

## Regional Updates

### West Region

As overseeding nears, consider some advice from Dr. David Kopec. Knowing what to avoid when overseeding will result in a better spring transition and better playing conditions.

[Read More](#)

### Northeast Region

Summer weather extremes disrupted golf calendars, caused numerous turf issues and resulted in maintenance budgets being exceeded. But could it have been worse?

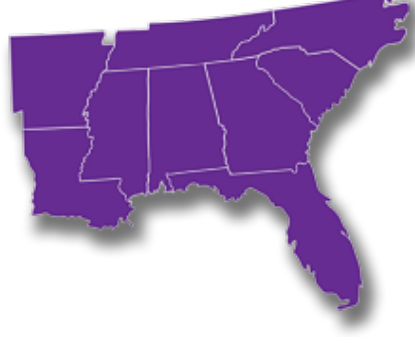

[Read More](#)

### Central Region

Is solid-tine aeration part of your maintenance plan? You may be able to save some time and cause less turf stress by topdressing before you aerate.

[Read More](#)

### Southeast Region

Problems with low sunlight intensity from prolonged cloud cover or shade? Here's what you can do to help your greens overcome these issues.

### Coming Up Next Issue

Bunker liners can improve playability while reducing maintenance. But choosing the right bunker liner is a complicated task. To guide you through the complex world of bunker liners, the October 5, 2018, issue of the *USGA Green Section Record* will highlight the differences between many popular bunker liners.

## Latest From Course Care

### Case Study

### New Practice Area Helps Manage Stormwater

Discover how NCR Country Club in Kettering, Ohio, managed increased stormwater runoff from neighboring developments by building a brand new practice area and a series of water holding ponds.

### USGA In The Field

### Small Steps, Big Improvements

Scarsdale Golf Club in Hartsdale, N.Y., was once referred to by A.W. Tillinghast as, "one of the toughest pieces of land devoted to golf purposes." Since 1964, superintendents at the course have worked with the USGA Green Section to tame the challenging landscape.

### Fore The Golfer

### What Is This Stuff?

The variety among golf courses is one of the most unique and enjoyable aspects of the game. Although every golf course has the same basic playing surfaces, these important differences make it impractical to directly compare turf conditions from one course to another.
