

Court Agrees to Rule On Arkansas Law

Negro Teachers Say Law Designed Against Segregation

WASHINGTON (AP)—The Supreme Court agreed Monday to rule on an Arkansas law which Negro teachers say is designed to deter them from supporting any organization that advocates desegregation.

The law, enacted by a special session of the state legislature in 1958, requires teachers to list under oath all organizations to which they have belonged in the preceding five years.

In their appeal to the Supreme Court, Negro teachers cited the act "part of a legislative plan and design to maintain racial segregation in public schools despite the 14th amendment mandate to the contrary."

R. T. Shelton, a Negro teacher in Little Rock who acknowledges that he belongs to the National Association for the Advancement of Colored People, was denied employment for the 1959 school term because he refused to submit a statement.

Shelton appealed to the Supreme Court after a three-judge federal court in Arkansas upheld constitutionality of the requirement. He was joined by the Arkansas Teachers Assn., composed of Negro teachers, and T. W. Congo, executive secretary of the assn.

In another case involving racial matters, the court ordered a hearing for two Negroes charged with death sentences in Louisiana.

Capital Makes Bomb Search In Two Planes

LANSING (AP)—Capital Airlines searched two of its aircraft here and at Milwaukee, Monday following an anonymous telephone call that a bomb had been put aboard a plane.

The airline office here reported the caller said a bomb had been put aboard a Capital plane due to arrive at Grand Rapids at 5 p.m. EST.

The airline had two planes, one from the east and another from the west, scheduled for 3 p.m. arrival at Grand Rapids. Capital said the caller reported the bomb was aboard the plane from the west.

Capital said the plane from Milwaukee had not left the city on time. It was ordered grounded while a search was made.

The other plane, headed from Detroit to Grand Rapids, with a stop at Lansing, was grounded here and searched as a precautionary measure, Capital said.

Seniors of the Week

RUSSELL PEPPET

Russell Peppet, Chicago, Ill. senior, is a familiar figure among the leaders of many campus activities and organizations.

His offices range from president of the Army ROTC Officers Club to business manager of the Men's Glee Club.

Russ is also treasurer of his fraternity, Delta Tau Delta, and a member of Union Board. Last year he was a member of Junior Council and chairman of J-Day.

A math major with an all-college average of 3.3, Russ has been selected for membership in five honorary groups. He has been a member of Phi Eta Sigma, Green Helms and Psi Mu Epsilon (mathematics honorary).

He is presently president of Blue Key and a member of Excelsior, which is limited to 14 senior men.

Russ' post-graduation plans include marriage, work for a master's degree at Stanford University, and military service in the Army.

Rosemary Meyer, Lansing senior, was class secretary and

ROSEMARY MEYER

a member of Fresh Soph Council during her first year at State. Since then, Rose has continued to add to her list of activities and organizations.

She is a member of Union Board, Student Advisory Council, Campus Chest, and has been recording secretary and president of the Speech and Hearing Society (soon to become Sigma Alpha Eta).

Rose was chairman of the Guests and Patrons Committee for last year's J-Hop, and general co-chairman for 1959 Greek Week.

A Speech major, with an all-college average of 3.4, Rose is president of her sorority, Sigma Kappa.

She was a member of Tower Guard, an Army ROTC Corps sponsor, in the Homecoming Queen's court, and received the outstanding junior award. She is a member of Mortar Board, senior women's honorary.

After graduation, Rose's plans include marriage and teaching speech correction.

Paris Fashions Put Accent Squarely, Daringly on Sex

PARIS (AP)—If Jean Patou's show doesn't turn out to be the sexiest of the season, then Paris really has something to look forward to.

His sleek, domineering, and tight and his suits barely cover the knee. His are happy. The college is daring. The designer is full of tricks that put the accent squarely on sex.

The trademark of the collection, second of the spring season, is a corset-like that begins under the bustline and ends at

the top of the hip. For the night time, a Paris high fashion collection, the girls seem to wear no girdles.

When necklines aren't too low, they're draped up to form a triangle below the bustline. Bows are still to be seen on the back, and long skirts are flared and fit to the knee in front.

It all seemed to go with the reworked sort of bird signature and warbles that greeted guests at the show Monday.

THE GARRETT CORPORATION

AiResearch Divisions

will be on campus to interview

ENGINEERING STUDENTS

B.S. - M.S. - Ph.D. candidates

The Garrett Corporation is one of the most diverse research, engineering and manufacturing organizations in the aircraft, missile and technological fields.

From AiResearch laboratories have come pioneer developments in aircraft and missile components and systems. Today 90% of the free world's aircraft use AiResearch equipment.

Other Garrett divisions and subsidiaries are creating a variety of products, including

industrial turbochargers and survival equipment, as well as supplying sales and service to airframe companies, airlines and the military.

Project work is conducted by small groups in which individual effort is more quickly recognized and opportunities for learning and advancement are enhanced.

With company financial assistance, you can continue your education at line neighboring universities.

TYPICAL PROJECT ACTIVITIES

Electronic air data computers, pressure ratio transducers, instruments, electrical systems and motors and generators.

Preliminary design, from analytical and theoretical considerations, for high-level technical work in aerodynamics, stress analysis, thermodynamics, heat transfer, cryogenics, pneumatics, nuclear power and mathematics.

Auxiliary power units and hydraulic and hot gas

control systems for various types of missiles.

Air and vapor cycle refrigeration turbines, pneumatically and mechanically driven compressors.

Gas turbine engine and other high speed rotating machinery design and analysis involving gas dynamics, thermodynamics and aerodynamics.

Air and spacecraft environmental control systems involving air and cryogenic valves and controls and heat transfer equipment.

ORIENTATION PROGRAM

In addition to direct assignments, an eight-month orientation program is available to aid you in job selection. You participate in Garrett project and laboratory activities

and work with engineers who are outstanding in their fields. Your orientation may include familiarization with sales, contract administration and production.

JOB OPPORTUNITIES

Thermodynamics
Aerodynamics
Missile Hot Gas and Hydraulic Systems
Combustion Analysis
Chemical Engineering
Mechanical Engineering
Instrumentation Design
Gas Turbine Engines
Stress and Vibration Analysis
Preliminary Design
Physics
Gear Design

Laboratory Engineering
Cryogenics
Pneumatics
Mathematics
Electrical Engineering
Transistors
Instrument Design
Electronics
Analog Computer Design
Cycle Analysis
Control Engineering
Computer Programming

On Wrestling Team Hobbs, Schluter Play Big Roles

By MIKE SKINNER

George Hobbs and Bob Schluter, two of the department's top wrestlers, played big roles in the department's victory over the Spartans last week without much difficulty.

Schluter pinned his opponent Dave Hall at 3:14 of the second round, to become the third Spartan to pin a Buckeye during the meet. Hobbs had a near-miss on his opponent Don Green, and finally settled for a 14-3 decision. Hobbs' victory was especially hard-earned since his opponent, like Hobbs, had been a state champion in high school.

Assistant coach Gale Mikes also thinks highly of Hobbs and his future. "I definitely think he's an excellent Olympic prospect if he drops down to the 115 lb. class," he said.

A good share of the Spartans' lead rests solely on the muscular shoulders of Hobbs and Schluter not only for the rest of this season, but also for the next three years.

Hobbs' latest victory against the Spartans was not far behind his previous one against the Spartans last week. Hobbs, a member of the Michigan State Wrestling Team, was a high school state wrestling champion during his senior year. Schluter finished his senior year at the New York State Division I level.

Hobbs looked real good as a freshman last year. Collins said he was counting on him to come through for us the way he has so far.

But Schluter on the other hand, he continued, "has been a complete surprise. We didn't expect this much from him."

Hobbs wrestles in the 125 lb. division and Schluter competes at the 167 lb. level. Both won their latest matches against Ohio State's Buckeyes last week without much difficulty.

Ted Williams Signs Again

Red Sox Star Outfielder Agrees to Play in '60

BOSTON (AP)—Aging, unpredictable Ted Williams signed a 1960 Boston Red Sox contract Monday which says that the question whether he will play but not how much.

The 41-year-old slugger, one of the most colorful and controversial figures in the history of baseball, affixed his signature after a brief talk with General Manager Buckle Harris.

The clandestine early morning session was a marked departure from the past when Ted had held elaborate press conferences.

"I don't know whether I can do it or not," Harris quoted Williams as telling him about the prospects of playing a 21st season with the Sox.

"But if you want me to give it a whirl I will."

The Red Sox definitely want you and at the same time as "last year," Harris said, he repeated to the slugger whose average slumped from .328 in 1958 to .254 mostly because of a painful neck ailment.

"I hope you can do it," the general manager said.

"Given a clean bill of health except for the chronic neck trouble," Williams told Harris that the corrective exercises given to him already made him feel better after only two days.

True to its policy, the club refused to discuss Williams' salary though Ted pegged it at \$60,000 for 1959 under oath in a recent Florida court hearing. Even this figure leaves a question since the case never determined whether Ted's testimony referred to gross or net (after taxes) income.

"I don't know how much Ted can play—he doesn't know himself," Harris said. "I did ask

Injunction Holds Up Proceeds from Fight

BOSTON (AP)—An injunction, tying up the proceeds of the Sugar Ray Robinson-Paul Pender fight of last Friday was issued Monday in Suffolk superior court in a suit by boxing manager Nuncio Camillo.

Promoter Sam Silverman, the Boston Garden-Arena Corp. and the Sharks Athletic Assn. Inc. were named as defendants.

A preliminary hearing is scheduled for Thursday.
