LITTLE KNOWN FACTS

What Do You Pay For Coffee That's a practical question! Are you paying too much? If you're paying a high price, you're probably paying as much for a name as for the coffee. Arbuckles Coffee is a plain, substantial coffee with an excellent aroma and delicate flavor, sold in a substantial way at an honest price. You don't want better than good coffee, do you? You can't afford to pay twice the price that's necessary, can you? Then why not get Arbuckles'? Get right down to the coffee question and settle it now. By buying many millions of pounds we buy the best of many large plantations at a low price. We sell it to you at a low price because we would rather sell millions of pounds at a low profit than a thousand pounds at a big profit. Arbuckles Roasted Coffee is the daily beverage on millions of tables. Why not on yours? There's an additional consideration in the many substantial and useful articles that go with the coffee. Ask your grocer for it. He'll tell you all about it. If he endeavors to substitute an imitation, insist on getting the genuine Arbuckles'-or go elsewhere. ARBUCKLE BROS., New York City, N. Y.

Diomede was a painter. He belonged to the impressionist school. True, the word "school" is an insult to an impressionist. Mr. Vanderguld shook his head "In my gallery, my dear sir, in which Europe's most famous artists are represented, there is not a picture that has stood me less than 15,000 francs.

Mr. Vanderguid took out his cheel ook and gave M. Diomede the amount. Then he stuck his visiting card into the frame of each of the five pictures as evidence of his having purchased them. He directed the art-dealer to adjust the figures on the price-list tacked on at the lower part of each frame and to leave the pictures on exhibition for another week, after which he would take them with him to the New World.

AGE PENSIONS OLD

ENGLAND.

It is Proposed to Give from Seven to Ten Shillings a Week to Every Man Year.

It is beginning to appear that there s every reason why the United States hould keep an eye on the really momentous agitation in England over old-age pensions. It is rather startling, when you come to think of it, this idea of granting a pension to almost everybody 65 years old who wants it. And yet, stated on its broadest lines, that is what the British government seems committed to tackle at he next session of parliament. If the powerful agitation for this plunge into state socialism succeeds in England, it will be a question of only a little time before those who would be benefited

that labor here is better naid and that pauperism is not proportionately so extensive in accordance with the laws of human nature, an old-age pen sion will seem to prospective recipients none the less desirable because it is less needed, especially if some one else pays the bill. Every argument now being urged in behalf of old-age pen-sions in England naturally applies in mas celebration in 1900, which will be kind, though usually not in degree, to begun with the ringing of the "Peace" the United States, and if the protests of many British statesmen against the expected that this will be the most principle of the thing prove powerless against the united voices of British labor, the implication is, to put it mild well to keep an eye on the progress

I am always at a loss to understand why the colossal incomes should not be taxed at a higher rate than, say, the average net incom of the upper classes. It is fitting that surplus and extravagance should be more heavily taxed than ordinary and legitimate expenditure.

La Porté, Texas, is now attracting the attention of the business men of the United States and during 1990 great interest will be manifested in it.
