DESCRIPTION:

Here's the link for the demo to *Level 101: A Video Game About Video Games* as it stands in July 2022. This is an unlisted link and is only shared here in ProQuest.

On the "About" or "Description" page, there should be more info about what's uploaded and what's currently created. I hope to continue using that page as a further record of the growth of the project moving forward, since it has space for changelogs.
