Forepaugh's great show trought an immense growd to Owosso. They came from all directions, by care leaded with men, women and children Many come the previous night to be on hand to see the unloading from the cars of \$ \cdot \n A dense throng packed the streets to see the morning parade, and there were 10,000 persons in the tert for the afternoon performance. The soft condition of the ground from heavy rains rendered the ring performance more difficult of execution than usual, but the Wild West velled its savagest, the cowboys and prairie girls went through their old fish ioned Virginia reel on horse-back, the intrepid trapeze performers thrilled the beholder, and the Dippodrome races de lighted everybody. Great is Foregaugh and great is his show.

West Haven

People's minds change as do the seasons. A few weeks ago it was, Oh, how we need a rain," but new, 600, how we need the sun."

Just at this point Dr. Ward put in an appearance. Having missed the morning train he had come on foot across lots. He looked bred, hadn't had time to comb his hair, but still he came smiling to the front and read a poem, which I hope he will please furnish THE PRESS. read it in his inimitable style, with all the vigor and pathos of a-slumbering volcano. The Doctor misused your correspondent right there on that platform, but I forgive him

Then came the old settler with his were ever fish (stories) so scaly? Never stranger was no other than Cooney .--that is, hardly ever. And so the after- Later-The suspect was not Cooney, noon wore away, with song and speech and kindly greeting, and when all had been said that we could think of, we went back and cleaned out what lunch be Mormon missionaries, were driven had been left, and home by train or out of Hinesboro, Ill., and their meet-

my memory serves me: "Older persons the forties and earlier, we used to find in the forests and especially along the Looking Glass river, trees that I think we called buttonwood or sycamore. They grew to great size and were hollow -nothing, indeed, but a mere shell being left. We used them for smokehouses, ash houses, and sometimes for hen-roosts. It was during the winter of 1846, or possibly '47, that I gut down one of these trees on the north end of my farm in Bonnington, thinking to use it for some one of the purposes mentioned. The tree was a very large one with an immense cavity or hollow. When the tree fell I at once looked into the hollow. it was full of snakes. However, as the cold had rendered them torpid, they were harmless. As the tree would not A fire in the ill fated Johnstown, be available for use with them in it I was obliged to remove them. When to destroy competition.

thing! Susie is certainly a quiet, pret- frighten me. ty little thing! And he is not half was quite a glow in his eyes to-night. Usually he is as dull as ditch water. So much like those everlasting Chidester brothers."

Two weeks later a party of the young people came out to spend the last evening of my loneliness with me. Father and mother were coming home the next day and I was heartily glad of trip with some college friends.

They all staid late. Mr. Heming and Susle were the first to leave and Monne and the Chidester the last. After enev had crossed the doorstep I saw him pause and glance back at the call and the stairway. It was a positiar and searching glance and gave me a chilly sensation of fear and or ead. Under the effect of that last giance,

however, I had all the silver gathered up most carefully and packed in several baskets and I concluded to sleep in mother's room instead of my own. Moreover, I opened the doors between the nursery and our rooms. I was not at all mindful of the delights of utter loneliness. I went back and forth several times to the tumbled beds in the nursery, envying the rosy sleepers, and it was late, indeed, before I joined

Almost instantly, it seemed to me, I was broad awake again and looking straight before me at the terrible, terrible sight.

There was a light in the room-a pale, uncertain, flickering light which streamed upward from the floor at the foot of the bed and cast strange shadows on the ceiling.

"Burglars!" bent my frightened heart. "The Chidester brothers!" came choking into my tightened throat.

I had too much sense to move or scream. I lay still as death, only drawing long, even breaths as if sound in sleep, and using my eyes for all they were worth. The shadows of the ceiling showed that things were being taken up and put down-our silver-by gigantic hands, but all other outlines were so confused I could 'distinguish nothing.

INTERESTS

THE GROTON

Has more separation than any other machine. It will separate paster and better. This Thresher is made with tight floor, so there is no litter or dust, which is a very important point over other machines. Our mill is large, and sieves are wider and longer, and with our New Improved End Shake will save and clean the grain ready for market. The GROTON NEW MODEL is built with arched sills, so that it can be turned around in a VERY SMALL SPACE, saving all trouble of lifting or running against doors, fences, etc., etc.

THE GROTON ENGINE uses less coal and water than any other engine built, giving the same amount of power. This engine is so nicely balanced that it needs no blocking whatever, except to keep the belt from pulling it ahead. We put a fusible plug into the crown sheet of all of our boilers, which, in case of low water, will melt and put out the fire, thereby ensuring positive safety.

Our Smoke-stacks are arranged with a perfect spark arrester, so there is not a possible chance of fire from sparks. AVERY'S PATENT REVERSE GEAR is used on all our Tractions. With one lever the engineer has full control of his engine, -can reverse it at will, and can cut off

his steam from zero to full stroke. THE DRIVING OR ROAD WHEELS of our Traction Engine are sixty inches in diameter, with twelve inch face, and are made principally of steel, wrought and malleable iron. The lugs, or traction pieces, are of peculiar shape, best adapted to adhere to the ground, and are held in place by nuts, and, in case of wear, can be renewed at a tri-OATS-Higher: 2140224c June: 2240224c fling expense, without throwing away the whole wheel. By this construction of a wheel July: 24024c September. we secure lightness, elasticity, durability, and strength, with a minimum of weight; and PROVISIONS—Meas Pork higher: July. we secure lightness, elasticity, durability, and strength, with a minimum of weight; and \$11,6500.1.24; August. \$11,724.011.80; Sept. with the large and broad tires, it is only in very extreme cases that we are obliged to re\$11,824.011.834. BINDER TWINE.

If the farmers who use Binder Twine will call and see Mr. P. J. Bryan, Manager for the Buck-eye Machine Co., in Owosso, they will learn something decidedly to their advantage.

"Trusts" and "Combinations" in Binder Twine exist only in the fertile imagination of dealers who want to sell you a low grade twine at a high price.

The only kind of a "trust" we believe in is trust the farmer to know a good thing when he sees it. Come and see us and learn our prices, and you will be convinced that the Buckeye Machine Company is all right on the "Trust" question.
