

THE ALUMNI MEMORIAL CHAPEL proudly stands on MSU's campus as a symbol of the religious spirit of the university. Remnants of world history are imbedded in the walls and stories of the building.

Nestled Among Pines, Oaks Chapel Represents History In Stained Windows, Walls

By JESS MAXWELL

Down a short, winding path, the Alumni Memorial Chapel is nestled among the pines and oaks. This little building, known as the Alumni Memorial Chapel, is a landmark of history and beauty on the MSU campus.

Throughout the chapel, designed interior, remnants of world history are imbedded in the walls. Stained glass windows, depicting scenes from the annals of world history, are scattered throughout the building.

The outstanding feature of this little chapel, however, is its stained glass windows. Each is a distinct, three-dimensional work of art, costing up to \$500 each, or a set of three, each tells a complete, lasting story of an idea, symbol or thought.

One such known tradition is the well-established shower, or an unexpected "swim" in the Red Cedar. Any of the following should walk with caution, or beware of their friends; seniors, "pinned" or engaged couples, and happy-go-lucky birthday celebrators.

Senior Swingout, another tradition, precedes graduation each year. Seniors stand in front of their living units and join the procession on its roundabout trip to Fairchild.

This has slightly changed from the earlier part of the century. Seniors actually did swing out of college.

Back in 1910, for example, the senior men would push the

Alumni Memorial Chapel remained an idea and a fond hope for over 15 years. The dream of such a chapel began before the depression—but financial problems beset its founders—and the little building of worship was not dedicated until June 7, 1957. In all, it's worth over \$235,000.

Nathan M. G. Dickinson speaks of the chapel with a feeling of pride. He points out that it is used by all faiths, creeds, and colors. Dickinson himself graduated from MSU back in the days when only several thousand students attended.

Next time you walk down Auditorium Road, take a look at the little chapel by the river. It is an important part of history and of MSU.

Red Writers Let Minds Run Wild

MOSCOW (AP)—Soviet writers are letting their imaginations run wild in exciting ways to support the world's armies.

At the same time, the Press Syndicate that Premier Nikita Khrushchev's plan to cut Russian armed forces by 1,200,000 men in the next two years will still leave the Soviet Union with military might at least equal to that of any other country.

The Supreme Soviet, or Parliament, approved the plan last week and called on other countries to do likewise.

These examples of the imaginative schemes of Soviet scientists and scientific writers for spending the money that would be available if the world followed Russia's example were given in the Trade Union newspaper Trud.

- Build a round-the-world railroad connecting New York, Moscow and London by way of tunnels, under Bering Strait and the English Channel, with branch lines to Red China and northern America.
- Change the direction of the Gulf Stream in the Atlantic to warm northern Europe and northern America.
- Dam Bering Strait to permit the moving of warm Pacific waters into the Arctic to warm northern Canada, Alaska and Siberia to make them more habitable and to make the Arctic seas navigable.
- Throw huge ice masses from the Arctic and Antarctic to water dry areas in North and South America.
- Moderate the climate of the Sahara by digging tunnels to run Mediterranean water into sub-sahara levels such as the Sahara, depression of western Egypt.
- Dig a hole 10 miles deep to study the earth's structure.
- Spend three to four billion dollars controlling the Congo, building dams and making lakes to industrialize the country and improve the climate.
- Dig an elaborate canal system connecting the rivers of South America.
- Build huge dams at the Dardanelles and Gibraltar to lower the Mediterranean's level by about 300 feet, creating low land equal to the area of France and providing immense power resources.

This last idea, said the Russian engineer I. Astashev, was originated by a German.

Checked Fashions Lead Parade In New York Spring Fashion Show

NEW YORK (AP)—Fashion will lead a checked parade this spring, according to all signs of the elegant New York spring dress showing.

Checks in all sizes, colors and fabrics form a dominant theme in the coat and suit picture spearheaded by Monte-Sano and Pruzan.

The Monte-Sano clothes for spring 1960 feature a melon silhouette in both coats and suits. Coats are straight or slightly flared in front and blossom into a wide, capelike line in back, curving from a wide shoulder

to a narrow hem. Suit jackets also are likely to be rounded and flared in back, with collars in both instances wide, cut away from the neck and drooping backward.

Checks dominate the collection, ranging from mesh tweed suit checks, usually in subdued tones, to giant black-and-white checks in spongy wools, seen in coats.

Monte-Sano and Pruzan are strong for the "slipped-back" look, enveloping their models to walk with a stance reminiscent of the debutante slouch of the twenties.

Crossword Puzzle

ACROSS

1. Build a round-the-world railroad connecting New York, Moscow and London by way of tunnels, under Bering Strait and the English Channel, with branch lines to Red China and northern America.
2. Change the direction of the Gulf Stream in the Atlantic to warm northern Europe and northern America.
3. Dam Bering Strait to permit the moving of warm Pacific waters into the Arctic to warm northern Canada, Alaska and Siberia to make them more habitable and to make the Arctic seas navigable.
4. Throw huge ice masses from the Arctic and Antarctic to water dry areas in North and South America.
5. Moderate the climate of the Sahara by digging tunnels to run Mediterranean water into sub-sahara levels such as the Sahara, depression of western Egypt.
6. Dig a hole 10 miles deep to study the earth's structure.
7. Spend three to four billion dollars controlling the Congo, building dams and making lakes to industrialize the country and improve the climate.
8. Dig an elaborate canal system connecting the rivers of South America.
9. Build huge dams at the Dardanelles and Gibraltar to lower the Mediterranean's level by about 300 feet, creating low land equal to the area of France and providing immense power resources.

Kisses, Moonlight Dot MSU Traditions

By HOWARD HOLMES

A kiss, some moonlight, and a tower striking midnight—completely unrelated objects combine to make one of MSU's oldest and most known traditions—the officiating of a woman becoming a coed.

Women, when kissed at the stroke of midnight under the shadows of Bestmont tower, are transformed into official coeds.

There are also some other traditions that have continued to hang onto the few ivy buildings around campus, a few completely new, some changed and some that are as old as the University itself.

Seniors are not able to boast of their many privileges as they did in the early part of MSU history. Quite a few changes have been made. An old 1912 MAC student handbook lists only a few:

1. "When an upperclassman tells you it is a custom or tradition (and not explaining what it is) for things to happen, respect his word and honor the tradition."
2. "Don't be a buttinsky. Be respectful to upperclassmen. Know your place and keep it."
3. "Seniors only may wear hard hats."

"One night stand" traditions still continue to exist on campus. Such customs include the Water Carnival, a gala night of floats and swimming in the Red Cedar, and if the men withstand the blows of the Excalibur tappings, they become a member of the "honorary" honorary.

Perhaps the most well-known and loved tradition is an emblem, the blue and yellow speckled Sparty that stands at the entrance to the South Campus, forever on guard against people who may be there to obstruct or try to fight against his people—the students of MSU.

Senior Gals Make Up Select Group

By JODY HOWARD

The May Morning Tapping of a junior woman is usually the pinnacle of her college career. From the junior coeds, about 20 are picked for the Mortar Board the senior Women's Honorary.

Earlier this term, over 200 top students and faculty members received recommendation forms from Mortar Board. Each was asked to name several junior women whom he felt excelled in scholarship, leadership and service.

These forms were returned to Mortar Board and are now being used as a guide for selecting next year's members.

Approximately 20 juniors have the honor of wearing the Mortar Board pin although, as few as five may be recognized. Most members have well above a B average, but a 2.0 all-college is the scholastic minimum.

Spenser Spin is an occasion on which all coeds are expected to fork out money for their dates. Strangely enough, it is the primary money making activity of Mortar Board who teams up with Tower Guard and Spartan Women's League to sponsor the dance.

Early in fall, the Mortar Board members go on a weekend retreat during which they outline their year's activities. Each class selects its own service project, to which they devote most of their year's energy. Last year Mortar Board sponsored the "Last Lecture" series presented by Russell Nye and Stanley Islerda.

A traditional activity is the "Apple, Polisher's Dessert," to which each member brings a favorite faculty member. They also sponsor Lantern Night, to honor outstanding senior women, and they take part in presenting "Who's Who and What's Freshman" for the benefit of new freshmen.

Next May, when you see coeds walking around in funny little flat hats with tassels, you will realize that they are not just members of the Beat Generation. They are the outstanding women at MSU, and the newly selected members of Mortar Board.

Young Voters Shock Nation By Their Ignorance of Candidates

The shocking facts in a recent survey were that one out of four young voters did not know that Senator John Kennedy is Catholic.

In order to determine the attitudes of men and women between the ages of 21 and 40 concerning five Democratic and two Republican candidates running for the presidential nomination, Redbook magazine asked an independent research organization to question a representative sample of 500 voters in all parts of the country.

The first category concerned the candidates' religions. Besides religion Redbook tested the voters on their knowledge of the seven candidates' health, financial status, public office and political party.

Surveyors also asked them to select the candidate they believed had the most experience in international affairs, would deal firmly with the Russians, would be a strong advocate of school integration and would be friendliest to labor and business.

The results, according to the article, "reveal ignorance and

confusion among many of our young voters about the best publicized figures in America today, ignorance of who they are and confusion about what they believe."

In answer to the question, "To which party does he belong?" Redbook reports were that almost everyone knew Vice President Nixon is a Republican and Adlai Stevenson is a Democrat. Eighty-three percent knew that Nelson Rockefeller is a Republican but only 12 percent could give Senator Kennedy's party.

On the question of which candidate had the most popular appeal, Kennedy led the Democrats with 58 percent and Nixon

received 63 percent of the publican votes.

Stevenson was second in popularity among the Democrats with Lyndon Johnson, Hubert H. Humphrey and Hubert H. Humphrey next in order.

In answer to which Democrat would make the best president, Kennedy received 34 percent of the vote with Stevenson a close second. Over half the voters felt the Republican candidate, Nixon, would make the best president.

Men Serve Hospital's Patients

If you're in the hospital, someday, it's possible you may be visited by a member of the men's service fraternity, Alpha Phi Omega.

Aside from visiting patients in Olin, the men of Alpha Phi Omega, a service fraternity, participate in various campus organizations where they can be of service.

The men also work with Spartan Women's League on Coffee Capers for transfer students. In the spring, they sponsor the U-List Man on Campus dance and the proceeds are given to Campus Chest.

Alpha Phi Omega is the largest national service fraternity with 251 chapters scattered around the nation. The only requirement is previous experience as a Boy Scout and a desire to be of service on campus.

A rush smoker for all interested men is held in February. During the pledge period, each man is required to devote 20 hours of service before he becomes active.

In the fall this service group helps in sponsoring the blood drive. However, their most important duties are serving the patients confined to Olin. They supply them with cigarettes and candy.

But all is not work for the hospital for in the winter they go tobogganing and have parties. There is a winter banquet and term meetings held with Spartan Women's League.

Pacific Scene for Red Testing

MOSCOW (AP)—Soviet use of the central Pacific as a rocket testing ground may lead to a test at Mars and a new drive to the moon.

Army General William Palm... was named chief of staff for military aid to friendly nations.

...in Soviet newspapers and scientific magazines. It apparently adds up to something besides talk.

The Russian rarely announce in advance what they are planning to do, but the scientists' talk appears to point to a possible double project before the end of the test period Feb. 15.

Prof. G. V. Petrovich, writing in the Bulletin of the Academy of Sciences, outlined what the Russians hope to do with a telescope-equipped satellite.

The development of a heavy well-oriented artificial satellite equipped with a powerful telescope which could be automatically aimed by remote control might lift the curtain which from time immemorial has con-

cealed space from the human eye," Petrovich said.

Although the article was written before the dates were announced for the Jan. 15-Feb. 15 experiments, this reference to possibility that some such operation may be attempted in the Pacific.

A telescope-bearing satellite would not need to go all the way to Mars to try for pictures. It would be necessary only to get it into orbit outside the earth's atmosphere.

Governor Asks Expansion of U of M Research

DETROIT (AP)—Gov. Williams said Tuesday night he will ask the legislature to authorize an expansion program for the new institute of science and technology at the University of Michigan.

More research is necessary for the state's economic growth, the governor said in a speech prepared for the American Right of Way Assn.

Williams said he would ask the legislature in his forthcoming budget message to allocate \$900,000 for the institute, a \$400,000 increase over the current appropriation.

He will also recommend \$3,000,000 for construction purposes in his capital outlay and bonding proposal outlined to lawmakers last week, he said.

"More and more people are coming to realize that there is a connection between so-called academic research and economic growth," the governor said.

KHRUSHCHEV addresses the Supreme Soviet Jan. 16, announcing a cut of almost a third in the number of men in its armed services.

Campus Favorites in Masculine Eyewear

It's a puzzlement: When you're old enough to go to college, you're old enough to go out with girls. When you're old enough to go out with girls, who needs college? Oh well, there's always Coca-Cola. BE REALLY REFRESHED. Bottled under authority of The Coca-Cola Company by LA-SALLE COCA-COLA BOTTLING COMPANY Lansing, Michigan

No Bomb Evidence Found In Plane Crash Wreckage

WASHINGTON (AP)—A well-placed source said Tuesday Federal investigators have turned up no physical evidence to prove that a bomb caused the North Carolina plane crash which killed 34 persons Jan. 6.

The source said the investigators, while still inclined to believe a suicide bomb scheme precipitated the crash, never have overlooked the possibility of other causes—possibly sudden decompression in the pressurized ship.

The wreckage of the National Airlines plane is being recon-

structed now at Wilmington, N.C., by Civil Aeronautics Board and FBI experts. They hope to find evidence as to just what happened.

Oscar Bakke, director of the CAB Safety Bureau, told the Senate Aviation subcommittee at a public hearing last week that if a bomb had exploded, the case could be solved easily.

Bakke had made much of the fact that one of the victims, Julian Andrew Frank, had taken out nearly \$900,000 worth of life and accident insurance since April.

Iowa Game Features Special Cheer Group

A cheering section will be featured at the Iowa game this Saturday afternoon.

Students wearing white shirts or blouses will be allowed to sit in a special section at center court across from the team benches. Special tickets will not be issued. Instead, students will be seated on a first-come, first-served basis.

Gary Subject Of Union Talk

British novelist Joyce Cary, author of "The Horse's Mouth," was the subject of a formal public lecture at MSU Union, Room 31, at 8 p.m. Jan. 20.

The speaker will be Dr. Harold Adams of MSU's English department. His will be the first lecture in a series, "New Views in Contemporary Literature," jointly sponsored by the Board and the English department.

Taking issue with many critics, Dr. Adams will uphold Cary as a major 20th century novelist. His analysis of Cary's books of "The Horse's Mouth" and the later "The Works of the Holy Spirit."

Dr. Adams will also discuss the English department's fourth lecture in the series, scheduled for Feb. 2.

Londoner Avoids Jam By Using Foot Power

LONDON (AP)—Arthur Williams, 26-year-old accountant, jogged a track suit and jogged 10 miles from his office to his vine-covered suburban cottage in 33 minutes. It was four minutes faster than he could have traveled by bus or subway.

Swimmer Gets 'Tie' Award

The Bill Campbell necktie award, a regular presentation to the outstanding MSU swimming team member in a particular meet, was awarded this week to Dick Brackett for his double victory in the 220 and 440-yard freestyles in the Iowa meet.

Brackett's times, 2:08.7 and 4:38.5, were his best, said Coach Charles McCaffree. The coach disclosed that butterfly man Carl Shaar won the honor for the Iowa State meet and sprinter Larry Jones for the Big 10 relays.

The swimming squad, traveling to Minnesota Saturday, now have a Big 10 win under their belts. "We had to do a good job with Iowa," McCaffree said, adding that the Hawkeyes are stronger than they have been in five years. MSU won, 70-31.

The 17-man traveling team has not been decided on yet.

... leads MVP race ...

Barry Cullen to Hershey

DETROIT (P) — The Detroit Red Wings Monday sent forward Barry Cullen to the Hershey Bears of the American Hockey League.

Departure of Cullen who came to Detroit from the Toronto Maple Leafs on a trade last summer, brings the Red Wings to the player limit of 18.

Howe Leads in Votes For Hart MVP Award

MONTREAL (P) — Veterans Gordie Howe of the Detroit Red Wings and Doug Harvey of the Montreal Canadiens have taken a firm hold on two of the National Hockey League's most prized trophies.

The mid-season voting released Monday showed Howe has a commanding lead in competition for the most valuable player award—the Hart Trophy. The Detroit star, who holds the all-time scoring lead with 750 points, is a four-time MVP. Eddie Shore, a former great defenseman for the Boston Bruins, is the only other four-time winner.

Howe collected 59 points in the balloting by hockey writers and broadcasters in each of the six NHL cities. Bobby Hull, Chicago Black Hawks' left winger, was second with 31 points. He was followed by big Jean Beliveau of Montreal with 21, Bert Olmstead of Toronto with 18 and Bronco Horvath, Boston 13.

Harvey had 66 points in the voting for the James D. Norris Memorial Trophy, awarded to the outstanding defenseman. Harvey won the trophy four straight years before teammate Tom Johnson took it last season.

Runner-up to Harvey on a basis of five points for a first place vote, three for second, and one for third was Bill Gadsby of the New York Rangers. Gadsby had 20 points. Then came Marcel Pronovost of Detroit 18, the Canadiens' Johnson 18 and Allan Stanley of Toronto 15.

In other trophy voting, Bill (Red) Hay of Chicago grabbed a slim lead over Murray Oliver of Detroit for the rookie-of-the-

year award—the Calder Trophy—and Don McKenney of Boston ahead moved in the running for the Lady Byng Trophy, given to the player "adjudged to have exhibited the best type of sportsmanship combined with a high standard of playing ability."

Hay piled up 57 points and Oliver 54. Stan Mikita of Chicago was third with 23 points, followed by Kenny Schinkel of New York, 22.

McKenney, who is eighth in the scoring race with 44 points and has incurred only 12 minutes in penalties, received 32 points. Henri (Pocket Rocket) Richard of the Canadiens was runner-up with 24.

A second vote will be taken at the end of the season and the combined total points will determine the winners, who will each receive \$1,000 from the league.

NFL Owners Meet to Elect Commissioner Coverage Extended In IM Cage Results

MIAMI BEACH, Fla. (P) — The scrimmaging is over and the real game kicks off today when 12 National Football League club owners gather to elect a commissioner and resolve the Thorny problem of expansion.

Other problems expected to be debated at the meeting include proposed playing rule changes, player association relations, the player limit, minimum game guarantees, radio and television contracts and the congressional investigation into professional sports.

Veteran observers are unanimous in the opinion this could be the most important meeting in the 40-year history of the league.

The first step will be a motion to amend the constitution, making 10 of the 12 votes enough to admit new teams. Such a move now requires unanimous consent. Ten votes can push through the amendment.

George Preston Marshall, volatile owner of the Washington Redskins, is emphatically against increasing the league membership.

SPORTLITES
Coverage Extended In IM Cage Results
By JIM WALLINGTON
State News Sports Editor

THE STATE NEWS sports department is attempting to offer readers more complete intramural coverage. The first step was taken in Tuesday morning's edition.

A new service has been added to the IM Results where the high scorers in each basketball game are inserted after results of each game.

The players' names and their total points are printed. Before the semi-colon are the winning team's high men with the loser's top scorer after the semi-colon.

If the new system proves popular and feasible, additional coverage will be extended to other sports.

Dean Look, who Michigan State football Coach Duffy Daugherty calls his "greatest quarterback," was quoted in a story called "I'd Like to Play in the Third League" which appears in SPORT magazine.

Look, a star on the diamond as well as on the gridiron, said in the magazine, "I definitely would consider an offer from a third-league team. Playing in the Continental League would have tremendous advantages."

Then Look got a little sickening as the magazine quoted him as saying, "It would be nice to grow with a new league, too. To improve year by year, just as the league does."

Then MSU's most valuable player in baseball and football got practical when he said, "Of course, the new league would have to offer me as much money as I've been offered."

And you know the story. Look signed with the Chicago White Sox of the American League.

A report comes from the South that the American Football Coaches Association is exploring the possibility of staging an annual East-West all-star football game in June. The game would be held in the Rose Bowl, the Sugar Bowl or Soldiers Field in Chicago.

Proceeds would be used to promote college football and to help finance a football hall of fame building.

Varsity Edges Alumni; Walker, Hedden Star

The MSU Alumni put on a tremendous second half show before 3,500 roaring fans, but they fell short as the Varsity managed a 75-73 victory.

The Varsity, led by Horace Walker's 34 points, saw an 11-point lead with less than three minutes to go, almost slip through their fingers, when the Old Timers tried to repeat last year's feat of forcing the varsity into overtime.

Julius McCoy and Larry Hedden led the Old Timers scoring with 21 and 24 points respectively, but it was Walker's phenomenal shooting that spelled the difference in the game. Walker poured in 19 of his points in the first half as the Varsity coasted to a 40-21 lead.

A pressing defense and a horse-type offense seemed to wear down the oldsters in the second half and help the Varsity build up their nine-point half-time advantage.

The Alumni seemed to catch the second wind in the final minutes when they reversed tactics with the Varsity and raced to within two points of tying the game.

With 2:45 minutes remaining to be played in the game, the Varsity enjoyed a seemingly safe lead of 70-59. Then the Old Timers won into a press, and with Jack Quiggle, Julius McCoy and Larry Hedden repeatedly stealing the ball, they managed to narrow the margin to 71-71. Quiggle then fouled Dave Fox as he attempted to steal the ball with only 9 seconds to go. Fox sank the free throw and put the game out of reach.

The Varsity was playing Tuesday without the services of Dave Scott and Lance Olson, who were starting forwards. Both were expected to be ready to play in Saturday's regional television game with the University of Iowa.

The foul shooting of the Varsity gave them the margin as they sank 27 of 39 free throws, compared to the Old Timers' 15 out of 23. The Old Timers hit 29 out of 72 from the field, a 40 percent shooting average, while the Varsity hit on 24 out of 67 shot for a 36 percent average.

The Old Timers outscored MSU 56-49.

The halftime entertainment consisted of a musical routine performed by the Owosso High School marching band, and a performance by the men's gymnastics team featuring Stan Tessa on the horizontal bar.

Saturday's game with Iowa will begin at 4:30 p.m. in Jenison Fieldhouse. In their previous encounter with the Hawkeyes, the Spartans were beaten 62-79.

U. S. Able to Stave Off Enemy Attack

Top Defense Officials Brief Senators on Arms Situation

WASHINGTON (AP)—Top defense officials briefed senators Tuesday on the state of U.S. arms and afterward Sen. Richard Russell (D-Ga.) said "at present I think we are strong enough to prevent an attack, except by a madman."

New Prof Joins Staff On Campus

John Coyle, an executive with the Burrage Corporation for the past 12 years, has joined the staff of the Labor and Industrial Relations Center.

As an assistant professor Coyle will be coordinator in the Center's personnel management program service. He will be concerned with management training programs in personnel administration, both on and off campus.

Coyle's positions with the Burrage Corporation in Detroit included corporate employment manager and industrial relations director. He has also served as division director of personnel and public relations in Plymouth.

He holds undergraduate and graduate degrees in business administration from the University of Detroit and taught courses in industrial relations as a member of the evening faculty of that institution since 1952.

His memberships include the Industrial Relations Assn. and the Industrial Relations Research Assn. of Detroit and the American Society for Personnel Administration. He is past director of the Personnel Management Club of Detroit.

Coyle's writings include articles on professionalism in industry, communications and grievance administration and industrial safety.

Placement Bureau

The following employers will interview on the indicated dates. If you are interested report to the Placement Bureau at least two school days in advance of interview date. Woman also may interview majors with asterisk (*).

(B) Bachelor's degree, (M) Masters, (D) Doctors. Where no degree is indicated, all degree levels are eligible to interview.

JANUARY 21-22

The Dow Chemical Co.: All men (B) (M) from the College of Engineering, Chemistry, Packaging (B) (M), Bus. Adm. (with U.S. one year of Chem. Engrs. or Science) (B) (M), Agriculture, or any Science majors for Industrial Sales, Merchandising & Market Research.

Linde Co.: All Engineers (B) (M) for Sales & Production, Chemistry (B) (M) majors for Engineering & Research, Physics (B) (M) majors for Design & Development.

JANUARY 22

Michigan State Highway Department: Civil (B) (M) Engrs. for Design.

Lee C. Moore Corp.: Civil (B) (M) Engrs. for Engineering Development & Design.

Olin Mathieson Chemical Corp.: Chem. (B) (M), Mech. (B) & Met. (B) Engrs. for Production and R & D, Civil (B) Engrs. for Sales Training Positions. Chemistry majors for R & D and Production.

The White Motor Co.: Mech. (B) (M) Engrs. for Manufacturing, Engineering & Sales positions.

WYANDOTTE CHEMICALS CORP.

Chemistry (M) (D) majors for Research, Chem. (B) (M) Engrs. for Production, Research & Pilot Plant Engrs. & Accounting (B) (M) majors for Accountant Trainee Program.

JANUARY 23-29

Bell Telephone System: Economics (B) (M), Business Admin. (B) (M), Accounting (B) (M), Marketing (B) (M), Finance (B) (M), & Div. Social Science (B) (M) majors for Staff Trainee Program in

Accounting & Production Management, and Management Trainee Program for Comptrollers, Office Management, Marketing & Supervision.

JANUARY 25

Armour & Company: Food Research & Quality Control Division: Biochemistry, Food Technology & Animal Husbandry (Strong in Chem. or Bacteriology) (M) (D) majors for Research, Bacteriology (D) majors for Bacteriology Research.

Central Research Laboratories: Chemistry majors for all phases of work in Chemistry,

Accounting & Production Management, and Management Trainee Program for Comptrollers, Office Management, Marketing & Supervision.

THE PARENTS of Beeky Cavendish, 3, and Paul Smith, 4, romping in background, say they mean what this sign says in Huntington, W. Va.

Keep Record of Insects Detectives Solve Bug Case With Mug File

University "detectives" use "mug files" and "m.o.'s" to catch public enemies from the insect world.

Example: Dr. Roland Fischer solved the "Case of the Larvae on the Kitchen Floor."

Mrs. X, a neat Michigan housewife, was distressed by the repeated appearance of white, wormy-looking creatures on her spotless kitchen floor.

She sent some of them to the entomology department. Fischer, an associate professor, consulted his "mug file," a collection of 30,000 species (types), including Mrs. X's creatures as a species of blowfly larvae.

Checking the "m.o." — police term for "modus operandi" or "method of operation" — he found that the species is associated with dead animals.

He wrote to Mrs. X, suggesting that she might have a dead mouse in her house. Mrs. X reported that she kept a clean house.

Fischer wrote again. He asked her to look for a dead animal, perhaps, in the attic over the kitchen ceiling.

She did. She found a dead bat riddled with the larvae. They had apparently fallen through an opening around an electric light fixture and onto the kitchen floor.

Fischer said the MSU collection of insects, which was begun about 100 years ago, is important and because no one person can hope to identify all insects.

In Michigan alone, he pointed out, there are about 18,000 species of insects. Within his own specialty, bees, he guesses there are 300 species. In the world, there are an estimated one million species, of which 750,000 have been identified, he said.

Trips to Hawaii by auto, plane rides to anywhere on weekends made their "appearances" on the Ride Bureau Board provided by the Union Board in the Union Lobby in the last few weeks.

Although these are not confirmed rides, the purpose of the bulletin is for people who wish to seek riders for a weekend or at the end of a term. Space on the Ride Bureau is allotted for rides to upper Michigan and various parts of the country.

Sheets of paper are provided for students to state their destination and put them on the spirals provided. The rider must get directly in contact with the person with whom he wishes to ride.

Veterinarians to Hold Reunion

The College of Veterinary Medicine will hold its alumni reunion and 37th Annual Post-Graduate Conference for veterinarians today and Thursday at Kellogg Center.

This year's conference will help observe the 50th anniversary of the College of Veterinary Medicine, which in 1910 established the first four-year curriculum in any veterinary school east of the Mississippi.

In honor of the anniversary, Gov. G. Mennen Williams has proclaimed Jan. 18-23 as Veterinary Medicine Week.

Nearly 400 practicing veterinarians and university students from the Midwest will be present at the conference to learn of recent advances in the treatment of farm and home animals.

Therapeutic methods in equine practice, tranquilizers in veterinary medicine, canine skin diseases, mastitis in cattle and blood disorders in cats are some of the topics which will be included in the conference.

Opening conference sessions will feature clinical demonstrations over closed circuit television, WMSB-TV.

Among the speakers will be Dr. William Hagan, dean emeritus, New York State Veterinary College; Dr. S. F. Scheidt, president, American Veterinary Medical Assn., and Dr. Paul Miller, Provost.

A special ladies program for the wives of the veterinarians in attendance is on the agenda.

Ruth Page's Chicago Opera Ballet will perform at the aud at 8:15 p.m. next Monday and Tuesday in Series A and B respectively of the Lecture-Concert Series.

Starring will be Melissa Hayden, of whom John Martin, drama critic of The New York Times, recently wrote, "Here is a magnificent artist, with an automatic understanding of dancing as such that illumines every role that is given to her."

Supporting Miss Hayden will be Kenneth Johnson, Veronica Mikar, Barbara Steele, Patricia Kikovic, Orrin Kayan and the corps de ballet. An orchestra under the direction of Neal Kayan is included in the touring company.

Formed in 1953, the Chicago Opera Ballet has provided the Chicago Lyric Opera with ballets for its performances, as well as offering full evenings of ballet or of ballet coupled with short operas.

The current repertory includes four translations of opera into dance: "The Merry Widow," a ballet version of Franz Lehár's opera, "Reverie," based on Verdi's "Il Trovatore," "Carmen," the story-in-dance of Verdi's "La Traviata," and "Carmen," from Bizet's classic.
