The following table shows the results of the regression analysis for the dependent variable *Y* (in thousands of dollars) against the independent variable *X* (in thousands of dollars). The regression equation is  $\hat{Y} = 1.2X + 0.5$ . The coefficient of determination is  $R^2 = 0.85$ . The standard error of the estimate is 0.3. The t-statistic for the slope coefficient is 12.5, and the p-value is 0.0001. The F-statistic is 156.25, and the p-value is 0.0001. The regression line is shown in the figure below.
