> CHAPTER XIV. LINWOOD TRANSFORMED.

Shirley had sighed for change. Well, she "You wanted change, did you?" she said to herself. "How do you like it, now you've

got it?" She laughed at Shirley Carstone, in her she laughed at shifty Carson, in her bitterness, flying homeword in the train that day. For two weeks she had been as happy as she thought it was given mortal torbe. And now! She said to her other self if there was a human being on earth who thought himself more wretched than she was,

she would be willing to change places with An old metaphysical question floated into her mind as she fied homeward still in that dull train. Whether is it better to know great happiness and at the same time take with it the fatal gift of susceptibility to intense suffering, or to Jog along moderately comfortable, without ever experiencing the

confortable, without ever experiencing the highest height of joy or the deepest depth of misery! In her stunned, broken mental state, Shirley debated the pros and cons of that old question half a day. Finally she said:

"It is better to know neither great joy nor C. TAYLOR, M.D. Office at residence on pleasure in the world, anyhow. The uninpressionable are the only happy. Thick

> In her blind misery little things the most absurd came into Shirley's mind. Col. Car-stone had disliked crying women excessively. Once in her father's lifetime she had seen her mother weeping. Her father had said smil

ingly:
"My dear, dry your tears. Crying women are an abnormal growth. They are the result of excessive emotional development in the sex since the days when man was monkey Think how many handkerchiefs have been worn out, how many bright eyes have been spoiled. Yes, think how many classic nose have been reddened through excessive emo-tional development. My dear, don't do it!" Her mamma dried her tears instantly. She was always slightly in awe of her strong, merry husband. But the matter seemed to strike Col Carstone somehow. He thought Her mother left the room

Presently, and then he said rather seriously:

"Shirley, don't you ever be one of the
sniveling kind. Be a rational, sensible human being. Rely on your brains for happiness, instead of on your emotions. Since the world for began, there have always been Byrons to tell was i the race that man's love is of man's life a part, 'tis woman's whole existence. Womer have been told this so often that they begin hearts, so as to display their superior emo-tional nature. It's rubbish, Shirley. Women take two-thirds of their unhappiness ther selves, through sentimental nonsense. It is not their fault, either, so much. The non-sense has been educated into them, and must be educated out. They must learn self control. The coming woman will repress her ab-normal emotional development, and put it back into its right place. Then women will no longer be more unliappy than men. Shirley, it would trouble me to the latest day of my life if I thought my daughter would be one of these uncontrolled, emotional

Shirley laughed. "Do I look like that, papa?" she said.
"No; thank God!" her father replied, fer-

In the depths of her grief, the most laughstile incidents she had known, the most comical stories she had heard, came up before her with perverse persistency, and mocked her in the darkness, and finally in watched her in the darkness, and finally in the daylight. They were gentine physical images; she saw them plainly with her waking eyes, in her right senses. She could have described the dress they wore, the color of their hair. The same images haunted her day after day. This one had the identical peculiarities of dress, that one grinned at her with the same way each time. No living creature knew of this storm of feeling that shook her because of "abnormal development of the emotional temperament," as she called it to herself, smiling grimly. But had not her father said—Take care of your mother, Shirley, take care of them all? There—was nobody to take care of the children, to have patience with her mother, absolutely nobody but Shirley. Here she was, and here she was to be tied to her country school, correcting the bad grammar of the children, listening afternately to the vulgar neighborhood clack and the pecyish complainings of her mother, putting her hands too to work, now with the needle, now in household labor and out in the grounds.

She had scarcely been in the village sin her return. But now she was struck with the sickly, greenish-yellow hue on the faces of persons she met. Surely, they did not look like that always. She neared the center of interest in the village, Simpkins' grocery. She saw something unusual had taken place. A

huddle of men, sparsely sprinkled with members of the weaker sex, were gathered there.

A look of gloom, of fear was in their faces.

An epidemic of fever had broken out in the village. The children and old people were dying. Some of Shirley's best pupils were down with it. Being so wholly taken up-with her own griefs, Shirley had not heard

For, something unusual, Deacon Durham was in the throng. Moreover he was talking, and that excitedly. He was in his shirt sleeves, his skeleton arms waving to and fr his thin, gray locks shaking with excitement as he talked. There was the gleam of fanati-

"The wrath of the Lord is upon Linwood,"

"This sickness is to Shirley heard him say. This sirkness is a judgment upon the people for their sins. The children walk in the ways of the ungodly. They go swimming in waters on the Sabbath day. The women are disolection to their husbands, setting themselves up on the leve of men. They attire themselves in gay apparel, not conducive to the glery of God, yea, wearing bonnets with flowers in them. "No, by thunder!" exclaimed Jim Sweet. Then Shirley got her doctor and her medicalled it to herself, smiling grimly. No living creature knew she had met Mr. Morrison again. And nobody found it out.

If her father had been living there would have been help for her. He was the one friend of her life who would have understood and sympathized with her, and helped her out of this chaos. But her father was lying in the Carstone graveyard up there on the hill, with the grass of six years above him!

There was no help for her. She must fight it out alone!

The Shirley got her doctor and her medicines and went home. The sickness raged in earnest. It took off Hughie Carter and Katy Tringle. Mis Simpkins was left a widow. The gossips said her husband vias just boo lazy to fight the fever, and so gave up and died. Pet Carstone was very ill. The pestilence at tacked old Mme. Frenchy, Mrs. Carstone's nurse. At last it fastened its grisly clatches upon that tough old Christian, Deacon Durham himself. It shook his ancient bones, it scorched his cold inwards. It rattled him soul and body. Plainly here was the wrath of the Lord kindled also against the righteous. It wasn't the fair thing, not the righteous. It wasn't the fair thing, not

There were weeping and deschalion and ter-ror in Linwood. Shirley worked night and day, tending the sick and beloing the well inall ways in her power. Three persons were a self-constituted committee of relief. They were the Presbyterian minister, the doctor and Shirley. After the first two the girl came next in authority, by virtue of being the teacher, partly, but especially by virtue of being Shirley. These three worked together with a will. The helpless, ganorant villagers instinctively looked to them to do their thinking for them and to aid them in their distrees. And the three had their hands

Shirley's sermon had sunk into the minds of one or two who heard it. After the pestilence abated the sermon returned afresh & then. They thought of it and talked. It was strange, but they had never noticed how unsightly the common-that camping ground of geese and

pigs—was before.
Once more the three lights of Linwood, the Presbyterian minister, the doctor and Shirley, laid their heads together. A Village Improvement Society, with a big, "I" and "S

The Presbyterian minister preached sermons about it from his pulpit. Shirles preached sermons about it in her school: How the birds made the landscape hemutiful, how they gladdened the earth with their songs how they were man's best friend in killing insects that destroyed the fruits and grain for his food, was dinned into all their minds. > CHAPTER XV THE SILK COLONY.

So at last, as always, though constantly remarkable fact there-working and thinking for others, calmness of home than anywhere else. soul came to Shirley Was her heart broken! Well there was

in the still.

It was her hard fate to be tied in this one little village. Linwood it was to be, for good or iii. She recognized her fate and made the best of it. At length she became more warmly interested than she could have behered in things about her.

The village purpovement scheme was only a part of her labors. From long habit of thought her mind still followed the old ideals of her unwritten poem. She found no calm:

holds and shook out the hidden specters in plain sight. Shirley perceived constantly a barrenness of the commonest small conforts, a lack even of articles of food that was pain-ful to her. It was the case alike among the overworked farm wives and the idle, gadding . village wives. Poverty she herself knew, she thought. But it was that independent pov-erty which has fertility of resource, the pov-erty which whets the edge of struggle and aspiration. From this kind of poverty every-thing that is worth having in the world has

small things which Shirley thought a civilized human being regarded as nocessities of life were to them unknown luxuries. In such a hard, stupid poverty as this, what

Could nothing be done to help them? The question haunted Shirley. Could they not somehow be put in the way of helping them. Selves! Verily there was little that they might even hope for. An untrained grown might even hope for. An untrained grown woman in a village can do nothing to get money. Although there was among them lack of so many of the small things that make life desirable, yea, absolute want now and then, these women had no lack of time on their hands. It was the habit of many of them, women and girls, to sit and gaze idly out the window, hour, after hour. A little spasmedic, intermittent effort flaished the small work they were obliged to do. For the rest, nothing. They had no knowledge of anything better and no incentive to action. That was all there was in life for them. They had even no appreciation that it was a sin to waste time so. Their idleness and poverty brought with it a poverty of soul that was most hopeless of all.

It was at this period that public attention was first being generally called to the beautiful and the second of the second

was first being generally called to the beautiful silk weaving industry in this country.
Shirtey herself had visited the mills, and been delighted as anylody must be with the exquisite fabries wrought there.

The workmen showed her the filmy, shining

threads from which the splendid fabrics were made.—These had all to be brought over seas, they told her. It was certain the mulberry tree could be reared here at home, and the silk cocoons produced. The production of raw silk was an industry scarcely less beautiful than that of weaving the threads, and remunerative too. It was not done in America simply because it was not done.

One day, thinking of the idle, yet poverty, stricken women she knew, Shirley happened to recall what she had heard in the silk mills. She put the two together.

Once more, processes are dull to outsiders.

Therefore again we skip them. There is enough dullness in this world, Loyd knows even after we get rid of all we can.

No, we will have only results, for the presented of the p

enough to keep it.

Linwood had heard temperance lectures since the time the noble red man gave up and surrendered to the white man. Yet here, right under their ness, was a temperance lecture worth more than all the rest. How odd they had never thought of it be-

forever.

It was in very truth Shirley who did all.

It was over again what George Morrison had read to her from the enchanted life of Joan of Are:
"Daughter of God, all things were under

Was it not so?

To accomplish worthy aims, three things are necessary: Unselfishness, singleness of purpose and eternal entimensum.

Shirley gave up her village school at length. Sha gave it into the hands or one of her best pupils. So from the master to Shirley, from Shirley to the favorite pupil, the school was handed down and kept running on worthily is the prise old was. handed down and keper more in the wise old ways.

Shirley had other work that was more remunerative, and that was forced on her also the first consideration. With all she

thing. Night never closed in on her and found her free from a care for the next day. She never had one week to rest.

She had now a modest yet solid distinction as a writer. The ideals in literature that she had set before her as peerless statues when she was 16, were locked away from human sight. Out of the fulness of the practical knowledge she had gained in her years of told and trial, she wrote naw. It was exactly this feature that made her work of especial value for everyday reading. People are glad to read that which helps them practically. But she wrote no more poetry.

Linwood had indeed changed since we knew it first. Now it had a railroad. Trains daily went thundering past the old stone house, till its very walls shook. Little regard have iron and steam for beauty in nature. They laugh to scorn sentimental memories. The old mill was palled down by the railway company. The iron tracks followed the bed of the picturesque mill race. They cut through the heart of the clump of graceful swaying will lows, the very willows mader which Shirley had sat while the master read to her the marred we carry of Lorn of Are had sat while the master read to her the mar-

had sat while the master read to her the mar-velous story of Joan of Arc.

Even so the iron had cut through the heart of Shirley's romance. Even so, (tod help us) the iron pierces the soul of us all, every one. And one fine morning Shirley waked and remembered she was 30 years old.

The brothers and sisters were nearly all men and women now. Alice, the youngest, was 14. Harry was 17. These two were executed to near to Shirley. They had hung

about her neck in their helpless babyhood, Fatherless, worse, than motherless, they had only this tall, strong sister to ching to.

only this tall, strong sister to cling to.

During these years so many minor incidents had happened in the Carstone family that it has not been possible to keep up with them all. It was well Shirley's worldly prospects had brightenest. As the children grew older the need of money to educate them, to start them in the, increased constantly. Shirley's worked and planned without coasing to meet the demand. It gave her steady pride and pleasure that she was able to do so frelief at thus receiving the

ANTICS OF AN APE.

Trying to Catch a Stray Monkey in

Paris A Question of Ownership. Poe's tragic tale of the murderous an ties of an ape in Paris has just found a comical counterpart. Oddly enough, both dramas were enacted in the same locality, that is to say, not far from the morgue. A bovy of newly enlisted conscripts, with painted pictures on their hats, were rossing the Point Neuf, arm in arm, keeping step to the music of the "Marsellaise," when suddenly they saw a small but nimble monkey leaping and bounding in front of them, making a zigzag course, from one side of the bridge to the other, frightened at the water on either hand, and too beaddled in mind to think of making a straight and swift escape to the end of the bridge, and thence to his home. The young conscripts, forgetting their country and its national actions are a superior of delight, brake song, gave a scream of delight, broke ranks and gave instant chase after the lively little beast. The raw recruits, undiciplined yet eager for action, performed proligies of valor in running against and knocking one another down, and whisk-ing off one another's picture covered hats but no one of the hunters caught the monkey. He dodged deftly between the collective legs of the whole battalion, and was as brisk in his thew departures as the Irishman's flea. Soon the melee, like a traveling gust of wind, was transferred from the bridge to the adjoining quai de la meggisserie. Here the numer-ous passers by, on seeing the fun, at once joined in it, adding to the baffled military force a fresh civil reserve. The spectacle was exhilarating. The crowd became dense, and exervised was soon stupidly looking down and around, here and there, expecting the monkey to be found

nere, expecting the manacy to be round under somebody's feet.

"Poor thing, he will probably be trampled to death," exclaimed some humane voices.

But this apprehension was soon put at

rest. A hundred merry throats suddealy burst into a ringing cheer. Had the monkey been caught? No! He was farther than ever sfrom such an ignominious fate—he had climbed a tree!

"Look at the little brute," said a stout

gentleman, who had a legal portfolio under his arm, thow he is grinning at us! showing contempt to the court and jury."
Two or three ragamuffins, veritable

grames then climbed the monkey's tree, as nimbly as if they had been their hands upon their Simian brother?

Not at all! He hopped from branch to branch, and, on being hotly pressed, made a final and splendid jump—better than anything done on the trapeze at the himselegons landing himself, safely on hippodrome -landing himself safely on the next tree. The gamins were badly laughed at. Nothing so ill succeeds as ill succeeds as Talleyrand might have observed. But the gamins were not to be disconcerted by a laugh nor outwitted by an ape. The young rogues attacked the next tree, and the next, until the monkey, having no more trees to leap into, skipped at last to the only remaining refuge, which was the top of a lamp post. On this low pinnacle of evident danger his chances of manifaming his liberty and life might have been small,

steady pride and pleasure that she was able to do so.

The children followed each his natural bent, no two of them affice. Percy, who had been so fond of studying the ways of birds and insects, developed into a naturalist. He was a slender, handsome youth, devoted to bis studies with enthusiasm.

The patches of weeds in front of the Linwood nes disappeared and their place was taken by brilliant patches of grass and flowering plants. Saplings from the woods were set out in the town, and in time these became noble avenues of trees. Shirley ransacked her brain and her father's books, and redisflowering trees.

The Improvement Society proclaimed loud her return. But now has struct with the sickly, greenish yellow hue on the faces of persons she met. Surely, they did not look like that always. She neared the center of interest in the village, Simpkins' grocery. She saw something unusual had taken place. They outgrew the spite, the narrow feminine jeal-ousies. They could no longer spend time from money getting to indulge in these pe-culiar little annusements.

There was another good result.

The town became a general center of interest. Foreigners visiting the country and tourists from half over the continent came there to see the women's silk colony. Whether they looked at the bandsome, tree embowered village itself, with fis clean, smooth streets and tasteful homes, the novel, successful industry that had contributed so greatly to its prosperity, or at the well fed, well dressed girls and children—everything they saw was girls and children-everything they saw was girls and enqueen—everytining tiney saw was interesting and pleading. In a control one another is picture covered hats, but no one of the hunters caught the monkey. He dodged deftly between the collective legs of the whole battalion, and was as brisk in his "new departures" as the Trishillan's fleas. Soon the melee, like a traveling gust of wind, was transferred from the bridge to the adjoining quai de la meggisserie. Here the numerons passers by, on seeing the fun, at once joined in it, adding to the baffled military force a fresh civil reserve. The spectacle was exhibitanting. The crowd became dense, and everybody was soon stupidly looking down and around, here and looking down and around, here and there, expecting the monkey to be found under somebody's feet.

"Poor thing, he will probably be trampled to death." exclaimed some

But this apprehension was soon put at rest. A hundred merry throats sud-dealy burst into a ringing cheer. Had the monkey been caught? No! He was farther than ever from such an igno-minious fate—he had climbed a tree!

Locking down the valley into the years that were to come, Shirley saw only brightness, Perplexities would come perhaps. Her hands would still be full of work, that she knew. Nay, as the world went, it, might be long before he could come and claim Her. She even thought of that. What them The master leved her. That knowledge would be a strange, sweet presence that walked beside a strange, succeptions to the find, turning hembeavy load into lightness. She laughed in the face of storm, of darkness, of the deadly lightning. The sweet, magic presence that walked evermore beside her would touch them and turn all her life into blue sky and rose cloud. And her poem? The intense girl heart gave a glad bound. Half her inspiration had seemed gono when the master left her under

She would prove herself worthy of such a lover. He should be so proud of her, in the Rapt in her sweet visions Shirley sat there hour after hour. Morning was at hand. The mysterious thrill of the coming day outvered in the dark air. A timid bird dairped faintly. The breath of lilies swept in at the open

the willows that day long ago. Now it came back. Now she would indeed write her poem.

Shirley started up, smiled and threw her Shirley started up, sained and infew misself upon her bed, dressed as she was. She lend spun her web of thought out for the time. In five minutes she was in the land of

Shirley was a sound sleeper. The fashion of "nervous" young lady was just coming in. Shirley was not of that kind. She had a clear conscience and a good digestion, beaven be praised!"

Therefore when a human shape tred cat-like over the low window sill and into the room, she did not waken.

The first knowledge Shirley had was an

awful consciousness that she was dying of suffocation. A great weight was upon her chest. Semething was pressed over her mouth and nestrils, stifting her, swift and deadly. She tried to breathe, she tried to cry but. In vain. She struggled. She was lapped from head to foot in some heavy covering that, made it impossible for her to use her hands or arms. She fought blindly a moment or two, and then gave over.

noment or two, and then gave over.

Death was almost there, she knew. The master, would be ever know how she died? In the last gleam of consciousness, a. Coolish tale of her childhood flashed through her memory. A cat had sat upon a child's breast, it was said, and drawn the breath from its postrils and so suffocated it. Was it a cat upon her brenst?

Then she remembered no more.

But just in the nick of time, the instant before it would have been too late forever, a hetore it would nave been too late invert, a man sprang in at the window. The man was Mr. Morrison. With giant strength hoseized the creature upon the bed and flung her off, it was a spensa, with waxy white face and wild, demoniac eyes. He snatched the pillow and a heavy covering from Shirley's senseless form. He lifted her, he fanned her with his hand; called her his Shirley, his durling, hi implored her to speak to him.

The wild woman flew at him like a pan-

with difficulty that even they could hold Shirley opened her eyes. The wild woman saw it, and made as if she would spring a her again. But the two keepers had got her into the strait jacket.

Mr. Terrison motioned them to be gone.

"Take that devil away," he said, "before I rush the life out of her!

The wikl woman snarled at him like a savage beast. The keepers forced her out through the doorway. As she went she gaya George Morrison a last look of helpless rage, and

muttered: outtered:
"I hate you! And you would marry me! Shirtey heard her say it. She lived over the horror of those few moments in her dreams, sometimes in after years, and would waken to find, herself standing upright,

waken to med hersen standing uprigues shricking frightfully, her brow wet with drops of cold perspiration. Sile had heard the wild woman mutter: "I hate you! And you could marry me!" The master stood still by the door with a deathly pale fa e. and blood dripping from his hand. A streak of blood coursed down his cheeks. Shirley turned her eyes on him. She was quite in her senses now.

"Who is that woman?" she said.
The concentrated gall and wormwood of all humanity was in his voice as he answered:

"She is my wife!"
Then a fearful silence followed. He broke it.

"Well, Shirley, you don't congratulate me on my wedded bliss?"
She gave him a terrible look.
"You have de cived me," she said.
"I have It is true I saved your life a moment ago, but that is nothing. I have let

you believe a falschood. And my name as not George Morrison. It'is Philip Dumoray. Perhaps you will be interested to know it."

The dare devil of his reckless youth was uppermost in him again now. He strode across and stopped beside her with his white, across and stopped beside her with his white, blood streaked face and wounded hand. He stood so close to her that the blood from his hand dropped and stained the above the stained the st

stood so take to be stood that he had dropped and stained the sleeve of her white dross. She shrank from him with horror. He went on.

"I have deceived you all along. I am a married man-hushand of the angelic creature who so nearly murdered you awhile

The master was the master no longer, not even of himself. A savage oath broke from his lips. Shirley could not speak. Sho beck-oned him feebly to go. He did not heed it,

but talked on:

"She almost killed me once, in the same They have had her in the mad house way. They have had her in the mad house, on the hill, for nine years. I come here once a year to see that she is well treated and wants for nothing. That is what I came here for now. Last night she got away. Nobody knew it till you saw her at the window. I gave the alarm and searched for her with two attendants all night after I left you. I was afraid she would do some deviltry. I never thought of-harm to you, though, good God!"
Then he broke into wild anger again.

Then he broke into wild anger again. Then he broke into wild anger again.

"Go, only go!" said Shirley, faintly.

"Well, I will. But I will come back again."

The rose she had worn in her hair lay upon
the floor, crushed and trampled. He steeped
and picked it up and carried it away with him.

Was not that a morning for them both,
after such an evening!

Shirley had only one thought to get away. and that quickly and forever. A mad desire to fly to the uttermost parts of the earth, where she would see nobody she ever knew; above all, where Philip Dumoray would never find her again. That was the only wish she was conscious of:

The work which she had come to do was done. The stir and bustle of the morning was on now. All about her she heard it. A train left early which would take her home She was weak and trembling, so that ward. She was walk and triming as the could scarcely rise, yet she hurried her preparations. She was in feverish haste to be gone. She had been so happy in that cottage, happier than ever in her life before But now it was hateful to her. Only let her

"So be it then," he replied. He had hoped—the Lord knews what he had hoped. It was true all was over now, all the pos ties he had dreamed of in that brief, mad hour of the night, before. Was that a cen-

tury ago, in some other state of existence?

There was nothing for them now. But if Shirley only knew his history, only could understand how he had struggled against fate, she might be not so hard. There might be a little less suffering for them both. If he could have her alone, and tell her, she would be gentler. Nay he might even hope to be forgiven at last. But she had willed it that
