TOWNSEND SPEAKS ON THE RATE BILL WITH VIGOR.

BELIEVES THE RAILROADS WOULD BE BENEFITED BY PROPOSED LEGISLATION.

DELAY WILL BE DANGEROUS AND TEMPORIZING WILL BRING ONLY DISASTER.

The Great Debate Opened.

"Systematic efforts have been made to discredit the administration in va-rious ways to direct attention from he regulation of railroad rates." said Rep. Charles E. Townsend, of Michigan, in opening the accate on the Hepburn railroad rate bill.

Temporizing will bring nothing but disaster. Already we hear the rumlings of discontent and our enemies smile with satisfaction at every delay. Regulation of a public servant is not departure from the principles of popular government, but disregard of a righteous law and indifference to legal restrictions imposed to protect the people's rights is more than so Edwin Perkins, a former resident of Clayton, was electrocuted in Misha waka, Ind., while trimming a light for the electric light company in that city. selves. "Let the law pass," said Mr. Town-nd, "and let the railroads heed its send, and let the railroads need its provisions, and instead of retarding its execution aid in its operation, and then instead of being the objects of suspicion and hatred they will be regarded as the instruments of progress

Townsend protested that a greater prosperity would come to rail-roads under the proposed supervision of rates than otherwise. To substantiate this he called attention to the tremendous strides of a year in the transportation business and this in the face of the legislation which—the last congress initiated, and which the present congress is taking up in somewhat more strenuous form.

In brief the bill attempts, he said to place under the supervision of the interstate commerce commission every form of interstate and foreign com merce and all instrumentalities commerce and transportation.

The most serious complaints on the part of shippers, he said, have been directed against special services, such as private cars, icing, elevater and terminal charges, and the like. Mr. Townsend believes the bill affords a complete remedy for all of these evils, as hereafter every such charge must be just and reasonable, and in case it is not, the commission has power to make it so, 💸

question is that which gives the commission power upon complaint, and after full hearing, to substitute a reaafter full hearing, to substitute a reasonable maximum rate in place of one found to be unjust or unreasonable.

Mr. Townsend went at length in

this phase of the proposed legislation. It. was the point against which the weight of the opposition had been diected, he explained, and this opposition had been based alike on the question had been based alike on the ques-tioned constitutionality, the impossi-bility for the commission to find a just rate and the injury such a finding would entail alike on business, the railroads, and the widowed and or-phaned shareholder. In the broader view of the question and in the cor-rect conclusion on any of the cor-rect conclusion on any of the correct conclusion on any of these phases he saw but one answer that to require the railroads to be just and rea. For Good Roads.

For Good Roads.

On the ground that good rural roads are better for the business men than proposed "trade excursions" by mail, the Business Men's association, on Battle' Creek, is planning a unique good roads campaign. The plan is to lay eight miles of good road, the city to pay the laborers and the farmers to furnish the teams. If trade follows, a similar road will be built annually. As it is new rural trade often goes to small towns because of the bad roads. Battle Creek is completely isolated at times from some of the richest farm territory in Michigan.

Wreck of Steamer Valencia

It is now possible to gauge accurately the full horror of the disaster which overtook the steamer Valencia on the rocks of the west coast of Vancouver island, Jan. 23. Of more than 150 men, women and children aboard the vessel when it went aground, thirty-six were saved, all of them, men. Every woman and child on board the ship when it sailed from San Francisco perished. To most of them death came slowly, and in one of its most hideous forms, when the Valencia, after withstanding the battering of the terrific seas for two days, was smashed to pieces.

C. What are the results of neglected:
Constipation!
A. Constipation causes more suffering
than any other disease. It causes rheumatism, cokis, fevers, stomach, bowel,
kidney, lung and heart troubles, etc. It is
the one disease that starts all others.
Indigestion, despensia, diarrhoea, loss of
sleep and strength are its symptoms—piles,
appendicits and fistula, are caused by

Constitution.

Q. Do physicians recognize this?

A. Yes. The first question your doctor asks you is "are you constipated?" That is the secret.

Q. Can it be cured?

A. Yes, with proper treatment. The common error is to resort to physics, such as pills, salts, mineral water, castor oil, injections, etc., every one of which is injurious. They weaken and increase the maiady. You know this by your own experience.

Carries in Her Breast a Piece of Polished Ivory.

Not long since a wild goose was killed in one of the lakes of northern California. The hunter was out hunting and came suddenly on three very large wild geese that instantly took wing. One was shot and billed When the hunter picked up the big honker, which weighed nearly twenty pounds, he was surprised to see a pleas of ivory sticking out from the breakt of the bird just below one of its wings. With some difficulty he succeeded in pulling out this polished atick of ivory. The flesh had grown tightly around the piece and the wound that had once been inflicted was entirely healed. On pulling out the object the hunter discovered that it was an ar-row point about eight inches long, very sharp at one end, and about the size of an ordinary pencil. There were some queer, peculiar, delicate carv-ings on the stem, where it had been attached to the wooden arrow. The quaint cravings were quite visible On a careful inspection they were prospunced to be of Dakimo crizin The bird had been shot away up toward the arctic regions, but had not been fatally wounded. With the piece of polished walrus tooth in its breast, the honker had winged its way for thousands of miles. The linkime hunter had failed to get his green, but
