First Play Of Year Tonight

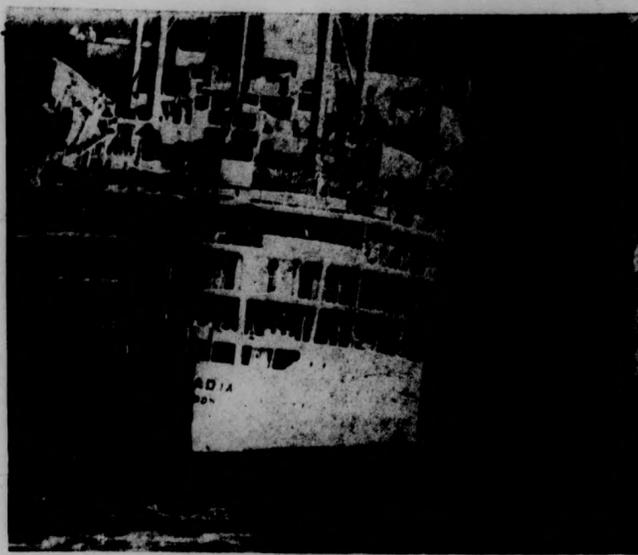

Lecture-Concert series present its first play of the year tonight, when the curtain rises on Shakespeare's Julius

Caesar, which will be presented by the Canadian Players, a national touring company from Toronto, which will start at 8:15 in the Aud. Tickets can be purchased at the Paramount Theatre in Lansing or the ticket office for \$2, \$2.50 and \$3.

The Stratford festival, directed by Brooks Atkinson as the finest classical theatre company in North America, was the starting point of the Canadian Players, which began being during the summer of 1954 by Tom Patterson, founder of the Stratford Festival and Douglas Campbell, brilliant actor-director.

The Players are now recognized as the leading touring company presenting classical plays, and they have been invited to perform annually to many cities, colleges and universities throughout the United States.

Over 250,000 theatergoers have seen performances by this celebrated group in the six seasons of the Canadian Players first to the road. This term the Lecture-Concert series will also present Dmitri Bashkirtov on Jan. 10, Richard Dyer-Bennet, singer, on Feb. 6, the Pittsburgh symphony orchestra on Feb. 8 and the Jose Limon dance company on Mar. 10.

ARCADIA AGROUND—The 30,000-ton British liner Arcadia lists to the starboard after running aground today on a reef in Honolulu Harbor entrance. She was pulled free after blocking all harbor traffic for more than two hours. The P. & O. - Orient liner was to dock here while enroute to Australia from West Coast ports with 1,182 passengers and crew aboard. No one was hurt and the ship apparently suffered only minor damages. (AP Wire Photo)

Registrar Reports 22,710

MSU Has Largest Winter Enrollment in History

MSU has experienced the largest winter enrollment in its 106-year history.

According to figures released by the registrar's office, the winter 1961 total enrollment was 22,710, or 1,823 higher than the total enrollment for winter term 1960.

The total resident enrollment, including the campus and East Lansing areas, MSU-O and the resident extension courses, was 21,874 or 1,616 more than the enrollment for winter term 1960.

The winter enrollment was down from the 24,223 total enrollment for fall term 1960. Enrollment in the campus and East Lansing area was 19,736, or 1,537 more than the same period last year.

The enrollment for resident extension centers was up 79, 1,323 compared to the fall enrollment of 1,244, but the figure was slightly under the 1,329 total for winter term last year.

MSU-O, which has expanded greatly within the last year, had a winter enrollment of 815 as compared to the 543 enrolled there for winter 1960. The 815 figure represents a 10.2 per cent drop in MSU-O enrollment since

the fall enrollment of 907.

Winter enrollment in credit extension courses was up to 436, a decrease over last year, but this was a drop from the fall enrollment of 1,150. Credit extension courses are not included in resident enrollment figures.

Sec. of Labor Quits

Mitchell's Resignation Effective Jan. 20

WASHINGTON (AP)—Secretary of Labor James P. Mitchell resigned Sunday, effective Jan. 20, and told President Eisenhower his administration had brought about great strides in labor-management relations.

The past eight years, Mitchell said, have been characterized by unprecedented stability, a greater understanding and increased maturity in the field.

Eisenhower, accepting his labor secretary's resignation, said Mitchell had established in the Labor Department "new standards of usefulness."

The President wrote Mitchell there are many ways to measure his effectiveness as Secretary and that "one important indicator is that time lost because of strikes has been half that lost in the previous eight years."

Mitchell's letter of resignation, and Eisenhower's "Dear Jim" reply, were made public by the White House along with a nine-

page list of accomplishments claimed for the Labor Department under Mitchell.

Mitchell's tenure in the Eisenhower cabinet is surpassed by only two others—Secretary of Agriculture Ezra Taft Benson and Postmaster General Arthur Sumner. They both came in immediately after Eisenhower took office Jan. 20, 1953.

Mitchell was appointed in October 1953 following the resignation of Eisenhower's first labor secretary, Martin Durkin, an official of the Plumbers Union, and after a policy disagreement with the President.

The new labor secretary in the John F. Kennedy regime will be Arthur J. Goldberg, lawyer and an authority on labor matters.

"As you know, there is much that remains to be done in helping our less privileged citizens such as migratory farm workers and those who, through no fault of their own, have been involuntarily unemployed for a substantial period."

"There is need, too, as you have so often stated, to continue work for the advancement of equal opportunity for all Americans, regardless of race, color or creed—a cause in which more last eight years than in any administration since Lincoln's."

De Gaulle's People Vote 'Yes' In Referendum on Algeria

PARIS (AP)—President Charles De Gaulle Sunday appeared to be holding a solid 76 per cent affirmative vote in the referendum on his Algerian policy.

The figure was based on a tally of nearly 6 million votes. It represented a comfortable margin over the 65 per cent

affirmative result De Gaulle believed to regard as sufficient to carry out his program.

The returns pouring in from all over France contrasted sharply with early results from Algeria, which indicated a big turnout of European voters, mostly a vote "no" and massive abstentions by Muslims.

The figure on Abstentions was not given but official tabulating indicated it was running about 24 per cent.

Jacques Richard, secretary-general of the Gaullist Union for the New Republic (UNR) party, said he thought the final vote figure would shade down to about 73 per cent of those

voting. However, the proportion of abstentions would cut this to about 61 per cent of those eligible to vote.

De Gaulle sticks to his earlier decision to count abstentions as "no" votes.

Biggest "yes" vote in far-flung 912 per cent—came from the Algerian department of Bassin around Strasbourg, where De Gaulle has retained his great drawing power of World War II days.

In Constantine, eastern Algeria, only about 5 per cent of the Muslims voted although polling stations were held open an extra day because the scheduled closing Muslim women, in particular, were staying away.

In the big port city of Oran in western Algeria, "No" votes were running ahead. The "yes" vote was about 47 per cent of the ballots cast.

Castro Flexes Muscles

Cuban Government Seizes Terrorists in Crackdown

HAVANA (AP)—The Cuban government arrested 10 accused terrorists and rounded up suspects throughout Pinar Del Rio Province today in a crackdown on opposition within Fidel Castro's invasion-alarmed land.

Military intelligence headquarters announced a raid on La Luisa Ranch in Cotorro, five miles south of Havana, and the smashing of a bomb-making ring there.

The government said the ring had links with the U.S. Central Intelligence Agency. The 10 men seized there were identified as members of a counter-revolutionary group headed by former public works minister Manuel Ray.

Under a new law the 10 are subject to execution. One of the band was reported still at large.

Agents also seized a cache of weapons, ammunition, explosives, chemicals, fuses and radio transmitters. The explosives included quantities of TNT (caps) and dynamite in gelatin form. A communique said the explosives are of U.S. manufacture and charged that agents connected with the CIA furnished them.

Travelers from westernmost Pinar Del Rio Province said Cuban agents there have picked up 60 to 80 persons in the last two days for investigation. No charges have been filed against them.

Those detained are said to include Bernardo Bonin, a Cuban identifies as a former U.S. Embassy representative; former Cuban Supreme Court Justice Luis Alberto Rubio; and Associated Press News stringer Guillermo Rodriguez.

A military tribunal at La Cavana fortress sentenced six men convicted of subversion to jail terms of six to 10 years yesterday.

Meanwhile, the "great network of liberty," a fusion of all Cuban radio and television stations into a single outlet, continued to broadcast periodic warnings of "imminent invasion by Yankee imperialism."

It repeated somewhat in its pattern of old Castro speeches.

Spartan wives hold open house

Spartan wives will hold open house tonight at 8 p.m. in the Library auditorium.

Dr. Phillip Lange of Lansing will speak on "Childbirth and Hypnosis" and members will sign up for classes in sewing, foreign languages, Swedish gym and bridge.

WJIM Hits Views

Sam Shapiro Returns; Cuban Trip Criticized

By Ray Pratt

Samuel Shapiro, assistant professor of chemistry at MSU-O and outspoken critic of America's policy toward Cuba, returned this week from his second tour of Cuba in the past six months.

MSU students will remember Shapiro from his participation in a debate last term with Dr. Charles Cummings of the history department on the subject of Cuba and actions of the Cuban government.

Shapiro left Havana in the wake of the break in diplomatic relations between the U.S. and Cuba, during a Castro television debate against the U.S. Upon arriving in Miami Shapiro made statements that were subsequently seized upon by some news editors as evidence of extreme pro-Castro bias.

Last Thursday, in his late evening news presentation, Dan Potter of WJIM television and radio in Lansing, accused Shapiro of violating his obligations as a member in a state-supported school.

Potter said that he does not think that a state-supported institution should be a refuge for Communists or fellow travelers hiding behind a phrase like "academic freedom." There is a point where freedom becomes license—where all of us must make a decision as to whose side we're on. It would now appear that Mr. Shapiro has made his choice, yet he wants to have his cake and eat it too. We would suggest that the officials at MSU permit Mr. Shapiro to exercise another freedom—the freedom to go to Castro's paradise and teach there.

In statements issued since returning to Michigan Shapiro's

views would appear somewhat different than those he stated in Miami which serve as the basis for Potter's television editorial.

Sunday, in an interview on Station WJR of Detroit, Shapiro strongly criticized Eisenhower-Hunter policy toward Cuba. However, he also said that "over, quite clearly, the revolution has taken a strong leftward turn."

In addition, Shapiro emphasized the collapse of the opposition group in Cuba, which he held to economic causes.

The present situation is the fault of both countries, he said, with the U.S. making some major blunders, including the break-off of diplomatic relations which Shapiro termed a "mistake" and "just what Castro wanted" at the present.

Shapiro concluded by warning that if the U.S. does not take action to reverse the misery of Latin America the whole area will be swept into violent, state-type revolutions. "We must stop a social revolution by sending aerial carriers into the area... we have to show these people we want to help them."

He made other comments during a network TV program (ABC-News and Answers).

The new Senate majority leader forecast quick passage of the key parts of Kennedy's "New Frontiers" program, with some help from Republicans.

There may be a few squabbles here and there over Kennedy's proposals, he said, "but it wouldn't be a Senate nor a Democratic party if we didn't have these squabbles occasionally."

Judgeships May Be Added

WASHINGTON (AP)—The chairman of the House Judiciary committee proposed Sunday adding 63 new federal judges.

This would add some 100 to the present 448 federal judges. The bill would also add some 100 to the present 448 federal judges.

Sellassie To Announce Reform

ADDIS ABABA, Ethiopia (AP)—Emperor Haile Selassie is expected soon to announce a political reform that will make him more of a constitutional monarch, an informed source said today.

Reconstitution of the cabinet is necessitated by the mass murder of the majority of the Ministers—in the unsuccessful December coup.

A source close to court said, the Emperor's reported decision to surrender part of his absolute power is also a result of the coup.

The Emperor has appointed the Prime Minister and Cabinet members and all were answerable directly to him.

The source said the Emperor, after considerable argument with his closest advisers, has agreed that henceforth the Prime Minister will pick the members of his cabinet and they will be answerable to the Prime Minister, he in turn being answerable to the Emperor.

Yesterday, Ethiopian authorities celebrated their Christmas in the Coptic calendar. In a radio message the Emperor said soldiers of his Imperial bodyguard, most of which are under arrest, most of which are under arrest, most of which are under arrest.

The bodyguard is to be disbanded.

Airplane Crashes in Pittsburgh

PITTSBURGH (AP)—A single engine plane en route from Chicago crashed into a hillside early today, killing the pilot and two occupants.

The Allegheny (Pittsburgh) County Coroner's office identified two of the victims—from papers on their persons as William Smith, about 45, of Shelby, Mont., and Robert Kubera, about 30, of St. Bank, Mont.

The third victim, also a man, was not identified immediately. He may have been from Chicago.

The Cessna 180, a four-seater, plummeted into a wooded, hilly area about 13 miles east of Pittsburgh. It was late afternoon before the bodies were taken out.

Bill Leeds of suburban Crafton said he received a call from Smith at Chicago about 12:30 A.M. that he and Kubera were flying to Pittsburgh.

"We may have a surprise for you," Leeds said Smith told him. Leeds, Smith and Kubera served in the Seabees together during the Korean War.

Leeds said Smith did not elaborate.

U. of Georgia Integration

Two Bright Negro Honor Students To End Historic Segregation Rule

ATLANTA (AP)—The two young Atlanta Negroes selected to end 175 years of segregation at the University of Georgia today are products of Atlanta's prosperous Negro middle class community.

Charlyne Hunter will be 19 years old in February. She was graduated from Turner High School in 1959. She was president of the honor society, editor-in-chief of the school newspaper for two years, associate editor of the yearbook, a member of the student council and she sang in the school chorus.

Her father is Maj. Charles Hunter, a U.S. Army chaplain stationed at Ft. Sam Houston,

Tex. Her mother, Mrs. Althea Hunter, is a secretary for an Atlanta real estate company. She is a Catholic.

Hamilton Holmes will be 29 July 8.

He was a classmate of Miss Hunter's at Turner High School where he was also an honor student. His four-year scholastic average in high school was 3.88 equal to a 97 average on a 100-percentile scale.

He was a halfback and co-captain of his high school football team, a guard and captain of the basketball team and was elected president of junior and senior classes.

He was also a member of the student council and the H.Y. club.

His father, Alfred F. Holmes, owns a tobacco company in Atlanta. His mother is a school teacher in the Atlanta public schools and specializes in teaching children with sight difficulties.

Miss Hunter spoke a telephone interview from Detroit, where she is attending Wayne State University, that she "hasn't developed any anxieties yet, but I'm not saying that I won't." She planned to fly to Atlanta Sunday, and is leaving here with definite plans for staying.

Miss Hunter said that she

Rush Dates Postponed

Fraternity rush dates have been postponed one day due to the Michigan basketball game, according to Bob Lantz, IFC rush chairman.

Hours west of Abbott road will be open Jan. 14 instead of Jan. 16. Houses east of Abbott will be open Jan. 18 instead of Jan. 17. All houses will be open Jan. 19.

900 Coeds Go Through Initial Rush

About 900 coeds went through the first stage of winter term rush this weekend according to Judy Kaufman, Panhellenic vice-president in charge of rush.

The coeds registered for rush at a convocation held Thursday in the Union. Over 1,000 women were eligible to participate.

A Thursday convocation, rush members explained the bidding procedure. Rushes were held when and where to pick up the invitations to the various sorority houses. Bids were picked up at the Women's division in the Student Services building.

Rushes were allowed to visit seven houses Saturday and Sunday in the first stage of rush. The second stage of rush, Wednesday and Thursday of this week, consists of visits to four houses. The houses are narrowed down in each stage, it was explained. The third stage in Jan. 15.

Winter term rush activities culminated with the preference desert Jan. 17.

Opponents Deported

SIKANGU, Ruanda-Urundi (AP)—The Kivu Province government, backing ex-Premier Paul Lumumba, has deported several political opponents to neighboring territory.

Library Change Proposed

A resolution was introduced in Student Congress last term that would encourage the administration to empower the director of the library to establish a central book check out system.

There were several reasons for the introduction of this resolution into Congress. The present book check system is bothersome to students, who, while doing research within the library, find it necessary to carry library books from division to division in the library.

The establishment of a central book check would make it unnecessary for those students to charge out books for temporary research, and have their books checked each time they go from division to division.

There is also an extra dividend in this elimination.

Trained professional librarians who are now occupied supervising student assistants at the main desk in each division and at the book check, would be freed to assist

students in locating books, and suggesting alternatives to unavailable books.

In summary, it would appear that students would gain more rapid freedom of motion in the library; the professional staff would have the opportunity to work as librarians, not as clerks.

As stated, this resolution was introduced in Student Congress, presenting it with an opportunity to use its influence in the students' behalf. The bill was referred to the Organizations Committee.

This committee has shown little interest or enthusiasm for the resolution, having made only a quick visit to the library and while there failing to speak with Dr. Richard Chapin, director of the library.

Dr. Chapin, incidentally, has indicated to the State News his wholehearted support of the central checkout system.

An editorial was run Friday calling for student support of MSUC. Here is an opportunity for MSUC to show that it is responsible enough to merit this support.

Basic Final Grading Problem

The University College changed its system of grading basic finals this year, reverting back to a system used two years ago.

Originally when a student's class grade and his final exam grade were on the borderline, ex. between a B- and a C+, the student was given the higher grade. Two years ago, in an effort to raise standards, the policy was changed so that such cases were graded down rather than up.

But this year, the former system was returned to, and once more borderline students are being given the benefit of the doubt. While there is a logical reason for this policy change, the change also carries with it some disadvantages which we feel should be pointed out.

Dean Edward Carlin of University College gives the unduly low grades of underclassmen in basic courses as the reason for the change. When the curved final exam grades were averaged in with instructor grades by the former system, fewer students received As and Bs as a term grade than were capable and deserving of them. The new system, he feels, will correct this situation.

He also states that the new policy results in increased incentive for the borderline student. Knowing that it is quite possible for him to pull up his term grade with a good final exam, he will study harder for the final.

We feel, however, that the new system has

just as strong an effect in the opposite direction. The student going into his basic exam with a B knows that he must drop all the way down to a C- on the exam in order to fall to a C for the course. This over-confidence could reduce incentive as much as hope for a higher grade might increase it.

A third suggested system of averaging class grades and exam grades would, we feel, maintain incentive for all concerned. If students who raised their grade on the final were given the benefit of the doubt, while those whose exam grades dropped were not, all would work for a high final exam grade.

The final exam, after all, is the test of what the student has learned out of the entire course. If a student produces well on the final, it is a good indication that he has learned the necessary material well and should be graded accordingly. Conversely, if his grade falls on the final, it indicates that his work has slacked off since mid-terms, and that he has not learned all that is required for a specified grade.

Thus, if he is interested in raising or just maintaining a good grade, a student would be given incentive to work by this third system.

The plan seems worthy of a try, since it would raise overall grades in University College courses, and yet would not reduce incentive on anyone's part.

Russians Make Congo Request

UNITED NATIONS, N. Y. (AP)—The United Nations made public today a Soviet Union request that the Security Council meet "as quickly as possible" to take up what the Russians termed Belgian aggression against the Congo.

Diplomatic sources said they expected the 11-nation council to take up the matter some time this week. Omar Louif, of the United Arab Republic, council president for January, was consulting other members on the exact date.

There was speculation that U.N. Secretary-General Dag Hammarskjöld would cut short a trip to Africa and Asia and return for the debate.

Soviet Deputy Foreign Minister Valerian Zorin asked for the meeting in a letter to Louif last night.

Zorin charged that Belgian authorities in the U.N. Trust Territory of Ruanda-Urundi, just east of the Congo, had "taken a direct part in organ-

izing an attack" from that territory on Kivu Province in the Congo.

Congolese troops loyal to Patrice Lumumba, deposed Premier now a prisoner of Congolese Army Chief Col. Joseph Mobutu, took over Kivu province Christmas day from Mobutu supporters.

On New Year's Day troops loyal to Mobutu used the Belgian-administered trust territory as a base for an incursion into Kivu province in an effort to restore Mobutu's control. All were captured or beaten back.

A U.N. report said at least one Belgian official had been killed in the skirmishing but order now has been restored. The Mobutu troops flew into Ruanda-Urundi from Kisai province and moved to the Congolese border in Belgian trucks.

In his letter, Zorin said the Belgians in Ruanda-Urundi had lent Mobutu's troops planes, trucks and military and service

personnel and had permitted five of the territory to move these military units to the rear of Congolese National Army detachments loyal to the legal government of the Congo.

He said these actions "constitute open armed aggression by Belgium against the Republic of the Congo and a flagrant violation of the international status of the Trust Territory."

Reports arriving from the Congo, Zorin went on, "indicate that the aggressive actions of Belgium against the Congo have not ceased and that the situation continues to deteriorate."

Hammarskjöld himself complained to Belgium over the use of Ruanda-Urundi for transit of the Mobutu troops. The Belgian reply was that the troops landed in the territory before Belgium knew they were coming and that they were then ordered to leave immediately "for the Congolese frontier."

Bloody Violence Erupts in Algeria

ALGIERS, Algeria (AP)—Bloody violence erupted in rural sections of Algeria Sunday as Muslims in the big cities boycotted a referendum on the country's future. By nightfall, 29 dead and scores wounded had been counted in clashes since voting began Friday.

Massive troop contingents concentrated in the cities to keep order on this final day of the voting, but despite the troops there was bloodshed or destruction at Taret, Orles-sville, Constantine, Setif, Sidi-Bel-Abbes and Tizeret. Fourteen

persons were known to have been killed during the day.

At the village of Tizeret, an armed band of rebel Nationalists shot up a polling place but was driven off by French troops. Five were killed and 33 wounded in the affray.

"Move One To The Back Burner — One Up To The Front Burner —"

Attitude at MSUO

Pat-on-Back Not the Answer

(Reprinted from Oakland Observer)

Many of the students who enrolled in September of 1959 are no longer here. The number of those who are contemplating leaving soon remains unknown. The last several weeks have seen a growing feeling of discouragement and dissatisfaction within the student body.

The time has come to stop and evaluate the educational program here. Students have many obligations to the university but the university has responsibilities to the students as well.

One of the aims of this university was said to be the production of critical thinkers who would not accept things without questioning their merits. But refuses to listen to students' criticisms? Graduates cannot be critical thinkers when they have not been allowed to be such as undergraduates.

Students look ahead to the future development of MSUO as a top-notch school where young intellectuals can develop to the heights of their capacities, but it can't be done overnight. In looking to the future, MSUO can't forget its present.

The educational program here has gone against some very basic principles of the psychology of learning. Instead of setting goals which students can attain and gain some feeling of accomplishment from having done so, goals are kept beyond the student's capabilities and he is never allowed to feel that he has accomplished or mastered anything.

Students feel that it is unfair that professors' names are not listed on class schedules prior to registration. They fail to see how registration can be complicated by this when all sections must be filled anyway. It is childish on the part of professors to feel that this would be a popularity contest. Are they afraid of what students think of them?

It is amazing that such a new university has already acquired so many insurmountable problems. There seems to be no way to make any changes, or at least this is what we are told by Deans and department heads. This is in direct conflict with the concept of a university that is supposed to stand for a change.

Students are expected to conform to educational policies which they have had no part in making. Many of those responsible for making these decisions refuse to listen to student opinion. Students recognize the economic limitations on the number of courses that can be offered and realize that more can be added only with growth of the university. However, they feel that their preferences should be taken into consideration in deciding which ones will be offered first.

Students feel that several courses have been misrepresent-

ed. It was the general understanding that the art and music courses would be appreciation courses, not history or theory courses. But what happened?

Many courses are poorly planned. Toward the end of the quarter when professors discover they have not covered as much material as they had hoped to. In most cases this is at the same time that term papers are assigned and when students need to begin studying for exams. This irregular tempo is sloppy preparation at the students' expense.

Many professors have taken advantage of the classroom situation to impose their religious and political views upon students. Others have used language in the classrooms which students feel is unbecoming to their position.

Many students feel that the repetition of material we had as freshmen in some courses necessary and should be eliminated.

It is the general feeling that this unnecessary business has burdened us because new professors are not familiar with the freshmen students' background. They should not be.

It has been suggested by the Dean of Students that AWS and SCU remain outside the Student Government. Because he is their advisor's boss, many students regard this as a device to control the effectiveness of student organization.

The role of an advisor has been overstepped in many instances by the Assistant Dean of Students. Members of the organization feel that they can be successful only if they are allowed to be self-governing.

Is it right that a student can be called before the Dean of Students for picketing against what he considers an inappropriate use of state buildings for meetings of a religious organization?

Students have been reprimanded on many occasions for holding hands on campus bybers. But what about husband faculty and administrative men and wife faculty teams who

find the Student Center and sidewalks near the parking lot places for kissing?

The Russian department has announced that in addition to the regular two-hour examination they will require students to forget about a well-deserved Christmas vacation to return to school and take an oral examination. This is an unfair expectation from students. There has been no statement to the effect that more than a two hour exam would be required for any class. After all this is NOT the Soviet Union!

The maturity and intelligence of MSUO students are insulted by those who think these problems can be solved by a once-a-quarter "pat on the back" from the Chancellor.

Humphrey Wants JFK to Use Ike

WASHINGTON (AP)—Sen. Hubert H. Humphrey (D-Minn.) expressed hope Sunday that President-elect John F. Kennedy can use the services of President Eisenhower and Vice-President Richard M. Nixon.

Humphrey made the comment in answering questions by Sen. Kenneth B. Keating, R-N.Y., on a TV program taped for use on New York stations.

The Minnesota Democrat said the retiring Republican chief executive "has the greatest reservoir of good will of any American throughout the world—as great as anyone, anyway."

Saying Eisenhower might be needed for future diplomatic negotiations, Humphrey commented: "He can be of tremendous help with contact of our allies."

Five former Secretaries of Agriculture will appear on the 1961 Farmers' Week program at Michigan State University. Secretaries: Benson, Brannan, Wickard, Anderson and Wallace will discuss "Agriculture in an Uncertain World" on Feb. 1.

Editor's Corner

Scars of War Still in Europe

It has often been said that the American living largely by habit and taking for granted all he has, does not appreciate his possessions. This point became clear to me during Christmas vacation when I visited England and took trips to Paris, Brussels and Amsterdam. I realized all I did not appreciate here.

Although Europe existed long before America, I had always believed that it would have become almost as modern as the United States. I expected to see modern business buildings, wide highways, electric appliances and other conveniences we take so for granted. And I did not expect years after the end of World War II, to see many scars of war.

It did not take long for my vision of Europe as an area of relative comfort to change. In England, gasoline costs approximately 70 cents a gallon—and we come when the price nears 35 cents. We have to walk an extra block from one gas station to another, so we drive from place to place in English, because the price of gasoline, petrol, as they call it, must walk for miles.

When Americans buy a new house, they want all the conveniences gas and electricity make possible. The average English family does not have a washing machine, a drier, or a refrigerator, although they may have a small ice box that holds a few supplies.

They do have laundromats, but these are usually equipped with washers and driers. And the English houses rarely have central heat, so it is extremely difficult to get clothes dry. Because refrigerators are a rarity, the English must go to grocery stores daily.

Milk is expensive and many families buy only a pint a day. Frozen foods are now coming into the grocery stores. The American housewife would not tolerate having to buy all fresh vegetables and having to wash and prepare them for eating.

The complaints heard about squeezed oranges in America are so loud that frozen orange juice is a must here. In England, one has heard of frozen juice and oranges imported from South Africa. The price is between five and ten cents each.

When I visited London, I expected to see a city of modern skyscrapers, much like New York. Instead I saw old buildings and a few new ones under construction. The scars of war were very evident. Bombed buildings were being torn down but many still stood as mere shells of what they once were.

Christmas in England was very different from the one pictured by Dickens. The cities were gaily decorated, the houses were not. A tree is the exception rather than the rule in many areas and greens are often seen on doors. While we take time for granted for Christmas dinner, the English must reserve their turkeys far in advance and pay a great deal more than America. Christmas, I feel, means more to the English and families try harder to be together for the holidays.

When I think back on my 17 years in Europe I hope that I'll be able to get again soon, for despite the things that I do not have that America has, it is a fascinating place—and it taught me to appreciate much more what I have.

Random Thoughts

While the year is still young and we're sitting around waiting for the New Year, perhaps Liberals can consider and solve this paradox:

1) A Liberal is a firm believer in individual and individual liberty. He believes in racial equality; he abhors the more typical forms of anti-Communism; he feels the freedom of speech should be inviolate and convinced that the housing office is insane.

2) At the same time, a Liberal is opposed to the Organization Man and conformity. He does not want a corporation, a university government, or any other institution of people to attempt to spread a uniform of action. Bureaucracy is evil in and of itself.

3) To promote political and economic equality, the Liberal often feels that only the best organization of them all is strong enough. From civil rights and social security to TVA and aid to education, the Liberal feels that only the government can provide the economic and political justice he feels is necessary for individual liberty. The Liberal believes in both man's desire for freedom and his need for organization.

Is this a paradox with inevitable consequences? What is the answer?

Science Needs Met By New Program

The nation's future scientific exploits will be in good hands if the youth of Michigan have anything to say about it.

This indication comes from National Science Foundation Traveling Science teachers from MSU who met in a two-day, mid-year conference on campus.

Twelve teachers, especially trained at MSU's Science and Mathematics Teaching center, will visit more than 300 high schools in a seven-state area, including Michigan, during the current academic year.

The five teachers whose area includes Michigan all reported a high degree of interest in science not only among boys but also the girl students in Michigan.

The traveling teachers also found that the scientific interest is not localized, but apparently as prevalent in the smaller schools in rural and suburban areas as it is in metropolitan districts.

"Once you get these kids interested in science and mathematics, they go overboard," reports Norman C. McKindles, L. I. Anso, whose territory as a traveling science teacher includes the Upper Peninsula.

He, as well as his colleagues,

Engineers Elect Farrall

Arthur W. Farrall, professor and head of the department of agricultural engineering, is the nominee for president-elect of the American Society of Agricultural Engineers for 1961.

Farrall is a native of Nebraska and received his bachelor's and master's degrees with a major in agricultural engineering from the University of Nebraska. In 1935, the University of Nebraska gave him an honorary Doctor of Engineering degree.

Warner Accepts NAREB Post

Dr. Arthur E. Warner, Director of the Masters of Business Administration program, has been appointed to the National Association of Real Estate Boards committee on education for 1961.

As a co-chairman of the committee, Dr. Warner will help develop a basic course in Real Estate, which would carry the NAREB approval.

Dr. Warner teaches a sequence of real estate courses in the department of business services, College of Business and Public Service.

Prof. Gurnham Gets New Post

Prof. G. Fred Gurnham, of the department of chemical engineering, has been elected a member of the American Institute of Mining, Metallurgical, and Petroleum Engineers. He will be affiliated with the Society of Mining Engineers, a constituent organization of the Institute.

found a surprising interest in biology and physiology.

In bringing the latest in scientific information, teaching techniques and instructional equipment to the various schools, the traveling teachers include a demonstration of heart and nerve dynamics.

McKindles emphasized that it is important to encourage students who show an interest in the biological sciences, for from this group may come doctors, nurses and researchers for tomorrow.

The science demonstrations were apt to run overtime at Alpena Catholic high school, reports traveling science teacher Richard K. Scofield of Ludington. He said the Alpena students were some of the most enthusiastic he has yet encountered.

He also reported that biology and physiology seemed to be the areas which most interested the students.

"I have not yet moved into a negative area," said Clifford D. Werten, traveling science teacher from East Lansing high school who is visiting schools in the Central Michigan area.

"It is not a matter of how large or small a community is," he said, "for I found interest high at all schools I have visited so far."

Included in his lists of visits have been schools in Blanchard, Carson City, Ashley and Flushing.

Indications are there may be a talented new crop of mathematicians to help fill the backlog in this vital area, observed Gilbert H. Erbsieck, who is visiting schools in Southern Michigan and Northern Indiana.

He noted that the students were most attentive during demonstrations on mathematics. The digital and analog computers and the abacus are used by the MSU traveling teachers to illustrate the differences between binary and decimal systems.

William J. Sheridan, traveling science teacher from Detroit, stresses that the attitude of the school administrators plays an important role in the success of scientific programs.

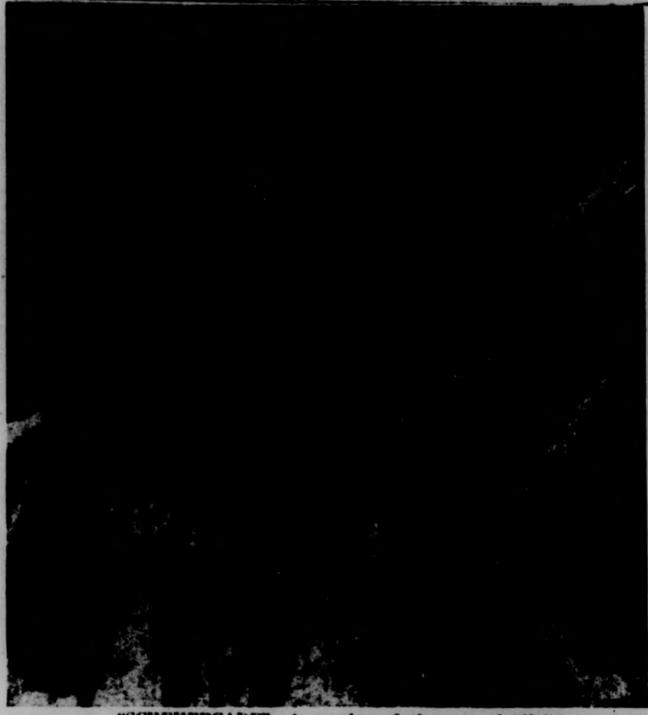

One of the most progressive schools along this line, he pointed out, is Richmond High School. At this school, he said, the student gets biology in the ninth grade, chemistry in the tenth, physics in the eleventh and by the time he reaches the twelfth grade he is ready for an advanced scientific course.

MSU is one of four national centers designated by the National Science Foundation to conduct the Traveling Science teacher program during the 1960-61 academic year.

Coordinating the program at the university is Jerrold W. Maiben in the Science and Mathematics Teaching center.

The traveling science teachers will resume their visits, which are made on requests from the specific schools, after the holidays.

This is the second year for the Traveling Science teacher program at MSU. Last year the teachers from MSU visited 572 schools giving presentations before more than 300,000 students in Michigan, Illinois, Indiana, Iowa, Minnesota, Ohio and Wisconsin.

African People Fed

Animals Provide Food

The ungulates—hoofed animals such as the giraffe, hippopotamus, and zebra—of Africa may offer the protein-hungry people of that continent a good opportunity to improve their diets, according to Dr. George A. Petrides, professor of wildlife management.

He feels certain that these animals can be managed in the wild or, possibly in a few cases, domesticated to provide more meat per acre of African grazing land than can be obtained from cattle, sheep or goats, the main animals now raised there for food.

"Most of the continent is either desert or semi-arid land suitable only for seasonal grazing," explained Petrides.

African wild animals are better acclimated to their environment and more resistant to diseases than imported livestock. In addition, he said, the native wildlife fares much better on dry grazing lands.

Another especially good source of food, is the eland. This horned antelope grows rapidly, produces excellent meat and has potentialities as a milk producer. African wildlife are immune to the sleeping sickness of cattle carried by the tsetse fly.

Forestry Awards Set

A new program of freshman and sophomore scholarships was announced by Dr. A. J. Panshin, head of the department of forest products. The money has been donated by Chapman Chemical Co. of Memphis, Tenn.

Two freshmen are to be selected each year to receive \$300 each. When they become sophomores they will receive \$200 each. These will be offered for the first time to entering freshmen in the fall of 1961.

'Waste Makers' Hit on Radio

Vance Packard's thesis advanced in his latest book, "The Waste Makers," that American marketers, advertising men and auto makers are waist-deep in villainy received less than a warm reception from two MSU professors Sunday.

There is no question that some of the criticisms he makes are valid ones, but of these our advertising and marketing executives are well aware," he added.

McKee said the book is a hasty concoction for the mass market—the very thing Packard criticizes—without a sufficient thought-out theme. He said that the author provides tons of data symptoms of the basic value problem of an affluent, mass-industrial society—but neglects to explore what lies behind the symptoms.

"In his zeal to cry alarm over our world as he sees it," Sencer said, "Packard is often careless with the facts and his condemnation of certain facts of our economy sometimes borders on hysteria. Such carelessness often weakens what might otherwise be a good case."

and then deplores the attitudes and values of consumers. McKee added "the real villain may not be anyone of these groups but a more basic causal factor, the underlying structure of assumptions and values which orient and direct the behavior of producers, distributors and consumers."

McKee said Packard lacked "a philosophical and social scientific framework as a tool for interpreting his own evidence and he failed to articulate the relevant issues which his own evidence points to."

"He hits us too hard with the symptoms and rushes off to a diagnosis," McKee said.

The sociologist cited as an example the fact that Packard in-terprets his own evidence and he failed to articulate the relevant issues which his own evidence points to.

The African mousebird, slightly larger than a sparrow, creeps rather than hops along the branch of a tree.

Engineering 'Drop Outs' Of Concern to Educators

Almost half of the students who start programs in engineering fail to complete them, the American Association for the Advancement of Science was told recently.

The high casualty rate is one of the principle concerns of engineering educators, reported Richard T. Fallon of the engineering department.

Fallon, who participated in a panel discussion before the engineering section of the association, is director of the Junior Engineering Technical Society (JETS), which has 742 chapters in high schools and junior colleges in all 50 states and several foreign countries.

"Engineering enrollments have been meeting the bare needs of the economy during the past six years," Fallon said.

He added that such enrollments could be sufficient if the students who started in engineering remained in the field and graduated with degrees. However, he reported that about half (48 per cent) of the engineering students are lost along the way for various reasons.

"ENGINEERING 'drop outs' appear to fall into three groups, Fallon noted.

One group, comprising about 17 per cent of engineering students, "have capabilities, talents and interests in engineering," he said, "but they have not been properly prepared or oriented in high school toward engineering. Such students are not informed about what is required in engineering training and what engineers do on the job."

Dr. Aldridge is director of the School of Social Work and a member of numerous national and state committees and projects concerning the aged.

Dr. Porter, a noted authority in the field of nutrition, is dean of the College of Home Economics.

"This group just does not have the proficiencies in the basic sciences to handle engineering courses," he explained. This could be remedied, in part, he believes, by better aptitude testing and by giving the students experience through junior engineering programs.

A THIRD GROUP of students who drop out of engineering, about 17 or 18 per cent, are victims of high pressures and decisions that every one who studies science is going to be a scientist," Fallon noted.

Such students, Fallon explained, "soon defect to other fields when they find that engineering does not offer the glamour in the disciplines where they built up their proficiencies, such as mathematics, physics and chemistry."

Fallon called for "more imagination on the part of engineering educators" to allow engineering students to have the option of a major in mathematics, physics or chemistry along with their engineering courses.

He also stressed the need for a more realistic evaluation in secondary schools as to what engineering requires. For example, he pointed out that sending a satellite up by way of a rocket is 93 per cent engineering, designing, building, and operating the hardware, rather

and a woman—were handling final details of yesterday's transfer of diplomatic and consular affairs to the Swiss Embassy.

In Santiago harbor, around the other side of the island, a Soviet cargo ship was unloading 2,500 tons of Russian wheat.

The government news agency quoted Soviet Deputy Commerce Minister Mikhail Zuzmin, in a Moscow-dated dispatch, as saying the Soviet Union will assure Cuban oil needs with 3 1/2 tons of petroleum products and 200,000 tons of mineral fertilizer.

Thompson Shifted To State Department

WASHINGTON, (AP)— Ambassador Llewellyn E. Thompson Jr. is expected to be shifted from his present post in Moscow to the state department some time soon, diplomatic sources reported Sunday.

"The move will not come immediately after the inauguration of President-elect John F. Kennedy, who will ask Thompson to stay on in his present job for a while, these sources said.

There was no word on what assignment Thompson would get after he returned home.

Thompson, a Russian-speaking career diplomat, has spent almost four years in Moscow. He was transferred to Russia from Vienna in the spring of 1957.

The man reported in line to succeed him in Moscow is another Russian-speaking expert in the state department, Foy D. Kohler, currently assistant secretary for European affairs.

The New York Times reported Sunday that Kennedy has de-

ceded to retain Thompson as ambassador to Russia and Charles E. Bohlen as special state department assistant on Soviet affairs.

The Times said Kennedy reached the decision Saturday while consulting in Washington with his incoming Secretary of State, Dean Rusk.

Kennedy returned to New York following the conference and newsmen questioned his Press Secretary, Pierre Salinger, about the report. Salinger said he had no knowledge of it.

Thompson and Bohlen are President Eisenhower's two principal advisers on Soviet matters.

Pay Study Now Ready

The first of an annual series of nationwide studies of salaries in selected professional, administrative, technical, and clerical occupations is now available according to Adolph G. Berger, Chicago regional director of the U.S. Department of Labor's Bureau of Labor Statistics.

The report contains information on salary levels for 77 job categories selected from the following fields: accounting, legal, engineering and scientific, drafting, personnel management, clerical supervision and clerical. Occupational descriptions used in the survey appear in the report.

The BLS study shows that average weekly salaries for the 77 selected job categories ranged on a nationwide basis from \$55.50 for file clerks performing routine filing, to \$442 for attorneys holding such positions as top legal advisers heading a staff of attorneys. Converted to annual salaries, which are also presented in the report, averages for the 77 job categories ranged from somewhat less than \$3,000 to \$23,000, with 41 jobs in the \$5,000 to \$10,000 salary bracket and 18 above \$10,000 annually.

Six levels of entry and advancement are shown for each of the 77 job categories. For example, the list of group of 11 jobs in the field of personnel management, average weekly salaries ranged from \$114 for a job analyst at the first level to \$307 for directors of personnel, level IV.

Swimmers Take Second In Big Ten Relays

By BRUCE FABRICANT
State News Staff Writer

Coach Jim Councilman's Indiana Hoosiers had a monopoly in capturing six of nine events Saturday in the sixth annual Big Ten Invitational Swimming Relays, before 1108 fans at the Men's Intramural Pool.

Mike Troy and Frank McKinnis, Gold Medal winners in the Rome Olympics, helped Indiana's power laden squad lower six relay records and six intramural pool records in the process of accumulating a total of 79 points.

Michigan State followed with 59, Michigan, 57, Kenyon, 22, and Toronto, 14.

TIED GOING in the final event, 400 yard medley relay, Michigan State edged out Michigan for second place honors with a strong freshman sophomore Mike Wood. Wood topped in a swifty 49.3 clocking in the final leg of the medley to beat free-styler Owen Kleinschmidt of Michigan.

Indiana's quartet, which recently had established a new American record, won the event with 3:41.7. This was 1.2 seconds off their record.

The host team, Michigan State, claimed its only victory in the 500 yard medley relay. Bill Stewart and his teammates Jeff Mattson, Mike Wood, and Dick Brackett were timed in 4:23.4, a new meet, school, and pool record.

In the second leg of the event two former Olympians were matched against each other, with Bill Stewart of Michigan State heading Al Somers of Indiana.

STEWART, former Big Ten and NCAA champion, provided the margin for victory as Indiana was caught at 4:23.5. The University of Michigan, shy of its usual power with several swimmers still out of school after touring Europe following the Olympic games, won both the 200 Yard Free-Style Relay and the Diving Relay.

COMBINATION of Ron Jacob and Tom Francis of Michigan racked up 407 points in the diving competition. Their nearest rivals were Michigan State with 365.35, followed by Indiana with 327.8 points.

Intramural Highlights

Anyone interested in reserving the Ice Arena for hockey practice time should contact the IM office starting today. The number of hockey teams will be limited to 24 this term, so only those which get their roster in early will be able to compete.

There will be a managers meeting for all basketball leagues, warm bowling leagues, later this week, and open hockey league Tuesday at 7:30 p.m. in 208 IM.

Anyone interested in officiating basketball or hockey games will meet Wednesday at 7:30 p.m. in 208 IM.

All basketball, bowling and volleyball rosters are due by 5 p.m. Friday.

Track Managers All men interested in becoming track managers report to the track office in Jensen Field House today.

Tom King, Michigan State University's dean of students, who will retire in 1961, first came to MSU as an assistant football coach.

Wrestlers Win In Quadrangular Meet

A strong MSU wrestling squad edged the Purdue Boilermakers to win a quadrangular meet at Evanston, Illinois. Minnesota was third and Northwestern fourth.

The main power for coach Fendley Collins' matmen came from Okla. Johnson, George Hobbs, Jerry Hoke, Duane Wohlfert and Alex Valconoff. Each pinned both of their opponents.

Gary King, Merle Trebel and Mike Seng also won honors while helping to compile State's 88 points, by winning second places. It was their first mat action of the season.

On paper State's 1961 wrestling prospects look good. They have eight returning lettermen, including former U.S. wrestling team member Jerry Hoke, and four blue-chip sophomores.

THE FOUR NEW comers, all of championship, according to MSU mat coach Fendley Collins, are heavyweight Dave Behrman of Dowagiac, 191 pounder George Azar, Alex Valconoff 167, and 115 pound whiz Okla. Johnson of Norfolk, Va.

Behrman, a member of the U.S. Pan American team in 1959, Azar and Valconoff were on the Spartan football team last fall. Azar is a former

Wisconsin Stops Cagers, 74-71; Inflict Big 10 Defeat in Opener

PAT BALDWIN (19) MSU's sophomore right wing, drives on the Ohio University goal in Friday's game at the Ice Arena. Baldwin scored three times during the evening to pick up his first collegiate hat trick. The Spartans swept the weekend series from the Ohio club, 12-0 and 8-1. State News Photo by Ron James.

Schwarm, Hall Top State Scorers

By **JOHN SCHNEIDER**
Associate Sports Editor

Michigan State's basketball squad started off the Big 10 season by dropping a 74-71 decision to another Big 10 weak sister, Wisconsin at Lenox Fieldhouse Saturday.

Tonight, the Spartans travel to Indiana to battle a tough Hoosier team. Game time is 8 p.m.

"It was a heartbreak game," said State coach Freddy Anderson. "We tried hard, in fact, a little too hard. We wanted to win this one and it was our first home conference game and a life crowd was here."

Wisconsin took the lead 15-14 with seven minutes gone in the first half and never relinquished it throughout the remainder of the game, while 9,065 fans watched.

JUNIOR GUARD Schwarm playing despite a pinched nerve in his back, kept the Spartans in the ball game in the opening minutes. Schwarm poured in 12 straight points to give State a 14-13 lead.

Sophomore center-forward Dick Hall was the high point man for the Spartans during the evening, with 18 points. Schwarm, who saw limited action because of the injury and making up three fouls early in the game, was next high with 12.

Reserve senior Guard Dick Dufresne of the Badgers picked a poor night as far as the Spartans were concerned to have the best scoring night of his career.

DUFRESNE, starting his first game in place of the injured Jack Uverson, jumped in 19 points in the first half, mainly 10-foot jump shots, and ended up with 25 points for the evening. Dufresne's previous career high was 12 points.

State managed to connect on but 35 per cent of its shots during the evening as compared to Wisconsin's 43 per cent. Both teams pulled down about the same number of rebounds, 53 by State and 54 by the Badgers.

The Spartans picked up added bench strength with Harold Brokens becoming eligible at the beginning of the winter term. Brokens played seven minutes before suffering a pinched nerve, forcing him to leave the contest.

FIGHTING FOR A REBOUND in Saturday's game against the University of Wisconsin is Spartan Ted Williams (33), Wisconsin's Tom Hughbanks (45) and an unidentified MSU player. Watching the action are Badger Tom Gwyn (10) and State's Dick Hall (32). State News Photo by Ron James.

Sports' Needs Writers

The State News sports desk needs IM writers for all IM sports. Any student interested in covering IM's and games in covering IM's and games should apply at the State News office or call ED 2-3391 and ask for Ben Burns or John Schneider. Previous writing experience is not necessary and both men and women may apply. At least three IM basketball writing experience should be necessary. One each for intercollegiate, independent and intercollegiate coverage.

MSU Sports Schedule

Michigan State athletes stage a mass exodus of East Lansing this week.

Five teams engage foes in eight different events on enemy sites ranging from Columbus, Ohio, to Houghton, Mich., to Ames, Iowa.

Only one event will take place at home, a wrestling match with Indiana in the Men's Intramural Building this afternoon at 4 p.m.

The varsity basketball team has perhaps its toughest week of the season coming up with an away game against Indiana on Monday and another against Iowa on Saturday.

The ice hockey team also has a significant date ahead with a pair of games on Friday and Saturday at Michigan Tech.

The complete week's schedule: Monday—Wrestling with Indiana at home. Basketball with Indiana at Bloomington. Friday—Ice Hockey with Michigan Tech at Houghton. Swimming with Iowa State at Ames, Iowa. Saturday—Basketball with Iowa at Iowa City. Ice Hockey with Michigan Tech at Houghton. Wrestling with Ohio State at Columbus. Swimming with Iowa at Iowa City. Gymnastics away game against Indiana at Ames, Iowa. Michigan State wrestling coach Fredrick Collins was elected to the Helms Foundation Wrestling Hall of Fame in 1956.

Win Twice, 12-0, 8-1

State Hockey Team Trounces Ohio; Sophomores Star

Michigan State's Hockey team swept a home series with Ohio University this past week-end by defeating them 12-0 and 8-1 in the ice arena.

Sophomores Art Thomas and Dick Johnson led the home team in scoring. Thomas and Baldwin made hat tricks and Johnson picked up his points during the first game.

The Ohio University Bulldogs, ranked with enthusiasm, skated against the Spartans. This was only the third year of organized hockey at Ohio and the Bulldogs are not considered a varsity team.

In Friday's game, Bob Doyle, Thomas and Martin Quirk all scored two goals in addition to leading a crowd of 1,000 fans. Ed Ozbak and Frank Silka scored the first goals for the Spartans. State picked up three goals in the opening period as Ozbak, Doyle and Thomas scored in the first 10 minutes. Doyle's shot was blocked by the Bulldogs' goalie, Don Chastik, but the Spartans were not deterred. Doyle scored again in the second period and Doyle, Thomas and Quirk all scored in the third period. Doyle's goal was the only one of the game. Doyle's goal was the only one of the game.

Head coach Art Thomas and his team traveled to Houghton Friday to face Michigan Tech in a two game series.

Reese Olger Announces!

that he has added a second Barber Shop for your convenience.

INTERNATIONAL RESISTANCE COMPANY, JOHN M. HAMILTON, JERRY A. HALES—Elec. (B) Engrs. for product development positions. Mech. (B) Engrs. for manufacturing positions. Chemical (B) Engrs. for product engineering positions.

WASHINGTON, (AP)—Sen. Pat McNamara, D-Mich., Sunday decried attempts by the American Medical Association to block medical insurance for the aged tied to Social Security.
 He urged delegates to the White House conference on aging not to be stampeded by what he called propaganda.
 The conference, with some 2,500 delegates from 50 states, opens a four-day meeting today with the financing of medical care for the aged one of the major topics for discussion.
 President Eisenhower was scheduled to speak to the opening session of this first government-sponsored nationwide conference ever held on the problems of the aging.
 The battle lines were drawn with pre-convention charges—and denials—that the AMA and other groups had attempted to stack the meeting with delegates opposed to the Social Security Plan.
 "I am concerned that the AMA has publicly stated that it will devote all its resources to block any attempts by this conference to endorse medical insurance for the aged tied to Social Security," McNamara said.
 The 65-year-old Senator, who has just introduced a bill to provide medical care for the aged under Social Security, made his

plea in a speech prepared for today's kickoff session in Constitution Hall.
 "Apparently," he said, "one tactic of the AMA is placement of AMA-oriented delegates in sufficient strength in certain work groups to give the nation the impression that the conference does not favor such medical insurance."
 The huge conference is divided into 133 work groups for discussion of some 36 topics on aging and to work out policy statements for future action.
 "It is unfortunate," McNamara added, "that the AMA continues to devote such massive effort to promotion of its 19th century philosophy rather than concentrating on the needs of tomorrow."
