

U. S. Orbits Satellite, Fires Missile

Baby Moon To Continue Space Study

Missile Crosses Explorer VI Path

CAPE CANAVERAL, Fla.—The United States launched one satellite into orbit around the earth Tuesday and, in a dramatic new experiment, fired a missile across the path of another.

Explorer VII, a 90-pound "gyroscope" satellite equipped to study cosmic radiation and other mysteries of space, was launched into a low orbit by a Juno II rocket. It was another step in the program to send a man into space within two years.

Earlier, a B47 jet bomber flying high over the cape fired a 37-foot Bold Orion missile across the path of the Explorer VI "Paddlesheel" satellite. The shot could lead to development of air-launched missiles to knock down enemy satellites.

The "Paddlesheel" was at the low point of its orbit at an altitude of 146 miles and streaking through the skies at 26,000 miles an hour when the Bold Orion was launched. It was aimed to pass 10 miles in front of the satellite.

A reliable source said the Bold Orion sped 150 miles upward, reaching a point four miles above the satellite, then fell into the Atlantic Ocean 1,000 miles northeast of here.

In Washington, the Air Force issued a cautiously worded statement saying "preliminary evaluation indicates the mission was successfully accomplished."

The Air Force said the Bold Orion was equipped with flares that would be fired at intervals to aid photographic observations of the accuracy of the guidance system.

The National Space agency in Washington said it completed its first circuit of the Earth in 101 minutes. It was sending back information on the various hazards man will encounter when he first ventures into space.

Its most important task was to probe the lower levels of the bands of radiation hovering above the Earth.

Packed into the satellite were instruments to measure (1) cosmic rays in and below the radiation belt; (2) the density of micrometeorites; and (3) sun-produced gamma-alpha ultraviolet radiation. The latter are believed to have an important influence on our weather.

Cancer Chief To Speak Here

Dr. Chester Stock, chief of the division of experimental chemotherapy of the Sloan-Kettering Institute, will speak to the Chemical Society on "Experimental Cancer Chemotherapy Studies," tonight at 7:30 p.m., 122 Kedzie.

Stock will discuss the present state of cancer chemotherapy and the methods which are used at the Sloan-Kettering Institute to screen drugs for possible anti-cancer activity.

Jazz Club to Meet

The first organizational meeting of the Jazz Society of West Circle Drive will be held tonight at 7:30 in 41 Union.

After the meeting there will be a session attempting to explore the latest innovations in jazz in Old College Hall. All students are welcome.

Petitions Available

Petitions for chairmanship of Campus Chest, part of the AUGC executive branch, are available in the Union commons.

MISS AMERICA, Lynda Lee Mead of Mississippi, is seen during her performance at the United Fund Kick-off Tuesday night. Accompanying her on the program were Four Ladies and various local bands.

Kick-off Starts Big

What a crowd! This year's kick-off even saw some of the finest singing remark by one of the Four Ladies. The kick-off show in Jennings was a two-hour affair, but more than 3,000 people crowded into the two-hour affair, many of which were the students of Michigan State University. In the program, which was sponsored by the United Fund, USA, and the two-week campaign which began in the Spartan football team, gave the "subgraphical" musical, "The Sound of Music," a high to the crown as she performed in the title of "Strangers in Paradise."

The MSU News Club, Club Alpha, and the Phi Kappa Phi Honor Society, as well as various other groups, and high school bands filled out the remainder of the well-moving show.

After the show, several of the "Four Ladies" sang in the "Sound of Music" program, which was sponsored by the United Fund, USA, and the two-week campaign which began in the Spartan football team, gave the "subgraphical" musical, "The Sound of Music," a high to the crown as she performed in the title of "Strangers in Paradise."

Graduate Program Important for Future

(Eighth of a series.)

THE GRADUATE PROGRAM will play an important role in the future of Michigan State University. Such is the philosophy of the Committee on the Graduate Program.

The committee recognizes that there are certain fields in which the graduate program is essential to the development of the state and the nation. It is the responsibility of the graduate program to provide the necessary training and research in these fields.

The committee also recognizes that the graduate program is essential to the development of the state and the nation. It is the responsibility of the graduate program to provide the necessary training and research in these fields.

State News Lists Staff Promotions

The State News has announced several staff promotions. The Managing Editor, D. J. Walters, has been promoted to Editor. The Editor, J. H. Smith, has been promoted to Managing Editor. The Business Manager, J. H. Smith, has been promoted to Editor. The Editor, J. H. Smith, has been promoted to Managing Editor.

THE COMMITTEE DOES not attempt to cover all the areas of graduate programs in its report, however, since the broad administration have been extensively involved during the past year in considering the direction and policies of the graduate program. Instead, it is concerned with pointing out the areas in which the graduate program is essential to the development of the state and the nation.

THE PROGRAMS REQUIRE course offerings of a different nature from those of the conventional master's degree, in presenting ideas and advances in a specific field," the Committee says. "The Committee also recommends that the long-range plan of the university include expanded degrees in the doctoral program. The Committee also stresses that some University regulations be changed to safeguard the student's program from (1) whimsical changes in committee membership and (2) changes in program direction.

Before Government Moves

Union Head Asks Strike Settlement

WASHINGTON (AP)—Steelworkers' efforts to bring about a last-ditch bargaining session—in hope of ending the 91-day steel strike before the government moves to do so—have received testimony before President Eisenhower's fact-finding board Tuesday.

David McDonald, president of the 800,000-member United Steelworkers union, tried to get the decision-making heads of the country's four biggest steel companies to terminate brass-tacks bargaining.

"I challenge these gentlemen to come down with us and negotiate," McDonald said.

McDonald named the four as Roger Blough of United States Steel Corp., A. B. Homer of Bethlehem Steel, Charles White of Republic and Avery Adams of Jones & Laughlin.

The fact-finding panel, which is holding hard for a negotiated settlement, could continue its inquiry into the nationwide steelworkers' strike negotiations.

The panel set an under-term of the fact-finding panel, which is holding hard for a negotiated settlement, could continue its inquiry into the nationwide steelworkers' strike negotiations.

Then Eisenhower could direct the steelworkers to seek a court injunction pending the 30-day "cooling-off" period for the steelworkers.

McDonald's challenge set off a rash of rumor and speculation that a new settlement effort was in the making. But in mid-afternoon McDonald told a newsman there had been no response from industry.

Previously, industry men passed on to newsmen a report—denied Tuesday by McDonald—that the steelworkers' chief Monday night spoke to two top officers of General Motors Corp. concerning a pending new union proposal.

The sources, who acknowledged their information was unconfirmed, said McDonald urged GM president Frederic Deane and executive vice president L. C. Gray to bring pressure on the steel companies to grant the workers' proposal and get the strike over.

AUGS Slates ROTC Issue

Main attention of tonight's Student Congress meeting will be focused upon the Academic Affairs Committee's report on the ROTC issue.

The committee has been studying the ROTC program for the past few weeks and will make its recommendations tonight.

AUGS budget will also be brought out for final approval by the congress tonight. The budget has been in committee process for some time.

Reading out the committee's report on the ROTC issue, congress will consider a bill appropriating \$60 for Spartan in Wagon. The organization will use the amount for administrative expenses.

Theater Tryouts Set

Tryouts for the Theta Alpha Phi Reader Theater production will be held Thursday night from 7-9 p.m. in 42 Aud. The production, to be presented Nov. 4 and 8 as part of Fine Arts Week, consists of one play and eight poems. Any student may try out.

Sang for Free Beer

The Kingston Trio well-known and liked by those who appreciate something a little different in music, will appear at the Civic Center in Lansing at 8 p.m. tonight.

The trio began in 1956 when Dave Guard, a graduate student at Stanford University in Palo Alto, Calif., and Bob Shane and Nick Reynolds from nearby Menlo College, started singing on campus for free beer.

After graduation they opened a San Francisco club for \$50 a week each, increasing their salaries by modeling bathing suits.

Guard and SHANE were brought up in Hawaii, where they learned to play ukuleles. Reynolds was born in Coronado, Calif., but traveled widely and picked up new songs as his father, a Navy officer, moved from place to place.

In regard to the choice of their name, Kingston says their vote because it combined Ivy League and Calypso qualities.

The Kingston Trio made a name for itself with the million-selling "Tom Dooley" The "Hungry" album came next, and this is the one that soared the trio into the public eye.

The latest LP, "The Kingston Trio at Large" is still one of the top LPs in the nation. "M.T.A." from the album, has been popular as a single.

All three are married, Shane to an actress from Atlanta, Ga.; Guard to the daughter of a chain of department stores, and Reynolds, who will inherit a sizable fortune from his grandfather, to a West Coast comedienne.

Among the trio, Shane is known as "our Sex Symbol," Guard as "our Acknowledged Leader" and Reynolds as "the Hunt of the Litter."

THE KINGSTON TRIO is in Lansing for a one night stand at the Civic Center. Known for its folksongs, the trio currently has a hit with "A Worried Man."

FOUR OF THE Takarazuka dancers sample some of MSU's cooking in the Union grill before their performance Tuesday night in the Aud. The ensemble will present their native dance again tonight at 8:15.

Delight Audience

East, West Blend Cultures As Takarazuka Women Dance

By SET PRICE
State News City Editor

A curious blending of eastern and western theater came to MSU Tuesday evening as the Takarazuka dancers presented their famed program.

The dances were oriental in style but the costumes, but the orchestration had a definite western flavor. However, the two cultures were more than harmoniously combined.

Throughout the evening the dancers glided gracefully across the stage, with only a slight smile of silk heart. The group of 75 women portrayed male and female roles.

Color—all shades imaginable—made the stage brilliant. There were colors used together that one would never imagine, yet each one complemented the next.

The program was divided into three acts: Dance in Flowers, "Engineer" Names Staff, and Snyder, Phillips Lack 3 AUGS Representatives.

Freshmen Offer, Can Receive Much

THE GRIND IS ON... no more welcome week... no more kindly orientation...

But such devices! Our freshman class this fall is the best in MSU history, according to Dean Gordon Sabine...

College life is great—the gala social life, the many lasting friendships, the campus escapades...

Getting an education—that's what most of us are here for. There may be incidental interests such as getting a man or having a good time...

ANALYZING YOUR OWN reasons for being here, what do you come up with? One thing they may not have mentioned during orientation week...

If you can develop an earnest interest in learning for the sake of learning and not for grades alone...

To repeat an old adage: an education should never end. College should be your jumping off place for bigger goals...

The good grades that accompany any true interest in studies are quite naturally expected from the class of 1963. This class excels in the number of students who ranked at the very top of national intelligence tests...

The classes of 1962 and 1963 drew more scholastically top high school graduates than those of any previous two-year period.

Expectations for them are high. Only they can prove whether they deserve such glowing predictions...

In a Hurry?—Then Jump

GETTING TO THE ground floor of Berkey when classes are changing is a near impossibility, if you happen to be situated above the ground floor.

In addition to people who go up down stairs and those who find the stairs and landings a convenient place to shoot the breeze...

Sororities, fraternities, and all varieties of G.D.s think the lobby of Berkey is the best place to hold informal meetings and gabfests.

The people who are inconsiderate enough to hold up the wheels of progress aren't the type that take hints (such as jabs in the ribs and tramped-on toes)...

It would seem that the only sure means of exit in time of an emergency would be to use the nearest window, regardless of distance from the ground.

Interpreting the News

Tentative discussion of an Eisenhower visit to India and Pakistan has brought the suggestion that the President, if he wished, should be in a position to offer mediation in the disputes between the two countries.

These disputes—primarily involving territories of Kashmir and division of the Tejus River—would adversely affect the stability of both countries, through the military expenditures they produce and world politics through the international transfer of funds.

Mediation in this type is not a unique function for presidents of the United States. As a nation, this country has by invitation or imposition frequently acted as mediator—or perhaps intervenor—is a more honest word—in Latin American disputes.

There is precedent, however. In 1960 President Eisenhower played a special role as mediator of the Berlin agreement. It was a peace conference which resulted in the signing of an actual treaty at American soil at Paris, France, N.H.

Woodrow Wilson, of course, sought to act as mediator for the warring interests of Europe after World War I, but his role was not as that of a representative of American interests.

If President Eisenhower tried to talk to India and Pakistan leaders about their differences it would be a still different role, although formal mediation could come out of it. It would be something like asking prestige to the role already played by several leaders of the Free World.

The President might make some very persuasive points about the mutual benefits which have accrued to both the U.S. and Canada through their friendly association as joint occupants of a continent. There is a current display of friendliness between the U.S. and Mexico in another sector of this continent.

In the background of the idea that Eisenhower would help to settle the Indian and Pakistan dispute is the growing realization that the substantial membership of the British Commonwealth of their part of a strong defense policy. This need already has been met in some degree in the atmosphere.

Much would depend on whether the President would be welcomed in India, as in Europe, or as a great warrior for peace, as in a number of other parts of the world.

Employment, Unemployment Show Decline in September

WASHINGTON—Unemployment declined and unemployment seeking work... The wage loss from the steel strike and those in furlough—reached \$1 million dollars by the end of the first week in October, he said.

Giant Crane Installs \$40,000 Machine

Heavy construction machinery, including a giant crane, were busy Monday, as they went to work in front of the Horticulture building.

The crane was used to lift a ton of new laboratory equipment to the building's roof.

The new piece of equipment, which cost \$40,000, is known as a direct reading spectrophotometer. It will be used to analyze plant material in order to determine what kinds of fertilizers are most effective.

Two times faster than the process it replaces, the spectrophotometer will be used by all departments of the Agricultural Experiment Station, to prevent soil and plant deficiencies in crops, especially fruit crops.

According to Prof. A. L. Kenworthy of the horticulture department, this will be the first installation of its kind in any college or experimental station.

Use of the device will not only speed the results of their work, but also save time. Instead of the old, more involved method of measuring photosynthesis, the new machine will do the work in half the time.

The type of work done in the department is the Agricultural Chemistry Department, and up to the

now by the Horticulture Department, can be done in the future by all departments of the Agricultural Experiment Station.

The installation will also mark the first application of the direct reading spectrophotometer to horticulture. Its principal application until now has been in the aluminum and steel industries.

Produced by the Applied Research Laboratory of California, the spectrophotometer is expected to be in operation by the middle of November.

It will be hooked up, a process that takes three weeks, by a special engineer from Detroit.

Game Films Tonight

Movies of the Iowa-MSU football game will be shown tonight at 7:30 p.m. in the Union Ballroom. Coach Billough will narrate.

Music Prof Sets Concert For Friday

Dr. Mario Castel-Nuova Tedesco, distinguished visiting professor in the music department, will play a piano concert Friday at 8:15 p.m. in the Music Auditorium.

Tedesco will play his composition, "Evangelium," op. 141, entitled "The Life of Jesus Narrated to the Children in 28 Short Piano Pieces." The pieces are programmed in four groups: "The Infancy," "The Life," "The World," and "The Passion."

This is the first of the fall term concerts featuring Tedesco's works. His choral composition, "Jonah," for men's chorus and ensemble will be performed in November under the direction of Hans Lampl.

Tedesco is also giving a series of ten lectures on opera every Monday evening during the term at 1:30 p.m. in 122 Music Bldg.

Hannah Appoints Lindquist To Fulbright Committee Post

President John A. Hannah has appointed Dr. William Lindquist of the department of microbiology to the MSU Fulbright Committee.

Dr. Lindquist will replace Prof. C. L. Schermer who has returned from the faculty to become the head of the department of civil engineering at Ohio University, Athens, Ohio.

Personal interviews must be arranged with Dr. Lindquist before all Fulbright scholarship applications.

The other four committee members are: Dr. J. T. Dorsey, political science; N. R. Rich, history; D. J. Gimmel, foreign student advisor; and Allen Tucker, Graduate Office, must also be consulted for interviews.

Oct. 20 marks the deadline for personal interviews. It is also the last day for applications to be submitted to the Graduate Office.

WKAR Airs New DeeJay Jazz Show

"Concert Hall of Jazz" later known as WKAR-FM MSU's disc-jockey show, is being revamped to meet the growing demand for non-commercial music. The new show will feature such acts as the Modern Jazz Quartet, the Buddy De Franco-Art Trio group, the Ted Heath orchestra, June Christy and Stan Kenton.

Bill Bob Franklin plans to give the format occasionally by featuring top jazz artists, but the most part the show will be uninterrupted hour and a half of music.

The main premise is little more than a lot of jazz," says programming director Richard E. ...

Listeners will find this show different from others of its kind because the purpose is not to play jazz, but to play it and let the music speak for itself.

"Concert Hall of Jazz" can be heard every Thursday night from 8 to 9:30 p.m. over WKAR-FM.

EYE HI-LITES by Dr. Joseph B. Gutstein

Dr. J. B. Gutstein, Ophthalmologist

Are contact lenses popular in other countries besides the U.S.A.?

Answer: Contact lenses are known and used to a greater or lesser extent in all the civilized countries of the world. At the recent 1st World Congress in Chicago there were ophthalmologists from Great Britain, France, Germany, Hungary, Russia, Spain, Cuba, Argentina, Mexico and Venezuela to name only some of the countries which come to mind.

Question: Can everyone wear contact lenses?

Answer: No! At the present time there are still some patients who cannot be fitted; there are certain factors (easily determined by your competent eye doctor) which rule out these patients. However, as new principles of contact lens manufacture and fitting are developed many patients formerly rejected, can now be accepted and successfully fitted.

Senator President Again Considers Shift of Club

WASHINGTON (AP) — Calvin Griffith, president of the Washington Senators, said Tuesday he would act soon on what he termed an enticing proposition to move his American League baseball team to Minneapolis.

Asked about a report that he had definitely made up his mind to shift the Senators, Griffith said he had not reached a final decision, but added: "The proposition looks enticing."

Griffith has received another offer from Minneapolis which probably is as good or better than previous proposals made by the Minnesota city in an effort to land a major league baseball franchise.

In the past Minneapolis interests have pledged, among other inducements, the equivalent of one million admissions for each of the first three years in which the Senators would play there.

Griffith last year abandoned at the last moment a plan to take up with other American League club owners the possibility of transferring to Minneapolis from Washington, home of the Senators since the American League was founded in 1901.

L.S.U. Has 2 Streaks; Heads Poll

By THE ASSOCIATED PRESS

Louisiana State has just won one but a couple of hot football streaks going.

The Bayou Terrors have stretched their winning skein to 16 games. Today they topped the Associated Press Football Poll for the 13th straight time.

They are attempting to become the 9th team to repeat as national champion since the poll was started in 1936. The predecessors were Minnesota (1940-41), Army (1944-45), Notre Dame (1946-47) and Oklahoma (1955-56).

LSU wrested the No. 1 place from Army on Oct. 14, 1958, and has been unshakable since.

The last game the Tigers lost was to Mississippi State 14-6 in the next-to-final contest of the 1957 campaign.

Newcomers to the select group are a pair of eastern independents, Syracuse and Penn. State. Syracuse smashed Navy 32-6 and Penn State stunned Army 17-11.

The top ten teams:

1. Louisiana State (4-0)	1,373
2. Northwestern (3-0)	1,066
3. Texas (4-0)	988
4. Georgia Tech (4-0)	918
5. Mississippi (4-0)	717
6. Purdue (3-0-1)	574
7. Southern California (3-0-1)	529
8. Syracuse (3-0)	386
9. Iowa (2-1)	352
10. Penn State (4-0)	297

The Second Ten

11. Auburn, 12. Arkansas, 13. Illinois, 14. Tennessee, 15. (tie) Clemson and Southern Methodist, 17. Air Force, 18. Washington, 19. Florida, 20. Pittsburgh.

Gary Ballman's Injured Finger Due to Be Operated on Today

By JIM WALLINGTON

Sophomore halfback Gary Ballman will be missing from Michigan State's lineup Saturday when the Spartans host Notre Dame. Coach Duffy Daugherty announced Tuesday at a meeting of Michigan Football Writers.

The speedy first stringer will be recovering from an operation which will be performed today on the finger he injured in the Iowa loss. The operation, on the middle finger of the left hand, will straighten out a double dislocation.

Daugherty expects the return of the East Detroit flash for the Indiana game Saturday, Oct. 24.

The Spartan mentor was principal speaker at the gathering of 30 sports writers, the largest here in years. His talk was a mixture of humorous and serious comments about the 1959 football team.

He assured the writers that the rest of the team was in good shape physically.

Delving into Spartan problems Duffy admitted that he has not been solved this season, even though the line should do better in future games. He gave much credit to Iowa for outlasting his boys.

Several line switches have been made to plug weaknesses, capped by the move of sophomore Dave Maffers to the first center slot yesterday. The transfer moved former starter John Wilks to the alternate crease. Larry Cundiff is the middle man.

The mentor announced another move involving sophomore Pete Kakela who moved from the alternate team to the defensive unit passing senior Jim Chastain.

Another first year man, Don Stewart, is moving up to fill in for Ballman. Normally a defensive back Stewart has performed well in previous games to warrant the temporary promotion.

Senior Bob Riccio and sophomore Larry Hudson will alternate at Stewart's defensive half post.

Daugherty informed the writers that Dean Look will start this season. Injured in preseason drills the converted halfback has slowly prepared for the starting post. Tom White previously got the call in game performances as obvious, the two signalcallers will play about equal time.

In response to the questions, the Spartan mentor stated that a good day for Look could pull the team together start it rolling. "The same as for Martin (Blanchard) who had a tough time getting started," he said.

When it was pointed out that Notre Dame had a star player in George Igo, Daugherty flourished. "We're training good passers... a player with no reputation, like 'The Way of Iowa,' he quipped. "After all, football passes through the hands that beat State Saturday.

The sports writer asked: "But was it funny?"

In explaining a phase of football, Duffy came back. "After all, football passes through the hands that beat State Saturday.

But the Spartans may have to worry about Iowa's Charlie Callahan. A Notre Dame publicist, told the gathering that Igo has not fully recovered from a pre-season injury.

"He could start if we win perhaps," Callahan's name in moaning continued as the writers on the list.

Both fullback Jim Coffey and left half Bill Mack are starters leaving only Joe Sapitto, running from right to starting out of the active team, he said.

The first two tight ends are out, and Notre Dame coach Kuharich is forced to go with a third stringer there.

The Irish representative pointed out that Notre Dame was saturated with scholarship like State, with 18 of the players in the California pre-first year men.

Retired University of Michigan coach Bennie Costello attended the confab.

Y Commission Evokes Trio

Little Fight Principals Take It on the Chin

YORK (P)—The New York State Athletic Commission Tuesday took steps to revoke licenses of three principals in the promotion of the Floyd Patterson-Ingemar Johansson heavyweight fight last June 26.

Velella, president of Rosensohn Enterprises, said he still held the contract for the bout and he expected to proceed with the promotion under a new name and in new areas. "We are changing the name of our organization immediately," Velella said. "We have five cities besides New York bidding for the fight and I won't name them now."

"I think the commission is trying to kill boxing in New York. I prefer New York as a site but this kills an industry. Also I think the report is a well-handled whitewash of Rosensohn."

Rosensohn originally was president of Rosensohn Enterprises, Inc., but post-fight developments disclosed he held only one-third of the stock and the other two-thirds was controlled by Velella.

Since the breakup Velella has brought Irving Karpis, president of Telephonator, which controlled the television rights of the fight.

AK Psi, SAE In Grid Romps

Alpha Kappa Psi and Beta Theta Pi 26-7, in IM tonight Tuesday night.

AK Psi checked up on their first game of the season by scoring in every quarter.

The first touchdown came in the first period when Dennis Le Bouton threw a long pass to Al Pressel.

Johnson came back to score by going around the left end. Louis Schimmel went over for the extra point.

Johnson came through again in the fourth to win the game by scoring on a 24-yard pass to Fred Goff and converting with John Gorman for the extra point.

The Beta boys played well but only once in the second period.

A 42-6 romp by Sigma Xi Epsilon over Alpha Psi was recorded Tuesday night.

Bill Mitchell scored touchdowns with a 30-yard punt and a 40-yard throw.

Physical Ed. Expert Set To Talk Here

Dr. MacCarthy here for talk.

Physical Ed. Expert Set To Talk Here

Dr. Shane MacCarthy, Executive Director of President Eisenhower's Council of Youth Fitness, will give a talk on "Physical Fitness of American Youth" in the Music Auditorium at 10 a.m. Friday, Oct. 16.

The Department of Health, Physical Education, and Recreation has invited all members of the university, students and faculty, to attend this meeting.

Dr. MacCarthy has taught political and social sciences at Georgetown University, the Catholic University of America, and Southeastern University. Also, he has been very closely associated with parent, youth teacher, social, fraternal and veterans organizations as a capable leader.

Responsible positions that Dr. MacCarthy has held include membership in the Federal Departments of Interior, Agriculture, Labor, State, and Central Intelligence Agency.

With such a list of experiences he is well qualified to present the government's opinions on what is considered to be the major problems of American youth, says Gale Mikes, a member of the Athletic Department.

Fight Is Due In Choosing Commissioner

PHILADELPHIA—With the National League Baseball League season opening in a week, the fight is on to choose a new commissioner.

The major parties involved in the race are scheduled to meet in late afternoon on Tuesday for the first time.

Philadelphia's game Sunday night was postponed from an earlier date at a league meeting.

Some think the national league commissioner's position should be given to the man who should be brought in from outside.

Some would like to see the commissioner's position given to one of the league's own.

The league's own commissioner would have to be chosen by the league's own.

The league's own commissioner would have to be chosen by the league's own.

The league's own commissioner would have to be chosen by the league's own.

Varsity Bid Fails Rowing Team Meets Tonight

The rowing team, undefeated in its freshman year, will hold an organizational meeting at 7 p.m. today in room 215 Men's IM building.

Student coach Jim Tyler, Franklin senior, has asked returning crew members and all men interested in rowing regardless of experience, that would like to try out for the team to attend this meeting.

The meeting will include movies of past crews, instructional films, and a discussion on crew at MSU by Gene Elliot, of the physical education department, who is crew sponsor.

Workouts have already begun and will continue throughout the winter on indoor equipment.

Possible foes up for discussion at the meeting will be Wayne, Wisconsin, Purdue, Minnesota, Marietta (Ohio), Cornell, Yale, Princeton, Navy and Colver.

During the summer the team applied to the MSU Athletic Council for varsity status but was turned down and therefore will continue under the jurisdiction of the IM office.

Rowers returning this year include Capt. Milan Savich, Dean Abbott, Bruce Hunt, Bill Bishop, Hal Joy, Bruce Nickles, Al Wickert, Frank Eisecker, Bob Briar, Mike Wilson, Hilar Falk and student coach Jim Tyler.

STUDYING CAN BE SCREAMS

If studying is bugging you, try Alpiners.

Alpiners, as we all know, was invented by the great Greek philosopher Alpinon in 320 B.C. Alpiners, incidentally, was only one of the inventions of this fertile Alpinon. He also invented the staircase which, as you may imagine, was of inestimable value to mankind. Before the staircase people who wished to go from floor to floor were forced to live out their lives willy-nilly on the ground floor, and many of them grew cross as bears. Especially Demosthenes who was elected Consul of Athens three times but never served because he was unable to get up to the office of Commissioner of Oaths on the third floor to be sworn in. But after Alpinon's staircase Demosthenes got up to the third floor easy as pie—to Athens, so to speak, as it turned out. Demosthenes, his temper shortened by years of confinement to the ground floor, soon embroiled his countrymen in a series of quarrels with the Persians, the Visigoths and the Ogulala Sioux. He was voted out of office in 321 B.C. and Alpinon, who had made his accession possible, was voted to death with fruit salad in the Duquesne. The later became known as the Missouri Compromise.

He was unable to get to the third floor to be sworn in.

But I digress. We were discussing memorization, which are nothing more than aids to memory—catchwords or jingles that help you remember names, dates and places. For example:

Columbus sailed the ocean blue
In fourteen hundred ninety-two.

See how simple? Make up your own jingles. What, for the student, is the important event immediately following Columbus's discovery of America? The Boston Tea Party, of course. Try that:

Samuel Adams threw the tea
Into the briny Teazer Tea.

(NOTE: The Teazer Tea was located in Boston Harbor until 1944 when Samuel P. Chase traded it to Holland for Lemmon and two outfielders.)

But I digress. To get back to memorization, you can see how simple and useful they are—not only for history but also for everyday living. For instance:

In nineteen hundred fifty-nine
The smoke is laid for at Alpiners.

"Why Alpiners?" you ask. Taste that fine, fresh flavor. Enjoy that subtle coolness. Until Alpiners you needed two cigarettes to reap the benefits of Alpiners—one for flavor, one for high filtration—and smoking two cigarettes is never graceful; in fact, with mittens it is high impossible. Now you need only one cigarette—Alpiners. Get more. You'll see.

The sponsors of this column make Alpiners, Philip Morris and Marlboro Cigarettes. Pick what you please. What you pick will please you.

Denies Evading Summons

Van Doren to Accept Subpoena

NEW YORK (AP)—Charles Van Doren's lawyer said yesterday the big-money television winner will accept a subpoena to testify at a congressional probe of fixed quiz shows.

The lawyer, Carl Rubino, denied Van Doren has been dodging the subpoena and notified federal authorities he'll set up a date with his client today, added Rubino.

"He could not evade a subpoena which he did not know had been issued. . . . If the committee wants to serve him, I'll arrange it. I'm making no secret of the fact that Charles Van Doren knew nothing about the subpoena. He first knew about it Monday night. He didn't know one was issued and he hasn't been avoiding one."

The subpoena was issued last Friday, Monday, Rep. Oren Harris (D-Ark.), accused Van Doren of evading it.

Van Doren, a Columbia University English instructor, dropped from sight last week when the subcommittee first sought his testimony at the Washington

inquiry. But Rubino said of his disappearance:

"He had no thought of evading anything. He just became distressed when NBC took him off the air summarily last Thursday."

In Washington, however, Harris challenged Rubino's statement that Van Doren had not been evading a subpoena.

He said the committee last Saturday advised the attorney

that a subpoena had been issued. On Rubino's contention that Van Doren did not know of this until yesterday, Harris said:

"That's trying to beg the point." He pointed out that the committee sent Van Doren a telegram last Wednesday inviting him to appear and that although it had been widely publicized, the committee had received no reply.

It's Cheaper by the Dozen!

BALTIMORE (AP)—Mrs. Lorraine Graves walked slowly down the corridor at Johns Hopkins Hospital yesterday and stopped at the big glass window to the nursery. Her face broke into a wide grin as she looked at her three-day-old offspring—all four of them.

The 30-year-old Negro mother from Annapolis was getting her first look at her quads. She acted just as a parent traditionally reacts on that occasion—moving back and forth in front of the glass panel to get the

best angle, grinning all the time. In addition to the quadruplets she has eight other children, including two sets of twins.

The quads—three girls and a boy—are doing splendidly, the hospital reported, although they are still in incubators. This is a normal precaution when infants are born under five pounds at birth. All four averaged just over four pounds.

Mrs. Graves has selected names for the four: Kim Marie, Karen May, Katherine Mary and Kevin Mark.

Survey Given On Discounts For Students

A student discount service may be installed at MSU before the term end, if an AUSG survey shows students favor the service.

Questionnaires will be distributed today and Thursday in all living units and the Union. The questionnaire will ask for estimates of per term expenses for school supplies, clothing, cleaning and laundry, food, entertainment, auto expenses and miscellaneous costs.

Other questions will involve stores patronized, percentage spent in university area stores and effects on amounts spent at a store if the discount were given.

The SDS has been successful at many universities, particularly on the west coast. It is usually done through the National Student Association, but would be carried on independently at MSU.

The questionnaires are to be completed and turned in to living unit presidents. They will be collected Monday and Tuesday.

Graduate Program Important

(Continued from Page 1)

"Often it is not a kindness to foreign students, especially those whose backgrounds in science are often deficient in laboratory experience, to permit them to undertake work based on thorough knowledge of methodology," says the Committee. "They should be advised to take the necessary collateral work to enroll as special students."

To orient students to the graduate programs, the Committee has the following suggestions:

1. A non-credit course in actual use of the library.

2. A review of ongoing research programs and an explanation of how graduate students may fit into them.

3. University cultural opportunities and services should be explained.

The Committee states that off-campus education and evening graduate courses pose problems in maintaining standards of quality. The Committee suggests that colleges should strengthen and maintain residence requirements for graduate degrees sufficient to ensure program quality and continuity.

Library facilities must be adequate if higher standards are to be maintained. The Committee believes the development of separate housing for graduate students should be given importance.

Recent recommendations for housing of graduate students and improved methods for their selection encourage graduate units to take the necessary collateral work to develop a graduate within their own institutions.
