MINUTES OF THE MEETING  
of the  
STATE BOARD OF AGRICULTURE  
November 22, 1954

Present: Messrs. Brody (Chairman); Akers, Mueller, Rouse; Miss Jones; President Hannah, Comptroller May and Secretary McDonel

Absent: Mr. Armstrong; Dr. Taylor

The meeting was called to order at 2:10 p.m.

The minutes of the previous meeting were approved.

SPECIAL MISCELLANEOUS ITEMS

1. The recommendation of the Finance Committee as outlined on the foregoing page was presented to the Board.

On motion of Mr. Brody, seconded by Mr. Rouse, it was voted to approve the recommendation of the Finance Committee relative to the investment of retirement funds.

2. The President called to the attention of the Board the fact that Miss Jones was elected President of the Association of Governing Boards at the annual meeting of that Association in New York last week and that the Association is planning to hold the 1955 meeting at Michigan State College in October.

On motion of Mr. Mueller, seconded by Mr. Brody, it was unanimously voted that the Board express to Miss Jones its congratulations on the honor that has come to her and the fact that she has brought great distinction to this Board and to Michigan State College as a result of her enthusiastic interest in the affairs of the Association of Governing Boards.

3. The College attorney in cooperation with Professor Brandstatter and the Police Department have prepared a traffic ordinance to provide regulations and control of the use of streets and highways within the campus of Michigan State College and for the benefit and protection of its property and the conducting of College activities. The proposed ordinance of 32 mimeographed pages is submitted as a separate document. Ordinance to be effective January 1, 1955.

On motion of Mr. Brody, seconded by Mr. Rouse, it was voted to approve the above-mentioned traffic ordinance. (Ordinance is filed with the minutes of this meeting.)

4. It is felt that it is desirable to have the new permanent student apartments named. Several possibilities have been suggested including: University Village, Spartan Village, Centennial Village, Red Cedar Apartments.

On motion of Mr. Brody, seconded by Miss Jones, it was voted to name the new permanent student apartments University Village.

SPECIAL MISCELLANEOUS, continued

5. The East Lansing City Council requests the concurrence of the Board in their proposal to hire Hubbell, Roth and Clark to present an over-all plan for providing adequate sewage treatment and sludge disposal for a lump sum of \$2000.

Study to be made of present sewage plant with view to changing present site.

On motion of Mr. Brody, seconded by Mr. Mueller, it was voted to approve the above request with the understanding that the City of East Lansing be notified that it is the desire of this Board that the study and survey include the possibility of changing the site of the present sewage disposal plants to a point farther down the Red Cedar River sufficiently removed from college property to eliminate the undesirable features associated with the present location. If the inclusion of this item increases the cost of the study, that will be agreeable with this Board.

6. It is anticipated that there will be a substantial increase in the number of civil engineering students using the Dunbar Camp in the summer of 1955 and that this number will continue to increase for several years. To provide housing for the 85 additional men, bringing the capacity to 160, will require an appropriation of \$20,000 to make possible the construction of five 8-man student cabins at \$2,000 each; one faculty cabin at \$6,000; structural changes in classrooms, clearing of site for the buildings, additional toilets, etc., \$4,000.

Appropriation of \$20,000 approved to enlarge Dunbar Camp

On motion of Mr. Brody, seconded by Mr. Mueller, it was voted to approve the above requested appropriation for the construction of cabins, et cetera at the Dunbar Station.

7. In 1952 the State Fire Marshal surveyed all state institutions including Michigan State College at the request of the Governor. He recommended changes in our structures at an estimated cost of \$822,000. We have included a request for an appropriation to take care of these items the last two sessions of the legislature. The State Fire Marshal has recently resurveyed the institutions to determine how many changes had been made in accordance with his original recommendations. He has now submitted this information to the State Budget Director. The estimated cost of making the changes now recommended is \$547,555. The Board may want to consider requesting the legislature for an appropriation to make possible these changes.

Officers of college to notify Gov. of findings of State Fire Marshal and request appropriation of \$547,555

On motion of Mr. Mueller seconded by Mr. Akers, it was voted to instruct the officers of the College to notify the Governor and the committees of the legislature of the findings of the State Fire Marshal and that it is the desire of this Board to make the necessary corrections and that funds to make them possible are requested.

8. As authorized by the Board, the following communication was recently addressed to the Kellogg Foundation:

"The W. K. Kellogg Foundation  
Attention Dr. Emory W. Morris, President  
Battle Creek, Michigan

Gentlemen:

"As a result of our several conversations discussing the additional requirements necessary to permit the Kellogg Center for Continuing Education to function as effectively as we would like, we submit the following information for your consideration.

"The Kellogg Center for Continuing Education is completing its 38th month of operation. During this time it has accommodated 303,000 room guests and served 1,100,000 meals and 1,100 conference groups with 142,000 conferees having made use of the building. In addition, it has provided instructional facilities for the students and staff of the Division of Hotel, Restaurant, and General Institutional Managements. This three-year period has permitted a study of the functioning of the facilities with respect to the original planning.

"It is now apparent that consideration should be given to expansion of the Center in order to provide better facilities for conferees, guests, and staff members working in the building. In view of the growing demand for future programs, it is urgent that decisions be made now to permit us to determine the number of conferees and scope of the program that may be scheduled in the future.

"At the time the Center was planned the emphasis was on small meeting rooms to serve the groups which might make use of the building. Consequently, our meeting rooms are small and only take care of groups of 10 to 45 persons. As the Continuing Education program developed, the conference enrollments became far greater than originally conceived, and the inadequacy of the size and number of meeting rooms became apparent.

"At the present time, we are unable to accommodate more than one large group (150 or more) at a time in our meeting rooms, and then only in the auditorium. When two groups of this size wish to use the Center, we are forced to move them to other buildings or turn down their requests. An increasing number of conferences need this type of facility, and the problem of scheduling groups and alternating room assignments has become both complex and costly. This has also been true in food service where we are not able to serve more than one group of 100 persons because of the limited capacity of the dining rooms. It is therefore essential that plans be considered for expansion of our facilities to provide more space for meeting rooms and private dining rooms.

"An equally acute need is for office facilities. The rapid expansion of the Continuing Education staff has made it necessary to locate as many as four to six persons in one office. With most of these people engaged in public contact and with frequent interviews taking place in the Center, the overcrowding works to the distinct disadvantage of the service. This year quonset hut accommodations had to be made available to provide desk space for staff members.

Communication sent to W. K. Kellogg Foundation re: request for additional funds for an addition to Kellogg Center.

SPECIAL MISCELLANEOUS ITEMS, continued

## 8. Letter to Kellogg Foundation, continued:

Letter to  
Kellogg Founda-  
tion,

A rundown of the staff shows 60 persons working in 14 offices in Kellogg Center. An additional 20 offices are required to properly house the Continuing Education staff.

"Ten people comprising the staff of the Division of Hotel, Restaurant, and General Institutional Management are currently assigned five offices. These are not adequate for the present staff or flexible enough to accomodate the additional personnel needed for this rapidly growing program. Enrollment for this academic division now totals 450 while in 1951 the total was 285.

"The operating staff of the Center need additional office space for the food director, reservations clerk, and housekeeper.

"A total of 26 offices are needed to properly correct existing overcrowding.

"In the discussions of our people with Lewis J. Sarvis, architect, it appears that the expansion of the building can be best accomplished in the following manner:

1. Expansion of the South Wing to the east in order to provide two meeting rooms that will seat 150 persons each without losing any of our present conference room capacity. This to be a two-story structure in order to use the ground floor for the required offices.
2. Expansion of the dining room of the Center to the west by 22 feet. This would permit an increase in seating capacity from the present 90 to 150. This is an acute need, as we are not able to accomodate the guests and conferees wishing to use this food service facility.
3. Expansion of the Ballroom or North Wing to provide two private dining rooms that will accomodate 150 persons each. The space so obtained can be used as an expansion of the Ballroom when required for larger groups.
4. Construction of a service elevator in the central stair shaft. This provision was made at the time of construction, but the elevator was eliminated to reduce the cost to the funds available. Operation has proven that the two dual purpose elevators are not adequate to handle guests, service personnel, linen transfer, and the other items that must be moved to the guest room floors. An additional elevator primarily for service but with sufficient speed to move passengers quickly would solve this acute problem.
5. Expansion of the Conference Registration and Front Office area 20 feet to the west will provide more adequate space for the se important functions. At the present time, much of the conference registration is conducted in the lobby areas which limits the lounge space and makes for great congestion.

Kellogg Foundation has been one of service to the people. The enthusiastic reception of "The basic philosophy of Michigan State College as well as that of reception of the Kellogg Center has demonstrated the wisdom of having a university and a foundation join hands in endeavoring to help people help themselves. Without the generous cooperation of the Kellogg Foundation, the Center and our ambitious program in Continuing Education would not have been possible. To further extend the services of the Center, the additional space requested in this proposal can be provided only through other than public funds. The proposed changes will make it possible to more adequately serve the many people now making use of this unique and valuable facility and service.

"Preliminary exploration of costs with Lewis J. Sarvis, architect, for the proposed additions and changes indicate a total estimated cost of \$440,750 for the structural changes desired, which makes no provision for furnishings and equipment which are estimated to cost an additional \$50,000.

"Michigan State College will always be grateful to the Kellogg Foundation for its generous support of this and other projects. We sincerely hope that your Board will see fit to grant this request for additional funds so that the work can be immediately undertaken and the new facilities made available for use during the Centennial year beginning next February. One copy of the blueprint of the proposed changes as prepared by Mr. Sarvis is attached."

Dr. Morris, the President of the Foundation, has notified us of the approval of a grant by the Foundation as outlined in our request and authorizing us to proceed.

On motion of Mr. Mueller, seconded by Mr. Rouse, it was unanimously voted to extend the sincere thanks of the Board to Dr. Morris and the Kellogg Foundation for this generous action on the part of the Foundation.

9. It is recommended that the Board engage Lewis J. Sarvis of Battle Creek as the architect for this project and authorize undertaking construction at the earliest possible moment so the new facilities may be useful during the Centennial Year.

On motion of Mr. Brody, seconded by Miss Jones, it was voted to approve the employment of Mr. Sarvis as architect on the Kellogg Center construction.

10. Bids were opened on November 19 for the construction of 312 married student apartments. The bids were as follows:

Christman Company	\$1,721,347
Jeffress-Dyer	1,989,000
Ellis Construction Company	2,289,000

## 10. Bids for construction of 312 married student apartments:

The Christman Company is the low bidder. The bid is within the amount anticipated when the financing was arranged. It is recommended that the Board authorize a contract with the Christman Company in the amount of \$1,720,547 which is \$800 less than the bid due to the acceptance of an alternate.

On motion of Mr. Akers, seconded by Miss Jones, it was voted to award the contract to the low bidder, the Christman Company for \$1,720,547.

Subsequent to the opening of bids, the architect was instructed, in cooperation with our people, to go over the specifications and identify all possible areas where savings could be made. After exhaustive studies and the acceptance of many alternates, it is now recommended that an over-all contract be let to George W. Lathrop and Sons for the general construction and including the low sub-bidders as follows:

Plumbing, Heating and Ventilating -- Dart & Cady  
 Electrical Wiring -- Hatzel & Buehler  
 Refrigeration Equipment -- Creamery Package Manufacturing Company  
 Laboratory Furniture -- Kewaunee Manufacturing Company  
 Stainless Steel and Galvanized Equipment - Austin-Blue Company  
 Elevators -- Detroit Elevator Company

The total over-all amount, including the necessary bonds, is \$3,841,953.

On motion of Mr. Brody, seconded by Miss Jones, it was voted to award the above contract to George Lathrop and Sons at \$3,841,953.

9. The cost of getting services, water, sewers, and electricity to the site of the Animal Industries Building, the necessary roads, drives, sidewalks, landscaping, etc., plus the necessary architect's fees and furnishings for the building will bring the total cost of this project to \$4,250,000. The amount in excess of \$4,000,000 appropriated by the legislature will require an appropriation from the Creamery Revolving Account which has been accumulated over the years for the purpose of providing creamery and dairy equipments for this structure.

On motion of Mr. Mueller, seconded by Mr. Rouse, it was voted to authorize the Comptroller to transfer the \$250,000 from the Creamery Revolving account to be placed in the construction account of the Animal Industries Building to be used to defray the difference between the cost of this project and the legislative appropriation.

10. Mr. Mueller suggested that a resolution be prepared commending the members of the football team, the coaching staff and the Athletic Department for the sportsmanlike conduct exhibited at all times during the past football season.

On motion of Mr. Mueller, seconded by Mr. Brody, it was voted to authorize the preparation of the above-mentioned resolution. (Resolution in full will appear in the Resolution book).

The meeting adjourned at 3:30 p.m.

The next meeting of the Board will be held Monday, December 20.
