HART SUFFERS FROM BURGLARY AND A VERY SERIOUS FIRE. ALL BY ONE MAN.

#### The Rollers Crowd.

The long-haired Flying Rollers of the House of David are becoming so numerous in Benton Harbor and are tranching one with such alarming ranklity that the inhabitants of the civy are beginning to fear that they may in a few years be driven from their cwn city, or else ruled over by these strange people.

These children of Israel believe that only themselves will remain on earth when the final trumper blows, and that all those of other faiths will be buried for 1,000 years, after which they will arise. They say that 50,000 of their faith will soon be gathered and that Benton Harbor is the chosen place of he Lord in which they are to congre

All the money goes into a common treasury, and the supply seems to be inexhaustible, new converts are continually coming in and it will be necessary to have sev eral new buildings before spring, as the large structures now used are ov-ercrowded.

#### Flood Milis Burned.

Hart village was again visited by a lone highwayman, who operated in regular Jesse James style, just before regular Jesse James style, just before chapbroak Tucsday. Ex-Senator James. K. Flood's sawmill was set on fire and a few minutes later the Pere Marquette depot was entered; the cash drawer rifled of \$15 and a penny gum machine was shattered to bits. The highwayman then galloned away and highwayman then galloped away and was seen by a farmer at 6.0 clock rid-ing furiously toward Mears, urging his horse to the limit.

At the Flood mills flames were dis-

The government professes confidence that he whole attempt will fail, owing to the woeful insufficiency of arms in pos-session of the proletariat and by rea-son of the loyalty of the army as a whole; but its calculations might again be rudely upset. A few arsonals might be seized to furnish arms or the open support of a few regiments might start a landslide in the army. Certainly the shrewdest of the revolutionary leaders fully appreciate that the issue must be decided by the attitude of the

army, which is yet to cast the die.

The past week several such cases were found where the children were suffering hunger while mothers were too ill to work.

Last fall a dozen arrests were made for desertion of children. The fathers were in several cases released on their promises to go to work, and in some instances the officials, at the instance of Judge Shepard, secured jobs for the men. After a brief period of liberty, however, most of them left. It is also noticeable that there is no

The fair brunctte, she of dark hair and eyes of blue, blue gray, or violet, must use discretion in choosing her colors. No strong, vivid tints for her -nothing, in fact, that will destroy the delicate tints of her skin. This does not mean that neutral fones should be selected, but that delicate shades of the chosen colors should be adopted. For instance, delicate yellow will suit her better than bright orange, and ivory better than deep cream. Gray, from dove color to pepper and salt, will become her, and so will golden brown, golden tans, navy blue, pale coral, and pale salmon pink, maize, lemon, and silver blue.

Now It's the Empire.

The empire style is a good deal to the fore in lingeries just now. It is especially noticeable in night gowns, many of which have the characteristic Empire feature, which may be called with equal variety the long yoke or the short waist. It is much used in the finest grade of night robes, and in fact, in the daintiest of all lingerie. Frequently the short waist or yoke is entirely of lace or embroidery. He went willingly, but two days later he sneaked into camp and took up his quarters with his old mess. There never had been a Tim pany. Every man was accounted for. Not a single man in the regiment had ever seen Tim Jones. Then it was relost identity through the influence of apple jack. It was a great joke in the company. Spanish War Veterans. The story is told how Col. Roosevelt became an active member of the organization of the Spanish war. When first asked to connect himself with the association, it is said, he declined to do so until all the various organizations of the soldiers of the war with Spain had combined in one

Friendship in Hour of Death.

After a skirmish between Hood's men and the Federal cavalry, a Louisianian discovered a wounded Federal soldier by the roadside. He immediately dismounted and spoke kindly to the poor fellow, who begged for water, which was given him. He then asked the Louisianian if he could pray for him and the latter was forced to acknowledge his inability to do so. Just then one of the Virginia trooppeated his request with great earnesttwo of consolation and then knelt beside him and prayed earnestly and fervently for the dying man, who soon lost all traces of suffering and in his new born love for his enemy, attempted to encircle his neck with his arm, but only reached the shoulder. riveted on the face of the praying trooper, he drank in the words of hope and consolation, "as the parched earth doth the rain," and when the solemn Amen died on the lips of the hand relaxed its hold and fell to the ground, and his spirit took its flight

to unknown realms. Such scenes were not uncommon in the South during the war. On my return to my Northern home before the close of the war I was greatly surprised to hear the expression of hatred and bitterness toward the South from those, who in my youth I had learned to revere as godly men and exemplary Christians. Oldest Woman on Pension Books.

Mrs. Catherine Hallock, who is believed to be the oldest of the women brated her 100th birthday at Galesburg, Mich., a few days ago. When recently the widows of two veterans of the War of 1812 died at the advanced ages of 102 and 104 years, respectively, it left Mrs. Hallock the oldest woman on the books of the Pension Bureau at Washington. She was seven years old when the war with Great Britain called out the American army and navy, and she distinctly recollects the various battles by land and sea that marked the war. Hallock fought through the entire time of the turnmoil and returned to the New England village where he had been taised, with small honors and deep scars. But he was the hero of the town, and while the little girl was growing to womanhood she came to look upon him with awe, mingled with admiration. Then when she was about twenty years old Hallock, who had never married, asked for her hand, and they were married with all the accompaniments of good old New England cheer that is still dear to the hearts of the sons of the Pilgrims. - Latterly the Hallocks moved to the West and finally they made their home in Galesburg. PROSPECTOR LEADS THE WAY: WITH THE HUMORISTS ENVIED STORY TELLER'S GIFT. CLERGYMAN ACCEPTED THE FEC.

Bears Rightful Title as Piencer of the SOME BRIGHT THOUGHTS AND West.

The prospector is the real pioneer. of the West; he blazed the trail for the railroad, for the merchant, the capitalist and the professional man; to him belongs the honor of the present condition of the mining industry. The prospector has made it possible for the making of the great fortunes of Haggin, Fair, Flood, Hearst, Daly and Clark. Where would the Comstock, Butte, Coeur d'Alene and other notable camps be, had it not been for the prospector and his burro? The life of the prospector is not a round of pleasure; he sleeps in the snow and rain as often as not; his fare is bacon and beans: dollars are few with him, yet he may be hunting for a new location for you to go to. When he asks you for a grub stake, help him out; his burro found the Bunker Hill and Sullivan; his rifle killed the mountain sheep that found and exposed the rich ores of the Ram's Horn mine: Comstock, the man who found the vein named after him, died a poor man, but he did more for his country than Prestdent Roosevelt has. Marcus Daly came to Butte with his blankets on his back, but he did more for Montana than John D. Rockefeller; W. A. Clark drove a bull team into Montana; placer mined in Deer Lodge and made a fortune, which he earned by hardships endured which the average Butte citizen would not care to go through. MODERN CHAPTER OF ROMANCE. Tale of a Willing Juliet But Unrespon-

sive Romeo. Juliet was the ideal age, about 14. She wore a red coat that fust came down to her boot tops and she had on a big black hat that partly shadowed her strikingly pretty face. She had just come out of Sunday school with companion who was too young to figure as the Nurse, by comparison, yet was old enough to sympathize with the commotion that was raging

Side by side the two girls walked slowly up the cross street and then, as if they were measuring their steps, they turned about and returned to the corner. When they reached a point where Juliet could see a young man who was standing half way down the block talking to a group of his friends, she cast a demure glance in his direction-but quite as though she were looking miles beyond him-and then turned about and retraced her steps up the side street. Slowly she ed up and slowly she walked back again.

Just as she reached the corner-it was beautifully timed-Romeo crossed her path. Romeo was at the stage in his youth when he probably would re-"There's ghosts in this room," said fer to the maid as "a little giri." eye is already considerable larger the Billyille man, as the pillow be than the right, it is brighter and it Subsequent verses relate the defeat lasts longer. Gilbert and others who followed him had adopted the term "electrica" to denote substances which, like amber, became attractive when rubbed: but they had used no name for the unseen itself. The first occurrence of the substanive in English (or, for that matter, in any language) occurs on page 79 of the "Pseudodoxia Epidemica" (1646) in the following passage: "Glasse attracts but weakely though clears, some slick stones and thick glasses indifferently; Arsenic not at all; Saltes generally but weakely, as Sal Gemma, Alum and also Talke; nor very discoverably by any friction; but if gently warmed at the fire and wiped with a dry cloth, they will better discover their Electricities." At six-ten the runner whistled to show he had steam up. I told one of the brakemen to stay behind and then went into 218. Mr. Cullen was still dressing, but I expressed my regrets through the door that I could not go with his party to the Grand Canon, told him that all the stage arrangements had been completed, and prom ised to join him there in case my luck was good. Then I saw Frederic for a moment, to see how he was (for I had nearly forgotten him in the excitement), to find that he was gaining all the time and preparing even to get up. When I returned to the saloon, the rest of the party were there and I bade good-bye to the captain and Albert. Then I turned to Lord Ralles, and, holding out my hand, said:

ALL-IMPORTANT FACT That in addressing Mrs. Pinkham you are confiding your private ills to a woman

a woman whose experience with woman's diseases covers a great many years.
You can talk freely to a woman when it is revolting to relate your private troubles to a man-besides a man does not understand-simply because he is a man. Many women suffer in silence and drift along from bad to worse, knowing full well that they ought to have immediate assistance, but a natural modesty impels them to shrink from exposing themselves to the questions and probably examinations of even their family physician. It is unnecessary, Without money or price you can consult a woman whose knowledge from actual experience is great. Mrs. Pinkham's Standing Invitation: Women suffering from any form of female weak-

ness are invited to promptly communicate with Mrs. Pinkham at Lynn, Mass. All letters are received, opened, read and answered by women only. A woman can freely talk of her private illness to a woman; thus has been established the eternal confidence between Mrs. Pinkham and the women confidence between Mrs. Pinkham and the wood America which has never been broken. On of the vast volume of experience which she has to draw from, it is more than possible that she has gained the very knowledge that will help your case. She asks nothing in return except your good-will, and her advice has relieved thousands. Surely any woman, rich or poor, is very foolish if she does not take advantage of this generous offer of assistance. — Lydia E, Pinkham Medicine Co., Lynn, Mass.

One day, while riding along, a mother sheep trotted up to my horse bleating pitifully. At last I made out that there was something wrong off toward the left. I followed the sheen in that direction and soon found the cause of her distress. Her lamb had fallen into a shallow pit and could not get I lifted the little thing up, and the gratitude in the mother sheep's eye will always be a source of consolation to me.

Cement in Dairy Barns.

There has been a great deal of dis-

cussion as to the use of cement in stables. We find a great many in favor of the use of cement, and also some men that hold very strong opinions against the use of cement. Some dairymen claim that the cement produces rheumatism in cows, on account of being cold. Some have covered their cement floors with boards to protect the cows from the cold. This of course largely nullifies the use of cement, as the boards largely tend to hold dirt and dampness. It seems to some that if boards are to be used over the cement there will be very little call for the use of cement in the standing places of the cows. The Review desires the opinions of its readers on this matter and also their opinions relative to the use gement for watering troughs .- Far-

The Ben Davis apple requires a long season to reach its proper development that kind of a season it finds in Kentucky, where it originated. It is not probable that the Ben Davis apple as grown in Wisconsin will ever very popular, although it will be a long keeper. Another thing in favor of the Ben Davis has been the fact that the trees have been wonderfully productive of fruit. It is a wonder in the apple world because it produces a crop every year. Most varieties of apples produce a good crop every other year, but the Ben Davis produces a crop every year. That is why the groat commercial growers have been planting out orchards when they had to sell the fruit very much under the price offered for some other varieties One man said: "I can make money by selling the Ben Davis at \$2 a barrel. The Ben Davis is my money maker, even at a low price these yield is not subject very largely to the at tacks of fungous diseases. Another great thing in favor of the Ben Davis apple is one remarkable characteristic relative to bruises. When a Ben Davis apple is bruised it forms a hard, dry, sponge-like crust and this does not develop into rot. Most other ap ples when they are bruised begin im-

We believe that the Ben Davis apple is destined to be more extensively grown even than at the present, and from group of apples. We have the begin-ning of this in two apples already quite prominent, the Black Ben Davis and the Gano. The Gano has been devel oped by selection from the Ben Davis wood of a certain quality. There is a lispute as to whether the Black Ben Davis was developed by selecting Ber wood of a certain quality or b planting the seeds from the Ben Davis apple.
