The staley Trial.

The jury disagreed in the damage suit for \$10,000 brought against Supt. V. M. Staley, of Coldwater, by the mother of Philip Miller, who claimed that the boy's death resulted from a whipping administered in school by Staley. The jury was out about 16 hours and at the end six were for a verdict of "no cause for action" and six for damages in varying amounts. The closing arguments of the lawyers were forcible. Attorney Palmer, in scathing words, reviewed the testimony and declared that a small how whom his teacher reported to Supt. Staley as a good boy and one who The Staley Trial. They manage to get rid of the luncheon and most of the bait but when their wives look into their fish pails when they get home, then the look of disappointment equals that of our neighbor across the way, Dr. Conklin, who has just returned from an eastern trip. When in Boston he visited the navy yard and saw some jelly fish swimming about. They looked pretty and were so different from anything we have here. The doctor admired them and concluded that he would like to bring one home with him to show his friends. One was caught for him and he put it in a can with specially prepared water, but when he arrived home and opened the can, he was astonished to find the fish had vanished; nothing was left save a slight sediment in the water.

### Norvell Farmers' Club.

About 40 persons were in attendance at the meeting with James Hay and Miss Eda Hay at Evergreen Home on Saturday. June 24

The exercises opened with prayer by communication from the Michigan Forestry Association. An invitation from Mr. & Mrs. M. W. Hess and Mr. & Mrs. H. Howland to meet with the Columbia farmers club at the home of Mr. Hess on Saturday, July 8, was accepted.

Mrs. Z. T. Kimble read a selection and E. E. Furgason spoke on current events. Some discussion arose on the automo bile law which was thought to be as good law as we could expect. Mr. Watkins said that trouble would come from reckless, haif drunk drivers of autos owned in other states.

T. B. Halladay thought that the law requiring a license of all peddlers had caught us trapping. It will result in the office. Call or send stamps for samples. stopping of nearly all meat wagons and the wagons sent out by some of the stores, both of which are a great convenience to many of us. The law was thought-to-have been justigated by the saloon men.

The meaning of the topic "Art vs Science in Cooking." was elucidated by the secretary whereupon Mrs. L. Whitney Watkins said she would know it was a man who was talking; that our cooking is not guess work, our measures are exact, our cupeful are a half pint, our spoonsful a definite quantity, our ovens many of them provided with themome-

Mrs. J. G. Palmer defined science as positive, systematized knowledge; art, its practical application, science and skill are both necessary to success, practice makes perfect.

Mrs. L. D. Watkins thought that while exact rules are good, conditions vary so much that common sense is needed in their application. There are many details, milk varies in sourness, flour in strength, groceries are not always alike

Mrs. R. D. Palmer spoke of difference in fuel.

W. E. Pease was asked to introduce the topic. " Do we want a parcels post?" He thought the charges would be so high we should make little use of it and that it was not best to increase the burdens of the postoffice department until rura; free delivery was fully established.

L. D. Watkins said that the parcels post in Europe was very largely used and a great convenience. If we want a small piece for a machine or other article sent down from Jackson it will cost 30 cents for express charges. In England\_it would cost one penny for postage. It is abourd that it should cost more for a package welghing one pound than the first class passenger fare. The express Charlotte, the past winter and spring, companies are the greatest opponents of a parcels poet system,

T. B. Halladay favors and believes we ought to have a parcels post system. It would be a great convenience, afford us their household effects and shipping many things now out of our reach and we ought to have it even though it should increase the annual deficit in the postal department. We can make it up

> A. R. Palmer and that we alread have a parcels post but only four pounds can be sent in one package and the postage on it would be 64 cents.

In England the postage is six cents for one pound and two cents for each added pound up to 10 cents. Parcels three feet long and three feet around may be sent. More than 75,000,000 parcels were perience free. This ! mailed in the year ending March 1, 1900, Germany parcels may be sent 10 miles for three fifths of a cent a pound and anywhere in the kingdom for one and one fifth cents. In France 11 pounds may be sent for 16 cents.

What we want is the chance to send much larger packages at a much lower rate, say one and a half to two cents a Mr. & Mrs. Frank Mahrle of Detroit pound. It would injure the business of of our small retail stores but on the whole would be a benefit to the country. C. P. Holmes told of sending to a distant factory for a small casting, the postage on which was 12 cents. To have had the same piece sent down from

### A REUNION

Of the Old First Michigan at Detroit

The old First Michigan Volunteen lesign to hold its annual reunion on the anniversary of the battle of Gaines Mills, which was fought on Friday, June 27th, 1862, one of the severest of the seven days' fight. By request of Comrade Marvin Preston, the reunion was held this year in Detroit on Thursday the 27th. We met a goodly number of our comrades from all parts of the U. S. who had never before met with us and had not seen each other since we stood side by side in the preservation of our country.

The meeting was called to order by our president, the noble Marvin Preston of Detroit. Orders were read and other business transacted, then the president asked : "Who is going to be our next president?" The cry went up all over the hall, Miller. John Miller," and they cried "-Miller" until the president requested them to save' their voices for the Russel house that night. Of couse Comrade Miller was pleased, but he got up and in a few words told his comrades how impossible it would be for him to do the work that the president would have to do and that he would rather have Comrade T. F. Rushton as our next president. So the officers were elected as follows :

President-T. F. Rushton, Manchester 1st Vice Pres.—Henry Fiegel, Saginaw 2d Vice Pres.—Rev. C. W. Carrick, West Branch

Chaplain-John A. Miller, Manches

By unanimous choice Manchester we choren as the place for bolding the

reunion next year. An old fashioned campfire talk followed which was enjoyed, as many interesting events were related, some of which

were sad and some very funny. A poem, "The Bugle Call," was has been seen behind the counter at the recited after which the retiring president peoples bank, the past year or two, and invited us to a banquet at the Russell manager of the Manchester-Chelses auto- large dining room was neatly decorated bus line has gone to Traverse City to and the names of the battles in which nanage a line that runs to Old Mission. the regiment was engaged and the names Farmers who have prepared to spend of all the colonels of the regiment were

Lee McCollister, Col. Oscar Janes and others who spoke in elequent and impressive language of the war and those

who fought the battles. The old battle songs and others were sung and everything done to make us feel as Major Codd said, that it was an honor to the city to have us meet there. We would like to mention some of the

speeches if space permitted. The second day we were given a troily car ride about the city for three hours In the afternoon we went to Star Island on the steamer City of Toledo, where we had a grand fish supper.

Before boarding the Tashmoo for our return to the city we presented President Maryin Preston, Secretary Geo. Hopper each with fine capes. Capt Charles Manley and Thomas Edwards made the

Arriving at the city we bid each other good bye, hoping to see all at Manchester next year, yet knowing full well that ere that time some will have fought their last battle in life and some to their reward in the land where strife, bloodshed

and sorrow is unknown.

As it is settled that the next reunion of the glorious old first Michigan is to be held in Manchester, our citizens are expected to entertain them. One of the companies of that regiment went from Manchester and the ENTERPRISE is sure that our citizens and those of the surissed are able to get out of rounding townships, will be glad to welcome the few surviving comrades and they can make close connections with their ladies and give them the best the land affords.

## RUSSIA MUST MAKE PEACE

Outbreak at-Home Forces Government to Accept Whatever Terms Japan May Offer

Writing from Washington on the recent momentous events in Russia, John Callan O'Laughlin, the veteran

newspaper correspondent, says:
No longer can the Russian government hold out against the inevitable. The revolutionary outbreak on the ships of the Black sea fleet makes immediate peace with Japan, whatever her terms, a moral certainty.

This is the opinion of diplomats who know, Russia's situation. They said today the czar must accept the Japanese conditions without delay in order to be free to deal with the terrible internecine war which has begun, and they look for greater expedition by the St. Petersburg authorities in naming peace plenipotentiaries and in giving them instructions which will lead to a cessation of hostilities.

Japan, on her part, is anxious that a treaty shall be signed, so as to end the state of war; and this will not be possible should the autocracy be overthrown and a state of anarchy reign in the immense empire of the Slavs. Minister Takahira, representative of Japan, deemed the developments at Odessa, of such importance as to warrant inquiries, and he discussed the situation to day with Secretary Taft.

Washington has been surcharged with sensational rumors in regard to the developments in Russia's internal situation. It has been said that the American consul at Odessa had cabled for warships; that all the powers were on the point of asking President Roosevelt to send men of war to the that all the warships of the Black sea feet had hoisted the red flag in place of the imperial Russian standard, and that most of the artillery of the Rusregister of the Russian navy giving the names of the officers on duty with the Black sea fleet. All that is known is that the best officers were de tached last fall and ordered to duty in connection with the Baltic squad ron, then fitting out for duty under Vice Admiral Rojestvensky.

When Vice Admiral Chouknin as sumed command of the Black sea fleet he made an inspection. The repor which he transmitted to the admiralty described a deplorable state of affairs. The ships were dirty, the men badly trained, and there was a grave lack of discipline.

His report created a sensation in St. Petersburg, as Vice Admiral Skrydloff, who was detached from duty in con nection with the Black sea fleet for service at Vladivostok, had had the record of being a good officer. But Vice Admiral Skrydloff certainly in his later years had devoted more of his time to pleasure than to duty, and the fleet suffered as a result.

Vice Admiral Chouknin at once re ceived orders to reorganize the fleet and put it in an effective condition. He attempted to impose the strictest discipline, and he created dissatisfaction among the men and among the officers as well.

This is an explanation based upon official information which was made nere of the reason why eight officers

Count Cassini, the Russian ambassa dor, expressed confidence that his government would be able to suppress

The navy department has no late, state of disaffection, and no surprise would be expressed should the regiments of this arm of the military service join the revolution.

The situation is so bad that no one here cares to predict what will hap-It is suggested that the czar may try to stem the tide of discontent by making radical reforms without further delay. The trouble is that people have so often been told that they will be given greater participation in the government and so often deceived that they will now hesitate. it is said, to stop their revolutionary work until they have realized the hopes which have been inciting them to the use of force.

The czar is handicapped by the absence of a strong man from his gov-ernment. One official said there is a dead level of mediocrity in the bureauin that of diplomats here, if there is a man who can save autocratic Russia, that man is Sergius De Witte, exmore thoughtful men in St. Petersburg have urgently recommended that he be made chancellor of the empire. The ezar has refused to adopt this advice because of his detestation of this, becomes almost appalling in the vast man of the people

Nor has De Witte attempted to admaining silent. He has sharply criticised the emperor and the bureaucracy, and has predicted that if the of the Kniaz Potemkin joined the methods of government were not mutinous crew. methods a revolution would occur. It can be appreciated that the emperor has had no desire to subordinate him-unto itself, and alters not the law to self to one whom he regards as a bit-suit the convenience of any one, howthe mutiny. He called attention to ter enemy, But that he will have to

THE MONTHLY TRIAL

HEADACHE, DIZZINESS, BEARING-DOWN PAINS.

A Woman Tells How She Has Become Well and Strong after Years of Misery Due to Irregular Functions.

The fact that one woman is brighteyed, rosy-checked, strong and cheerful, while another is pale, weak and depressed, is due more often than otherwise to the regularity in the one case and the irregularity in functions that are peculiar to the sex. When these are disturbed everything goes wrong; pain and discomfort are felt all over the body; the sensations are

often terrifying.
"For four years." said Mrs. Davis recently, "I suffered indescribable misery from sick headache every month companied by fainting spells, shortness of breath and severe pain in my left side. There were also bearing-down pains, at times so acute that I could not stand up. and my head was full of ringing sounds. t seemed as if everything was going to hit me in the eyes. I was compelled to lie down with closed eyes for hours to get a little relief. When I attempted to arise everything would whirl around and it would grow so dark that I could scarcely see any object."

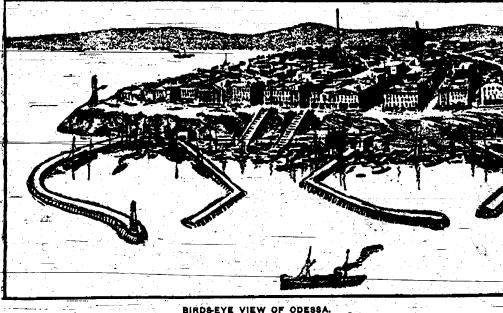

"Couldn't your doctor help you?" "Five doctors in all treated me, but I got no lasting benefit. Besides I used a lot of advertised remedies. The only medicine, however, that had the de-sired effect was Dr. Williams' Pink Pills and they are truly a godsend to women. I did not have much faith in them when I began to take them. I found myself, owever, so much better after using two boxes that I began to believe in them. They checked right away the decline into which I was going. My troubles kept lessening and finally disapport

"How long did it take for a cure?" "After I had used several boxes my nealth was all right. I had taken an flesh and was strong and hearty. I feel oday in spirits more like a girl of sixteen than a woman of my years."

### A Lower's Letter

O long are the leagues of division:
'Twixt' me and the dream of my heart!
And fate, as in wintry derision,
Persistently holds us apart.
I could breathe my devetion far better
Inspired by her presence, I know;
Alas, I must tell her by letter!
How-how should it go?

Shall I call her "my friend?" That sounds No ice (except ices) for me! Shall I greet her as "sweet?" That seems

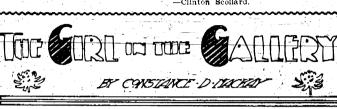

silly.

Although she's as sweet as can be.
Shall I mention a goddess—say Venus,
Or'one of her mythical crew?
Well, somehow I fancy (between us)
That hardly would do!

Shall I delve into botany's pages
And quote from the language of flowers
Shall I cull from the love of the sages
"Bright gems of expression" for hours?
Love-lines from a bard, perhaps Swinburns burne, In Gelicate hand shall I frame, To indicate how I within burn With passionate flame?

Shall I study the stars in their courses?
Shall I brood on the moon from the

sien?
Shall I ponder the ethical forces.
For tropes that are fitting to pen?
Dear heart, naught about nor above you is fair as you whom I adore.
So I'll just write—I love you! I love you!
Be Mine—and no more.

# Constipated All His Life

Wilbert Thompson never knew a well day he had been constipated all his life many doctors treated him, but all feiled to even help himhis health failed rapidly and on January 21, 1903, Mrs. Thompson asked us to suggest a treatment for her husband. We thought the case too serious and recommended that a specialist be consulted - but he also failed to help the patient - NOW HE IS WELL.

MULL'S GRAPE TONIC CURED HIM.

## Mull's Grape Tonic Cured Him

Mrs. Thompson first wrote us as follows: "My husband, aged 23, suffers from sharp pains in his stomash and sometimes thinks it is his heart. Let me know by return mail what causes the pain, if you can. Ma. Thompson has been treated by several doctors, but they have given him up."

We promptly advised that a first-class specialist be consulted. We quote: "We want to sell Mull's Grape Tonic, because we know it will cure constipation, but 50c, a bottle is no object to us when a human life is at stake, and if your husband's case is as serious as you state, we suggest you consult a reliable speciales, set the advertising kind, promptly." At the same time, knowing that Mull's Grape Tonic could do no harm, we advised its sentil a physician could-be consulted. January 25th, Mrs. Thompson whole that a physician had been conflicted. He diagnosed the case as being chronic constipation and dyspepsia. His treatment was followed faithfully, but there was no perceptible improvement in Mr. Thompson's health. Then he began taking Mull's Grape Tonic and on September 3, 1905, we received the following letter from Mrs. Thompson:
