THE ELECTRIC LAMP.

ories of Hotel Men Who Manage to Have Lots of Fun thut of It.

Several hotel men were standing in group in an uptown hotel recently hatting. The conversation turned upon the eccentricities of guests. The any odd ways in which different peo ple handle electric lights came up, and one hotel man said: "Nearly every one now knows how

the incandescent lamp is operated, but still we meet with some funny in-stances of ignorance. Last week we nearly had our hotel set on fire on account of a piece of stupidity on the part of a guest. The building being fire-proof alone prevented a conflagra-A woman came to the house who was in the habit of sleeping with a dim. light in her room, and the electric lamp bothered her. She either had to let it burn brightly, or else turn it off altogether. Finally she hit upon the idea of wrapping a towel around it. Then she began to question whether the towel would catch fire. Then she adopted the happy expedient of wetting the towel. That was the worst thing that she could do. She soo dropped asleep, and of course the towel dropped on the curtains, and soon the whole room was afire. She was badly scared and, of course, the contents of "That was odd," said another one

of the party, "but the strangest thing "Good heaven!" moaned Mr. Rasp- I have heard of was the case of a farmer who came into St. Louis. He went sed. He tried for an hour to put it out, and then sent for a call-boy. The guest explained his dilemma, and the boy promptly stepped up to the lamp and turned the button. There was a moment of silence, and then from the place where the farmer stood there came a flash and report, and a bullet buried itself in the wall, narrowly missing the boy. Again and again th pistol was heard until every chamber was empty. Fortunately the boy escaped and the police entered the room and placed the farmer under arrest The old fellow was talking incoherently and seemed mad clear through When he was finally quieted down he gave his reason for shooting. He said that he had been trying to put out a new-fangled sort of a light and had not been able to do it. Then he called a boy, who blew it out. Just after the light went out he heard a click, and knew that someone had cocked a revolver He at once thought he was about to be murdered and robbed, and did not wait but began shooting at once. When told of his mistake he was much chagrined and apologized most humbly."

This story brought forth another one from a member of the part, who had not yet spoken. He said:

"When we put electric lights in our hotel we placed them so that they could be moved to any part of the room plenty of wire being allowed for that purpose. One night a man came to the house who was unfamiliar with the light, and could not find the way to put it out. Evidently he did not wish to show his ignorance, and as he could not sleep with the light burning, he "Then you—you knew;" gasped Mr. cast about for some way to get rid of Raspberry. "Oh, Adelaide, tell me you—it. Finally he drew the bureau up alongside the lamp. Then he took the globe and placed it in one of the bureau drawers, and closed the drawer tightly. The result was the light was practically put out. The chambermaid found it there in the morning, and it was still burning brightly. He admitted his ignorance then, and we showed him how the machine worked."

(From the Battle Creek Moon.)
Our representative called at 26 Battle
Creek Avenue, the residence of S I. Robbins, and in an interview with him brought out the following facts: Mr Robbins tells of his wife's experience in a manner that carries conviction with his words. He says. "I am sorry my wife is not at home this P. M., but no one knows better than I how she has suffered during past years. For twenty years she has been efficient. For twenty years she has been afflicted with the various forms of kidney com plaint and an enlargement of the liver. She was often confined to her bed for more than two weeks at a time suffering untold agony. She has doctored constantly, and I have paid out in doctors' bills for her I have paid out in doctors Dies for nea-alone as much as \$300.00, and then her re-lief was only such that she would be able to be ground for a spell. Some time ago to be around for a spell. Some time ago she felt the symptoms of another attack coming on, such as a pain in through the kidneys and back. I hardly know what induced me to get a box of Doan's Kidney Pills, instead of sending for the family physician; however, I got some and she commenced their use. It was a surprise to us both to see their action; the attack was warded off, and she continued taking them with marked improvement such desired. was warded off, and she continued taking them with marked improvement each day of their use.
