MICHIGAN AND BORDER CITIES
GOLF COURSE SUPERINTENDENTS ASSOCIATION

A PATCH of GREEN

Official Publication of the
Michigan & Border Cities Golf Course Superintendents Association

GOOSEGRASS OR CRABGRASS?

CONTROL BOTH WITH RONSTAR.[®]

HERBICIDE

It's hard to tell the difference between goosegrass and late-germinating crabgrass.

But if you treat your turf with Chipco[®] RONSTAR[®] G herbicide, it makes no difference.

RONSTAR gives excellent control of both, season-long... and it's convenient to use, because there's no leaching problem, no root pruning, and no problems with ornamental plantings.

So, for the best control of grassy weeds, use RONSTAR. Rhône-Poulenc Inc., Agrochemical Division, Monmouth Junction, NJ 08852.

RONSTAR[®]
SPREAD THE WORD.

Please read label carefully, and use only as directed.

When the fair way is everybody's backyard, you need

TORO automatic sprinkler systems are the #1 choice of the country's top golf courses.

More and more developers are discovering these important reasons why:

VERSATILITY Whether you're doing golf course condos, equestrian trails or a camp ground, TORO's got the sprinkler heads for the job. From tiny ground bubblers to 235' giants. And a variety of controllers to make the system completely automatic.

BUILT-IN QUALITY TORO heads are built of CYCOLAC® the tough engineering plastic, with gear assemblies of Du-

Pont Delrin. They're self-contained for easy maintenance and oil-sealed for long life. And they feature TORO innovations like valve-in-head and repeat cycle watering for better accuracy, less waste.

AESTHETICS No more ugly, noisy impact sprinklers. TORO heads pop down below ground surface when not in use, discouraging vandalism and expensive accidents. And TORO's gear-driven heads are night-time silent.

EASY INSTALLATION A TORO system can be installed quickly, with minimum turf disruption, less piping and impressive in-ground savings. TORO sprinkler systems, together with the full line of quality TORO mowers, provide complete care for both lawn and large turf areas.

SERVICE TORO's nationwide network of distributors and installer/contractors is readily available whenever, wherever you need service, a system design, installation arrangements...or more information.

TERSAN® 1991 + Daconil 2787

Put the proven performers together for even better control of brown patch, dollar spot and other serious diseases.

TERSAN® 1991 fungicide and Daconil 2787* fungicide are two of the most effective disease control products on the market. And now, these proven broad-spectrum fungicides are labeled for tank mixing. Together, they give you even better control of major turf diseases than either product used alone. You get improved control, yet without the problem of phytotoxicity common with some tank mixes.

A TERSAN 1991/Daconil 2787 tank mix will give you consistent performance against brown patch and dollar spot—the two most troublesome diseases on turf each summer. You'll also get strong action on leaf spot and other important diseases. It's the kind of performance superintendents depend on when a quality course can't be compromised.

*Daconil 2787 is a registered trademark of Diamond Shamrock Corporation.

Tank mixing brings other advantages, too. With TERSAN 1991 in your tank, you get systemic action for protection from within the turf plant. Disease control is longer-lasting and is less affected by rainfall or frequent irrigation. Tank mixing fungicides with different modes of action also reduces chances of benzimidazole resistance. You help insure the long-term effectiveness of TERSAN 1991 in your disease control program.

This year, plan on using TERSAN 1991 in combination with Daconil 2787. It's the tank mix turf diseases can't match.

With any chemical, follow labeling instructions and warnings carefully.

Don't be TRAPPED... Use the **EASY RIDER '76** TRAP MAINTENANCE SYSTEM

Why does Easy Rider '76 do the BEST job maintaining your sand traps?

Because Easy Rider '76 is not just another trap rake. The Easy Rider is a complete TRAP MAINTENANCE SYSTEM specially designed to maintain sand traps. The simplified finishing rake provides ultra-fine top layer raking, superior to a hand raked finish.

In addition to the rear mounted finishing rake, there are THREE INTERCHANGEABLE ATTACHMENTS: The Weed Cultivator, a Super Scooper and, for 1976, a Pre-Rake, all of which can be operated independently or simultaneously with the rear mounted finishing rake.

The entire body of Easy Rider is molded fiberglass, mounted on a steel chassis.

The rear engine hood and fender section is hinged for easy maintenance.

The Pre-Rake*—Uniformly scarifies tightly packed sand where a softer, deeper raked surface is desired.

The Weed Cultivator*—Knocks out weeds and loosens deep, hard packed sand. The operator controls the cultivating depth.

The Super Scooper*—Picks up eroded sand in low spots and transports it back to the desired high locations. The operator controlled hand lever spreads and feathers the sand to a level finish in one easy operation.

P.O. BOX 500 (313) 348-8110

Jacobsen Trap King II and Scarifier Blade.

The Trap King II gives great raking results as well as providing substantial savings in two important areas, time and money. One man on a Trap King can do the work of five men using hand rakes. Lateral raking motion gives better control and smoother follow while turning in tight and confined areas. Three forward speeds, one reverse, for various conditions. Scarifier/Push Blade accessory easily mounts on undercarriage. Breaks up hard surface crust, levels low spots, prevents weed build-up, and softens playing surfaces of baseball infields.
