

USGA Recommendations for a Method of Putting Green Construction

The USGA Recommendations for a Method of Putting Green Construction – and the supplementary document, Building the USGA Green: Tips for Success - have been revised. Following a comprehensive review process, the USGA Recommendations have been refreshed to incorporate the latest research, testing procedures and construction techniques. Each revision ensures that the USGA Recommendations continue to provide superb performance around the world.

USGA Green Section Award Tim Hiers, CGCS, has been presented the 2018

Tim Hiers, CGCS, Awarded 2018

Green Section Award in recognition of his visionary leadership in sustainable golf course management. Hiers' efforts helped Collier's Reserve Country Club become the first Audubon International Sanctuary Golf Course. His dedication also helped Old Collier Golf Club become the first course designated an Audubon International Gold Signature Cooperative Sanctuary.

No Such Thing As Simple Whether they are new or old, putting greens are

very much different from many familiar turfgrass areas. Far more than just short grass, putting greens are a lot more complicated than they appear from the surface. As complex systems, putting greens rely on precisely engineered construction techniques, grasses that are specially developed for golf course use and specialized management practices.

Putting green construction is complicated. These

videos serve as a supplement to the USGA Recommendations for a Method of Putting Green Construction and Tips for Success documents. They highlight each of the integral construction stages, presenting successful strategies and critical aspects along the way. Whether viewed individually or in sequence, these videos are additional putting green construction tools.
