But my dear Press, I started out to ten you of my search for a famous spining Mark Twain in climbing Vesuvius. As I have said, this is a cuty of springs:

that is why there is a city here: it is

Eureka Springs. We had discovered

many of them famous, among them there Arsenic, the Oil, Magnotic, Alum, Mys-1 ne, Zine, etc. But in all our wander-t ings and gossip with the old residents. we were constantly told of our sping rivating all others in magnitude and mystery. This was the famous Blue spring. This storing is a long way off and almost inaccessible. I resorved to asit it. For this purpose I took the arry morning train on Saturday, 11th; nst., for Beaver, a little station six imles. I had been assured that here I should find saddie horses and a guide for the spring five miles farther away. Upon my arrival I found to my utter disgust that no horse, saddle or guide could be to do was to wait for the next train and return home, a sadder, a madder, but a i wiser man.

It soon became known in the little namlet, that a lunatic wanted to go to Blue Spring, and a native told me he would take me out if I could ride in his A Magnificent Effort in Behalf of Art. Inwagon. A bargain was quickly struck, and the man went home for his team. At the end of an hour he reappeared with his rig. Here, let me pause long enough in my journey to describe the man and his outfit. The man had on a straw hat, hickory shirt, overalls, only that and nothing more. Neither his hair nor beard had been trimmed or combed for weeks, months, years. The wagon! If you were here and I should; say an Ark. one, nothing more would be necessary. It had the indispensable rake, without which it would be impossible to go down these mountains; for our seat, a rough board on the top of the box, trace chains for tugs, ropes for lines. The team! Oh yes, the team. Well, one was a horse, 16 hands high, with about 16 pounds of flesh on his bones and 16 years old-past. The other the horse. I noticed nothing strikingly remarkable about the mule, except that he was blind in his off eye, and his heels I climbed into the wagon, with

misgiving, and with a great flourish of whip we started. I asked the man about the road, and probability of our getting to the spring and back. "Wall," said he, "there's a right smart of rock, and the mountain's powerful steep, but I reckon if you un kin stick in the wagin' Dock and the mule kin tote us." My apprehension on that point ceased, but I was tormented with another thought. When I looked my companion over more closely, I was sure I detected a tween Dock and the mule and the driver. I did him a great in the three-year boy into the wagon, and tiful Detroit river, the picturesque Canadian C. A. VANDERHOOF, said: "Tell your maw that Clevy has

dustry, Education and Amuse-

Combining a Wealth of Wonders with a World of Pleasure and Instruction Representing a Grand Outlay of More Than Half a Million Dollars - Special Exhibits in All Departments and Curios ling, which, which the entrinous cost of from Many Climes - Sept. 17 to 27 Inclusive, the Ten Great Days of Display.

Memorable indeed in the history of Michigan's efforts in behalf of agriculture and its 1889. For this is the year in which the great Wolverine state, with a dash of that enter- ero i courts, in which the visitor, leasurely prise which has made her name, famous over the whole continent, will come before the agricultural community of the United States with an International Fair and Exposition PROJECT OF SUCH HERCULEAN PROPORTIONS that, with the exception of the famous Centennial of '76, it will positively surpass any thing in the fair and exposition line our land has ever seen.

It is needless to speak of the generous inproject as that initiated at Detroit. Held at a season of the year when Nature arrays herself in her most gorgeous robes, when the harvests have all been gathered home, and when the industrious farmer is privileged to enjoy a period of well-earned restathe fair has won a warm place in the hearts of those who esteem an attraction which combines interest with instruction, education with di-

# INTERESTS

THE GROTON

Has more separation than any other machine. It will separate faster and better. This Thresher is made with tight. |floor, so there is no litter or dust, which is a very important point over other machines. Our mill is large, and sieves are wider and longer, and with our New Improved End Shake will save and clean the grain ready for market. The GROTON NEW MODEL is built with arched sills, so that it can be turned around in a VERY SMALL SPACE, saving all trouble of lifting or running against doors, fences, etc., etc.

THE GROTON ENGINE uses less coal and water than any other engine built, giving the same amount of power. This engine is so nicely balanced that it needs no blocking whatever, except to keep the belt from pulling it ahead. We put a fusible plug into the crown sheet of all of our boilers, which, in case of low water, will melt and put out the fire, thereby ensuring positive safety.

Our Smoke-stacks are arranged with a perfect spark arrester, so there is not a possible chance of fire from sparks. AVERY'S PATENT REVERSE GEAR is used on all our Tractions. With one

lever the engineer has full control of his engine, -can reverse it at will, and can cut off his steam from zero to full stroke. THE DRIVING OR ROAD WHEELS of our Traction Engine are sixty inches in diameter, with twelve inch face, and are made principalty of steel, wrought and malleable iron. The lugs, or traction pieces, are of peculiar shape, best adapted to adhere to the ground, and are held in place by nuts, and, in case of wear, can be renewed at a tri-

fling expense, without throwing away the whole wheel. By this construction of a wheel we secure lightness, elasticity, durability, and strength, with a minimum of weight; and with the large and broad tires, it is only in very extreme cases that we are obliged to resort to locking the drive wheels, or putting on extra lugs to climb the steepest grades, or to get out of the worst ruta. PATENT SPRING ATTACHMENT to the intermediate gear, which relieves the

trrain of gearing from sudden shocks, breaks, etc., caused by the drive wheels running over obstructions, is a very desirable attachment to any traction engine.

CONDITION OF CROPS

The agricultural department monthly crop report says: The condition of win ter wheat advanced from from 94 to 99 to 90 to 90.5; general average winder ter barley, 93.9; spring pasture, 93.6; mow ing lands, 66.3. Winter wheat in the Ohio large weeds may be removed, until the valley, while fully maintaining its April position, has had a scant supply of poists.

lives an old farmer, honest and upright in business matters, but notorious for the ineredible stories of his own prowess which he relates upon every occasion. A short time since in following the condition are entertained in case of a continued deficiency of rainfall. On the finded deficiency of rainfall. On the or by roller thrashing, and there will be a market for all flax straw thus grown at ficiency. The plant is generally green and flourishing, but has not tillered well in localities inclining to dryness. A high condition are entertained in case of a continue with nay.

The seed may be taken off by rippling or by roller thrashing, and there will be a market for all flax straw thus grown at a half tons of straw to an acre and twe very occasion. A short time since in localities inclining to dryness. A high condition is reported in the goath though to fifteen bushels of seed. The cost of pulling is, in Canada, E an acre.

The percentages of condition of the states | earnestly considered by the department.

BINDER TWINE.

If the farmers who use Binder Twine will call and see Mr. P. J. Bryan, Manager for the Buckeye Machine Co., in Owosso, they will learn something decidedly to their advantage.

"Trusts" and "Combinations" in Binder Twine exist only in the fertile imagination of dealers who want to sell you a low grade twine at a high price.

The only kind of a "trust" we believe in is trust the farmer to know a good thing when he sees

it. Come and see us and learn our prices, and you will be con vinced that the Buckeye Machine Company is all right on the "Trust" question.
