FOREST FIRES COST AMERICA FACTS FOR SICK R.W. PULLMAN \$50,000,000.AYEAR WOMEN

OREST fires which have just laid waste whole counties in Minneso wernment and state forest officers on the enormous losses of fores wealth which will be checked up to the year 1908.

In the whole northern half of the United States throughout the vast ter-Many extending from coast to coast, the reported destruction by forest fires been terrific and it is likely that the year will go down as one of the worst in the last quarter century. It seems that no part of the country has compaped the work of the devastating flames. The latest disasters in Minne-Michigan and Wisconsin are the worst of the many that have visited the the states this year. Other sections have also suffered from forest fires turing the spring and summer months, and the people of the Pacific coast, the Rocky mountain and the New England states, and Canada have had a thorough, and in some cases, a continuous experience in fire fighting.

Officers in the United States forest service say that it is doubtful if this year's actual losses from forest fires in all parts of the country will ever b n, but it is certain that they will run up so high in the millions that the ry will be startled when a compilation of statistics at the end of the n makes it possible to give even the most conservative figures. Suffice It to say, were all the timeer burned up this year in all parts of the country werted into cash, it could provide for a good sized navy of first-class ba

attention on the seriousness of the forest are problem, practical foresters say, and have started a wide-spread movement in many states to check them, by adopting rational systems of the protection. Among thinking people there has been awakened an intense interest in throwing a better protection around

more than \$10,000. This sum is small when it is remembered that it means putting down fires on all of the national forests, which now have an area of approximately 168,000,000 acres. The value of the timber destroyed will not be known until the fire reports are made at the end of the year, but it is estimated that it, will be very much greater than in previous years because of the nusual destruction by fire in all sections. Progressive state fire wardens and forest officers, individuals and private corporations having large timber the national forces along much the same line as the government in many cases, and in this way they have given protection to many cases, and in this way they have given protection to many cases, and in this way they have given protection to many cases, and in this way they have given protection to many cases, and in this way they have given protection to many cases, and in this way they have given protection to many cases, and in this way they have given protection to many cases, and in this way they have given protection to many cases, and in this way they have given protection to many cases, and in this way they have given protection.

It is hard and practically impossible to figure losses accurately at this time, and it will be weeks before even an approximate estimate that it means as the early administration.

Throughout 1905 fires have done serious damage in practically every and be made. Cruisers will have to be sent over the action of the mational forces will have to be sent over the action of the mational fit will be weeks before even an approximately life in the distinction.

Throughout 1905 fires have done serious damage in practically every and the lake states.

The country has experienced some fires which have attained his time, and it will be weeks before even an approximately life and practically every and the timber owners say that it is absolutely useless to do anything in this line until a heavy rain comes and the end of the fire fighting line on the national forests, orests for the season, exclusive of the salaries of forest officers, will not be

Loss in new growth amonus each year to \$90,000,000. If not fer torest firm, we could expect an additional growth of 23 onlike beet per acre per year, which for a ferest area of \$00,000,000 acre, would amount each year to 10,000,000,000 cube feet. This is \$00,000,000,000 feet lossed measure.

JAMES WILSON

FIRE SCENE FROM AFAR

which is more than the annual consumption of saw-timber in this country. Figuring at \$2 per M, this amounts to \$50,000,000. The loss of soil fertility cannot even be estimated. Pamage to river courses and adjacent farm country, due to floods and drought, is caused by the destruction of the forest by fire, and costs the nation each year many millions of dollars. Depreciation in forest wealth and value of land, which is destroying the possible prosperity of many sections, is a hindrance to business enterprise.

The forest service, by a fire patrol, reduced the burned-over area on the national forests from .60 of one per cent, in 1904, the year before the forests manifestant of the local board of health. These results have come about through the increased efficiency in fire fighting fire, and through the co-operation of settlers and users of forests who now understand that the forests are their property and aloss from fire is a personal loss. By posting fire notices and giving advice the forest service has secured the co-operation from the ourside, which may be said to be as important an agency in reducing the loss from forest fires as the perfection of machinery for fighting these fires.

These results have come about through the increased efficiency in fire the score operation of settlers and users of forests who now understand that the forests are their property and a loss from fire is a personal loss. By posting fire notices and giving advice the forest service has secured the co-operation of settlers and users of forests were one about through the increased efficiency in fire the score of the local board of health.

These results have come about through the increased efficiency in fire discontance with this order, the store of fighting fire, and through the co-operation of settlers and users of forests who now understand that the forests are their property and a loss from fire is a personal loss. By posting fire notices and giving advice the forest were in fire as the property of fighting fire, and through th 000,000 acres, and this at a cost far smaller than .07 per cent., which cover

field \$250,000 a year. This is worth contrasting with what the state forestry board now has to spend for protection. It has an appropriation of \$10,500,000 acres, and the division of threaty has collected records of 12,000,000 acres, and the division of the prosperous little town of Chisholm on the reports of fires on the national forests during the last three sort where you spent your vacation. Pretty Niece—Indeed they do uncle.

10,000,000 acres, and the division of threatry has collected records of 12,000,000 acres, and the division of the value of the tumber destroyed was excres burned over in one year. The value of the tumber destroyed was excress burned or from \$25,000,000 a year. While in 1908 the acreage of forest burned over was undoubtfully similar, utili the less was not less than but even greater because the value of stumpage has increased at least than but even greater because the value of stumpage has increased at least than but even greater because the value of stumpage has increased at least than but even greater because the value of stumpage has increased at least than but even greater because the value of stumpage has increased at least than but even greater because the value of stumpage has increased at least the same amount of damage. Upon the basis of the forest service exhemiculating fire patrel, amounts to only one cent the forest area of the United Majority of St. 1909, the area burned over was \$13,150,100,000, including real property, stocks of merital the service of the same amount of the same area of the United Majority of the same area of the United St. 1909, the area burned over the year before. The value of the timber destroyed to say bothing of all other damages caused by forest fires.

That the estimate of the fire is a factor of the same area of the United St. 1909, the area burned over the year before. The value of the timber destroyed for simples of individual fires. The Huncklew fire in Mintescal in 1945, the area burned over the year before. The value of the timber destroyed to say bothing of all other damages caused by forest fires.

That the estimate of the fire is as for the fires steries are for the fires of the value of the timber destroyed for simples of individual fires. The Huncklew fire in Mintescal in 1945, the area burned over the year before. The value of the timber destroyed to say but the fire of a gate of the fire that destroyed to say but the fire of a gate of the fire that destroyed t

Last year's report shows that fire burned over 212,850 acres of land in the national forests. Fire reports were received on 152,000,000 acres, against processes in 1965. The increase of 53,000,000 is accounted for by the increase in the area of the national forests during 1906. The fact that the parea of the national forests during 1906. The fact that the parea of the national forests during 1906. The fact that the place could have been saved. As it was, all that was spared with the place could have been saved. As it was, all that was spared with the place could have been saved. unsleading, because it takes into account three large grass fires on the dismat River National Forest in Nebraska; the Garden City National Forest in Kagsas, and the Wichita National Forest in Oklahoma. After elimination were saved because of a peculiar shifting of the wind.

eminine organism, restoring

with a bit of dress material which his destroyed by the year's fires was only \$31,590, against \$76,183 in 1906. The very last remnant was sold this

destroyed by the year's fires was only \$31,590 against \$76,183 in 1906. The cost of fire fighting (which is always figured exclusive of forest officers' salaries) was only \$3,610 against \$5,765 in 1906.

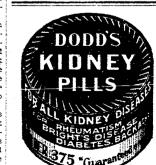

Although the fire menace has been serious in all sections, officers of the forest service estimate that the total cost of fighting fires on the national forests for the season, exclusive of the salaries of forest officers, will not be more than \$30,000. This sum is small when it is remembered that it means putting down fires on all of the national forests, which now have an area of approximately 165,000,000 acres. The value of the timber destroyed will not be known until the fire reports are made at the end of the year, but it is alternated that it will be very much greater than in previous years, because

estimated that it will be very much greater than in previous years, because of the unusual destruction by fire in all sections.

Anyone who knows of the fearful damage wrought by forest fires on private and unprotected public lands each year, will see that through fire patrol, such as is maintained on our national forests, the losses can be reduced to the

It is hard and practically impossible to figure losses accurately at this "I do," replied the senator, calmiy.

yield \$250,000 a year. This is worth contrasting with what the state forestry Uncle Henry-Nellie, I hope they

GEORGE J. HAEUSSLER & SON, MANCHESTER, MICH

The real test is in the baking. Other Paking Powders may make broad claims, but when it comes to the production of real delicious biscuit, cakes and pastry

CALUMET

BAKING POWDER

proves its real worth. This is because of its much greater leavening power and the strict purity of its ingredients. It costs only a trifle more than the cheap and big can bronde and much less than the Tru t Baking Powders.

Order Brings Forth Most Extraordinary Demonstration in Honor of the American Visitors.

Tokyo, Oct. 23.—The capital of Japan witnessed Thursday night the most extraordinary evidence of the spirit of the new Japan. After having an audience of the officers of the American battleship fieet on Tuesday, the emperor issued an order directing the people to increase in every way possible the enjoyment and pleasure of the American visitors, who came, he said, as historic friends of the Japan and the numbers of the embass staffs with their wives, with about 890 other guests, were present.

The civil ceremony was held in the private apartment of the palace, after
