Judge Gaynor, of the New York supreme court, on application of Joseph Loader, a Brooklyn merchant, for a mandamus to compet the Brooklyn Heights railroad to operate its cars in sufficient-numbers to accommodate the traveling public, has rendered a decision that the company must-run their cars. On the direct point at issue the judge says: "If they other railway company) cannot get labor to man and run their cars at what they offer to pay, then they must pay more, and as much as is necessary to get it. Likewise, if the conditions in respect to hours or otherwise which they impose repel labor, they must adopt more lenient or just conditions. They must not stop their cars for one hour, much less one week or one year, thereby to beat or week or one year thereby to beat or coerce the price or conditions of labor down to the price and conditions they offer. For them to do so would be a defiance of law and of government, which, becoming general, would ingevitably by the force of example lead to general disquiet, to the disintegration of the social order and even the downfall of government itself."

TOO MUCH WORK

For a Healthy Existence-That's Why the Kidneys so Often Fail. (From the Detroit News.)
