President's New Draft Call May Take University Men

Hannah, Thomas Nominated

President John A. Hannah will run in the Sept. 12 general election for constitutional convention delegates as the Republican nominee in the 14th senatorial district.

Gordon L. Thomas, professor of speech and East Lansing mayor, will join Hannah in the election as the Democratic nominee in the Ingham County second representative district.

Hannah won the nomination by easily outdistancing his opponent George R. Sidwell, Lansing attorney. Thomas was unopposed for nomination.

THIS WILL be Hannah's first bid for an elective office and his first experience in partisan politics. He will be opposed in the election by the Democratic candidate Robert E. Curby of Howell.

Hannah and Thomas were nominated Tuesday in the primary election. Ingham county voters also nominated Democrats Lucile Belen and Thomas Walsh in the first representative district.

OPPOSING Thomas in the second representative district will be the Republican nominee, Charles Davis. Davis is a farmer and dairyman from Onondaga.

The Republican nominees in the first representative district are Claud R. Erickson and Eugene Gilbert.

The 144 delegates elected in the Sept. 12 election will convene in Lansing Oct. 3 to draft a new Michigan constitution to replace the present 54-year-old one.

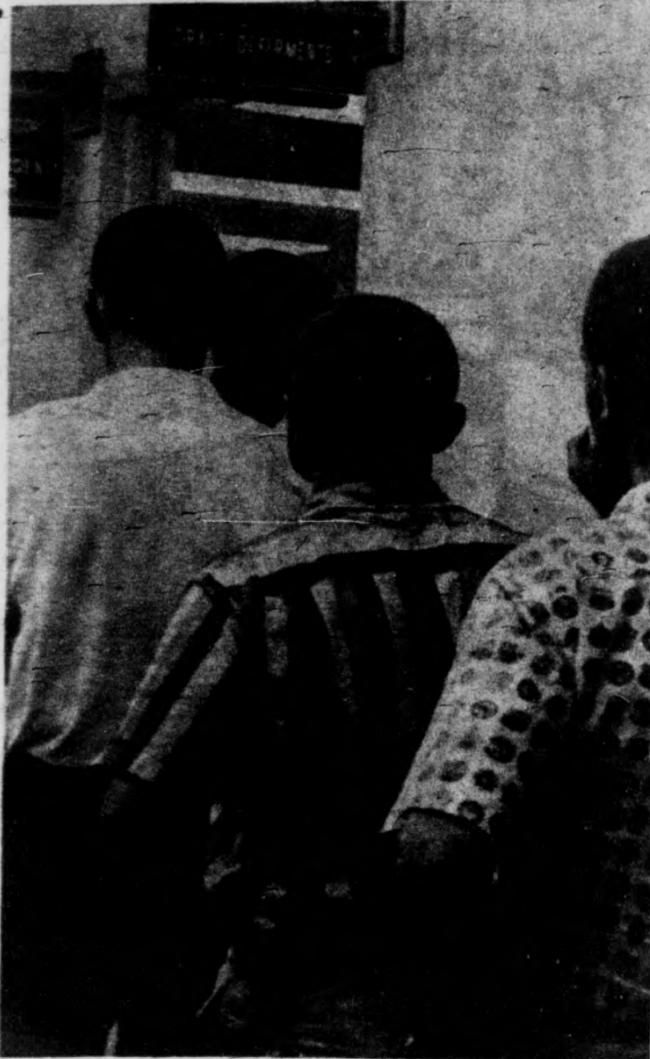

Glareproof Driving On Its Way?

A four-foot high fence made of mesh construction to deflect light which strikes it will be installed on the Interstate 96 Freeway between Brighton and Farmington.

The fence, designed especially to reduce headlight glare, will be set up in August.

John C. Mackie, state highway commissioner, said about 500 feet of fence will be placed near the eastbound lane of the freeway near Kensington Metropolitan Park.

Films will be made from a typical position non the freeway before and after the fence is installed to see if the fence reduces the glare of headlights.

FEELING THE DRAFT?—With the coming of draft increases, many of the draft-age men on campus are becoming concerned with their military status. — Photo by Art Wieland, State News Picture Editor

AUSG Told Plan For Planetarium

A planetarium is the best investment for Development Fund money, the AUSG said other projects had been mer interim committee heard Wednesday.

Robert C. Toll, fund director, suggested, but that they would cost more than the \$500,000 involved, Julie Bock, AUSG secretary, reported.

She said Toll explained the purpose of the planetarium as an aid to explaining what is in outer space and its importance.

"Only approximately one person in ten has visited a planetarium," Toll said. "It is planned that all students will have at least one lecture in this one."

THE BUILDING is scheduled to be built on the south side of the Museum. Its capacity will be 300.

The building is planned to be approximately one-third as

large as the Adler Planetarium in Chicago.

"We aren't getting any government help for the building itself," Toll said, "but we may get some assistance (1) programming."

Toll said Deans of the colleges were consulted for suggestions of what to build with Development Fund money. He reported a question of whether a planetarium or conservatory should be considered.

The AUSG meeting resulted from a student government inquiry for more information on why the planetarium project was chosen.

In other business, the committee passed a bill to help finance the 1961 activities carnival. It referred back to committee a bill to provide money for meals for AUSG students attending a pre-school workshop for campus leaders in September.

Asks Permission To Use Reserves

By JOE HARRIS

State News News Editor

President John F. Kennedy's address to the nation Tuesday, and the armed forces buildup requests he made of Congress Wednesday may affect some 60 per cent of the male population on campus.

Whether or not it will involve a change in student deferments has not been disclosed as yet.

However, in his address, President Kennedy made specific reference to studies being interrupted and the possible separation of families.

In the group most directly involved will be draft age men 20 and over; air force ready reservists, and active army reservists.

INCLUDED in the President's request was raising the August draft call from 8,000 to 13,000, and raising the draft calls for September and following months to 20,000 and over until such time as the buildup requested has been reached.

He also requested the authority to call up a quarter of a million ready reserves for a period of one year active duty.

This would be filled by the calling of units and individuals with technical specialities.

THE PROGRAM as submitted to congress Wednesday by the President, calls for an additional 125,000 in man-

power for the army; 63,000 for the air force, and 29,000 for naval and marine forces.

According to the draft figures released, this buildup through the draft alone would take almost a year.

Speculation is that the reserves will be called up to provide an immediate buildup in power and be released as the draft and enlistments complete the increase deemed necessary.

HOWEVER, nothing official will be disclosed until the President is given the authority by congress to act.

Both houses of congress are now working on the program, and congressional leaders have promised to have it on Kennedy's desk by Tuesday evening for signing.

The one major snag in the program could be the 3.47 billion increase in defense spending.

While both congressional factions agree to the increase, one believes that non-defense spending should be curbed to provide it, and the other disagrees.

However, it is expected that this difference will be bypassed and ironed out at a later date.

Official Status Given Morrill Act Birthday

A Congressional joint resolution providing for national recognition of the centennial of the establishment of land-grant universities and colleges passed both houses recently, according to a letter the State News received from Charles E. Chamberlain, Michigan Sixth District representative.

The resolution authorizes the President to declare an official observance of the centennial when it arrives, July 2, 1962.

President Abraham Lincoln, in signing the Morrill Act, established a nation-wide system of land-grant colleges and universities under which public lands were granted to states and territories for support of colleges.

One result has been a national education system that has provided greatly expanded educational opportunity in the

the United States.

Michigan State and Pennsylvania State Universities were the first to take advantage of the Morrill Act provisions in 1862.

Musicians To Play Here

Several of the nation's outstanding string musicians will be featured in a program of chamber music by faculty members of the American Federation of Musicians Congress of Strings at 8:15 tonight in the auditorium of the Music Building.

Should Students Grade Faculty?

Sydney J. Harris, in his Detroit Free Press column, "Strictly Personal", called it disappointing that the proctors at Oxford College have forbidden "Isis," the undergraduate magazine, to continue reviewing university lectures.

He writes:

"When a college professor writes a book or a paper, it is subjected to the most searching reviews by his colleagues. This does not prevent dull and windy academic books from being written — but possibly it keeps them from being repeated.

"THERE ARE, however, no restraints on bad university lecturing — and I think that students themselves are admirably equipped to make critical comments on professors who are pompous, rambling, inaudible, unprepared or dully repetitious.

"Many scholars do not lecture well — and, indeed, most writers do not lecture well — and make no effort to improve their technique, thinking it is beneath their dignity to try.

"Some give the same cut and dried talks year after year, in a contemptuous and absent-minded fashion.

"Of course, I would rather hear a lecturer who has something to say and says it poorly, than listen to one who has nothing to say, and who says it with fluent charm.

"BUT UNIVERSITY students should not be forced to make this choice — a teacher who cannot lecture clearly, concisely and interestingly should limit his activities to small graduate seminars.

"I would go even farther than having the students review the professors' lectures in the school paper. It seems to me perfectly proper that they should grade their teachers at the end of each year, just as they are graded.

"Students know who are the good teachers and who are the bad ones. Even when they don't care to study, they are ready to give grudging respect to the teacher who is tough but fair, competent but not-ingratiating.

"In my visits to colleges throughout the year, I always find a surprisingly high degree of unanimity among the students about the "best teacher" on campus.

"AND IT is always the same type of person — one who lectures well, who explains carefully, who enjoys his subject, who is neither tyrannical nor lax, who treats his students as equals in intelligence although inferiors in learning.

"Students are less apt to be fooled by a teacher than are his colleagues, his superiors, or his employers.

"This Concludes Another Lesson In Communist Cooking"

Reporter Says:

Freedom Riders 'Pathetic'

By TOM DEWITT
State News Staff Writer

It seems rather odd that in America today we should have the need for Freedom Riders.

Now at a time when our way of life is being put forth as an example to the rest of the world, is it really necessary?

The "riders" have disappeared from the blaring headlines to a small squib on the second or third page. The public has once again been roused out of its lethargy only to once again revert to it.

Who are these "riders"? What are they trying to prove?

Actually they are, shall we say for now, humanitarians. They are the champions of the mistreated and the underdog. Their slogans are fine, but over used words of "freedom" and "civil rights," and, I am afraid, their motives are a bit quixotic if not down right pathetic.

The "windmill" they fight is as old as time immemorial, and just as hard to conquer. It has been one of the main causes of human strife in history. All the U. S. marshalls in the country couldn't destroy this menace. I am speaking of prejudice.

One hundred years ago, Abe Lincoln attempted to destroy this menace. He succeeded in only removing the physical appearance of slavery. The real menace went underground, to appear off and on in the form of segregation.

It is unfair to blame only the south. The north is just as biased on the race issue. Maybe here we don't have the segregated lunch and waiting rooms, but the "feeling" does exist! Witness the recent racial conflict—in Chicago, and Detroit.

Nor can we blame the white population. If the shoe were on the other foot and the Negro held the majority position, I am sure there would be anti-white discrimination. For you see, prejudice is a characteristically developed trait.

Does this have to be true? When man was created he was created man, not white or black. Social science tells us that pigmentation was developed by environmental natural selection.

Prejudice is a disease! A disease of the mind. However, stopping it is not a physical problem but rather a moral one. No amount of government-forced integration will

curb it. In fact, I think it will only strain relations and lead to open race war.

It not only exists in race, but also in religion and every possible phase of living.

However, the future doesn't have to look so dim. Man is a rational animal. He has the ability to learn and teach. I feel that through intelligent education we can ultimately destroy prejudice, but it will take longer than yours or my life time to do.

In this article, I have set myself in a capacity that no man truly belongs — that of judging other men. There is no such thing as a perfect being. I too must admit to the affliction of prejudice. I also realize that mine is so deeply rooted that I will never be able to overcome it. But I also feel that mine and others inadequacies need not be a part of the future generations, as they have been a part of the past.

Some day their may be no need for freedom riders or other integration movements. An ideal goal is a beautiful thing to strive for and is needed for motivation of the human mind, although it (the mind) realizes it may never reach it.

MOVING OUT—Today the high school students who participated in the Third session of the Communication Arts Institute are leaving for home. With them they are taking newly acquired knowledge that will benefit not only themselves, but also their fellow high school students.

HOW TO MAKE A YEARBOOK—That's what Diana Durbin and Noreen Stinke are learning from their instructor, Mr. Braedle.

Professor Studies Fruit Fly Mutations

Armon Yanders, professor of the Biological Research Department is experimenting with induced mutations in fruit flies by X-rays, to find the effects of radiation on the genes of living cells.

The radiation changes the genes and Dr. Yanders is working to find what the change actually is and what happens to particular genes and male gametes.

It is known that the X-rays are detrimental to the genes and Dr. Yanders claims it is because the substance which the genes produce takes on a new quality after exposure to the radiation.

THE WORK is sponsored by the Atomic Energy Commission, the Institutional Cancer Research Program and the National Science Foundation. These organizations want to find the effects of radiation so that it can be related to human beings.

Fruit flies are used because they are cheap, small and easy to raise. More is known about the genetics of flies than those of almost anything else.

The fruit flies have only eight

chromosomes and there are certain tissues where the chromosomes are over three hundred times the normal size enabling actual viewing of them.

ALTHOUGH Yanders considers the *Drosophila Melanogaster* to be "elegant and very pretty," he feels that the inability to become attached to a fruit fly also renders them valuable.

Yanders has several students working with him, two of which belong to the National Science Foundation for Undergraduate Research Participation, which sponsors interested and promising students in working in actual research situations.

Dr. Yanders began work in this field in 1950 under a predoctoral fellowship from the Atomic Energy Commission. He did his graduate work in Nebraska and considers it his home state.

He has worked in the Oregon National Laboratory, the Radiological Defense Center in San Francisco and at Northwestern University. He has been at State for close to two years.

This Miss Works With Missiles

An MSU coed, Barbara Kroupa from Cedar, Michigan, is working with Army missiles this summer at Redstone Arsenal in Huntsville, Ala.

She is one of nearly 100 undergraduates and faculty members from various universities and colleges hired in a program to encourage undergraduates to join the Army's missile development team upon graduation.

A program which the Army has had in effect for several years, the summer staff this year went to the Army Ballistic Missile Agency and the Army Rocket and Guided Missile Agency.

Their on-the-job training will continue through September when they will return to their campuses to apply some of the principles learned during the summer.

Final Exam Schedule Announced

Final examinations for the second five-week session will be held from August 26 to September 1, the same as the schedule for 10-week courses.

The finals will not be given on the last day of classes in the second five-week sessions as was done in the first half, according to Victor Henley.

EXPENSIVE HAT—Ann Cioffe, who plays the part of Agnes Sorel, tells Charles the Dauphin, played by John Runlevy, that a new hat 'will only cost 6,000 francs,' in the first scene of "The Lark". The play will run through Saturday at Demonstration Hall. —State News photo by Fred Bruflodt

'Lark' is Fitting Climax To Fine Season of Plays

By DAN WHITNEY
State News Reviewer

Summer Circle's final production soars like a "Lark". It is the fitting climax to a fine season of plays.

The "Lark" is the story of the trial of Joan of Arc at Rouen. The trial is presented in the form of a play recounting Joan's life as leader of the French Army.

It is difficult to point to a single player as the star. The cast, with few exceptions, turned in excellent performances. It was very well balanced.

A LARGE part of the praise however, must go to Corliss Phillibaum, the director. He was responsible for selecting the cast. The job was so very well done, it is difficult to imagine the actors playing a different role.

Joan of Arc, the central character, was played by Phelia Rutledge. She was perfect in the role. Her lines were spoken with great feeling and only in a few minor instances did she hesitate. Her performance was very consistent throughout.

John Dunlevy, as Charles, the Dauphin, came closest to stealing the show. His performance late in the first act so inspired the audience, they applauded heartily as he exited. His portrayal of the cowardly, somewhat womanish monarch of France left little to be desired.

As usual, Charles Cioffi turned in a good job. He played the part of Beauchamp, Earl of Warwick, who had captured Joan.

JAMES BARUSHOK, as Cauchon, Bishop of Beauvais, was very convincing as the chief judge. Whenever he spoke, he took complete com-

mand of the stage. He looked the part as well as acting it. Nicholas Howey, as the Inquisitor, acted his part well. He was more effective when he spoke quietly than when he shouted. His sinister looks added weight to the role.

James Pepper, as the Promoter had more occasion to shout, but it seemed at times that he may have been guilty of overacting. This did not detract from his fine over-all performance.

FRANK BRAMAN, as Robert de Beaudricourt, Squire of Vaucouleurs, was as long on talent as his title is on names. He was one of the minor players, but while on stage he com-

pletely held the audience's attention. As a matter of fact, he upstaged Joan of Arc herself.

Tom Loomis, as the Archbishop of Rheims, gave a performance that utterly felt flat. Whether due to nervousness or lack of practice, he was out of tune.

While having an audience with King Charles, Loomis seemingly forgot his lines, spoke too slowly and in general ruined the scene. Fortunately, the other actors in the scene were not thrown off and picked up the tempo very well.

THOSE WITH lesser parts who did fine jobs, were: Lee Crouch, as Brother Ladvenu; —See LARK, Pg. 8

Paintings Displayed At Leland

The 20th annual exhibition of the Leelanau Summer Art School of Michigan State University will be held Friday and Saturday at Leland.

According to Erling Brauner, director of the Summer Art School, the exhibition will feature more than 100 oil paintings and water colors representing the work of 18 outstanding students enrolled in the course.

The hours for the exhibit are from 2-10 p.m. Friday and 10 a.m.-10 p.m. Saturday, at the Leland Studio, at which time much of the art will be available for purchase.

Most lampshades on the market have white linings, and this is the kindest choice you can make for your eyes. Home economists at Michigan State University say white reflects the most light and best illuminates the magazine or book you are reading. As lining color deepens, it absorbs more light.

Spring Term Grads Of Residence Halls Revealed

Kappa Alpha Theta, Farmhouse, VanHoosen, and West Shaw Hall had the highest scholastic averages for spring term, 1961.

Kappa Alpha Theta's average was 2.81, Farmhouse's 2.73, VanHoosen's 2.86, and West Shaw's 2.41.

Ellsworth House, with a 2.87, topped the list of men's co-operatives.

The graduate women of Owens Hall had a 3.32 for the highest average on campus. They were closely followed by the men of Owen who accumulated a 3.17.

The all-university average was 2.40 with the women achieving a 2.47 and the men a 2.38.

The all-society average was 2.46. The sorority average was 2.60 and the fraternity average was 2.35.

NON-AFFILIATED students averaged 2.38. The women in this group had a grade point of 2.43 and the men a 2.35.

The individual sorority averages are: Delta Gamma, 2.78; Pi Beta Phi, 2.71; Alpha Chi Omega, 2.69; Delta Zeta, 2.69; Phi Mu, 2.67; Alpha Gamma Delta, 2.66; Zeta Tau Alpha, 2.63; Gamma Phi Beta, 2.62; Alpha Delta Pi, 2.6; Kappa Kappa Gamma, 2.57; Alpha Xi Delta, 2.55; Alpha Phi, 2.54; Chi Omega, 2.52; Delta Delta

Delta, 2.51; Kappa Delta, 2.51; Sigma Kappa, 2.51; Alpha Omicron Pi, 2.4; Alpha Epsilon Phi, 2.35; Alpha Kappa Alpha, 2.16.

Individual fraternity averages are: Alpha Gamma Rho, 2.52; Delta Tau Delta, 2.51; Sigma Nu, 2.48; Alpha Sigma Phi, 2.48; Phi Sigma Kappa, 2.47; Alpha Epsilon Pi, 2.42; Sigma Chi, 2.42; Pi Kappa Phi, 2.41; Phi Gamma Delta, 2.41; Theta Chi, 2.41; Triangle, 2.39; Phi Kappa Sigma, 2.37; Delta Chi, 2.37; Sigma Alpha Mu, 2.36; Delta Upsilon, 2.30; Kappa Sigma, 2.30; Zeta Beta Tau, 2.28; Sigma Alpha Epsilon, 2.28; Alpha Tau Omega, 2.27; Delta Sigma Phi, 2.26; Sigma Phi Epsilon, 2.24; Phi Kappa Psi, 2.24; Beta Theta Pi, 2.21; Lambda Chi Alpha, 2.20; Phi Kappa Tau, 2.20; Psi Upsilon, 2.19; Phi Delta Theta, 2.15.

THE WOMEN'S dormitories compiled the following point averages: E. Landon, 2.52; S. Campbell, 2.47; W. Yakley, 2.44; N. Campbell, 2.41; Gilchrist, 2.40; E. Yakley, 2.40; W. Landon, 2.39; Phillips Hall, 2.39; W. Mayo, 2.36; Mason, 2.35; E. Mayo, 2.34; Snyder, 2.31; Abbott, 2.28; N. Williams, 2.22; S. Williams, 2.22.

Averages for the men's dormitories are: E. Shaw, 2.37; Emmons, 2.31; Bryan, 2.22; Butterfield, 2.21; Armstrong,

2.18; Rather, 2.17; Bailey, 2.15. Men's co-operatives and other off-campus housing compiled the following averages: University YMCA, 2.64; Mott House, 2.53; Hedrick House, 2.48; Evans Scholars, 2.46; Asher Foundation, 2.45; Howland House, 2.33; Bethel Manor, 2.32; Martin Luther House, 2.29; Bower House, 2.13; Beal House, 2.10; Ulrey House, 2.04. The off-campus girls averaged 2.47, room and board girls, 2.89, the Asher Foundation for Women, 2.37.

WANTED Wardrobe Trunk. Call ED 2-2114. 13

Hort Gardens Big Summer Attraction

By JAN WELLMAN
State News Staff Writer

One of the biggest summer attractions on the University campus is the Horticultural Gardens.

The gardens, located between the Horticultural and Student Services Buildings, are used for teaching and demonstration purposes as well as for testing the performance of plants under central Michigan weather conditions.

The area was originally part of a field test plot for horticultural crops and covers over two acres. The gardens had gradually developed into their present formal arrangement by 1943 and final structural changes were made in 1958.

THERE ARE over 600 varieties of flowering plants in the gardens and they have been "color-tuned" to provide pleasing color combinations. Various plant forms and flowering periods have been arranged to provide examples of satisfactory planting schemes. All of the plants have been permanently labeled with both common and scientific names.

There six specific garden areas. These include the rose, combination, perennial, annual, bulb, and water gardens.

The rose gardens are made up of the floribunda and hybrid tea rose collections. The garden is the larger of two public rose gardens in Michigan and it is accredited by the All-America Rose Selections, Inc. This means that many new varieties may be seen in the garden before they are offered for sale to the public. There are nearly 1,100 rose plants of over 170 varieties on display.

The combination garden is made up of perennial, biennial, annual, and bulbous plants. The different varieties are combined so as to give continuous color. The color scheme blends from red and purple at the south end of the garden to orange and blue at the north.

PERIENNIAL and biennial flowers give continuous color to the perennial garden. Some plants of special interest in this area are Oriental poppies, phlox, daylilies, delphinium, and peonies.

Non-hardy plants which are started from seed every year are planted in the annual garden. The varieties used vary from year to year and a different color scheme is also used every year.

Hardy and non-hardy bulbous plants are on display in the bulb garden. The area includes new varieties of hybrid lilies, hardy amaryllis, tuberous begonias, and autumn crocus.

The pool in the center of the Horticultural Gardens contains the water garden. Hardy and tropical waterlilies are grown here.

SEASONAL highlights of the gardens are the annuals and lilies in mid-July, the dahlias and waterlilies in mid-August, and chrysanthemums and autumn crocus in mid-September. The gardens are open to visitors at all times.

There are several additional smaller plant collections to be seen on campus. Flowering plants may be seen at the Beal Botanic Garden, west of the Library, and also at the annual flower trial grounds located at the plant science greenhouse range on Farm Lane. There is also a labeled shrub collection located north of the Auditorium.

Four Changes Made In International Staff

Four university men have been assigned to new posts in MSU's International Program.

Dr. Raymond N. Hatch, assistant dean for off-campus affairs in the College of Education, will leave in mid-August to head the university's advisory group at the University of the Ryukyus on Okinawa.

Hatch will also be an adviser at the central administrative level on the broader aspects of teaching, research and extension programs at the island university.

HE WILL also be working with a program to upgrade elementary and secondary teachers in the Ryukyu Island.

John D. Singleton, assistant director of placement, has been named administrative officer of the MSU Advisory Group in India.

Singleton will leave Sunday for a one-year assignment in Madras, India.

Under a contract with the

International Cooperation Administration, MSU is providing technical advice and assistance to India in establishing teacher-training programs at Guindy College of Engineering in Madras and Poona Engineering College at Poona.

IN ADDITION to working with these two institutions, Singleton's administrative duties will also be related closely with the U. S. Technical Cooperation Mission headquarters in New Delhi.

Charles F. Doane, Jr., who was an administrative assistant in the Pakistan project will take over a similar post in the university's Nigeria program.

Dr. Sheldon Cherney, assistant professor of Continuing Education, was named associate professor of Continuing Education and associate coordinator on campus of the Nigerian project.

The four assignments were approved July 20.

Faculty Members Widely Traveled

For the second year in a row, MSU has had more faculty members abroad than any other university or college in the United States, according to the Institute of International Education.

The Institute's annual survey showed that 10 per cent of the 2,218 U.S. faculty members abroad during the year were from MSU.

The university, a pioneer in international education, reported 222 faculty scholars abroad in programs supported by federal or private sources.

THE UNIVERSITY of California was second with 161 and the University of Indiana was third with 66.

Many of the MSU faculty overseas were participating in the University's advisory programs in South Vietnam, Okinawa, Brazil, Columbia, Costa Rica, Nigeria, Pakistan, Formosa and India.

Sponsors of these projects include the International Cooperation Administration, private corporations, foundations, the specific governments concerned and the U.S. Department of the Army.

Of the 2,218 total abroad, the survey noted that 1,202 (54 per cent) were on assignment in Europe; 368 (17 per

cent) in the Far East; 230 (10 per cent) in Latin America, and 200 (nine per cent) in the Near and Middle East.

THERE WERE 116 scholars from the U.S. reported in Africa—twice as many as in the previous year.

Even though the total U.S. faculty members abroad showed a substantial increase over the last year, the survey pointed out that there are still more foreign faculty reported at U.S. institutions than there are U.S. faculty members in foreign countries.

The Institute also listed MSU

as one of the U.S. institutions with more than 400 foreign students.

MICHIGAN STATE reported 562 foreign students, or 2.6 per cent of its total enrollment.

The three universities with largest percentages of foreign students were Howard University, 16 per cent, and Harvard University, 7.4 per cent.

Six universities reported more than 1,000 foreign students each. The University of California was first in this category with 2,003 students enrolled from abroad.

'Fastest Ice Skater' Top Crowd Pleaser

By TOM DEWITT
State News Staff Writer

Little 15-year-old Bobby Mecay of the St. Paul Skating club, introduced as the fastest moving thing on ice skates, proved to be the top crowd-pleaser at the "Talent on Ice" show Wednesday night.

About 3,000 people, including about 400 members of the Homemakers Conference, applauded the routines of some of the finest amateur skaters in the country.

Leading off the show was little seven-year-old Corrine DeVozzo of the Detroit skating club. The cute little girl captured the hearts of the crowd with her routine.

AS EXPECTED, both Albertina Noyes and Joya Utermohlen turned in superb performances.

With the exception of a production number, the skaters all did individual routines and dances.

Three skating duo's performed dance routines that called for the utmost of timing and precision. They consisted of Janet and Nic Burhans, Joey Heckert and Gary Clark, Paul Pepp and Sandy Latocha. The team of Pepp and Latocha featured a jitterbug dance . . . on skates yet!

A fog-like mist hung just above the surface of the ice giving the skaters the appearance of skating on clouds.

THE "ROARING 20's" flashed onto the ice, complete with flappers, gangsters and a clown whose antics in the crowd made it difficult to concentrate on the main event. The Charleston and Varsity Drag were the featured dances.

Gary Clark of the Lansing Skating club was well liked by the crowd. Clark's routine consisted of several dazzling mid-air spins that drew "ooh's" and "ah's" from the spectators.

Last on the show was Mecay. He did a soft-shoe dance routine first then reappeared for a rock and roll number complete with a Presley-type dance and a guitar.

NORRIS WOLD, manager of the ice arena, said after the show that none of the spectacle had been rehearsed.

"We just open the curtain

and they take it from there," he said.

The future of the United States amateur ice skating should be bright from the glow of these young stars.

Wednesday night's show was the first of three to be presented this summer. The next one will be Aug. 2.

University Theatre Plans Major Plays Next Year

The University Theatre has announced its schedule of events for the 1961-62 school year.

Tours Europe Dance Group

'BALLETS: U.S.A.' ABROAD
NEW YORK (AP)—A second European tour takes place this summer for the Jerome Robbins dance company in "Ballets: U.S.A."

The three-month swing begins July 12 at the Spoleto, Italy, Festival of Two Worlds-

Five major productions are planned. They include:

- "Born Yesterday" — Nov. 1-5
- "Dr. austus" — Nov. 29-Dec. 3
- "The Good Woman of Setzuan" — Mar. 7-11
- "A Streetcar Named Desire" — April 25-29
- "Brigadoon" — May 24-28

In addition, the University Theatre will present three arena productions, an evening of opera and seven historical film classics.

where the production premiered in 1958. Subsequent stops include Paris, Berlin, Hamburg, Munich, Copenhagen and London.

Old Vic Compan Slated For Coming LC Series

The historic Old Vic Company will be featured in the Lecture-Concert Series next season on its fourth visit to the United States.

"Romeo and Juliet" and Bernard Shaw's "Saint Joan" will be performed by the famous London group next April 9 and 10, according to Dr. Wilson B. Paul, director of the Lecture-Concert series.

It has not been determined yet, he said, which performance will be in series "A" and which in series "B".

DETAILS OF the Old Vic's American tour were announced simultaneously in London and New York. The company will visit some 13 cities in the United States and Canada, under auspices of Impresario Sol Hurok, over a period of 20 weeks beginning January 5.

"Romeo and Juliet" will be directed by Franco Zeffirelli and "Saint Joan" by Douglas Seale.

Barbara Jefford will play the title role of "Saint Joan," in which she scored an outstanding success in London's 1959-60 season. John Clements, who will head the Old Vic company of 50 on tour, will play Warwick; George Baker, Dunois; George Howe, The Inquisitor, and Andre Van Gysegem, Cauchon.

ZEFFIRELLI'S production of "Romeo and Juliet" has proved to be one of the biggest hits in Old Vic history. Zeffirelli, famous as an opera

Lark

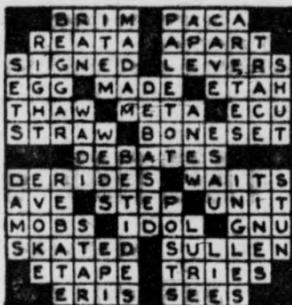

(continued from page 4)
Anne Cioffi, as Agnes Sorel, King Charles' mistress; Helen Shaw, as Queen Yolande; and John Corsat, as Captain La Hire.

The staging and lighting were both very effective. The circular stage was instrumental in creating a sense of audience participation. The actors who were not on stage sat around the stage and between the aisles. They commented on the action and drew responses from the audience as well.

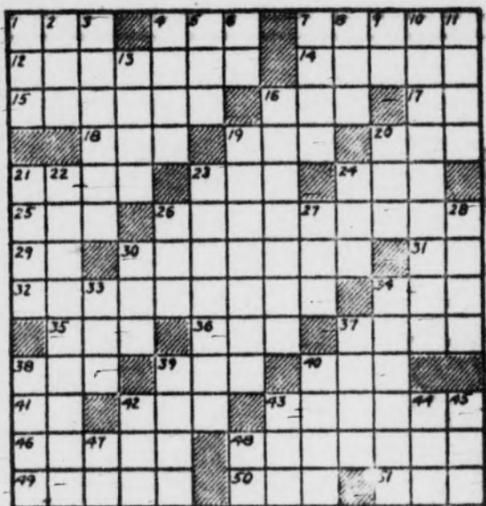

There were a few stutters and stammers, but no more than is expected in an amateur production.

Smithsonian Exhibit Is On Display at Museum

By ISABEL RACKI
State News Staff Writer

Colorfully designed fabrics from the island of Okinawa are now on display at the university museum.

The exhibit is on loan from the Smithsonian Institute and will appear in the museum through August 15. The display, entitled "Designed in Okinawa" is part of this summer's Institute on Asia.

The exhibit, now being circulated throughout the country by the Smithsonian Institute, was started by a group of Americans living on the island interested in art in Okinawa. The exhibit was sponsored and financed by the U. S. Army situated in Okinawa.

EXAMPLES OF Benigata, the characteristic dye work of the Ryukyus, a group of islands to which Okinawa belongs, are included in the display.

Benigata is similar to the type of dyeing done on Javanese textiles.

It is done with the use of stencils. The stencil paper consists of several layers of rice paper which are glued together with persimmon juice.

The stencil is placed on cloth and rice paste is brushed over it. After the stencil is removed, the colors are painted into the pasteless areas with fine brushes. The rice paste is then washed out, and the brilliant design remains.

INCLUDED IN the exhibit is a utility cloth, called Furoshiki, and a hand towel, called Tisagi. The utility cloth serves to carry food or other items.

The hand towel, at one time, played a part in courtship. It was woven by the prospective bride and presented to the family of the prospective groom.

The quality of the weaving was, at times, decisive regarding the proposed marriage.

The designs are normally made of objects of nature — flowers, turtles, fishes, etc. Ryukyuan mythology is also employed in the themes of the designs.

Most of the fabrics in the display are in dark colors, as the Okinawan men and the married women do not wear bright colors. Only young girls in Okinawa wear bright clothing. About the time a girl is 12, she begins to wear more subdued colors. When married, she is obliged to wear dark colors.

THE CRAFTS of Okinawa became developed because the Okinawans, a sea-faring people, were forced to pay tribute to the kings and lords of neighboring China and Japan. They needed to develop their skill in crafts because this was the only way they could pay their tribute money. Consequently, their crafts have become more developed than in China and Japan.

Government interest in the culture of Okinawa developed because the wife of the Consul-General living on the island interested the U.S. government in the notion of developing the

The European Corn Borer is now attacking peppers, potatoes and certain ornamentals, say Michigan State University entomologists.

appreciation of Okinawan arts.

The Japanese, when they held the island made the Okinawans proud of everything Japanese. The Okinawans grew

to feel that everything Japanese was somewhat better. The United States government decided to attempt to instill a pride of their own rich culture in the Okinawans.

Edward Everett Horton Appearing at Ledges

Edward Everett Horton will be at the Ledges Playhouse in Grand Ledge, July 31 through August 5. Horton will star in "Nina", an adult French farce.

Today Horton is known as "America's most beloved comedian." He is one star who al-

ways plays to and for his audience. Many have tried to imitate him, but none have succeeded. He has a comic magic all his own.

Appearing with Horton will be Marte Boyle, Bill Slout, and Harry Cauley.

Research Bureau Forced To Depend on Outside Fund

By HANK BERNSTEIN
State News Staff Writer

The Bureau of Social and Political Research, a part of the College of Business and Public Service, will soon be forced to depend upon outside funds to maintain its operations.

The new and inadequate MSU budget has forced withdrawal of university funds.

The bureau has several projects underway at the present time and the university has provided money to complete them, but after the present projects are finished, no further funds will be available for the coming year.

According to Dr. Frank A. Pinner, associate professor of political science and director of the bureau, the organization serves two basic purposes.

THE FIRST of these is the development and execution of basic research both in the United States and abroad.

The second function of the bureau is its publication pro-

gram which provides both a publishing outlet for the faculty and a source of information for the public.

While the bureau hopes to continue its research work, if outside funds are forthcoming, the public information aspect of the bureau will be reduced.

Four books are presently in various stages of production and the university will provide funds to complete their publication.

THESE INCLUDE Academic Encounter, an account of American university programs in Japan and Korea by Martin Bronfenbrenner; Individualism and Social Welfare, an analysis of the social welfare system in France by Walter A. Friedlander; Problems of Freedom, a study of social and economic development in South Vietnam; and a monograph on radical nationalism among Panamanian law students by Daniel Goldrich.

Problems of Freedom is a collection of articles edited by Professor Wesley R. Fishel, of the political science department. Goldrich is an assistant professor of political science and a bureau staff member. Bronfenbrenner is currently

with the department of economics, University of Minnesota. Friedlander is currently with the department of social welfare, University of California.

The Bureau of Social and Political Research has two major points of emphasis in its research program. These are studies of the development of political orientations and applications of role theory.

THE BUREAU conducts studies concerned with the orientations which enable participation in an open society, such as political interest and ability to compromise. In this area, the research is usually concerned with young people.

The bureau also studies the ways in which people acquire and play their social and political roles in public life. This side of the research program is threatened by lack of financing.

What kinds of research projects are currently being carried on, or have been planned and are ready to be undertaken by the bureau?

The U. S. Office of Education, part of the Department of Health, Education and Welfare, has provided a grant for a study of the development of

the political attitudes of high school students.

A FORD Foundation grant to the university's International Programs has made possible a study of the development of political orientations among students in Panama.

A project is planned in conjunction with the School of Police Administration which would be an evaluation of the training for juvenile officers, studying actual changes in the role of the officer in his office and home community.

Another research project which is currently being carried on by the bureau is a study of adult migrants to Israel to try to discover how they acquire their political attitudes.

Dr. Jones To Attend Seminar

Dr. Gardner Jones, acting head of the Department of Accounting and Financial Administration, will attend a faculty seminar at Williams College, Williamston, Mass. July 31 to August 25.

The seminar will be conducted by the Graduate School of Business of the University of Chicago and is being sponsored by the Ford Foundation.

The seminar will provide an opportunity for approximately 36 faculty members of the American Association of Collegiate Schools of Business and two participants from foreign schools to examine new developments and concepts in two major areas — accounting and marketing — and to consider related developments in economics, behavioral sciences and mathematics.

Educational Grant For James Stamm

A U. S. educational exchange grant from the U. S. Department of State has been awarded to Dr. James R. Stamm, assistant professor of humanities.

The grant will enable Stamm to conduct a year of research in Spanish literature and history at the University of Madrid in Spain.

Stamm taught romance languages at Lehigh University and philosophy at Mexico City College prior to joining the MSU staff in 1958.

He holds the B.S. degree from Columbia University, B.A. and M.A. degrees from Mexico City College and the Ph.D. degree from Stanford University.

To Smallest in 20 Years Lion Coach Limits Squad

The Detroit Lions opened their 1961 training camp Tuesday with the smallest squad to report since World War II days.

Forty-seven players, including 35 veterans and 12 rookies, reported at Cranbrook School in Suburban Detroit's Bloomfield Hills.

Coach George Wilson deliberately decided to limit the squad because of the abundance of veterans returning for the season.

AMONG THE vets are four former MSU players. They are quarterback Earl Morrall and Jim Ninowski, end Sam Williams and halfback Gary Lowe. All four were among the 47 old timers that returned last spring for the traditional game with the varsity.

Training will get under way Friday in an afternoon session. On the following Sunday, the regular two-a-day sessions will begin.

Three Lion vets that will not return with this year's squad are end Dave Middleton, guard Grady Alderman and defensive halfback Dave Whitsell. They have been sold to the Minnesota Vikings, the newest team in the NFL.

Another Lion, Jim Weatherall, plans to retire.

THE NUMBER one problem facing the Lions coaching staff is to find some offensive line replacements. Also several running backs are needed both as starters and replacements.

Last year the Lion backfield depended heavily on the talents of Terry Barr, Howard Cassady, Dan Lewis, Nick Pietrosante, Ken Webb, Morrall and Ninowski. All will be back, but you can't count on injuries.

The first pre-season game will be Friday night, Aug. 11, against the Cleveland Browns.

Weather Report

At long last, rain is in sight for the Lansing, East Lansing area.

The U. S. Weather Bureau five-day forecast calls for partly cloudy skies, a high of 86 and widely scattered late afternoon and evening thunder-showers today.

Saturday will be fair and mild with partly cloudy skies.

Bowling Alley, Lounge Closed During August

Two changes have been announced in the schedule of Union building activities for the second five weeks of summer school.

The Bowling alley and the U-N. Lounge will be closed.

Other facilities will follow the same schedule as for the first five-week session.

The Billiard Room will be open from 7 a.m. to 10:30 p.m. Monday through Friday, and closed on Saturday and Sunday.

The Browsing Room will be open from 10 a.m. to 8 p.m. Monday through Thursday and from 10 to 6 on Friday. It will be closed on Saturday.

Grill hours will be from 7:15 a.m. to 10:30 p.m. Monday through Saturday and from 10 a.m. to 10:30 p.m. on Sunday.

The cafeteria will be open

from 11:15 a.m. to 1:15 p.m. and from 5 to 7 p.m. Monday through Friday, 11:30 to one and 5 to 7 p.m. on Saturday and noon to 2 p.m. on Sunday.

The table tennis room will be open the same hours as the Union Desk—7:30 a.m. to 10:30 p.m. Monday through Friday and from 9 a.m. to 10:30 p.m. on Saturday and Sunday.

Student Faculty Golf Tournament

Another student-faculty golf tournament will be held the second five weeks if enough interest is shown. All interested persons should stop in at the IM office or call ext. 2881.

All-Stars Defeat Rozos, Take First Softball Crown

A one-hitter pitched by Hal Leigeb, East Lansing senior, won the first five-week softball championship for the All-Stars.

The Stars scored three runs in the third inning and two in the fourth to defeat the Rozos, 5-0, for the title.

The Rozos only hit came in the first inning when Jerry Lamb, Detroit junior, singled

off Leigeb.

Ed Abrey, Roslyn Hts., N. Y. senior, hit two singles and a double for the Stars. George Folisek and Fred Chappel each had a single. John Rogers hit the only home run.

The Stars were the winners of block four and the Rozos from block three. Both teams were undefeated.

STARLITE
Two Miles Southwest of Lansing on M-78

JITTERBUG ON ICE—Paul Pepp and Sandy Latocha delighted the audience with their show stopping dance.

PEEKING—The people in the audience were not the only people to see the show. Many of the participants watched the routines of the other performers by peeking through the curtain.

LITTIEST AUTOGRAPHER—Seven-year-old Corrine DeVozzo signed her name to the programs of slightly older and slightly envious girls.

ROARING TWENTIES—The big production number of the show transported the audience back to the days of speakeasys and the Charleston.

Talent On Ice

The ice arena at Demonstration Hall was the scene of the first "Talent on Ice" show of the Summer Wednesday night. The show was not a noisy spectacle, but it did present some of the country's finest skating talent.

It would be unfair to single out any one skater as being the hit of the show; they were all too good. From the moment the first skater appeared in the spotlight until the last performer was off the ice the audience was presented skater after skater of excellent ability.

SEE STORY PAGE 7

SHOWSTOPPER—Bobby Mecay brought the show to a close with a soft-shoe routine that was followed by a dance in which he mimicked Elvis Presley. During the Presley number several of the elderly ladies in the audience swooned.
