

Good Roads.
The good cause of highway improvement is making steady advance in this country, and will continue to do so for many years to come. This is a nation with a great territory and much of the land is unimproved. It is the business of the nation to build the roads and other ways for the use of the people. The roads are the arteries of the nation, and the arteries must be kept open. The roads are the highways of the nation, and the highways must be kept open. The roads are the highways of the nation, and the highways must be kept open.

Manchester Enterprise

By MAT D. BLOSSER

Established 1867. This paper devoted to the interests of the people of Manchester, N. H. is published every Wednesday afternoon. Office at the Enterprise Block, corner of Main and Elm streets. Telephone No. 44. Long Distance Bell Telephone No. 44. Birth, Marriage and Death notices, free. Ordinary notices five cents a line. Card of Thanks five cents a line. Advertisers wishing to change their advertisements must get the copy to use as the work can be done as early as Tuesday. It will be set after the paper is out and be inserted the next week. Write or phone the Enterprise and name at Office for Job Work or Advertising. Residence phone No. 61. Those having business at the Probate Court or his Deputy to send the advertising for the state to the ENTERPRISE OFFICE. Address, MANCHESTER ENTERPRISE, Manchester, Mich.

THURSDAY, MARCH 14, 1907.

We learn that the real object of Capt. Kie's visit to his old home was to take his mother to Cuba. He was entitled to a vacation and the plantation company was glad to have him come north, as the officers wished to see him, but he came after his mother, who will be company for himself and family. They leave here week after next.

There was considerable excitement here last week on account of the mysterious actions of a number of university students and the lavish manner in which they threw their money. They supposed that a certain freshman was in hiding here and they were after him, wishing to keep him from attending the annual banquet at Ann Arbor.

Fred Kaumayer of Marshall visited in town Monday and Tuesday. Fred came here in 1870 and learned the baker's trade of Wm. Kirchgraber. He went from here to Marshall, where he married and settled in business, being now a confectioner and maker of ice cream etc. He has often passed through here, but this is the first time that he has stopped off to renew old acquaintances.

Manchester stockholders of the Portland cement plant were met last Saturday when F. M. Freeman announced that Judge Swan of the federal court at Detroit had decided the case in their favor. Judge Watkins will remain receiver of the company and unless the Toledo parties appeal to the U. S. supreme court, he will get busy very soon and the promoters of the company may have to make good for the stock they held.

The many friends of Mr. & Mrs. C. H. Miller of Waukegan were greatly shocked by the news sent to the Enterprise Monday of the accidental shooting of their daughter's little son by their son, Schuyler Miller. With all the experience noted daily in public print of deaths from gun shots when they did not know that the gun was loaded, it would seem that no sensible person would point a weapon at another. This unfortunate affair will undoubtedly have the memory of the young man for many years. The little boy was buried at Grasse Lake, Wednesday.

At the spring election we shall have an opportunity to vote on the proposed amendment striking from the constitution the section which provides that convicts shall not be taught a mechanical trade. Most people have an idea that it is better for the convict to be employed rather than to be idled and though the hindmost think that other factions backed by the labor societies, are opposing convict labor, the humane thought is to keep the poor fellow busy. Another feature is that when they are employed they are paying a portion of the cost of keeping which must otherwise be a tax upon the people.

A Chicago man offered to bet an eastern man \$5,000 that he would show a Chicago beauty that couldn't be equalled in the east. Pictures of many women were shown in a Chicago paper and because the Chicago man won he had an idea that the Chicago woman was the most beautiful woman in America. This is denied by Michigan, and the Detroit Sunday News Tribune is publishing requests for photographs of beautiful women in order to select at least three to set against the Chicago prize beauties. The pictures will be published from week to week. Manchester has plenty of them that could take the best of the \$100,000 prize.

A joint resolution, proposing an amendment to the constitution of this state by adding a new article to enable the voters to originate and adopt laws and constitutional amendments, to approve or veto laws passed by the legislature and to recall officers and elect their successors by direct vote and to secure such vote at the option of the petitioner, was introduced in the senate by Hon. J. Edward Bland of Detroit and in the house by Hon. Wm. A. Norton of St. Johns. This bill has the unanimous backing of the state grange, state association of farmers' clubs, state federation of labor, Detroit municipal league, state league of direct legislation forces, etc.

An effort is being made to organize a ladies' society by wives of members of the arboretum.

Lake Shore railway men were here and put in the electrical signal at the Ann Arbor street crossing.

Sunday was a beautiful day, bright and sunny and much like spring. Wild geese were seen flying north.

Farmers say that the wheat has been severely injured by unfavorable weather and a lack of snow to keep it covered.

The cry goes out that the cold snap early last fall injured the peach trees and that there will be no fruit here this season.

Frank Leeson shot a number of flying squirrels in the Case woods a few days ago. They are singular creatures and pretty, besides being quite rare.

Everybody will want to attend the St. Patrick's day banquet Monday evening and hear their popular representative, Congressman Townsend, speak.

Jacob Briegel reports that he saw a red winged blackbird and a catbird while crossing the marsh a few days ago and thinks they are a harbinger of spring.

The universalist society was so well pleased with Rev. C. J. DeGo's trial sermon that a call was extended to him to become their pastor and if he accepts he will probably make Manchester his home.

Notwithstanding the fact that some people move away from Manchester because they can get better jobs elsewhere, there is a scarcity of residences in this village and the demand is greater than the supply.

J. S. Townsend of Clinton has a change of advertisement this week. Saturday is the last day of his big sale. He is receiving his new stock now and will open it in the double store lately occupied by Freese & Son.

The council for the coming year, if the newly elected trustees qualify, will be: Fred Freeman, president; Henry Landwehr, Gust Breitenwischer, George Wuerter, Samuel Holmes, Wm. Widmayer, Fred Steinkohl, trustee; Wm. Hofer, clerk.

Jacob Hauser of Ann Arbor and a brewer from Toronto have bought the Manchester brewery. They will come here at once, put the brewery in order and begin operations, hoping to have the support of the trade here and in surrounding towns.

Will Walker, who has been living on the Morley Pierce farm in Sharon, having bought what was for many years known as the Tracy farm about a mile and a half from there, just over the line into Manchester, is preparing to move. Alfred Tuttle, of whom he bought, is looking for another place.

Leonard Plummer, deputy of the Modern Woodmen of America, is in Manchester in the interest of the local camp. It is the intention of the camp to put in a large class of candidates in the near future and have a big log rolling when State Deputy E. J. Bullard, District Deputy Chas. H. Hart and other head officers will be present and a big time is anticipated.

The next regular communication of Manchester lodge F. & A. M. will occur on Monday evening, March 25th. The lodge, however, will convene for an afternoon session, when the 3rd. degree will be conferred. Supper will be served in the banquet room at 8 o'clock and in the evening the 3rd. degree will again be conferred. The object of the afternoon meeting is to give the older members who think to be out late at night, an opportunity to see the work.

A. C. Lewis of the firm of Evans & Torrey, Columbus, Ohio, came here last Friday and made contracts with several of the farmers to raise cabbage, carrots, parsnips, beets etc. the coming summer. The firm hopes with what is raised on the Waghtsaw garden farm, to ship 200 carloads of produce from here next fall. They pay good prices for everything and the farmers ought to appreciate the market furnished them for their produce by so trading quickly.

Wm. Burtless shipped a carload of lambs today.

Lost, a bunch of keys. Reward for return to ENTERPRISE office.

Miss Elizabeth Kiehl is visiting her sister, Mrs. Geo. Nide, in Tecumseh.

Ernest Lauterbach came here from Milwaukee yesterday for a few days' visit.

There is more talk about electric lights, more than ever before. The people seem determined to have better lights.

Annual Village Election.

The annual village election on Monday passed off in the usual quiet manner. There was a good vote cast, 279, and the young men's ticket was elected with the exception of Edward Drieselhouse for trustee and Laurence Wuerter for clerk, whose places were filled by Sam Holmes and Wm. Hofer of the union's ticket.

Following is the vote each candidate received:

President—Fred M. Freeman 150
Eugene Kirchgesner 129
Trustees—Ed Drieselhouse 129
Samuel Holmes 150
Wm. Widmayer 152
Merrick Hough 127
Fred Steinkohl 150
Fred Hough 127
Clerk—Laurence Wuerter 85
Wm. J. Hofer 194
Treasurer—Louis Loeber 188
John Koller 91
Assessor—George Dielle 145
Nathaniel Schmid 134
Street Commissioner—Edwin Bythe 168
Edward Braun 112

The vote on the question of bonding the village for \$25,000 for electric lights was 125 for, 149 against and five mutilated ballots. The reason for the vote against the proposition was clearly because the council did not specify what kind of a plant they wished.

Village Bought a Chemical Engine.

Sutphin's Successful Test on the Public Square Friday Night.

The village council has been much perplexed over the condition of our fire department since it was announced that "Romero" was no good, and they have been working hard to find a way to give protection to property in the village against fire. The one of the best cook extinguishers in fighting fire, and especially when one has discovered, has proved their efficiency time and again, and acting on the experience, the council decided to purchase a chemical engine. They entered into negotiations with H. Sutphin, manufacturer at Columbus, O., who brought a 45-gallon engine here, and on Friday evening the council and a large crowd of our citizens assembled on the public square to witness the test. A large pile of dry goods boxes and other inflammable material was made, which was lighted, and when all was burning and the fire hot enough to drive the crowd back, Mr. Sutphin took the hose and in a few seconds time completely subdued the flames. He accomplished his work so quickly and easily that all stood speechless with astonishment. In fact, we may say some were disappointed, because they did not think that he could accomplish it so easily.

As we said before, the engine is of 45 gallons capacity and there was a pressure of 85 pounds. Not more than a gallon was used on the fire. Mr. Sutphin then explained the simplicity of manipulation, throwing fine spray, or a large stream a distance of 50 feet or more.

The council were so well pleased that a meeting was called and the engine and ten Royal extinguishers were purchased for \$337.00.

It is the opinion of President Freeman and others that it would be policy to purchase a 20 gallon machine to be kept on the east side of the river. Well regulated fire departments everywhere bring their chemical engines first into use and then, if the fire is too great for them they use the steamers, as it is well known that steam damage is done to contents of building by chemicals than by being soaked with water. Several of our merchants have given orders for Royal hand extinguishers to place in their stores or residences and we wish others would do likewise, as most of the fires could be extinguished with one.

My Apple Crop for 1906 and Remarks.

For the third consecutive year, my orchard has given a crop without a seed worm. The crop from my 130 trees, now in bearing, the trees being two rods apart and occupying three and a fourth acres, sold for \$1,265. Were I starting a new orchard, I would not set the trees less than 40 feet apart. The time is near when I will be obliged to take out a number of fine trees to let the sun reach the apples and also to allow the spray wagon to get through, as we were compelled to shorten in a number in 1906, which lapped over each other.

At the agricultural college in the winter of 1903, it was predicted that I would kill my trees with my formula of spraying but, with the determination of clean apples or dead trees, I have had three crops of clean apples and still have as healthy trees as at the college. At the commencement of harvesting, the 1906 crop, Hon. L. Whitney Watkins, a graduate of the M. A. C., and interested in apple growing but supporting the college, with so many worms, to be at the top of the business in the state, made me a call, expecting to find a fair showing, but he was more than surprised when he could not find a scabby or wormy apple.

As I am often asked the expense of spraying in detail, I will try and give the expense of my spray for 1907 for each separate one and also for a certain number of trees, etc.

As apples are the best paying crop grown, I have made room in my peach orchard for five acres of apples. I planted good hardy, thrifty one year old trees—Tatman Sweet and Spies as far as I could get them—and in the spring of 1908 I will graft all of them about two feet from the ground with grafts cut from trees of known annual bearing and quality and then get the heads as low as possible as I prefer apples on the ground instead of 30 feet in the air. I got the apples for the 1906 county fair where the limb rested on the ground and received first premium on them. When the trees are so thoroughly wet as to wet every bud and every apple all fungi underneath will have lost its nutrition and fine apples will be found low down.

I now have an order for a car next fall for certain varieties at my own price, provided I can furnish them. This party has been furnished the last years with apples at three and four dollars a barrel about cars here. The party to which I sold last year asked if he could get the apples but nothing was said about the price. You people growing worms would call the above way up but it is not a factory to me.

No better apples are grown than in Michigan. Why not use the barrel box for extras and compete with the north-west and receive from \$2 to \$2.50 a box. It will take time and money to work up such a trade. It took time and money to work up the trade I now have. With extra work to wrap and pack, the price will pay. I am after that trade.

You had better set a few acres of apples and take good care of them. Begin now to your old age and you will have a bonanza. The price is tending upward for good clean stock. Many barrels of Little Jonathans retailed in the fall of 1906 at two for a nickel and three for a dime, which meant from \$12 to \$15 a barrel. If I am spared to look after the five acres which I set in 1906, for 25 years, the block will net me for time and expenses \$2,500 or \$3,000 for each acre per year from the time of planting. The peach trees left will for a few years pay all expenses. From that time for 50 years it will pay \$500 per year and all expenses, also a reasonable compensation for boxing the job and you who neglect to grow the trees will contribute part of the payment—two for five cents for small ones and two for ten cents for large ones. The apple is worth more today than the orange.
