Plans for library to be continued on basis of bldg to cost \$4,000,000.

10. The President pointed out that the state officials had indicated that funds for capital improvements will be available in accordance with the appropriations made by the legislature. The legislature has appropriated \$1,000,000.00 toward the cost of a library to cost \$4,000,000.00. Our library as designed in 1949 is now estimated to cost, with services and equipment, approximately \$5,300,000.00. It must be decided whether we are to reduce the size of the building or what changes are to be included in the final plans put out for bids.

After considerable discussion, on motion of Mr. Mueller, seconded by Mr. Armstrong, it was voted to instruct the architect to proceed with the development of plans designed to provide the services included in the building as planned. The shell of the building is to be provided with as many of the desired features as can be constructed with the funds available.
