calves and need save none but those ancestors.

from high-producing mothers, It is With a herd of 40 cows, as here illustrated each cow represents one butcher) than to buy cows that are eightlieth of the future herd each year.

ity and qualities, character and charity and qualities, character and characteristics, the capacity for milk production, and everything else, transmitted to the calves which are to constitute to the calves which are to constituted to the calves which are to constitute the calves which are the calv A fine dairy sire can be bought for \$150, and with 40 grade cows at \$60

Yet in the face of all this, hundreds of dairymen make no effort to save their, best heifer caives, and they think they have a reason. They say it takes too much milk. This guestion was carefully investigated with 45 calves by the Illinois experiment station. They calves at a time were tested at four different times. It was found they could be successfully raised on 150 pounds of skimmilk. This milk was pounds of skimmilk. This milk was pounds of skimmilk. This milk was the feed of the characteristics have a time representation. They was always the size of the characteristics have a time were tested at four different times. It was found they could be successfully raised on 150 pounds of whole milk and 400 pounds of skimmilk. This milk was pounds of skimmilk. This milk was carefully the whole thing.

They calves are a time were to the characteristics have that the found they could be successfully raised on 150 pounds of whole milk and 400 pounds of skimmilk. This milk was carefully the whole thing.
