# California lawn weeds

...AND WHAT TO DO ABOUT THEM

## You can control weeds so easily

**T**O ENJOY a lawn free from weeds is not difficult these days. First you clear them out with specific controls. Then follow a maintenance practice that keeps the weeds from reestablishing themselves. The key to that maintenance is proper fertilization. Scotts fertilizers, used on more lawns than any other brand, are designed specifically to promote the thicker turf that discourages weeds.

The photographs in this book will help you identify lawn weeds and select controls.
