## HELPFUL SUGGESTIONS

"Take care and ponder what you find below,  
For there are rules all housekeepers should know."

Bread should not be covered when taken from the oven,  
but should be turned from the tins, raised on one side and  
allowed to cool.

Dry left-over slices of bread and use in casserole dishes.

The best ingredients are always the cheapest in cooking.

When butter is too hard to cream easily, heat the bowl  
slightly instead of warming the butter.

When baking custards, set a small pan of water in the  
oven at the same time.

The colder the eggs the quicker they will froth. A pinch  
of salt helps.

To relieve a burn dip the burned part in vinegar.

Salt and vinegar will remove stains from discolored cups.

A grain of salt will often make cream whip.

A damp cloth dipped in salt will remove egg stains from  
silver.

Dampen clothes to be ironed with warm water.

Keep flowers fresh by adding a pinch of salt or soda  
to the water.

Use lard for greasing cooking pans.

Use pastry flour for cakes and bread flour for bread.

Lemons will keep for weeks if kept covered with water.

To take iron rust out of linen, rub with lemon juice, lay  
in sun for several hours, then wash.

To take out berry stains pour boiling water through the  
stained spots.
