TRADE STILL ON UP GRADE

NEW HIGH MARK MADE IN SOME LINE EACH WEEK.

Bright Outlook is Enhanced by Abundant Crops, Demand for Steel and Plenty of Work for All.

New York, Aug. 18.—R. G. Dun & o.'s Weekly Review of Trade, says: Abundant crops and an oversold steel industry engender sentiments of confidence that make the outlook bright for a continuance of present prosperous business conditions. Each week brings a new high water mark some department and the net result is uniformly better than for the corresponding week in any previous year. The weather has favored both crops and the distribution of merchandise. while the latter is increased by seasonable bargain sales. Despite unprecedented preparations for business by liberal purchase of rolling stock, the railways are facing a serious blockade that cannot be avoided when the crops begin to move freely. Earnings thus far reported for were 11.7 per cent. larger than last year.

Some damage by storms was reported, but of local effect only, and a more significant factor was the farther voluntary advance in wages at textile mills. No relief appears as to the supply of labor, production being reduced in some cases sumers are most urgent.

THE LAXATIVE OF KNOWN QUALITY

There are two classes of remedies; those of known qual--ity and which are permanently beneficial in effect, acting gently, in harmony with nature, when nature needs assistance; and another class, composed of preparations of unknown, uncertain and inferior character, acting temporarily, but injuriously, as a result of forcing the natural functions unmecessarily. One of the most exceptional of the remedies of known quality and excellence is the ever pleasant Syrup of Figs, manufactured by the California. Fig Syrup Co., which represents the active principles of plants, known to act most beneficially, in a pleasant syrup, in which the wholesome Californian blue figs are used to comtribute their rich, yet delicate, fruity flavor. It is the remedy of all remedies to sweeten and refresh and cleanes the system gently and naturally, and to assist one in overcoming constipation and the many fills resulting therefrom. Its active principles and quality are known to physicians generally, and the remedy has therefore met with their approval, as well as with the favor of many millions of well informed persons who know of their was personal knowledge and from actual experience that it is a most excellent laxative remedy. We do not claim that it will care all manner of ills, but recommend it for what it really represents, a laxative remedy of known quality and excellence,

outaining nothing of an objectionable or injurious character.

There are two classes of purchasers; those who are informed as to the quality of what they buy and the reasons for the excellence of articles of exceptional merit, and who do not lack courage to go elsewhere when a dealer offers an imitation of any well known article; but, unfortunately, there are some people who do not know, and who allow themselves to be imposed upon. They cannot expect its beneficial effects if they do not get the genuine remedy. To the credit of the druggists of the United States be it said that nearly all of them value their reputation for professional integrity and the good will of their customers too highly to offer

State's increase in Wealth.

The first reliable data to be used by the state board of equalization in fixing the equalised values of the several counties has been prepared by the auditor general's department. The figures prepared show that the state was equalised five years ago at \$1.573,600,000, and that with the exception of Bay county, not reported, the property is now assessed by local officers at \$1.571,632,591 in 1901. These figures show that the supervisors have
