U. S. Challenges Red Troop Cutback

Asks Agreement on Plan For Effective Disarmament

WASHINGTON (AP)—The United States challenged Soviet Premier Nikita Khrushchev Thursday to follow through on his troop cutback proposal by agreeing to an effective international disarmament plan.

As for itself, it said the United States is "prepared to go as far toward safeguarded disarmament as any other country."

State Department Press Officer Lincoln White issued the U.S. reply to Khrushchev's Moscow speech while U.S. strategists studied the Soviet Premier's text.

Lava Runs Over Town In Hawaii

300 Villagers Flee From Fiery Mass

HONOLULU (AP)—A 200-foot-wide river of molten lava, spewed out of fiery jets, snaked slowly down the lower slope of Kilauea volcano toward the sea Thursday night.

Flaming lava and rock were hurled 200 feet in the air. Steam raged even higher from a 300-foot-long blazing fissure.

The vents opened the earth Wednesday night across a cañon at Kapoho, a normally sleepy little village emptied earlier of its 300 inhabitants.

The fiery discharge seethed from a long rift across a sugar cane field extending from Kapoho to the eastern tip of Hawaii island, largest of the island chain and some 200 miles west of Honolulu.

Telephone poles burned like torches.

Heavy thuds were heard and earthquakes shook the ground frequently. Acid white smoke from burning trees and cane hid the air.

In the first outburst lava rained down the gentle slopes in raging torrents and lapped around the bases of trees. Large logs and coconut trees stood for minutes, then crashed into the molten stream and burst in flames.

The eruption began Wednesday night at 7:30 P.M. after two days of earthquakes. Earlier in the day the quakes opened a mile long and two to four feet wide rift at Kapoho village.

The 300 villagers began evacuating hours before the eruption. The last of them left before 11 p.m.

The lava first appeared as a small curtain of fire, then broke into three separate fountains from a long rift.

Small cinder cones formed around the fountains.

Five years ago a similar eruption in the same area caused over \$1,000,000 in damages.

Employment Reaches New Record High

WASHINGTON (AP)—Secretary of Labor James Mitchell said Thursday employment reached a record for the month in December.

Mitchell said new figures to be announced today also will show "a good improvement and a new peak for worker earnings."

The government's latest prior job report showed 65,640,000 employed and 8,000,000 unemployed in November.

Mitchell gave out advance word on the new job data at a news conference in which he said that new steel dispute is settled the nation can expect "an extraordinary good" economic outlook in 1960.

He said that plans are going forward to hold a high-level labor-management conference in February or March to try to improve the collective bargaining climate. He said he recently held preliminary discussions with both labor and management.

President Eisenhower told Congress in his recent State-of-the-Union message that the administration is encouraging labor-management "summit" conferences in an effort to minimize industrial strife and create a more union-management relationship.

BLANCHE THEBOM leaves her dressing room prior to her performance in the Aud Thursday night. Miss Thebom, a member of the Metropolitan Opera, gave a varied program to her listeners.

Opera Star Offers Talented Program

A small and appreciative crowd gathered in the Aud Thursday night to witness a fine musical performance by mezzo-soprano Blanche Thebom of the Metropolitan Opera.

The program opened with a Mozart aria. The difficult task was handled with great command and authority. The Brahms selections which followed were rendered with artistry and musicality, the obvious results of Miss Thebom's excellent training and experience.

The audience was transported to the operatic stage for the third portion of the program. Miss Thebom depicted the fiery and passionate Carmen by singing three of the arias from the Bizet opera.

The familiar "Habanera" held the listeners in the spell of the flirtatious gypsy. The dramatic quality of the artist's performance was most convincing and portrayed the despair and desperate joy of the tragic Carmen.

The program continued with a group of French and Latin-American art songs. Miss Thebom chose several contemporary works of a lighter nature to end her recital. The entire program was sung with youthful spirit and power, embodying a love for music past and present.

A native of Canton, Ohio, Miss Thebom last year became the first American woman opera star to perform in the USSR. She appeared under the same cultural exchange program which brought Russian pianist Emil Gilels and violinist Leonid Kogin to the United States. Her first role at Moscow's Bolshoi theater was Carmen.

Trained in the United States, she recently toured Latin America for the State Department and appeared for the U.S. at the Brussels World Fair.

No Longer Called 'Suicide'

Back in 1887 a hardy band of daredevils took part in the first organized national ski jumping tournament at Ishpeming and recreational skiing got its start in Michigan.

Some 73 years later, "ski eagles" still are soaring off the towering jumps at Ishpeming and Iron Mountain, but skiing no longer is considered a wild form of Scandinavian suicide. For today the sport is a popular family recreation in Michigan with more than 150,000 devotees of all ages, sizes, and shapes.

Abilities vary greatly among these enthusiasts, of course, and Michigan's 11 winter sports centers are tailored to provide a variety of slopes and facilities for beginners, in-betweeners and experts.

Winter sports centers dot the Michigan map from the far northern reaches of the upper

Reds Can Use Missiles, Cut Army, Says Nikita

Tells Soviet Of Great New Power

Claims U.S. Now In Second Place

MOSCOW (AP)—Nikita Khrushchev declared Thursday the Soviet Union is so strong it can cut the number of men in its armed forces by almost a third and rely upon the greatest firepower—rockets and intercontinental ballistic missiles—ever possessed by any nation.

And more awesome power is to come, the Soviet Premier told 1,300 deputies of the Supreme Soviet (parliament).

"The central committee of the Communist party and the Soviet government can inform you, comrades deputies, that though the weapons we have now are formidable weapons, the weapons we have in the hatching stage today is even more perfect, even more formidable," Khrushchev said. "The weapon which is being developed—and is, as they say in the portfolio of our scientists and designers—a fantastic weapon."

Khrushchev did not elaborate on the "fantastic" weapon in his address, but he said that "now it is quite clear that the United States of America is not the world's most powerful military power."

Khrushchev spoke for three hours and five minutes—with a half hour break—before a special session of Supreme Soviet deputies from all parts of the vast nation which occupies a sixth of the earth's land surface.

He proposed—and automatic parliamentary approval is certain—a cut of 1,200,000 men in the armed forces, reducing the total to 2,423,000, the lowest figure since 1937. But at the same time he told the deputies Soviet military firepower exceeds anything known in history and Soviet defense never has been so strong.

"In cutting the number of our armed forces we are not decreasing their firepower," the Communist party chief said. "On the contrary, in a qualitative way the firepower will be increased many, many times. I am sure the Western powers know this, and if they don't, I have to warn them."

But the fireworks in the speech concerned Soviet military prospects in advance of East-West disarmament talks and a summit meeting of the Big Four powers opening May 16 in Paris.

One of the outstanding questions before the summit meeting was the twin problem of West Berlin's future and that of divided Germany. Khrushchev once again repeated the statement which touched off a crisis in November 1958. He said the Soviet Union would demand that the powers sign peace treaties with both West and Communist East Germany, and if this did not come to pass, "we will sign a peace treaty with the German Democratic Republic (Communist) Republic only, with all the consequences that might follow."

Great-Grandpa Attends College

SOUTH BEND (AP)—Robert Orr is only a sophomore at Florida Southern college in Lakeland, Fla., but he is 20 years older than the school.

The 80-year-old man visited relatives here this week enroute to Florida.

The Caro great-grandfather explained he couldn't last year "to fill some of the empty spots in my life."

Orr said he didn't go to college to wear a beanie or to lead cheers.

"I just want to learn some of the things I missed when I was younger," he explained.

PRESIDENT JOHN HANNAH presents the International Marketing Award to Gottlieb Duttweiler Thursday night. The Swiss corporation president was honored for his part in raising the standards of living in his own and other countries.

Honors 'Imaginative Daring' International Marketing Award Given Duttweiler by Pres. Hannah

By BOB FIENBERG President John A. Hannah presented the International Marketing Award to Gottlieb Duttweiler, president, Federation of

Migros Co-operatives, at a dinner Thursday night at Kellough Hall. Duttweiler received the award for "imaginative daring in directing a higher standard of living for people in his own and many other countries through efficiency and innovations in mass marketing management."

Duttweiler was born in 1888 in Zurich, Switzerland. After attending business school, he joined one of the most important business firms in Switzerland, of which he has since made a junior partner in 1907.

During World War I the firm was responsible for a substantial part of the food imported into Switzerland, with branches opened in the U.S., the Mediterranean area, and the Near East. When he returned to Switzerland in 1925 he organized Migros.

Migros operates 363 sales outlets including 98 supermarkets and superettes, 233 other self-service stores, and 130 route trucks.

Duttweiler is a moving force in other fields. He founded a political movement called the Ring of the Independents, and in terms of service he is one of the oldest members of the Swiss Legislature, being a member since 1935.

He established the Hotel Plan in 1935 for tourists. In 1944 he started a school for adults. From modest beginnings it has grown

into the largest school for adult education in Switzerland with an enrollment of 85,000 students.

He helped establish a Book and Record Club and a Concert Organization which brings outstanding soloists, conductors and orchestras to Switzerland. He helped found the Green Meadows Foundation which sponsors an international conference on education trends and problems.

His high venture in education is the Federation for International Education Centers. Schools have been set up all over Europe where young people from all parts of the world may, for a period of three or six months, learn the language and culture of the country.

The ultimate aim is to awaken in our young people a sympathetic understanding for other nations and their way of life," said Duttweiler.

Duttweiler was made a honorary member of Sigma Phi Epsilon. This was very meaningful to him, he said, because it came from young people and that was important to one a leader.

Duttweiler was made a honorary member of Sigma Phi Epsilon. This was very meaningful to him, he said, because it came from young people and that was important to one a leader.

Illinois Musicians Set to Feature Instruments of Shakespeare's Time

Authentic medieval instruments, similar to those which delighted Shakespeare and Leonardo da Vinci several hundred years ago, will be featured in a concert Sunday by the Collegium Musicum of the University of Illinois.

Music written in the Middle Ages will be performed on lutes, which were the equivalent of today's piano in a Renaissance home, and the recorder which Shakespeare referred to in Hamlet.

Other instruments include the vihuela, favorite of the cultured classes of Spain, the krumphorn or "crooked horn," two types of viola da gamba, and the vielle.

The music scheduled, dating from as early as the 14th century, includes dance music, folk and love songs, as well as religious pieces.

The selections are chosen from the great medieval composers. From Italy comes the works of

Francesco Landini, who was to outlive what Donatello was to Italian sculpture.

The French Guillaume de Machaut captured the spirit of flamboyant Gothic architecture in his music. The German selections come from the late 15th and early 16th centuries, and resemble Lutheran chorale tunes of the Reformation.

John Dowland, a contemporary of Shakespeare, represents England in the musical tour of the medieval world.

Dr. George Hunter, director of the museum presenting the concert, has been interested in the music of the Middle Ages for over 20 years. His group, now several years old, is composed mostly of music teachers and graduate students at the University of Illinois.

The concert will be at 4 p.m. Sunday in the Music Aud. Admission is one dollar. Students may attend with their ID cards.

Panel Talks On Problems Facing Co-ops

The expansion of the co-operative system, the membership program responsibilities, and the problems facing the co-ops were discussed Thursday evening by a panel composed of faculty and co-operative members.

Louis Heckhus, advisor to ICC, mentioned several points on which members could be drawn into the co-op movement. He stated that "Members should be prepared to answer: What can a co-op offer me?"

He said that the emphasis should be placed on scholarship, development of leadership abilities, economy of living conditions and the position of co-ops as a contributing factor to the student's educational process.

Dr. George Motts, advisor to Ellsworth House and long connected with the co-operative system, presented information concerning the improvement of facilities and the possibility of expansion of the number of co-op houses to include one out of 10 male students at MSU.

Pat Smith, president of Motts House, commented on the lack of publicity for the co-ops, and the resulting lack of knowledge by the students in general about the system.

Students Run Own Town, Government in Norway

By BILL CALLAHAN

A RECENT SPECIAL issue of Universitas, the official publication of the Oslo Student Union, includes an article describing a system of student government that dwarfs anything yet seen in the United States.

The article claims that Norwegian students are an independent lot and like to go their own way. If their system of student government is any indication, the claim is well justified, indeed.

The university students are represented by a student member in the University Senate, and, at the general meeting of students, faculty representatives are elected to the Student Representative Council (S.R.C.), which handles matters concerning students.

THE S.R.C. PLUS representatives from the independent College of Theology and the College of Veterinary Medicine compose the Student Parliament.

The parliament's 50 members meet regularly to discuss all matters, national as well as international, which concern the student body. Through the parliament, the Oslo students are also represented on the Board of the National Union of Norwegian Students (N.S.S.).

The Oslo Student Union is a unique organization, taking care of many activities which, in the United States, are the function of university authorities, not of students.

THE UNION, for example, runs the student town at Sogn, Norway, with rooms, restaurants, and cafeterias for 750 students. It also operates a health service, the University Book store, a travel office, and the Oslo University Press, which publishes all sorts of academic materials not profitable for other publishers.

The Union is directed by a board made up of students and representatives of state

and the university, and employs more than a hundred persons. It has an annual budget of 7.5 million kroner (\$1,505,000).

The student town is run as a summer hotel during June, July and August with the profits used to subsidize students' rent.

STUDENTS AT OSLO are also represented on the boards of the various faculties, which have a function similar to that of the University Senate. Thus, the individual student has a voice and a large degree of self-determination in all affairs of his concern.

This novel system is, indeed, student government. That is, the governing of students and student affairs (in everything from housing to matters of curricula) is accomplished by students and their elected representatives.

What all this means for the All-University Student Government of Michigan State University is, I think, obvious. "Thursday's child," as AUSG is sometimes named, by comparison seems to be a rather unobtrusive organization which attracts wide notice only during its annual spring imbroglio to perpetuate itself.

THIS IS NOT to malign the AUSG. This organization has, at times, accomplished much. But, at times, the quiet that emanates from Student Government gives cause to wonder if it still exists. Indeed, at times, I find occasion to wonder how many students would miss AUSG, or even know it was gone, if it were suddenly eliminated without any publicity.

I have no personal quarrel with the AUSG, except that it frequently seems to be less effective than it should be. Nor do I, by any measure, think it is futile or worthless.

Still, the Oslo system is, at least, to be envied.

Incidentally, Oslo University has 5,000 students.

Views the News

A confident Nikita Khrushchev struck a powerful blow Thursday for the cause of world disarmament and made an audacious bid to dominate the Paris summit meeting this spring.

In his Moscow speech Khrushchev seemed determined to challenge the West and put it on the defensive.

At the same time, Khrushchev dined the rest of the world with powerful propaganda medicine. The Soviet Union, he said, is so strong it can afford unilaterally to cut its armed forces while its economy surges ahead at a stupendous rate. And more than that, the USSR in 1959 actually began full-scale building of a Communist society.

Khrushchev announced plans to cut armed forces a third to a total of 2,423,000, the lowest figure in more than 20 years. This is just short of the 2 1/2 million promised by the West for the armed forces of the United States.

Meanwhile, Khrushchev renews 1,200,000 more men from the armed forces to be infused into the economic mainstream of the Soviet Union, long short of manpower. This promises to give new impetus to Khrushchev's internal development program.

Khrushchev heads toward the summit holding a strong hand. The out in Soviet armed forces challenges the West. Khrushchev also, in effect, dares the United States to resume nuclear testing and take the responsibility for what happens thereafter.

Khrushchev shattered Soviet precedent by announcing an exact total of men under arms in the USSR.

He said to the West in effect: "Our disarmament talk is more than just talk. We have made a concrete move. Now it's your turn." In terms of influence upon the world's public, it will do little good for the West to argue that this much demobilization represents no real accomplishment toward the goal of disarmament while nuclear stockpiles still exist.

Khrushchev emphasizes that "the principle of priority development of heavy industry" was followed in 1959, first year of the current seven-year plan. The heavy industry program builds world political power.

At the same time Khrushchev promises the Soviet people the rewards of a full-scale Communist society. The promise is one of plenty for all. Khrushchev indicates he expects a patriotic surge of selfless labor to make the USSR the most powerful nation on earth—and thus protect the promise.

Just in advance of his trip to Asia, Khrushchev paints for the uncommitted and underdeveloped countries a picture of what might be done with a Soviet-like organization. Here, he told them, is a nation which has pulled itself up by its bootstraps.

Khrushchev does not have to spell out the implied lures. Many of those who count in the uncommitted nations will get the idea.

Michigan State News

341 Student Services
Published on class days Monday through Friday inclusive, during fall, winter, and spring terms except holidays. Weekly during summer term and one special freshman issue between summer and fall terms. Entered as second class matter under act of March 3, 1919 at the post office, East Lansing, Mich.

Despite profuse commentary in the dissent, "Page One" is a relatively good movie if you are not going to be a greedy troll and demand technical virtuosity too.

It concerns a unhappy wife, Jo Morris (Rita Hayworth) and a lonely widower, Larry Ellis (Gig Young), who loves her who are joined and thereafter come to trial about the murder of Jo's uncouth husband (Ryder). The husband actually had been killed accidentally as he came upon the embracing couple in the kitchen long after bedtime hours.

Jo's mother (Miss Squire) hires a lawyer (Anthony Franciosa) to defend her daughter, and Larry's mother (Mildred Dunnock) hires another to defend her son, having been against the affair from its beginning.

Lawyer Franciosa seems to think that he can win the case by denigrating Larry's domineering mother and proving that she was ultimately at fault

for Larry's unhappiness which thereby led to his romance. This is, supposedly, for the purpose of convincing the jury that the love affair in discussion was not a surreptitious one and that said disclosure would relieve the stigmatizing publicity that has ensued.

In the meantime, the prosecution cooks up a story about how Jo got her husband drunk and had Larry fly in from an out-of-town business trip to murder her husband lest he discover her romance.

Enough about the plot! The idea about reversing the object from the Jo-Larry romance to Larry's mother is a construction weakness, but if you have retained a sufficient of holiday season gentility, you may find it in your bones to forgive the "faux pas."

The acting of Rita Hayworth, Gig Young, and Mildred Dunnock is good enough. If you believe that the play's the thing, you might well enjoy "The Story on Page One."

Letters to the Editor

AUSG Hits Loyalty Affidavit

To the Editor

We would like to have the opportunity to discuss the resolution number 18 which concerns the loyalty oath and the National Defense Loan Program.

The resolution as presented by Representative Gerald H. Bennett and Douglas reads as follows: "A resolution to suggest that Michigan State University withdraw from the government loan program provided by the National Defense Education Act."

Whereas the requirement that students sign loyalty oaths in order to receive federal finan-

cial assistance is not consistent with academic and political freedom, and discriminates against the students in American universities. Resolved by Student Congress: That Michigan State University withdraw from the government loan program provided by the National Defense Education Act."

The main reason behind this resolution is reported to be the requirement of the signing of a affidavit according to the following Section 1001 (1) of the NDEA: "No part of any funds appropriated or otherwise made available for expenditure under

any of the Act shall be used to make payments or loans to any individual unless such individual: (1) has executed and filed with the Commissioner an affidavit that he does not believe in, and is not a member of, and does not support, any organization that believes in or teaches the overthrow of the United States Government by force or violence or by any illegal or unconstitutional methods, and (2) has taken and subscribed to an oath of affirmation in the following form: "I am solemnly sworn and affirm that I will bear true faith and allegiance to the United States of America and will support and defend the Constitution and laws of the United States against all its enemies, foreign and domestic."

Several universities have withdrawn from the program due to the above section in the NDEA. Also the United States National Student Association has published a report along with a resolution against the disclaimer affidavit. The United States Congress will have before it when it convenes, a measure to repeal the above section of the NDEA.

However, if MSU were to withdraw from the loan program at the present time, the students on the program or those interested would have to look elsewhere for their finances or drop out of school.

Our committee must decide how to do about this resolution and would like the help of all interested persons, especially those who are or have been directly concerned with the affidavit.

We would appreciate it if anyone who objects to the present situation concerning the loan program would call the Secretary of Student Congress and leave his name and phone number or come to the committee hearing Monday, Jan. 18, at 4 p.m. in the student congress meeting room of the Student Services building.

It is our hope to act in the best interests of the student body. Your help, suggestions, and comments are what determine the outcome of AUSG legislation.

John Cowden, Chairman
Organization and Eligibility Committee

University of the Act shall be used to make payments or loans to any individual unless such individual:

(1) has executed and filed with the Commissioner an affidavit that he does not believe in, and is not a member of, and does not support, any organization that believes in or teaches the overthrow of the United States Government by force or violence or by any illegal or unconstitutional methods, and

(2) has taken and subscribed to an oath of affirmation in the following form: "I am solemnly sworn and affirm that I will bear true faith and allegiance to the United States of America and will support and defend the Constitution and laws of the United States against all its enemies, foreign and domestic."

Several universities have withdrawn from the program due to the above section in the NDEA. Book Review

Intrigue, Love Mixed In Endless Colonnade

By Robert Harling

G. P. Putnam's Sons 83.95
The personalities of this fascinating novel are particularly interesting as they are revealed through the discriminating eyes of the main character, Dr. Frost, a prominent English psychiatrist.

After the death of his wife, Frost falls into a deep melancholy, and loses himself in the work he loves. An old war buddy, Frost's closest and most respected friend, prescribes a tour of Italy with him as a cure for his depression. The cure is successful; however the doctor can't resist analyzing each person he meets on the trip.

In this way the reader is acquainted with many of the contrasts between the English and Italian personalities which proves amusing in many cases. Due to his unusual interest in people and their problems, Frost becomes involved in an international intrigue.

One of the men on the tour is an English scientist, famous for his brilliant research in atomic energy. This scientist is a sick personality who believes certain atomic secrets should be spread to other parts of the world, and has come on the trip to deliver them to Italian agents.

When he is just beginning to relax and soak up the warm Italian sun, and is really developing an appreciation of the architecture of the Palladian villas, Frost's life is complicated by the suicide of the warped English scientist who leaves the valuable information in his hands for safe conduct back to England.

Unfortunately, the enemy is aware of their possession, and the befuddled doctor finds himself in a situation he is totally unprepared for. He is forced to flee across the Italian countryside with the unwanted secrets in order to escape his pursuers who, disguised as monks, peasants, and common businessmen, keep on his trail.

A parallel adventure of different kind evolves when Frost hopefully in love with the dark Italian beauty, Bianca. His typical English conservatism is frequently assaulted by the woman beauty's preference for earthy things (such as the picturesque countryside) over the artistic masterpieces of sculpture by Bernini and Palladio, as well as by her passion for life and rich sense of humor.

His resistance is finally broken down by the enchanting hedonist and their love affair becomes intertwined with the cat and mouse game he plays with his dangerous pursuers. To complicate matters, Frost has many reasons to suspect that his charming Bianca is mixed up with his enemies.

The result is a hectic two weeks of seductive love culminating in a sad, but realistic ending; mixed up with menacing adventure. These double exposures are pictured in sharp contrast to the serene beauty of the famous ruins, art and architecture, and the sunny Italian scenery of Rome, Padua, and Venice, which the author draws in detail for the reader.

Harling's novel is an interesting reading on the merits of the novel, its colorful descriptions of Italy, and the author's uncanny insight into the depths of his characters.

Jury Ends Probe of Lynching

BILOXI, Miss., Jan. 14—A special federal grand jury ended its investigation of the Mack Charles Parker lynching Thursday without returning indictments in the nine-month-old case.

Charles Long, of Grapeland, the jury foreman, read the verdict to U. S. Dist. Judge Sidney McDaniel that "on the basis of the evidence presented, we were unable to arrive at a true bill."

The action apparently has the effect of ending the Parker case unless authorities uncover new witnesses or new testimony.

Mise congratulated the jury on its work during the deliberations which started Jan. 4, saying he thought jurors conducted themselves "diligently and fairly."

He then recessed the jury until the regular Feb. 23 term of federal court, cautioning members might be called back sooner to take up other matters.

A mob of hooded men dragged Parker, 23-year-old Negro truck driver from Lumberton, out of his second-floor jail cell at Poplarville last April 25 and killed him. His bullet-pierced body was recovered from the Pearl river 10 days later.

The lynching came two days before Parker's scheduled trial on charges of raping a pregnant white mother. The woman and her small daughter had been kept in a stalled auto near Lumberton while her husband sought a mechanic.

A Pearl River county grand jury investigated the case last November and returned no indictments. The Justice Department then called for the federal jury session.

Du Pont Struggles For Stock Holdings

Government Asks Release of General Motors Shares

WASHINGTON (AP)—The government Thursday renewed its long court battle to strip the Du Pont company of its stock holdings in General Motors corp.

Olson Sets Speeches On Japan

Lawrence Olson, expert on Japan and Japanese affairs, will give a series of seminars, lectures and classes Jan. 19-22 under the auspices of the American Universities Field Staff, Inc.

On campus Olson will give two seminars open to the public: a lecture seminar on "The Problems of the Japanese Economy" scheduled for Wednesday at 7:30 p.m. in the conference room of the Physical Science Building, and a lecture on "Japanese Foreign Policy" Jan. 22, at 7:30 p.m. in 311.

Olson will also lecture on "Social Change and the Legacy of World War II" at a luncheon of the Men's Club Tuesday in the Union. He will make a television appearance at 5:15 p.m. Tuesday to discuss the "War in Japan and the Japanese Situation." He has held various government positions, including Cultural Attaché of the American Embassy in the Philippines. He holds a Ph.D. degree from Harvard University.

In addition to his writings on Japan, Olson is also the author of a book of poems and has translated poems and book reviews in the "Virginia Quarterly Review," "Saturday Review" and "Poetry: a Magazine of Verse."

Olson is one of four AUFSS members who will visit the campus during the winter and spring terms of this year. AUFSS is a non-profit corporation for the study of foreign nations and cultures, sponsored by MSU and other universities and colleges.

MICHIGAN STATE NEWS
January 15, 1960 Page Three

PRETTY LINDA GIBSON, 10, Miss Hot Springs of 1960, stands on West Mountain near Hot Springs, Ark., famed for its mineral baths, and marvels at the unusual sight of snow. And it was something to marvel at—weathermen measured a total fall of 11 inches.

\$10 Millions In Gas Taxes Paid So Far

Michigan motorists will have paid out \$10,082,000 in gasoline taxes in the first two weeks of 1960—the same amount they paid in the entire first year of the tax in 1955.

William Palmer, executive secretary of the Associated Petroleum Industries of Michigan, said this means that Michigan motorists "now are rolling one million dollars in gasoline taxes into the state and federal treasuries every 34 hours."

In 1925 the tax was two cents a gallon. Now it includes 6 cents state gasoline tax, four cents federal gasoline tax and the three percent state sales tax—averaging 0.5 to 0.7 cents per gallon on regular gasoline, depending on the local price. State car owners, Palmer estimated, will pay about \$257,000,000 this year in direct taxes on gasoline.

"It is a surprise to most motorists," Palmer said, "that today's regular gasoline price, excluding taxes, is substantially below the 29.3 cent average price of gasoline 40 years ago. Other retail prices now are 44 percent above the 1920 level, but gasoline prices, except for the tax, are actually lower."

Horticulture Head Writes on Plants

Dr. H. B. Tukey, head of the horticulture department, is the author of "Plant Regulators in Agriculture," which has recently been translated into Russian. The book deals with hormones and chemicals which control growth in plants. The Russian edition contains all illustrations found in the English edition.

Michigan Road Progress Reported at Meet

Three Michigan State Highway Department research engineers this week reported on progress of three major Michigan highway experimental projects at the 39th annual meeting of the Highway Research Board in Washington.

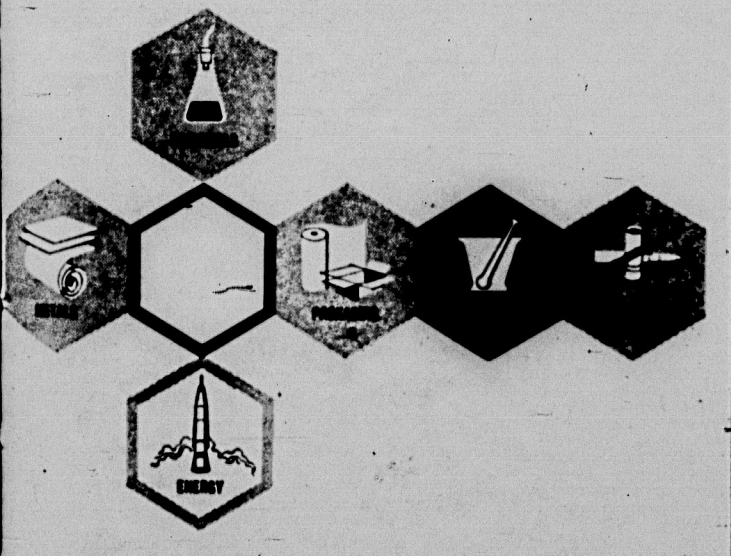

The department's research laboratory division at MSU made a final research report on an extensive durability study of road construction materials on M-115 in Clare and Osceola counties. Built in 1940, just as the research organization was established at MSU, the 17-mile stretch of road explored various

methods of prolonging concrete service life. The project, known as the Michigan Test Road, led to major revisions of Michigan road specifications and influenced standards in many states with similar traffic and climate conditions.

A third paper, prepared by M. G. Brown, reported on progress of research of new latex-concrete patching mixtures. The report described experiments made to restore deteriorated deck surfaces and other portions of concrete highway bridges with latex-concrete mixtures.

DIVERSIFICATION for unlimited opportunity

The interest of Olin Mathieson in the vital fields of chemicals, metals, packaging, pharmaceuticals and energy and in the sporting arms and ammunition industry promises the chemist, the chemical and the mechanical and metallurgical engineers a career that can progress along any one of many avenues just as rapidly as ability can be displayed. We would like to talk to you about your post-graduate plans. Include Olin Mathieson in your interview itinerary.

The Olin Mathieson representative will soon be on your campus. See your placement office for full details.

Interview to be held on Jan. 22

OLIN MATHIESON 460 PARK AVE., NEW YORK 22, N. Y.

Olympics Criticized

SQUAW VALLEY, Calif. (AP)—Alex Cushing leveled a bit of gentle criticism Thursday at winter olympic planners carrying out a scheme he started six years ago.

Cushing, ski resort owner-promoter who lured the 1960 games here, said:

"There's been too much money spent.

"However, it's easy to sit on the sidelines and say that."

Cushing's original plans called for an outlay of 2½ million dollars but he quickly upped his estimate to 4 million. He got out of the picture after the games were awarded to Squaw Valley in 1955.

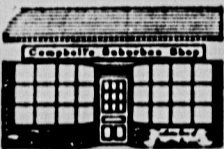

The state has put up 8 million and may need another million to pay final bills. The federal government has provided 4 million for an ice skating arena.

FROM THE EXPRESSION ON Wes Covington's face, he's really bearing down on Frank Torre's spine; but Torre doesn't look miserable enough for the training table here-hence, to be on the level. The clowning was part of serious business as some of the hometown Milwaukee Braves started limbering up Monday at County Stadium.

Has 38.2 Per Game Robertson Still Leads Individual Scoring Race

NEW YORK (AP)—Oscar Robertson's average has dipped below the 40 points a game but the Cincinnati Bearcats' star continues to hold a commanding lead in the major college individual scoring race.

Statistics released Thursday by the NCAA Service Bureau through Tuesday's games show that Robertson has scored 458 points in 12 games for a 38.2 average. Tom Sitch of St. Bonaventure is second with 28.2 followed by Jim Darrow of Bowling Green 28.3 and Frank Burgess of Gonzaga 28.0.

Larry Willey of Cincinnati is tops in field goal accuracy with .667 while Bob Parker of Gettys-

burg is the best marksman from the free throw line. Parker has missed only one of 33 foul shots for a .970 percentage.

Jerry Lucas, Ohio State's sensational sophomore, is fifth in scoring with 27.5, second in field goal accuracy with .622 and runner-up to Leroy Wright of College of the Pacific in rebounds with 20.4. Wright has hauled down an average of 24.3 rebounds a game. The statistics include games of Saturday, Jan. 9.

Ohio State has moved into the team scoring lead, dropping Cincinnati from first place for the first time this season. The Buckeyes are averaging 93.3 points a game, Cincinnati 92.6.

Redskins' Expansion Plan Told

WASHINGTON (AP)—The Washington Redskins—whose owner George Marshall has been outspoken against expansion of the National Football League—will present a new plan for increasing the NFL from 12 to 16 teams in 1961. The Washington Post said Thursday night.

The newspaper said the plan will be offered by the Redskins at a special meeting of the club owners at Miami Beach, Fla., on Sunday.

The special meeting has been called three days in advance of the annual league meeting on Jan. 20 in an attempt, the Post said, to reconcile factions which have been split on the expansion issue.

The Redskins plan, set forth by C. Leo De Orsey, Redskins director who will cast the team's vote, calls for a veto of two-team expansion in 1960 but admission of four new teams in 1961.

Austin Gunsel, acting commissioner of the league, confirmed Wednesday that applications for franchises, accompanied by \$25,000 earnest money checks, had been received from four clubs—Dallas, Minneapolis-St. Paul, Miami and St. Louis.

Gunsel also said he had been notified by Marshall that De Orsey, the Redskins attorney, would be authorized to vote for the team at the executive committee meeting at which all clubs will be represented.

A faction led by George Halas, owner of the Chicago Bears, has been holding out for the admission of Dallas and Minneapolis-St. Paul to the NFL this year. Halas claims support of 10 clubs.

De Orsey, queried by telephone at Miami, told the Post Halas would be unable to muster enough votes to expand the league this year.

De Orsey predicted that Marshall's opposition to expansion would be withdrawn if the league voted for four more franchises instead of two.

Spartan Swimmers Begin Conference Meet Saturday

LARRY JONES, Junior, was singled out as having the outstanding performance for MSU last week in the Big 10 relays, for his three anchor legs in the freestyle events, by swimming coach Charles McCaffree.

Sophomore Swimmers Powerful

McCaffree Using Jones in Lineup

By SUZETTE RAMSEY
The Spartan swimming team that has opened the eyes of a few disbelievers after its strong showing in the Big 10 relays last week, opens its conference season against Iowa Saturday, 1:30 p.m. in the Men's pool.

"People had us pegged as a team going downhill, when I lost nine lettersmen through graduation, including two national champions," McCaffree said.

But after placing second in five of the nine events in relays last Saturday, and some of those seconds were near-firsts, McCaffree said some of the coaches among MSU had some strong individuals.

In a triangular meet last Saturday, the Iowa team placed second in Ohio State's 47 score with a 64½ score. The team, Wisconsin, scored 49 Iowa was ahead by one point until the last event, the 400 yard freestyle relay, in which it placed second.

McCaffree will again be using sophomores that form the majority of his team, but many of his hopes will be on Larry Jones. He singled out Jones' performance in the relays as being the outstanding one with his three anchor legs in the freestyle events.

Jones has the assignment of Saturday of meeting Iowa's El Claerhout and Chuck Mies in the 100-yard freestyle. Claerhout was on both of Iowa's one-place finishes relay teams in the Hawkeyes' meet last weekend and won the 200-yard freestyle event.

Carl Shaar, whose 2:08.9 performance in the 200-yard butterfly race in the Iowa State meet cut the old record by four seconds, will swim against Iowa's Ray Carlson and P. Rhodes.

Hawkeye Howard Head will meet strong competition in the 200-yard breaststroke in Dan Ruppert, another sophomore. McCaffree has praise for Capt. Frank Medina.

The 220-yard freestyle will pair sophomores Dick Brack and Dick Blazewski against Iowa's Bill Meyerhoff and Glover Washington. Claerhout will face Dave Diget or Dan Convis and Jürgen Mies in the 50-yard freestyle sport.

Diget, Shaar and Tom In will swim the 200-yard individual medley against Hawkeye Mitchell, Jim Bing and Bob Namee. Spartan backstroke Ron Gage and Jack Wickers will contend with Les Cutler and Larry Fruehling.

Brackett and Chauncey Johnson will swim the distance of the 440-yard freestyle against Glover Washington and Meyerhoff.

Iowa's big loss through graduation was Gary Morris, who placed second in the Big 10 championships in the 100-yard freestyle last year.

Admission to meet is free for students with IDs.

Syracuse Beats St. Louis Hawks

SYRACUSE (AP)—The Syracuse Nationals snapped a 111-day deadlock with an 84-78 point, spurge in the last 10 minutes and 44 seconds to defeat the St. Louis Hawks, 112 in a National Basketball Assn. game Thursday night.

Cliff Hagan's free throw was the only point, followed by Western division leaders at the Nationals Johnny Kerr put a hook shot for the Hawks and Larry Costello scored a three-point play.

Bob Pettit scored 38 points and Hagan 36 for the Hawks, splitting 22 in the closing session.

JOB OPPORTUNITIES!

A General Motors representative will be on campus
January 25, 26, 27, 28, 29

Contact your college placement office to arrange an interview.

Looking deep...
into the nature of things

At the General Motors Research Laboratories, physicists employ radioactive isotopes and other ultra-modern techniques and tools in their search for new scientific knowledge and an understanding of the many laws of nature that continue to perplex mankind.

Although a lot depends on a man's ability, enthusiasm and growth potential, there's every chance for advancement in many fields for General Motors scientists and engineers. There's virtually no limit to opportunity at GM. Fields of work are as varied as radioactive isotope research, astronautics, automobiles, aircraft engines and inertial guidance systems—to mention but a few.

If you wish to pursue postgraduate studies, GM offers financial aid. And since each GM division is autonomous yet related, you can grow in two directions—up through your own division, or to the side to other divisions.

For an exciting, rewarding career, see your Placement Offices or write to General Motors, Salaried Personnel Placement, Personnel Staff, Detroit 2, Michigan.

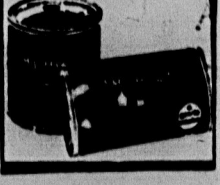

GENERAL MOTORS

GM positions now available in these fields for men holding Bachelor's, Master's and Doctor's degrees: Mechanical, Electrical, Industrial, Metallurgical, Chemical, Aeronautical and Ceramic Engineering • Mathematics • Industrial Design • Physics • Chemistry • Engineering Mechanics • Business Administration and Related Fields

Robin Roberts Signs Pact With Phillies

PHILADELPHIA (AP)—Robin Roberts signed his 1960 contract with the Philadelphia Phillies Thursday and disclosed he took a "justifiable" pay cut.

"It wasn't a tremendous slice," said the 33-year-old righter. "But it was justified."

Roberts, who won 15 and lost 17 for the last place Phillies in 1959, said of his performance, "it wasn't good and it wasn't bad. I didn't pitch as well as I should have."

Owner Bob Carpenter personally negotiated the new pact for his favorite player. The two have dickered man-to-man ever since Roberts came to the National League and the Phillies 12 seasons ago. It has been said Carpenter would rather sell his team than trade Roberts.

"Bob suggested the pay slash and I had to agree with him," Roberts asserted.

Although neither Roberts nor the club would disclose the salary, it is believed the husky right hander will receive in the neighborhood of \$40,000 for the coming season.

Roberts, who has won 221 major league games—six straight years he won 20 or better—feels like the golfer who finishes with a bird or par on the 18th hole. He's raring to go because of the impressive way he wound up the season.

Other newcomers include Gani Brown, all-around; Larry Bassett, free exercise and parallel bars; Jim Durkee, horizontal

Home Opener Saturday

'Beckerless' Gymnasts Face Tough Ohio State

Michigan State's gymnastics team will hold its first home meet Saturday at 3 p.m. in the Main Sports Arena of the Men's 1M Building.

They will meet Ohio State, a well rounded team which has always been tough, and this year is no exception. OSU's outstanding gymnast Tom Gompf will give State's John Daniels some real competition in tumbling and Charles Thompson in rebound tumbling (trampoline) said Spartan coach George Szypula.

Dick Becker, who ran a close second in NCAA free exercises as a sophomore in 1958 before missing last season on scholastic ineligibility, will not play against OSU due to a chipped wrist which he suffered in practice. He will be unable to play for at least ten days.

The Spartan team which placed high in both NCAA and Big 10 meets in 1959, can count on the returning of seven lettermen and several talented newcomers.

According to Szypula "This team has the greatest depth of any I've ever had and it could be Michigan State's greatest gymnastics team."

Stan Tarshis, who was last year's Big 10 champion on the horizontal bar, is State's big hope this year. Other outstanding turners include Daniels, 1959 Big 10 runnerup in tumbling, Chuck Thompson and Capt. Angie Festa.

The squad also boasts of some fine new sophomores; the most prominent of whom is Steve Johnson, who placed third in the NAU rebound tumbling competition last year, he'll also compete in tumbling for the Spartans.

Other newcomers include Gani Brown, all-around; Larry Bassett, free exercise and parallel bars; Jim Durkee, horizontal

bar, parallel bars and still rings.

In the Central Michigan meet Jan. 2 Festa placed first in the free exercise and side horse competition, and Tarshis placed first on the high bar.

Rebound tumbling saw Johnson place first with Thompson a close second. On the parallel bars Shorr came out on top with Bassett second, missing first by one point. Brown was top man on the rings and Durree was in runner-up position. The tumbling competition was won by Daniels.

Szypula said he feels that the chief conference opposition this season will come from Illinois and Michigan, the two top teams last year. Iowa will again have a good team and Minnesota is figured to have one of their finest teams in years.

The Spartan team which placed high in both NCAA and Big 10 meets in 1959, can count on the returning of seven lettermen and several talented newcomers.

Michigan State basketball coach Forddy Anderson didn't seem overly enthusiastic about the Spartan cagers' chances in their Saturday meeting with Illinois, when interviewed Thursday afternoon.

Anderson said, "Illinois will be every bit as tough as the Iowa Hawkeyes." The Spartans dropped their first Big 10 loss of the season to Iowa Monday by a 92-79 score. The MSU "Midgits" will be spotting the Illini four inches a man according to Anderson.

He seemed to be optimistic about the squad's spirit for Saturday's game, however. "I don't think they're down after the loss to Iowa. They were disappointed, but they are ready to return."

Commenting on Dave Scott, his new forward, Anderson said, "Scott did a good defensive job in the Michigan game, but was a little rusty on offense in both the U of M and the Iowa game. It will take a while for him to get the habits of his teammates, but as far as we're well satisfied."

Anderson didn't attribute the Iowa loss to any special cause, but did say that every team has had game one in awhile.

Spartan eager Horace Walker is presently holding down the number-one spot in Big 10 high scoring statistics, with a three game average of 27.3 per game.

Walker is also holding down top rebounding honors in the conference with an average of 19 per game.

Lance Olson, co-captain of the squad with Walker is tied with four other players among the top 10 scorers in the league with a 17 point average per game.

Probable starters for the Spartan squad will be the same quintet that started the Iowa game. At forwards will be Scott and Olson, Art Schwarm and Dave Fahs will hold down the guard slots while Walker will work from the pivot position.

Harry Combes, head coach of the Illini, has eight veterans returning from last year's squad that wound up in a tie for fifth during Big 10 competition.

The returning lettermen are: Guard, Mannie Jackson, 6-2 1/2; Guard, Gower Vaughn, 6-3 1/2; Forward, John Wessels, 6-7; and Vern Altmeyer, 6-8 centers; Al Gussell, 6-3, and Ed Perry, 6-5 forwards and Lou Landt and Gerald Colangelo both 6-2 and guards.

The game will start at 2:30 (EST) and will be the 13th game between the two teams.

Big 10 Leader, Terry Dishinger
CHICAGO (AP) — Sophomores are the top sharpshooters in the Big 10 basketball conference, official conference statistics disclosed Thursday.
Two of the league's three leading marksmen are newcomers, the current pacemaker being soph. Terry Dishinger of Purdue with a corking-good 34.3 average for 3 conference games.
Dishinger fattened his point bag Monday night with a 43-point spurge in a losing cause against Illinois for the fourth best single game performance in Big 10 history.
In third is another sophomore, Ohio State's brilliant Jerry Lucas with a two-game average of 25.0.

Here Saturday Night Icers Take on Michigan In Weekend Clashes

Michigan State will be facing the "best balanced" hockey team in the Western Collegiate Hockey Association in a home-and-home series this weekend according to Spartan coach Amo Bessone.

The Spartans, fresh from a hustling 4-3 victory over North Dakota last Saturday, will skate against Michigan on Wolverine ice tonight and battle the same club here Saturday night.

Bessone's opinion of the Wolverines is based upon sound facts and observation.

"I scouted them last weekend against Michigan Tech and they impressed me with fine overall team speed, a good defense, and sharp passing," said the 43-year old Spartan mentor.

Bessone added that although Michigan is presently leading the WCHA, they are playing without one of the finest hockey players in the nation.

"Michigan has a sophomore center by the name of Gordon Barronson who won't become eligible until next term. He played for the Canadian national champions a few years ago and is rated as one of the top players in the country."

When asked if last week's victory boosted the Spartans' morale to any degree, Bessone said it definitely was a shot in the arm but added that squad spirit has been high throughout the season.

"The boys have been hustling every game and the only thing that has hurt them has been inexperience. You know, graduation riddled last year's team and the lack of experience hurt a lot. This team is just coming into its own now."

Bessone said that the addition of several players who became eligible winter term strengthened State a great deal. Claude Fournel and Real Turcotte added the needed spark to the second line and Jack Foote's body-checking bolstered the defense.

Eidon Van Sybrooke, Spartan goalie who has turned away 310 shots in ten games will be in the nets against the Wolverines. The 5'7" 150-pound senior from Wallaceburg, Ontario, is coming along fine after a rough beginning.

IM Highlights
Busters are due for basketball, fraternity volleyball, open hockey by 5 p.m. today.

AUSTIN GUNSEL, acting commissioner of the National Football League, and a former FBI man, may be elected next week to succeed the late Bert Bell as commissioner.

Yachting Conference Stops Race To Havana

ST. PETERSBURG, Fla. (AP) — The Southern Ocean Racing Conference Thursday cancelled the annual St. Petersburg to Havana yacht race because of current conditions in Cuba.

Levy McMasters of St. Petersburg, chairman of the conference, said a Miami to St. Petersburg race will replace the other event.

"The decision was reached," McMasters said, "after it was apparent from talks with racing shippers that there was no desire on their parts to race to Cuba."

A St. Petersburg-Miami race was held in place of the St. Petersburg-Havana run in 1958 because of political unrest in Cuba at that time.

But there will be no points in that event toward competition for the coveted governor's cup, the annual award to the SORC boat who finishes the season at the top of the standings.

The Havana race, a 284-mile event for sailing craft, was scheduled for its 27th staging March 19. Its replacement, a tougher 370-mile test, starts March 5.

McMasters said the change in plans gives the Tampa Bay a finish to the SORC race for the first time. Heretofore, the sleek craft always headed down the bay toward another finish line.

It wasn't known whether Cuban vessels which usually enter the Havana race would participate in the substitute event.

Football Auction?

Philadelphia Eagles Having Draft Troubles

PHILADELPHIA (AP)—"You know what they ought to do with these college football players we're trying to sign," asked Vince McNally, general manager of the Philadelphia Eagles.

Answering his own question, McNally asserted:

"Put them all in one room and hold an open auction. Because that's what this thing has become, an auction, a rat race."

The silver haired pro football executive had just returned from a tour in which he corralled Maxie Baughan, Georgia Tech center-line-backer, and Bill Lapham, Iowa center. He's been facing stiff competition from the new American Football League and the Canadian Loop.

"You run into two types of kids," said McNally. "One says, 'I want to play in the National Football League. I prefer its stability. I don't want to be a pioneer.'"

The other tells you, 'I want as much dough as I can get. I'm going to sweat you out.'"

McNally, who has been chasing college talent for the Eagles since 1949, years for the old days when "you asked a kid

Stan Musial Feels Age

ST. LOUIS (AP)—Stan Musial, anxious to atone for the only poor season of his career, said Thursday his daily training grind "makes me feel confident I'll be ready this time—already I feel stronger."

The seven-time batting champion is 39 and that's not a joke. In baseball it means you're getting old, but Stan is the first to admit it.

"When you get older, you have to work much harder to be ready to play," Stan said. "I just wasn't ready last year. Once the season starts, it's too late." He batted only .255 after 16 straight .300-plus seasons.

Musial admits he was dead tired after the St. Louis Cardinals 1958 post-season tour of Japan. He took it easy in spring training last season.

"I took it easy in past springs, too, but I was younger then and could more easily round into shape," he said.

For the past 10 days, Musial has been huffing and puffing through a rugged set of exercises outlined by Card trainer Bob Bauman. He has six weeks of the same before spring training.

"This looks easy but man, it isn't," said Stan, sweating and smiling. "But this is really the way to get in shape — you're toning up all your muscles, not just a few. When we started, four push-ups and I was bushed. Now I can do 15."

MSU Matmen Meet Illinois at Champaign

Both Teams Claim Strength In Heavyweight Division

Coach Fendley Collins and his Spartan grapplers leave this afternoon for Champaign, Ill., where they will tangle with the Illinois matmen on Saturday afternoon.

It will be the first dual meet for State this season. The Illini already hold a season opening victory over Purdue.

MSU's starting lineup, which was determined by practice meets held during this week, is as follows: 123—George Hobbie; 130—Bill Gucciarolo; 137—Norman Young; 147—Gordon Johnson; 157—Bob Moser; 167—Bob Schluter; 177—Roger Tavenner and heavyweight—John Baum.

Last winter Collins' crew pinned Illinois with a crushing 24-3 defeat. This year the Illini are stronger in several departments according to Spartan sources.

"We look for it to be a pretty close match," assistant Spartan coach Gale Mikley said. "It could swing either way."

Although State hasn't had as many matches as their opponents have, they won't go into the match completely cold. They warmed up for the Illini last weekend by defeating Minnesota, Northwestern, and Purdue in

an Quadrangular Tournament. Last season the Spartans had a dual meet record of five wins and three losses, and a tie.

Strong spots for State this year are in the 137 lb. class where Young is holding down the position, and in the heavyweight division headed by Baum. Young was the Big 10 champ as a 130 pounder last year.

Illinois sources state that the Illini are likewise strongest in the heavyweight competition. Big Bob Salata, who joined the squad late last season and defeated three of his last four dual meet opponents by pins, holds down that berth.

The best grapplers are also well equipped in the 157 lb. class with junior Mike O'Laughlin and at 167 with Pat Kelly.

Weak positions in the Illini armor are in the 137, 147 and 157 lb. classes. They are relying on sophomores and inexperienced bench strength to carry the load in these departments.

Kennedy Mapping Plan For California Primary

WASHINGTON (AP) — Sen. John Kennedy (D-Mass.) said Thursday he is "entertaining the idea" of running against Gov. Edmund (Pat) Brown in the California presidential primary.

Kennedy told the national press club at a luncheon that he expects to meet Sen. Hubert Humphrey (D-Minn.), the only other avowed candidate for the Democratic presidential nomination, in one primary or another.

But the Massachusetts senator indicated this may not be the April Wisconsin preferential vote which his brother, Robert Kennedy, has said would involve an unfair test because the state borders Humphrey's home grounds.

Kennedy suggested it might be possible to work out an agreement with Humphrey under which Humphrey would enter the March 8 New Hampshire primary in exchange for Kennedy's entry in Wisconsin.

In a prepared speech Kennedy said the next four years will require a president capable of acting as commander in chief of the Grand Alliance. Apparently he was talking about leadership of the free world lineup in general.

The people and the times, Kennedy said, will demand "not merely a bookkeeper who feels that his work is done when the numbers on the balance sheet come out even."

SEN. JOHN KENNEDY Democratic candidate

Tax Labeled Unconstitutional Mackie Claims Nuisance Tax Robs Road Construction Fund

More than 100 Michigan motorists may lose their lives in the next few years because of the state's new tax on state highway construction materials, according to the Michigan Commission on Transportation.

The tax is "discriminatory and unconstitutional," Mackie told the annual Michigan Forestry and Park Assoc. conference Thursday at Kellogg Center. He charged that it indirectly put money into the general fund that had been intended for highway construction.

The tax has caused contractors bidding on highway construction jobs to raise their bids to allow for the tax, according to Mackie. "The architects of the new tax program clearly have sought to rob gas and weight tax money earmarked by Michigan's constitution for highway purposes only, by taxing the use of this money for road building and putting the profit into the general fund," he said.

Russians May Orbit H-Bomb

WASHINGTON (AP) — Nuclear scientist Ralph Lapp speculated Thursday the Russians may be working on plans to orbit hydrogen bombs around the earth as a weapon satellites that could be shot down upon an enemy attack.

Dr. Lapp, a consultant on atomic energy, told reporters he thinks a Russian satellite nuclear bomb would be a serious threat but are not a possibility for the 1960s since they would be merely an extension of present ballistic missiles.

Present ICBMs, he noted, are fired from a fixed base to a target 6,000 miles away, and it would be only one step further to orbit the missile enough thrust to orbit the earth.

Honorary to Tour Chicago Studios

Miss Epsilon Rho, national president and television honorary, is making a three day field trip to Chicago beginning Monday, Jan. 18.

At the guests of two Chicago television agencies, the group will tour the network television studios and view both live and videotape operations. Plans will also be made to commercial film studios and record recording companies.

The group feels that the knowledge they gain from their visit will apply to their courses at Michigan, according to president Marjory Hippler.

McFarland Elected Secretary-Treasurer

New Space Engine Boosts Thor Missile to Distant Point

CAPE CANAVERAL (AP)—A new space engine made an impressive debut Thursday, boosting a Thor missile to an Atlantic target off the West Indies island of Antigua.

The test was the first of three for the engine, which the United States hopes will help fill a gap until bigger space boosters are developed in a year or so.

The Able and Delta rockets have numerous space assignments in the next few months. Most involve hurling relatively small payloads into orbit above the earth or deep into space.

The Thor blasted off at 11:35 a.m. Thursday and covered the 1,700 miles to its target in about 15 minutes.

Restaurant Club Plans Big Dance In Exotic Setting

"A Night in the Exotic Orient" is the title of a buffet dinner dance to be presented February 13, by Les Gourmets, a restaurant majors club, according to the club's executive board.

Tickets will go on sale Monday morning for students at the Union ticket office. Faculty and staff may obtain tickets at 39 Kellogg Center.

A WORD TO THOSE STUDENTS WHO WANT TO LEAD A CLEAN LIFE

Louis

'60 CHEVY! ONLY WAY YOU CAN BUY A CAR FOR LESS IS TO BUY A LOT LESS CAR!

- THRIFTIEST 6 IN ANY FULL-SIZE CAR** — Chevy's Hi-Tech 6 is the '60 version of the engine that got 22.38 miles per gallon in the latest Mobilgas Economy Run—more than any other full-size car.
- NEW ECONOMY 1000-FIVE V6** — Here's a V6 with the "big" Chevy's famous 1000—plus a new economy contoured camshaft and other refinements that get up to 10% more miles on a gallon of regular.
- EASIER-TO-LOAD LUGGAGE COMPARTMENT** — The trunk will fit more than a foot and a half wider than Chevy's nearest competitor. There's over 20% more usable space!
- MORE ROOM WHERE YOU WANT MORE ROOM** — Chevy's trimmed down transmission tunnel (25% smaller) gives you more foot room. You also get more head and hip room than in any other 2- or 4-door sedan in the field.
- WHEEST CHOICE OF POWER TRAINS** — A choice of 24 engine-transmission combinations in all — to satisfy the most finicky driving feel. There are seven engines with output all the way up to 135 h.p. and five silk smooth transmissions.
- EXTRA CONVENIENCES OF BODY BY FINGER** — No other car in Chevy's line gives you crank-operated vent windows. Safety Plans Glass all around and dozens of other Fisher Body refinements.
- CHEVY SETS THE PACE WITH LOWER PRICES** — All Chevy's are lower priced, as are many options. Example: a full Air V6 sedan with Torqueflite, do-horn heater and push-button radio lists at \$95.30 less for '60.
- QUICKER STOPPING BRAKES** — Long-lived bonded lining brakes with larger front-wheel cylinders for '60 give you quicker, surer stops with less pedal pressure.
- SOFTER, MORE SILENT RIDE** — Chevy's the only leading low-priced car that gets the bumps out of all four wheels. Noise and vibration are filtered to the vanishing point by new body mounts.
- NOT CHANGE FOR CHANGE'S SAKE, BUT FOR YOURS** — There's only one person we consider when we make a change—and that's you. That's why we don't think you're to your liking if anything has the grain.

The more you look around the more you'll find to convince you that no other low-priced car has so much to show for your money as this new Chevrolet. Here's the kind of styling sophistication and subtle detail that only Fisher Body-craftsmanship can create. Here's the kind of Full Coil comfort that neither of the other two leading low-priced cars—and only some of the smoothest riding higher priced ones—build into their suspension systems. Here's more room inside (where you want it) without an inch more outside (where you don't want it). And with all these advances Chevy has managed to hold the price line! Your dealer will be delighted to fill you in on all the facts. See The Drive Show Chevy Show in color Sunday ABC-TV—the Full Size Chevy Showroom every ABC-TV. Now—fast delivery, favorable financing. See your local authorized Chevrolet dealer.

Eisenhower Wants Shift Of Peaceful Space Program

WASHINGTON (AP) — President Eisenhower asked Congress Thursday to concentrate responsibility for the nation's peaceful space program in the Civilian Space Agency.

After a reading of Eisenhower's two special messages, Chairman Overton Brooks (D-La.) of the House Space committee said he found the proposals reasonable. No opposition developed on Capitol Hill immediately.

Once again the President underscored his view—and here he may be in for Democratic criticism—that "there is at present no clear department of defense requirement for such very large" rocket boosters as the Saturn.

Saturn is the name given a project for developing a giant three-stage rocket, with a basic thrust of 1 1/2 million pounds, to boost a manned vehicle far into space. Von Braun's team, based at the Army Ballistic Missile Agency in Huntsville, Ala., has been working on the Saturn which already has been transferred by Eisenhower to NASA.

In one message, the President asked for legislation to eliminate what he said are deficiencies in

the 1958 law authorizing the space effort. Eisenhower said that law has provisions which tend to obscure NASA's responsibility for planning and running a program of peaceful exploration in space.

Among other things, Eisenhower asked that the president be relieved of legally imposed duties for planning and detailed survey of space programs. He also proposed abolition of the National Aeronautics and Space Council whose only function, he said, is to advise him in this connection.

In a second message, the President formally notified Congress of his plan, announced Oct. 21, to transfer to NASA the

Army Ballistic Missile Agency and its force of scientists, technicians and others numbering between 4,600 and 5,016. Most are at Huntsville.

Eisenhower said the change-over would spur work on super rocket engines.

Insurance Investigated After Plane Crash

WASHINGTON — A government investigator disclosed to intently listening Senators Thursday that from \$875,000 to \$187,500 worth of insurance had been issued for one of the 31 persons killed in a mysterious Jan. 6 airliner crash.

The heavily insured victim was named as Julian Andrew Frank, a 32-year-old lawyer whose home was Westport, Conn.

His body was found only last Saturday, 16 miles from where the plane crashed near Bolivia, N.C., three days earlier.

There was no disclosure of who took out the insurance, or who the beneficiary or beneficiaries were.

"More investigation is currently underway," Oscar Bakke, head of the safety division of the Civil Aeronautics Board told

a Senate commerce subcommittee on aviation.

The subcommittee is looking into problems of air safety in general, and Thursday took up the case of the four-engine National Airlines plane which apparently disintegrated in flight over North Carolina while headed nonstop from New York to Florida.

At one point he said Frank's

insurance included a \$100,000 accident policy issued in April, 1959, a \$500,000 life policy issued in November, another \$100,000 accident policy dated late in November, and three accident policies of \$62,500 each, issued in December.

At the time of the crash the casualty list carried the name of "Julian K. Frank, 32, of 28 Ellery Lane, Westport, Conn."

Signup Deadline Set For Bridge Tourney

Union Board announces that bridge tournament signups will last until January 20. A 75 cent entrance fee is required for the tournament, which will begin Jan. 21, and will run every Thursday for five weeks. Interested players may sign up at the Union Board desk.
