These gentlemen will see what can be done in a small district, such to report upon an effective plan Mr. Porthe law which makes the gathering of these statistics mandatory.

THOUSANDS OF APPLICANTS. aminations that are to be held during the organization of the commission. In New York city there are more than 3,488 applicants for federal jobs, and as not more it will take nearly a month to ascertain ernment service. About 1,500 of the applicants want to be mail-carriers. In Chicago the examinations will begin Aug. and last two weeks. The recent aunexation of adjacent territory by that city calls for greatly increased postal service and 650 Chicago men are applicants for appointment as carriers, while as many more desire clerkships in the postoffice, There is a proportionate increase in the number of applicants for examination at Philadelphia, Cincinnati, and St. Louis.

What this country really needs is less scrambling for an office and more strawbernes in the shortcake. -Shoe and Leather Reporter.

MOST FAMOUS SHOWS

OF ANCIENT AND MODERN NATIOUS, AND DIFFERENT RACES

Sketch of the World's Most Benowned Festivals, Fairs and Exhibitions Their Characters and Industrial How They Have Led to the Moder . International

Go backward into the dark morning and abyss of time until the wearred wings of research tire out in the ancient twilight, and there you will find the institution of fairs aiready old. Far back beyond recorded history, beyon't even ancient myth, the primal nations hold their early annual fairs. At first these fairs were religious. A tribe, a principality of a kingtom assembled its people yearly at some cary or surme for a religious festival. Thather necessarily came the traders and artisans, and the religious festival became gradually a market fair. The wares of the merchants, the works of the artisans and nanderrafts, the cattle bave overflowed their banks. Portions for anglet for sacretives and food were all compared tegether. Thus, the market fair grew | flowing of Shunganinga Creek, and famsuch as all countries have to-day. Tous

THE MORNING STARS OF CIVILIZATION There the congregated merchants and artisans compared experiences as well as wares, and learned improvement. There the earliest inventors came, taught, and found their rewards. There the whole nation, as spectators, learned to progress. There the gathering of animals taught the improvement of breeds, and the displays of fruits, grains and food advanced the early agriculturists.

The oldest written books in the world are the various bibles of the human race. Every one of them-alike the Jewish's riptures, the Dooks of the Bluddists, of the Brahmins, of Zoroaster, the ancient paintings of Egyptian combs and temples, the inscribed bricks of Ninevah, the ruins of Babylon-all mention

The great fair of India is still held at Hurdwar, on the Upper Ganges. Every twelfth year it is particularly holy, and 2,000,000 or more pilgrims assemble. Elephants, tigers and other wild beasts are sold, with all merchandise, and a vast display of

EVERY NATION ON EARTH HAS ITS FAIRS, the Orent being first in point of time. The great fair of Russia, at Nizhoni-Novgorod Often non bers 200,000 traders. King Alfred the Wiscintroduced the fair into England over 1,000 years ago. In the middle of dark ages, the fairs held in the European cities were very important, and did much to keep civilization alive. The great fair at Mecca | been found guilty of murder in the first dates from shortly after the death of degree. Mahomet The most important fair of France is held at Boalwaire, and the trade in one week has reached over \$5,000,000. The fair of Madrid is held at the hermitage. of San Isidro del Campo, when the grand pilgrimage and fes it is to the surme of San Isidro draws immensionowds. Italy holds ther principal fair at the shrine of St. Mary Magdalene, in Sinig Ca. Germany has her great fairs at Louisic, Frankfort-on-the-Main, Frankfort-on-the Oder, and Bruns well. wick. The English, Scotch, Irish and Welk's cattle and other fairs are well known. At the great Irish fair in Badimakow 75,000 sheep and 25,000 cattle are often exhibited At one Ipswich fair, in England, 100,000

Mars I was some as

And so on, all goods mentioned at ove, suffering the same fat

The reason for this is easily given. The damp, cold weather we have had this season had a very depressing effect on the arts of circumstion in broken motion, the sale of this class of goods, and now at the commencement of the dull season we find we have an overstock which peoples together in the bonds of friendly MIUST GO. We therefore propose to make the usual dull period a lifely one (for us at least) and and profitable number this and he sure hofore move these goods to your profit it at a sacrifice to ourselves. Remember this and he sure hofore purchasing to call and

examine the goods included in this Great 1-4 Off Sale.

The body of Dr. A. E. Jones, an aged San Francisco, Uni., from Hong Kong and respected resident of Cincinnati, and Yokohama reports a disastrous fire was found Saturday in a man-hole near at Lu Chow, which burned twenty-three his residence. Charles Bligh, Dr. Jones' hours, destroying 87,000 dwellings, over | colored coachman, was arrested at Madisonville, O., charged with the crime, and nearly 170,000 people were left and made a full confession. He says homeless, and were dying at the rate of he killed Jones during a quarrel, hid Thursday night, then put the body into Aug. \$6.07% \$6.07%; Sept., \$6,17% \$6.17%. a sack and threw it into the sewer. Bligh made a confession without a tre-

Princess Louise Victoria Alexandria Dagmar, eldest daughter of the Prince and Princess of Wales, was married in the royal chapel at Buckingham Palace Saturday morning, to Alexander William George, Earl of Fife. The ceremony was characterized by all the pomp of diana of serious injury to the wheat royalty. Queen Victoria and all the and cats crop from the continued wet | members of the royal family of England were present and many foreign nobles and representatives of royalty were in attendance. The Prince of Wales gave

the bride away. The weather during the last week was decidedly favorable for crops in the is sickly. Fruit does not promise spring wheat regions of Minnesota and Dakota, where a good harvest is in progress. Throughout the Northern States of the central valleys extending from Ohio westward to Nebraska and Kansas the weather was favorable for corn, which is reported as excellent and growing finely. The harvesting of winter wheat, grass, and oats was interrupted by rains, and the weather in many localities was too wet for thrashing.

The result which attends the Sloux Commission's labors at Chevenne leads people to believe that there is more than rumor in the charge that towns interested in the Capital fight have been taking a hand in the matter. It is believed that if the Indians at that agency had been left alone the result would have been much different. At this time 3,000 of the necessary 4,000 signatures have been secured. A more favorable result is looked for at Standing Rock. The prevailing opinion is that the requisite number will yet be secured.

At Chicago Saturday evening the untiple used during the State census of incessant lightning caused a loss of 1885 the City of Minneapolis contains property that is difficult to estimate. GROTON

Has more separation than any other machine. It will separate faster and better. This Thresher is made with tight floor, so there is no litter or dust, which is a very important point over other machines. Our mill is large, and sieves are wider and longer, and with our New Improved End Shake will save and clean the grain ready for market. The GROTON NEW MODEL is built with arched sills, so that it can be turned around in a VERY SMALL SPACE, saving all trouble of lifting or running against

THE GROTON ENGINE uses less coal and water than any other engine built, giving the same amount of power. This engine is so nicely balanced that it needs no blocking whatever, except to keep the belt from pulling it ahead. We put a fusible plug into the crown sheet of all of our boilers, which, in case of low water, will melt and put out the fire, thereby ensuring positive safety.

Our Smoke-stacks are arranged with a perfect spark arrester, so there is not a possible chance of fire from sparks.

AVERY'S PATENT REVERSE GEAR is used on all our Tractions. With one lever the engineer has full control of his engine,—can reverse it at will, and can cut off his steam from zero to full stroke.

THE DRIVING OR ROAD WHEELS of our Traction Engine are sixty inches in diameter, with twelve inch face, and are made principally of steel, wrought and malleable iron. The lugs, or traction pieces, are of peculiar shape, best adapted to adhere to the ground, and are held in place by nuts, and, in case of wear, can be renewed at a trifling expense, without throwing away the whole wheel. By this construction of a wheel we secure lightness, elasticity, durability, and strength, with a minimum of weight; and with the large and broad tires, it is only in very extreme cases that we are obliged to resort to locking the drive wheels, or putting on extra lugs to climb the steepest grades, or

to get out of the worst ruts. PATENT SPRING ATTACHMENT to the intermediate gear, which relieves the I trrain of gearing from sudden shocks, breaks, etc., caused by the drive wheels running over obstructions, is a very desirable attachment to any traction engine.

incident of his life. The eight hunters had plenty of powder and ball and big English muskets which they could lead to the muskets which they could lead to the muzzle. Through the tangle of vines and thickets they traveled until they cries of distress echoed far through the keep about 10,000 tons of coal there at all

The hunters started toward the elephant, keeping, however, in the edge | Department, U.S. A., has not not the Trustees of Alton Ill.) cemetery that the of the timber, where they would be less exposed to an offensive sally from their victim. All of a sudden they heard cries responding to those of the | make an annual allowance hereafter, thus young elephant. The hunters at once putting it on the same footing with comprehended that they were in danger. The other elephants were not says: immediately anandoned their victim, which had fallen to the ground. They

After a desperate effort to get through | 000. The commission also distributed 50, they were compelled, with bleeding 190,000 wall-eyed pike, over 170,000 carp limbs, to turn back and seek some betlimbs, to turn back and seek some better route. They had gone but a few mend Prof. Sheldon, of Kansas to the steps when they saw live elephants government of Queensland, Australia, for rushing toward them. Further flight an appointment as instructor of agriculwas impossible, and so with their eight ture. The chief secretary of Queensland guns they blazed away at the enemy. The bullets hit the mark, but an elephant is hard to kill by a front shot, ment of Queensland would pay \$3,700 a and the animals with redoubled fury year. rushed upon the helpless men.

Seven of the men were lifted high in the air on the trunks of the animals and then dashed to the ground, under foot. One man made his escape and hurried back to the village, whose people were horror-stricken at his recital. A strong party was sent out to the scene of the tragedy. The seven victims were found so terribly, graving and printing. According to a mutilated that their own relatives local paper, the captain does not content mutilated that their own relatives could hardly recognize them. One of the five elephants was on the ground, spection of what is going on every day. so seriously wounded that he could not move. The young elephant, whose cries had brought the comrades that so terribly avenged it; was dying and the others had disappeared.

The Health of Railroad Men.

The life of railway men does not seem to be a very healthy nor yet a very enjoyable one, if any reliance is to be placed on the observations of medical men who have given some attention to the subject. According to not numerous. M. Duchesne railway men improve in health during the first four years, but at the end of ten years they are tired out, in fifteen they are actual sufferers, and very few can remain in the service after twenty. These general observations have been supplemented by Dr. Lichtenbag, of Buda-Posth, who Dr the Liquor Habit, Positively Cured found from examination that out of BY ASMINISTERING DR. Fearful and Wonderful

The Bible save, 'man is fearfully and won-derfully made." But physiologists all conede that the most wonderful portion of man is the nervous exstem. In it are located the sents of life and mind, and the control of all the bodily organs. When the nerves are distroyed, the part is paralyzed. The flesh, blood and bones are as nothing to it. Derangements of the brain or nerves are the causes of headache; fits, dizziness, fluttering of the heart, sexual weakness, sleeplessness, neuralgia, cold hands and feet. A free trial bottle of Dr. Miles' Nervine-the latest and most successful curs for all these diseases, may be had at M. L. Bagg's drug store.
