In Case You Missed It

Many superintendents once believed smooth and fast greens could only be achieved with walk mowers – but things are changing as triplex technology improves and the need for efficiency increases. In the April 2, 2021, issue of the *USGA Green Section Record*, we explained how courses are reaping the benefits of triplex use on greens, how to calculate the potential return on investment, and how to avoid common issues.

Coming Up Next Issue

Rough mowing is often the most time-consuming, costly task on golf courses. Concerns over rising maintenance costs and a desire to improve operational efficiency have many courses looking for ways to scale back how they maintain their rough. In the May 7, 2021, issue of *USGA Green Section Record*, we provide practical strategies to reduce inputs for low-use rough areas without significantly compromising playability.

Latest From Course Care

FORE THE GOLFER

Reflecting on Golf and the Environment

Golfers and everyone in the golf industry have a role to play in maintaining a healthy balance between golf and the environment. Embracing the perfectly imperfect nature of golf courses is one of the keys to success.
