Sketch of the life of Mrs. Philip Miller, for many years a resident of this village but of late residing with her daughter, was sent to us but failed to arrive at this office. Mrs Miller passed away recently at a ripe old age. Her's was a wonderful life spent in works and thoughts for others during the years of the world's greatest progress. She leaves two sons, a dauhtger, grandchildren and great grandchildren who will miss her greatly.

Obituary

Eunice E. Whitelaw, daughter of Edward and Theodosia Whitelaw, was born near Bloomingdale, No-Aember 14, 1857 and died July 13, 1928, aged 71 years, 7 months and 29 days.

She was married to William H. Adriance of Waverly, Michigan, March 9, 1887. To them were born 4 children: Mrs. Margaret Shock of Colorado Springs, Colo.; Mrs. Effie Kazoo Stove Works will play Starks, Midland and Annabel Adri-Kendall at North Lake Park Sun- ance of Walsenburg, Colo. They had one son, Thomas Edward, who died in infancy.

The family lived in Waverly until 1900 and then moved to Gobles, where they have since resided. Mr. Adriance died in 1909, thus leaving the mother and her 3 daughters to mourn his loss.

Mrs. Adriance was baptised and joined the church at Covey Hill while living in Waverly, and after they came to Gobles she joined the Methodist church here, of which she has been a most faithful and consistent member until her recent death. She leaves not only her family and near relatives to mourn her loss, but a host of loving friends who feel that in her death they have lost a valuable, loyal and faithfu

She was of a modest, quiet and retiring nature, but staunch and true to what she deemed was right, and ever ready and willing to lend a helping hand to those who were

for years to come and her children have a wonderful legacy left to them in the example of a wonderful mother. "They shall rise up and call her blessed."

The following poem, written by one of her daughters as a tribute to her mother on "Mothers" Day" will attest the value she placed upon a mother's true worth.

INSPIRATION

There's a face on the wall of my memory I carry it always with me.

Tis wrinkled, and careworn, and haloed

by gray, Beautiful, wonderful; day unto day.

I see in it clearly as closely I scan

The pages of girlhood, of grown woman land.

Hardships and longings, so many unfilled, Of bitter days, joyous days all of us feel, Of sorrows, and sadness __of death's heavy

But over it all comes the greatness to stand.

And carry her children along with her too Prayers for them, tears for them, Fears__alas__true.

She fights for them-strives for them, Ready to die for them, That's painted clear.

And out of it all comes a sweetness that cheers,

A patience, a kindness of spirit so true; That's my inspiration ... Dear mother—'tis you.

Card of Thanks

We wish to thank our friends for their kindness and sympathy during the illness and death of our beloved mother.

Mr. and Mrs. Earl I. Shock and Family,

Mr. and Mrs. Steve Starks and Family,

Miss Annabel Adriance.

Sunny Day Club

Sunny Cay Club met with Mrs. Alice Simmons Thursday, July 12. It being the birthday of Sister Ada Pike, they were both given a handkerchief shower.

Two beautiful pink and white oirthday cakes were features of the bountiful dinner.

Thère were twenty members present and ten visitors. After dinner we adjourned to the lawn and Mr. Simmons informed us if we moved please look pleasant, wnich we always do, he would try the effect of his camera. The camera seemed to stand the test and six pictures were taken.

Our meeting was then held on the lawn which consisted of the usual good readings etc. A letter of thanks was read from Mrs. Nellie Waber, also a communication from Mrs. Hattie Phelps and others sent thanks for being remembered by the club.

After our prayer we adjourned to meet with Mrs. Ida Walker July 26 and the hostess served ice cream and cake just before the guests departed for their homes.

O, Alice has an ideal home and she's a loyal member and the day the ladies met with her I'm sure they'll long remember.

GEESE MAKE PROFITS WHEN GRASS OF ANY KIND IS AVAILABLE

period is the most economical basis the starting place. for the raising of geese. A stream or pound, or even tanks of water may ids at noon and will spend the afterserve for the aquatic needs of the noon of the first day inspecting po birds, and shelter may be reduced to tato fields in the vicinity of Green a minimum. In the south none is re-ville. The Greenville business interquired and in the north a simple shed ests are reported to be planning speably in all parts of the United States, will proceed north from Greenville. but are more abundant in the middle west and the south. In 1920 Illinois with nearly 200,000 geese closely fol- announced by the sponsors is as followed by Missouri, Arkansas and lows: Iowa led in production of geese. Kentucky, Tennessee, Minnesota, North of Stanton Elevator Co. at Stanton; Carolina and Texas followed, but this visit certified fields and warehouse of four leaders.

'Geese subsist largely on grass dur-Lee, author of Farmers' Bulletin 767-F, "Goose Raising," just pub-lished in a revised edition by the United States Department of Agricul-

Geese grow to much heavier weights than chickens, but the price per pound on the markets is usually several cents less than for chickens. Some in Petoskey. of the geese are sold from the farms to specialists in the fattening of the birds, and then go to market, largely in the cities where foreign population creates a demand.

The bulletin describes the principal breeds of geese found in the United States, the Toulouse, Embden, African, Chinese, Wild or Canadian, and Egyptian. It gives directions for housing, selection and mating, incubation, care and feeding of the goslings, and preparation of stock for market. An acre of grass will supply nearly if not all the food for from 4 to 25 geese, with perhaps 10 to an acre as an average. In the south some cotton growers keep geese for the sake of their aid in keeping down weeds in cotton fields.

Farmers' Bulletin 767-F may be obtained free upon request to the Department of Agriculture, Washington,

Special Crops Give Good Yields of Hay

Soybeans and Sudan grass as emergency hay crops where seedings of the legumes have been winter-killed are recommended by the farm crops department at Michigan State college.

Soybean hay has about the same feeding value as alfalfa hay, and the yield of hay will average two and one-half tons an acre. Soybeans are usually planted the last of May or the first of June, in 28-inch rows.

Manchin, to San, and Midwest are the varieties that usually are most satisfactory for Michigan conditions. Soys are ready to cut for hay in late August or early September. Un-

der bad weather conditions, the hay can be cured satisfactorily by using the McNaughton system. Sudan grass makes a good emer-

gency pasture crop. When sown the last of May, it will be ready for pas- development of the agriculture of the rate of 20 to 25 pounds to the acre. A drill set to sow two pecks of wheat to the acre will sow the required amount of Sudan grass seed.

For hog or sheep pasture, rape is a satisfactory crop. From three to five pounds of seed to the acre are required. If the field is divided so that the stock can be shifted from one part to another, the crop will furnish good forage until late in the fall.

Suspect Mikado's Gift May Have Carried Insect

It may be impolite to "look a gift horse in the mouth," but Michigan Uncle Sam had more closely inspected will furnish as much grazing as a those lovely flowering cherries, presented to President William Howard Taft in 1913 by the mikado of Japan.

Some horticultural authorities are nclined to suspect the flowering cherries furnished free transportation into the United States for the oriental peach moth, an insect which has become widely distributed.

The moth attacks and severely injures peaches, quinces, apricots, cherries, plums and sometimes apples and pears. No satisfactory method of control has been found or is likely to be found soon owing to the difficulty of reaching the caterpillars with poisonous sprays.

Urges Larger Poultry Houses

Too often the mistake is made of building a small poultry house with a low roof, involving drudgery in the care of the chickens. Labor is an important factor in the management of poultry and the arrangement of the house for convenience adds greatly to the chances of success. should be built so that the attendant can stand up and do the work comfortably; and if from 3 to 5 square feet of floor space per fowl is allowed this will give enough cubic air space for the flock.

Speaking of Kansas and Kansas wheat, let's remember that Iowa grew more corn than any other state last year-nearly 400,000,000 bushels.

August 6 Date of Annual Spud Tour

At Stanton Aug. 7 The remainder of the itinerary as

Aug. 7.—Inspection of warehouses group of states was much behind the F. W. Johnson & Son at Wyman; dinner and noon entertainment at Barryton; inspect certified potato fields ing the growing season and are the at Henry Curtis' farm near Lake City; closest of grazers," says Alfred R. special entertainment and banquet at Cadillac in the evening.

Aug. 8.—Inspect potato fields near Manton and Fife Lake; dinner at Mancelona; swing east through the potato belt around Gaylord, Vanderbilt, Wolverine and Alanson en route to Petoskey; view \$1,000,000 sunset from bluff before attending banquet

Aug. 9.-Visit fields near Petoskey, Charlevoix and Kewadin; dinner at Traverse City; sightseeing trip in the Grand Traverse Region, returning to Traverse city in the evening for a banquet and entertainment.

To End at Augusta Aug. 10 .- The tour will continue south along lake shore through Benzie, Manistee and Mason counties, inspecting fields on route to Hart for dinner. Fields about Hart and Shelby will be inspected before proceeding to Grand Haven to spend the night.

Aug. 11.—Potato fields near Hilli ards and Paw Paw in Allegan and VanBuren countties will be inspected the last day. The final stop of the tour will be at the Kellogg far near Augusta. Out-of-state guests will be taken to Kalamazoo to make train connections.

Farmers' Day Program Fixed

The "Combine," labor saving development in the farm machinery field which handles harvesting and threshing in the same operation, will be seen at work under actual field conditions as one of the features of Farmers' Day at M. S. C. on July 27, according to plans of the college au-

Inspection of hundreds of acres of experimental work on the college farm, with the "Combine" demonstration as the high light, will occupy the morning of the day. The experiments and test work will cover: farm crops, soils, horticulture, poultry, livestockin fact, all the standard work of the extensive college experiment station.

A new type of entertainment is also under consideration for the after noon meeting, according to tentative plans of the Farmers' Day committee. Historical pageants tracing the early Michigan, are being planned to supplement the music and speaking program.

Sweet Clover

Nitrogen is the most expensive fertilizer there is, but a crop of sweet clover when plowed under will add without cost a good supply of nitrogen taken from the air. Sweet clover forage is also high in protein, which is an expensive element in livestock feeds. A second season's growth of a biennial sweet clover may be grazed as pasture from early spring until the plants are too woody to be palatable, which is usually about the end of There is no other plant that stand of sweet clover in its second season. This crop will grow almost anywhere, provided there is sufficient time in the soil and enough rainfall.

Large Quantity of Grain Marketed on Co-operative Plan

Wheat, corn, oats, rye, barley, flax, and other grains to the amount of one-half million bushels were marketed during the 1926-27 season associations listed by the United States Department of Agriculture. This grain has a sales value of approximately \$450,000,000. The quantities handled were estimated as follows: Wheat, 213,000,000 bushels; open to the south is sufficient. Geese cial entertainment and a banquet for corn, 152,500,000 bushels; oats, 98,can be raised successfully and profit- the visitors in the evening. The tour 500,000 bushels; barley, 16,500,000 bushels; barley, 16,500,000 bushels; flax, 9,000,000 bushels; rye, 8,500,000 bushels; other grains, 2,000,000 bush-

> Nearly one-half of the total quantity of grain was handled by the association in three states-Illinois, Iowa, and Kansas. The associations of eight states handled more than four-fifths of the total.

> Of the 23 states in which the 3,330 associations were located, Illinois with the largest number of associations handled the most grain, its 439 organizations being credited with marceting 110,000,000 bushels having a sales value of \$73,000,000.

> The total value of the grain for the various states was largely influenced by the quantities of wheat handled. In those States where the associations were engaged chiefly in marketing wheat the values were larger than in those states where corn or oats were handled in large quantities.

> Owing to a partial crop failure in sections of the spring-wheat area in 1926, the number of bushels handled is probably smaller than would be the case in a normal year.

> Approximately 17,500,000 bushels of wheat were marketed by the nine wheat pools which were active in the 1926-27 season. This quantity, added to that handled by the farmers' elevators, makes a total of 230,500,000 bushels of wheat marketed by these two types of associations.

OSBORN SCORES BRULE LOCATION

It was a great injustice to the north country to induce the president of the United States to spend the summer "in a cedar Swamp" on the Brule in northern Wisconsin, Chase S. Osborn declared at Escanaba recently. "I have fished the Brule," he declared, "and the fishing is indifferent. The whole district is mosquito-ridden and blackfly-infested. It is a damp, cold, cheerless hole. The president would have been much more comfortable on the shores of your Bay de Noquet, or in scores of other spots I know in northern Wisconsin and the Upper Peninsula of Michigan," Mr. Osborn declared. "He would have had a much more accurate idea of the northland, and so would the people who are reading about the activities around the summer White House."

Mr. Osborn's love of the out-ofdoors led him on an unusual excur-Accompanied by his son, George Osborn, who accompanied him to Escanaba, the former governor slipped away with a "dime's worth of cheese, a bag of crackers and a couple chocolate bars," to a spot a couple of miles south of the city. "Here we found a low spot," he said. "We built a fire, pulled up a log, ate our lunch and then picked wild strawberries for Then we played seven-upa grand old American game. I have always claimed that holding 'low' in a seven-up game is an art seldom attained by a great majority of the men who think they are card players. Geo. knows that I held it nearly every time. I won't tell you how many times I let George deal, either. That also is an old-time accomplishment of mineletting the other fellow do the deal ing. Anyway, we had a wonderful afternoon-warm, cheerful and a lot more satisfactory than sitting on a screened porch on an island in a northern Wisconsin river.

The former governor's skill in the gentle art of seven-up was reluctantly ALLEGAN WINS OUT conceded by the son.

"He won four out of five games," George confessed. "I don't know how many hands he really held 'low' but I know he counted 'low' most of the

The wing stanchions on the car deck also are to be taken out. Carferry No. 15 was built in West Bay City. It was the first steel carferry on the Gerat Lakes.

Farmer's Horses Attacked by Deer

A. E. Greenhalghe, a farmer living in an isolated region near Hoxieville, was frightened when a big buck charged out of the brush and attacked his horses. The deer's horns became entangled in the harness and he was thrown to the ground by the plunging team. Becoming extricated the deer fell back and the team passed on.

Mr. Greenhalghe cannot account for the unusual action of the animal as at this time of the year deer are very docile, the horns of the bucks being scarcely out of the velvet.

Deer usually are friendly with domesticated animals, often grazing with them in the pastures. It is the opinion of local hunters the deer must have been unusually frightened or bewildered to attack a team of horses.

New Plant Rumored

Although official confirmation from the Ford Motor company was lacking, recent rumors stated that the company was planning to build a dam and lake on the Rouge river, between the Ten and One-half Mile and Twelve-Mile roads, in Southfield township, Oakland county. The purpose of the reported dam would be to provide water power for a new Ford automobile parts factory. Ford has owned river rights in this section for more than 10 years and recently added to his holdings a 30-acre farm in the Rouge valley directly north of the proposed dam site.

Many Tourists Visit State Parks NEW SHOCK ABSORBER

Early season attendance records at the state parks are being established according to P. J. Hoffmaster, superintendent. This despite the unusually cold weather that has prevailed in practically all sections of the state. Away to a flying start, Superintendent Hoffmaster believes that citizens will, more than ever, appreciate the huge playgrounds that the state has provided for rest and recreation. More out-state tourists have been registered at the parks at this time than in any previous year. This indicates that the tourist business may enjoy a record season in 1928.

Playground equipment for the use of children will be installed in upward of 45 parks this year. This feature, introduced in 11 parks for the first time last season, provide an excellent attraction. The equipment includes swings, slides, see-saws, etc.

HAS UNIQUE FEATURES

After several years of experimen-tation with shock absorbers, combining the principle of hydraulic and pneumatic cushioning of road shocks, Continental Motors Corporation announces a perfected shock absorber involving entirely new operating features. According to Continental officials, production will start at once.

The new shock absorber will be known as the Continental Hydrocheck. The long sought for principle of combined hydraulic and pneumatic cushioning has been developed by Continental and is the result of a free center" air cushion, an exclusive feature that has been the goal of inentors for many years. In describing the new product, Con-

inental engineers point out that when a car equipped with hydro-checks is driven over a smooth road, action of the shock absorbers is against air. This leaves body control free to car spring and balloon tire action. When The United States Forest Service a hard jolt is encountered that needs started the expansion of work on the control to assure passenger comfort. establishment of national forests in shock absorber action is against oil. Michigan. Government officials have Thus adequate body control is assured

It is by means of the "free center" The shock absorber is divided into high and low pressure chambers, each containing both oil and air. A compression piston operation in the high pressure chamber co-acts with the arm of the shock absorber which receives fact and the oil in the high pressure chamber is an air space.

Kazoo Hangar Completed

Harvesting Flax

The usual method of harvesting fiber flax in European countries is by hand pulling, and this method has also been used in certain sections of the United States where laborers could be hired at reasonable rates. Marked improvements in the efficiency of flaxpulling machines have been made in recent years, and the expensive backaching work of hand pulling is being superseded by machine pulling.

Sink High Explosives

The War department says that dangerous high explosives, which cannot be salvaged and have no money value. are sometimes disposed of by dumping them into the ocean. Such ammunition in small amounts has been so disposed of since the World war. The approval of the secretary of war is necessary before ammunition may be destroyed in this way. No act of congress is necessary.

Great Musician and Wife Fond of Pets

the Belgian statesman, was visiting 1928. the Paderewskis some years ago at their beautiful place on Lake Geneva, Paderewski, one evening after dinner, sat down at the piano and began to

play Chopin. "I was astonished," says Mme. Vandervelde in her book, "Monarchs and Millionaires," "when, at the the first notes, a parrot flew across the room and alighted on the musician's right foot, which, it appeared to me, must be a great hindrance to his use of the pedal. When he had finished playing, the parrot flew onto his shoulder, exclaiming, 'Good boy, good boy,' with great gusto."

Another surprise for Mme. Vandervelde came from Mme. Paderewski who had a passion for chickens. At dinner one evening when everyone was dressed in his best, Mme. Paderewski received a whispered message. In great excitement she called for her overalls and rushed out of the room. Paderewski explained to his astonished guests that some new kind of chicken had been hatched out in the incubator, and that his wife simply had to be present on all such occa-

Petrarch as Scholar, Among World's Great

Francesco Petrarch, a leading figure in the revival of learning in Europe, was in greatness inferior only to Dante. His greatness belongs to a history of literature rather than to a story of human progress.

He lived before the invention of printing, being born in 1304 and dying in 1374. He was a great and an original scholar, the first scholar to collect an important library, and the first scholar of medieval times to write of ancient Greece and Rome as if they were times when men were actually alive and not as if they were museum exhibits

Petrarch wakened his age to the importance of scholarship. He did more than any other man to prepare Italy for that glorious age known as the Renaissance.

Living in an age that saw medievalism nearing its close and modern times beginning, Petrarch looked back toward the past and forward to the future. He was both medieval and modern by turns.—Kansas City Star.

Coelebs' London

It must be confessed, however, as I have since found, that for giving a terseness and a polish to conversation; for rubbing out prejudices; for correcting egotism; for keeping selfimportance out of sight, if not curing it; for bringing a man to condense what he has to say, if he intends to be listened to; for accustoming him to endure opposition; for teaching him not to think every man who differs from him in matters of taste a fool, and in politics a knave; for cutting down harangues; for guarding him from producing as novelties and inventions what has been said a thousand times: for quickness of allusion, which brings the idea before you without detail or quotation; nothing is equal to the Miscellaneous society of London,-Hannah More in "Coelebs in Search of a Wife."

Suburban Homecoming

Those interested in changing customs and manners may have noted that the busy housewife in suburban regions does not now wait to greet her squire at the door of their home on his return from daily labors. Instead she hops into her car and meets him at the railroad station, taking the children with her. They "climb his knee the envied kiss to share" on the platform of the station or in the automobile. Even the dogs and dolls are included in the welcoming party.

Not long ago at one of the small stations close to New York there were about twenty youngsters and a dozen dogs waiting for fathers and n sters at sundown. When the train pulled in the scene was as lively and stimulating as a circus.-New York Times.

Chinese Actors Under Ban

Prof. Edward Thomas Williams in his book, "China Yesterday and Today," says: "The actors theoretically form one of the despised classes in China. Under the old regime they and their descendants for three generations were not allowed to enter the examinations for civil service. They were classed with beggars, barbers, butchers and chair-bearers, who, because of the menial services performed or, in the case of butchers, because they were familiar with the sight of blood, were regarded as unfit to hold office. There were always ways of removing the handicap, however, if one were eager to enter the service, for he could be adopted as a son by some one who was free from the disqualification."

Prosperity and Pie

Apple pie is now blamed for American prosperity.

"American pie breeds dyspepsia, restlessness and dyspepsia breeds restlessness begets a feverish but none the less formidable material progress," declares the London Evening News in lamenting displacement

of the good old English apple tart by

foreign substitutes. "The American apple pie is the sneer gastronomic equivalent of an incendiary bomb."

U. OF M. PROSPECTS **NOT BRIGHT FOR COMING YEAR**

Except in baseball and swimming, where many of the athletes who helped win conference championships during the past season are returning, Michigans' hopes for a successful year in Big Ten competition are not prom-

Captain George Rich, Geistert and Gembis are the only veterans Coach Wieman will have available for the 1928 football team. Gembis is the only man who started the Ohio State dedication who will be eligible for the next season. However, Coach Wieman, his new assistant, Franklin Cappon, and other helpers have a host of enthusiastic freshmen and reserves as a nucleus for a new team.

Michigan's football schedule with Wisconsin, Illinois and Iowa playing at Ann Arbor will provide three sellout games if the number of applications already received and returned unopened offer any criterion. The annual game with Michigan State has been moved from second position on the schedule to seventh. With Harry Kipke, former coach and star at Michigan, new head football coach at Michigan State, a different type of game can be expected from the Lansing team. Kipke would certainly delight in beating. Michigan and will have a "die hard" spirit imbued into his team for that game.

Captain Ernest McCoy is the only basketball player with a reputation who will be available for next season and again, as in football, the success of the season will depend upon untried freshmen and reserve material.

The success of the 1929 Michigan track team, according to Coach Stephen J. Farrell, hinges on the continued point winning ability of Captain W. H. Kotz in the hammer throw and three new men in the running events. Two of these athletes, all of whom have just finished a year on the freshmen team, were members of the Detroit Cass Tech high school team which won the national championship a few years ago and the third is a quarter miler of varsity caliber.

The loss of two infielders and an outfielder from Coach Fisher's Conference championship baseball team will be offset by new freshmen material by the time the 1929 season gets under way. The pivoted positions on the next baseball team will be taken care of by regulars; second base by the veteran Captain Corridon, third base by Weintraub, remembered by winning the Harvard-Michigan game with a home run, McAfoo and Asbeck, veteran pitch-

ers, and Reichman, veteran catcher. The 1929 swimming team under Captain Richard Spindle will be a well balanced team, without holders as the 1928 team, yet capable of upholding Michigan's Big Ten swimming reputation.

More Iodine Needed By Growing Children

Are you getting your share of

It is a generally accepted fact in this part of the country that our foods prevent goiter. More general use of sea foods is advised by diet authorities. Children especially need them, they say.

The western coast furnishes much canned fish which is valuable for the iodine it contains. From the east, Michigan people may obtain canned or fresh oysters or salt sea fish. Both the canned and fresh oysters are especially recommended because they are also rich in the substances which help prevent rickets.

Iodized salt is also recommended by many doctors, although they warn that when it is used, care must be taken to make sure that all the members of the family who need iodine use the salt.

Poems That Live

SONG

where

Stay, stay at home, my heart, and Home-keeping hearts are happiest, For those that wander they know not

Are full of trouble and full of care To stay at home is best.

Weary and homesick and distressed, They wander east, they wander west, And are baffled and beaten and blown about

By the winds of the wilderness of doubt;

To say at home is best.

Then stay at home, my heart, and The bird is safest in its nest;

Over all that flutter their wings and fly A wawk is hovering in the sky; To stay at home is best.

Henry W. Longfellow (1807-'82)

Amelia in London Settlement

Miss Amelia Earhart, first girl transatlantic flyer, snapped at Toynbee a London social settlement, surrounded by the inmates. It is a familiar scene for the girl flyer, as she engaged in welfare work in Boston, Mass., prior to her ocean flight.

State Music Teachers To Meet in Grand Rapids Next Year

At the state music teachers convention just closed in Detroit the invitation to hold the next convention in Grand Kapids in June, 1929, was accepted, unanimously.

Miss Marguerite Colwell read a

paper on "Is Jazz an Aid or an Interference to Music Study?" Various phases of this subject were presented by other speakers and was west diet is prescribed, however, a subject of discussion. The teachers Vegetable Chowder agreed that in this period of a new and changing order, of which jazz seems to be an expression, the matter should be regarded understandingly and that it may be used as a means toward interesting music students in the fundamentals of music and the

Country Salad-Cut cabbage in half. Shave very fine two cups. at all wilted cover with cold water for one hour and drain. Wash red apples, cut two cups fine, lightly toss with two tablespoons sour cream, onefourth teaspoon salt, two teaspoons

SUGGESTIONS

Care of Silk Hose "Wise choice and good chiffon hose will prolong their life and cut down the now mounting hosiery bill," asserts a prominent manufac-

turer of silk hose. "Always buy a full-fashioned stocking. If an 'out size' or a slender leg' fits better than the regulation size, be sure to ask for and get it. Look for the garter run stop, for new hose are

old hose after a run appears. "Put on a stocking carefully, first turning it inside out and working it on from the toes. Reverse the process and avoid strain on the delicate silk

when taking the stocking off. "Buy a hose a quarter of an inch, or half a size, larger than you like. They will prove more comfortable and

wear longer.

"Rinse new stocking in cold water before the first wearing and in the suds of mild soap as soon as possible after they are worn. Wring them out in a towel and let them dry in the shade. Never rub soap directly on

"Get several pair alike and then if you have an accident, odd stockings can be matched."

Mending Hint

When darning stockings thread three needles with yarn before starting. It is often awkward to lay down the work to thread another needle. When there is much darning this is a real help.

Western Teachers Start Museum

Plans are being made at Western State Teachers college for a museum collection of articles of historical interest . Dr. J. O. Knauss of the department of history and social sciences is chairman of the committee

It is proposed to gather together as one feature of the collection a complete assortment of articles which went into the furnishing of a Michigan pioneer home. To this end contributions are being asked of equipment found in old homes, such as beds, clocks, andirons, kitchen utensils, locks, keys, spinning wheels, farming utensils, plows, harness, wagons, etc. It is planned to have one room furnished with the equipment for this pioneer Michigan

In addition books of olden days, costumes, Indian relics, specimens of eary currency, equipment in old schools and churches, hunting trapping and fishing implements, geological specimens, relics of the Revolution, the Mexican war, the War of job. 1912, the Indian wars and the World war, old flags and signs, and many other similar articles are being sought.

Several contributions already have been received. One of these is a cannon fired in the battle of Brandywine. Another is an Indian club used by Cheyenne in the Battle of the Little Big Horn.

Salads for Hot

Now that the hot summer days are here, there is nothing like an attractive idea of a regular engineering profestime you spend in learning from ive salad to tempt the flagging appearance in the winner of tite. Salads supply water, mineral nutrients, acids, bulk and flavor to the diet, and so are an excellent food. The dressings contain oil and acid, and some other ingredients as egg and milk. Salads are especially good as a means of serving raw vegetables or fruits attractively. It is possible to utilize left-over foods, thereby making an economical dish. French, cooked, mayonnaise and whipped ed. Various vegetables or fruits may up everything to make him happy.

WEEK OF JULY 22

General Farm Outlook-As far as the state we are expecting precipitation for week beginning July 22 to be similar to last week. However, this week will be drier than last week. While temperatures will range normal or above over the greater part of the state during the week, we do not believe the readings will be as high as last week. This ought to be a good week to harvest wheat and rye ic those counties where the crop is ready to cut. Oats and barley should ripen and corn, also, should be doing nicely. Potatoes, beets, beans and other truck will generally find this week mostly favorable for their advancement. Meadows and pastures will make good

Weather for the Week-The excessive warm weather predicted for the latter part of last week will run over into this week with electrical storms and generally light precipitation.

By Monday or Tuesday there will be a sudden drop in the temperature to more seasonal conditions and then will follow a day or so of generally pleasant weather.

About Thursday there will be a return to cloudiness, warmer weather and local showers and thunderstorms. Some rather strong winds are also expected locally during the passage of this storm center over Michigan.

Unsettled to stormy weather will remain throughout the balance of the week over most counties of Michigan.

Farmers and Politics-Regardless of the political party ruling or the bills passed by Congress, the farmers of the eastern half of the United States will find the period of two weeks either side of the last day of July more or less successful to them and the majority will be looking on the rosy side of life.

"Phillips Milk of Magnesia" Better than Soda

Hereafter, instead of soda take little "Phillips Milk of Magnesia" in water any time for indigestion or sour, acid, gassy stomach, and relief will come instantly.

For fifty years genuine "Phillips Milk of Magnesia" has been prescribed by physicians because it overcomes three times as much acid in the stomach as a saturated solution of bicarbonate of soda, leaving the stomack sweet and free from all gases. It neutralizes acid fermentawithout purging. Besides, it is more pleasant to take than soda. Insist only thing to be considered is—do upon "Phillips." Twenty-five cent you care to marry me now?" upon "Phillips." Twenty-five cent and fifty cent bottles any drug store.
"Milk of Magnesia" has been the U. S. Registered Trade Mark of The Charles H. Phillips Chemical Co. and its predecessor Charles H. Phillips Chemical Charles its predecessor Charles H. Phillips

How Much Water **Should Baby Get?** A Famous Authority's Rule

By Ruth Brittain

Baby specialists agree nowadays, that aring the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing him before and after feeding for the whole day; and it is easily calculated for the bottle fed one. Then make up any de-

ficiency with water.
Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him a few drops of Fletcher's Castoria. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is on the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full non's niece! Todd was admittedly a nourishment from his food, so he in criminal! creases in weight as he should. You resent the intrusion of our pointed. love into a conversation which deals: He told himself bitterly that he with the intense practicality of this was a fool and an ingrate.

"You're not!" "Perhaps. You are sure, though, that you wish to marry me?" Certainly.

"Then that solves a problem for love for her. He leaned across us. Now listen carefully. Just at this table and took her hand.

moment, you are safe. You can do pretty much anything you like—despite Carmody—so long as you are She tried to control her vocatain of Pater Bordon's attitude "You'll meet me here—at this table." certain of Peter Borden's attitude. Isn't that so?"

"Good. Now to another thing: Perhaps you were surprised that I we'll be married in Chicago, Kathdidn't upbraid you when you told me leen. I'm so happy." that you had stolen this money."
"Frankly, I was."

"That's because you don't understand me. You see, Bob, I would have been bitterly disappointed if you had done anything else which was not honest. But I look at this right to do anything to Borden you wish. And his attitude is proof that you and I are right. I should hate to think that you would ever again steal from anyone, but I don't blame you for what you have done."

He looked at her through narrow eyes. "You really mean that?"

"Certainly. Now let's get down to the practical side of things: You

have \$200,000 in bonds which are readily convertible into cash, provided you are careful. You must get them away from this city at once. With that amount of money was to the provided to the provided that the provided the provided With that amount of money you can go somewhere—perhaps to the Pacific coast-and live in safety and comthat we might go west together, take the bonds with us—and get married dered. immediately.

She ceased speaking and somehow although her eyes looked into his, he fancied that she did not see him. He

succeeding not at all.
"You propose that I take these bonds, go west with you, marry—and live for the rest of our lives on this He was incredulous—and showed it.

We can use that money to tions in the bowels and gently urges the souring waste from the system You have taken what even Borden or his daily acquaintances! maddening uncertainty.
"I'll do it, Kathleen. Of course—

"Good."

"When?"

Her response was ready; she was almost too ready. Bob was annoyed—and disappointed.

You haven't much time. Just two days. Borden will then report to the directors that he cannot recover the bonds. If you are still in the city, you will be arrested."

"Are you sure?"
"Positive."

"But if they are watching me that close—and if what you say about Carmody is true—won't they stop me if I try to get away?"

"I've thought of that, too. My idea is this: Tomorrow morning you are to get the bonds from wherever you have hidden them. Wrap them plainly in brown paper and bring them to me-"Where?"

"Anywhere. Not the office, of Anywhere. Not the office, of course. I'll meet you for lunch. Right here. Meanwhile, I will have packed my grips and I'll leave on the four o'clock afternoon train for Chicago. You can join me there and we can discuss plans for going west. Perhaps we'll be married in Chicago and make the trip together. Perhaps we'll be married in Chicago. and make the trip together. Perhaps we'll wait until we get to the coast." She seemed so unnecessarily cold-blooded. "At any rate, they won't suspect that I have the bonds cold-blooded. —and if they should stop you at the station, you'll have nothing there to incriminate you. As soon as we reach whatever city we decide on, we'll put the bonds away—just as you have them here—and convert them into cash a little at a time. It is really quite simple, don't you

He hesitated. "Very—the way you tell it."

"The only important whether you are sure you care to marry me." She seemed very inmarry me." She seemed very insistent. "If you do, I think we had better go right ahead."

A single irrelevant thought came

to the young man and hammered on his brain:

Kathleen Shannon was Todd Shan-

He had thought Kathleen was different. Yet he might have known-

another quirk of chance had eyes followed her. A sad, tired little smile flitted brief- freed him and proclaimed his innoearning a livelihood; Kathleen had given sympathy and understanding "Please have a seat, Miss Borden. and companionship; Todd Shannon Sit down, Bob." -robbed him of the necessity of Kathleen seemed hovered in the background to advise

> He wanted to throw the bonds counted the creeping minutes.
> At ten minutes before the appoint-

ed hour he was in the restaurant. It was virtually empty; a few patrons sat here and there, but the noon rush had not yet started. lected the same table he and Kath-leen had occupied the day before, and sat pressing the heel of one foot on the toe of the other, left hand clenched tightly over the package of bonds. His eyes moved restlessly about the modest place; he feared to see Carmody or Peter Borden or Whispering Willie Weaver. Or Eddie Mulcahy, Carmody's gumshoe man.

Kathleen Shannon was at the tabl before he knew she was in the place, and he flashed her a startled glance.

She smiled reassuringly.

"Have you the bonds, Bob?"

He shoved them toward her. "They're in that newspaper." Then "For God's sake, be careful, Kath-

leen.

"I won't lose them." "I don't mean that. I mean I'm afraid to have the things around.
I've suffered this morning—"
"Regret?"

don't know. Really I don't. Maybe it is regret and maybe it's fear. You scared me. I don't want you to become involved in this mess. "Don't worry, Bob. Her voice was

cheerful, her eyes unnaturally bright.
"Everything will work out right."
"You have packed?" "Yes."

"We marry in Chicago?"
"You're sure that is what you want, Bob?"
"Of course."

"Whatever you wish-" He no-

ticed that her cheeks were colorless. The waiter appeared and they ordered. And because they were both under terrific strain, they chatted with assumed lightness. was filling; there was a steady scrap-ing of chairs, the sound of feet, the clatter of crockery and silverware. He saw Kathleen reach across the table, transfer the parcel of bonds from the newspaper to the bag she carried, then fold the newspaper carefully and replace it ostentatious-ly on the table. She seemed to radi-

ate strength and courage, and Bob felt some of his fright vanish. But he was not happy. Bewilderment still cloaked him, and he felt a sense

She smiled upon him; a wan, tired little smile that was strangely with-out animation, and, as from a distance, he heard Kathleen's cool, quiet

CHAPTER XLII

table—Kathleen Shannon, niece of a convict; Lois Borden, daughter of the there was no mistaking their emotional unrest.

Lois Borden here! Certainly not accidentally. Bob's teeth caught his lower lip and pressed until he experienced an actual twinge of pain. That seemed to help. Once again he was struggling against forces stronger than himself. He kept silent, and focussed his eyes upon his plate, waiting for the others to speak.

It was Kathleen who first broke the silence. He saw her open the hand bag and take from it the brown which contained \$200,000 worth of bonds. Quite calmly, she handed these to Lois Borden.

"There, Miss Borden," she said quietly, "are the bonds!"
Lois' eyes opened wide. She caught

package to her and sat staring. Bob blinked. Kathleen did not surprise him to the extent that Lois did. He would have thought— But no, Lois was unquestionably startled.

"You will find them all there, Miss Borden. You will give them to your father at once.

Lois found difficulty in speaking. Her eyes clung gratefully to Kathleen's face.

"You did this?" "I? No, indeed." Kathleen was speaking softly, but every word beat on Bob Terry's eardrums. "Bob did. was certain he would. You see, Miss Borden, Bob isn't a thief.

hasn't it in him to be one. He hated your father—or thought he did. He built his whole life on single thought of squaring accounts. And when he was told of his chance -it rather swept him away. Do you understand?"
"Yes." T The golden head was in-

clined slightly. "But he has been miserable ever since. Not frightened, mind you,

was frightened," interrupted "Scared to death. And let me Bob. make one more thing clear, Lois; that was not my idea. It was Kathleen's. I never would have done it." He stared belligerently. Kathleen

questioned him.
"Are you glad I have done this,
Bob?"

He hesitated, then nodded. "I believe I am. I'm not sure—it isn't all quite clear to me. But I think I

Kathleen turned back to Lois. "It clears things up for him. He's had his chance at your father, and he's finished with it. That feud is ended, isn't it, Bob?"

"You see, Miss Borden, he was unhappy because he is naturally decent, naturally straight. This is going to give him a pretty firm basis on which to build. He didn't have that before. He would have gone through life with an unfinished

"I understand, Miss Shannon. I understand that you have been wonderful. I'm too choken up to talk."

Bob could not look at either. He felt the dynamic force of their. He inclined the same state of their sam

sonalities, but his own brain was not idle, and his instinct was at work. He felt that Kathleen was right. He had been piloted through treach erous shoal waters and brought once again to a deep and placid stream. His bitterness against Peter Borden had been vanquished by this brief taste of power over the older man He had been snatched from the fire through no volition of his own, but he felt that his feet were on firmer ground for the experience. He knew instinctively that his future would be builded solidly, that the falseness of the past few years, and particu-larly of the months since he had

been freed, was gone.

He wanted to put it all into words, and knew that he couldn't. The new sense of freedom made him inarticulate. He heard Kathleen speaking.
"I think that just about completes

things, Miss Borden—so far as the bonds are concerned.' "Yes. I won't try to thank you-"Don't. Please. I knew that Bob would be grateful." She hesitated for a moment, then went on nerfor a moment, then went on nervously, "I have one thing more to say before I go. It is delicate—and personal—and I deliberately selected this public place to say it. You see, we are cleaning the slate, and I feel it had better be done well." She hesitated for a moment, and then: "You know, Miss Borden, that Bob and I were engaged."

and I were engaged."
"Were?" Bob voiced the query. "Yes, Bob-were."

He felt his muscles grow tense. What do you mean, Kathleen?"
She paid no heed to him. Instead. her attention was directed toward

"There is very little I can say Miss Borden. Words are pretty cheap at times." She did not evade. 'I love Bob. I think I always will. But I love him too well to make him unhappy." She paused. The restaurant noises seemed very far away. Just these three in a little world of their own. "I—I'm trying to be sensible—not dramatic. I don't want to interfere. Please don't interrupt. Hear me through.

isn't the man for me, Miss Borden. You see"—softly—"he doesn't love

Please—"
She turned and was gone. As through a mist, Bob saw her pass out of the door. He closed his eyes. 'He was beginning to understand.

The restaurant was crowded. There was a steady hum of conversation, punctuated now and then by a burst of laughter or a stentorian call for waiter. Above the human voices could be heard the clatter of crock-ery and the clink of silverware. Dinners finished their meal and moved through the narrow aisles between the tables. Others swept forward

quickly to their places. Humdrum. Everyday. Identical with fifty other restaurants within a rant. And as he vanished through radius of half a mile. Salaried peo-ple, business executives, clerks, ste-ders were square and that the ghastnographers, salesmen, casuals in the business district. The noon rush—just as it was yesterday; just as it was yesterday; just as it * * *

Bob found Kathleen in her room at the corner, behind the screen of potted palms it was different. With them it was not humdrum, it was not everyday. Tragic drama had flamed in their lives and been played through within the helf here payed. through within the half hour across this-very table. A woman—steady of eye and of spirit—had guided the destiny of a man. Then her task fulfilled, she had made a supreme sacrifice—and vanished.

Bob was dazed. He looked at Lois, but he did not see her. Her face swam before his eyes, and his mind was on Kathleen. It was as though Kathleen had never left. Her personality hovered vividly between them. She had cast a magic spell' over the table—a spell which each feared to break. And it was only a simple gesture on the part of Lois which broke the silence. Lois touched a handkerchief to her

eyes.

"Bob," she said softly, "oh, Bob—"
He nodded slowly. "Yes, Lois," he said, as though in answer to a question, "I think she is wonderful." tion, "I think she is wonderful.
"You don't know how wonderful.

"You don't know how wonderful. You have no idea—"
"I'm beginning to know."
"And you'll always be learning. These"—she touched the package of bonds—"are relatively unimportant. They are merely the signposts." She leaned forward eagerly, blue eyes ablaze. "Do you realize what Kathleen has done for you, Bob?"
"Yes, Lois."
"She has saved you from a mistake

"She has saved you from a mistake which you did not want to commit. She was right when she said that you are not a thief and never could She has—"

"She has taught me a very great eal about myself." His face was flushed and he spoke with difficulty. "I seem to have been going around in circles since I got out of prison, Lois. I've been reaching out—and never touching. Now I feel that I have my hands on something."

"The future. I have gripped it. 'm not afraid any more, and I'm no longer unsure of myself. I've learned to evaluate." He drew a deep breath. "For the first time in nearly

four years, Lois, I am a free man. They looked at each other. For a moment conversation was forgotten. They spoke their thoughts without

equivocation:
"What do you think, Bob?" "About what Kathleen said?" His teeth were clenched. "I don't

felt the dynamic force of their per-tinued—speaking swiftly, as though afraid of her words.
"I cannot be as big as Kathleen,
Bob. But I can be honest. A mo-

ment ago she renounced you. But before doing so, she said that she loved you. What she could say—I, loved you. 'too, can say.'

She balled her handkerchief into a tiny knot.

"I love you, Bob. You are entitled to know that. When Kathleen said e."
—what she did—I experienced a moThe eyes of the two women met ment of exultation. But, Bob, I'm The eyes of the two women met and held. Kathleen spoke in a whisper.

"You love him, Lois. He'll be happy with you. He loves you." She rose swiftly, and smiled bravely.

"You two— You're meant for each other. And please—please—be happy. Please—"
She turned and was gone. As she can give you understanding. Bob, tell me—" standing. Bob, tell me-

She ceased abruptly. "Tell you what, Lois?"

"Isn't it Kathleen that you love?" There was pain in her eyes—pain and happiness. But his words carried no suggestion of uncertainty.
"Yes. I love her."

"Then go to her, Bob. Go to her And — and — God bless you

The blood coursed hotly through his veins. There was new strength in his sinews. He spoke no word. He made no gesture of fare-

He moved quietly from the restauders were square and that the ghast-

Bob found Kathleen in her room

stretched.
"Kathleen," he said gently, "I have

come for you." She read in his eyes the prophecy of a radiant future.

Her words of surrender were sim-

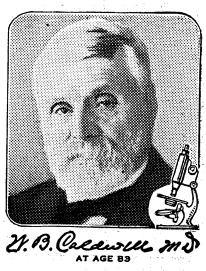

"I am ready, Bob." THE END.

Millions of Families Depend on Dr. Caldwell's Prescription

When Dr. Caldwell started to practice medicine, back in 1875, the needs for a laxative were not as great as they are today. People lived normal. quiet lives, ate plain, wholesome food, and got plenty of fresh aid and sunshine. But even that early there were drastic physics and purges for the relief of constipation which Dr. Caldwell did not believe were good for human beings to put into their system. So he wrote a prescription for a laxative to be used by his patients. The prescription for constipation that he used early in his practice, and which he put in drug stores in 1892 under the name of Dr. Caldwell's Syrup Pepsin, is a liquid vegetable remedy, intended for women, children and elderly people, and they need just such a mild, safe, gentle bowel stimulant as Syrup Pepsin.

Under successful management this prescription has proven its worth and is now the largest selling liquid laxative in the world. The fact that milthat it has won the confidence of people who needed it to get relief from headaches, biliousness, flatulence, indigestion, loss of appetite and sleep, bad breath, dyspepsia, coids and

for emergencies. It is particularly pleasing to know that the most of it is bought by mothers for themselves lions of bottles are used a year proves and the children, though Syrup Pepsin is just as valuable for elderly people. All drug stores have the generous bot-

We would be glad to have you package you get a book on Motherhood terent. Yet ne might have known—worth its weight in gold.

Just a word of caution. Look for the since that four years previously, signature of Chas. H. Fletcher on the when stronger minds than his had signature of Chas. H. Fletcher on the when stronger minds than his had package so you'll be sure to get the genuine. The forty cent bottles contain thence to the state penitentiary—thirty-five doses.

Yet ne might have known—the known—the known—the known—the known—the can and with the tide: Ever of impending tragedy.

Kathleen was toying with ner fork. Suddenly she rose and started forward. Her face was pallid, but there was pallid, but there was a smile on her lips and her thence to the state penitentiary—thirty-five doses.

Interfere. Please don't interrupt. Kathleen was toying with ner fork. Suddenly she rose and started forward. Her face was pallid, but there was a smile on her lips and her hand was outstretched. Bob's amazed what he can and will do. And he will also always have a bottle handy please of impending tragedy.

Kathleen was toying with ner fork. Kathleen was toying with ner fork. Suddenly she rose and started forward. Her face was pallid, but there was corched him, perhaps—but I know what he can and will do. And he will also always have a bottle handy please of impending tragedy.

Kathleen was toying with ner fork. Suddenly she rose and started forward. Her face was pallid, but there without Dr. Caldwell's Syrup Pepsin, and if you will once start using it you will also always have a bottle handy please of interrupt.

Suddenly she rose and started forward. Her face was pallid, but there without Dr. Caldwell's Syrup Pepsin, and was outstretched. Bob's amazed what he can and will do. And he will also always have a bottle handy please of the province of the part of the call without Dr. Caldwell's Syrup Pepsin, and the province of the part of the pa

Push Your Pigs Along **NOW**

The hog market is usually at its height in August and early September. If you have young, thrifty pigs that you can get on this market; it will pay to push them along with plenty of grain as well as letting them run on pasture.

We have just marketed 47 hogs, averaging 278 pounds each that topped the market—these brought 11c and they dressed out extra fine.

They Were Fed on 10 p. c. Hexite A balanced ration—enough other ingredients to offset the heating

The 16% HEXITE is an ideal Dairy Feed to use with pasture you do not need 24% feed at this time of year.
