Regional Updates

West Region

The 2017 North American Golf Innovation Symposium was recently held in Vancouver, British Columbia. Learn how innovation and technology can improve the golfer experience while reducing critical resources.

[Read More](#)

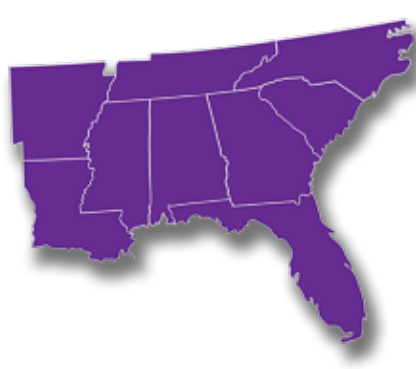

Northeast Region

Cold weather has temporarily put spring on hold, so turf growth and the development of pests will be difficult to predict. What does all this mean for golf courses throughout the Northeast Region?

[Read More](#)

Central Region

Weather patterns throughout the Central Region have been far from ordinary. But did the unusually warm February weather affect the ability to suppress *Poa annua* seedheads?

[Read More](#)

Southeast Region

There seems to be an increasing amount of products available in different combinations, with different names and from different companies. What are the advantages and disadvantages of this ongoing product evolution?

Fore The Golfer: Why Is Sand Applied To Putting Greens?

The effects of sand on putting green performance have been a topic of discussion since the days of Old Tom Morris. Although a common cause of frustration, here's why golf course superintendents so often apply sand to putting surfaces - these long-term benefits far outweigh any short-term inconvenience.

BMP Case Study: Naturalizing Areas To Reduce Inputs

When faced with operational budget cuts that reduced the size of the golf course maintenance staff, here's how the superintendent at Burlingame Country Club in Sapphire, N.C., worked with golfers to focus resources down the middle of the golf course.
