

Triplex vs. Walk Mowing: Getting to the Bottom Line

By [Paul Jacobs](#)

FEATURED

It was not long ago that many superintendents believed smooth and fast putting greens could only be achieved with the use of walk mowers. Many thought triplex mowing was only for “low-budget” facilities – but things are changing. Staffing challenges and the need for operational efficiency have courses across the spectrum using triplexes regularly. Thanks to improvements in equipment and some modifications to mowing procedures, courses are reaping the benefits of triplex mowing on putting greens without any reduction in playing quality.

NORTHEAST

Is the Time Right for Preemergence Herbicides?

The transition to warmer weather always gets superintendents thinking about weed control. Although weed pressure seems like it has never been higher, applying earlier is not the answer.

SOUTHEAST

Spring Transition in the South

Extended periods of cold and wet winter weather can mean extra care is needed in spring. Monitoring greenup and scouting for pests will be important heading into another busy year.
