Global Glimpses

By the Associated Press

U. S. Troops Bolster Vietnamese

SAIGON, South Viet Nam—Two U. S. Army air support companies totaling 300 men arrived Wednesday from the plains of Kansas to bolster South Viet Nam's jungle war against Communist guerrillas.

The new units, which have been based at Ft. Riley, Kan., were identified as the 18th Aviation Co., and the 339th Transportation Maintenance Co.

They increase to about 4,000 the total of U.S. service personnel now in South Viet Nam. They will be based at Nhatrang, a port on the South China Sea northeast of Saigon.

Red Charges 'U.S. To Invade Cuba'

UNITED NATIONS—Soviet delegate Valerian Zorin asserted Wednesday the United States is completing final preparations for "a new aggression" against Cuba. He added that the Soviet Union is standing by its earlier pledge to support the Castro regime with all necessary assistance.

U.S. delegate Francis T. P. Plimpton scoffed at the Soviet charge. He said the only threat to Cuban Prime Minister Fidel Castro's "dictatorship is the longing of the Cuban people for freedom."

Kennedy Seeks Space Network

WASHINGTON—President Kennedy said Wednesday that global communication by satellite has become technically feasible—and that private enterprise should take charge.

Kennedy asked Congress to charter a communications satellite corp. to build and operate satellites and associated ground stations for the relay of messages to any part of the world.

Spellman Hits College Aid Bill

NEW YORK—Cardinal Francis Spellman said Wednesday that passage of President Kennedy's \$5.7 billion federal aid to education bill would bring about the "eventual end" of the Catholic school system.

The administration measure, made public Tuesday, excluded any federal aid to private or church elementary and high schools.

He said the Catholic hierarchy would continue its fight for what he termed "equal justice" for all the nation's school children.

Dutch Plane Held in Alaska

ANCHORAGE—A KLM airliner carrying 94 persons—including 68 described as multi-clad Dutch troops bound for West New Guinea—was held here Wednesday after being refused a landing permit in Tokyo.

Bill Wardenier, KLM manager here, said he was awaiting instructions from Amsterdam, but added "the only thing I can see now is that the plane will have to return to the Netherlands."

The report that Dutch troops in civilian clothes were among the passengers came from Amsterdam. Wardenier described the passengers only as "government officials and employees."

Bostonians To Hear Radio Moscow

BOSTON—News beamed to North America—Radio Moscow's English version—will be broadcast daily by Boston radio station WBOS for one week beginning next Monday.

The Russian newscast will be broadcast eight times daily for five minute periods.

Purpose of the broadcasts is to enable American listeners to hear "the distortion of facts, half-truths and propaganda in subtle forms" as aired by the Soviets, said Herbert S. Hoffman, president of WBOS.

Kennedy Questions Nuclear Test Ban

WASHINGTON, (AP)—President Kennedy opened his weekly press conference with a statement contending there is no inconsistency between preparing for nuclear tests in the atmosphere and going into disarmament negotiations next month.

He said the Soviet Union's series of atmospheric tests last year—he numbered the Russian detonations at 40 to 50—had created a wholly new situation raising "grave questions" as to the safety of maintaining this country's self-imposed ban on testing.

Following are comments by President Kennedy on other major issues at his conference, topic by topic:

COLLEGE SCHOLARSHIPS—"I want to take this opportunity to express my pleasure at the Senate's action Tuesday retaining in the college aid bill the provision for 212,000 college scholarships. It is urgent that this provision be retained in the conference (with the House)."

PAROCHIAL SCHOOLS—"The position which I have taken on this matter (in opposition to federal aid for church schools) I have taken after legal advice from the Attorney General, and from the counsel at the Department of Health, Education and Welfare. . . I am going to continue to take the position I now take, unless based on constitutional grounds, unless there is a new judgment by the supreme court."

SENATE INVESTIGATION of Postman Censors—"I don't think that Mr. McNamara (Secretary of defense) or I, however, can agree to a harassment of individuals who are only carrying out the policies dictated by their superiors."

GOV. NELSON ROCKEFELLER'S POSITION—"I did read with interest a column in the Times, where Mr. Fulton Lewis said nobody could get to the right of Barry Goldwater, but now I am not so sure."

EXTREMISTS—"Kennedy said Eisenhower had been just as vigorous as he in denouncing the ultra-conservative John Birch Society, and said he thought the group has no place in the Republican party typified by Eisenhower and responsible men. He added "it is totally alien to both parties."

GREGG FAGAN

These photographs were inadvertently switched in Wednesday's State News. The two men, Franklin Gregg, Jr. and Thomas J. Fagan, are prospective candidates to fill the seat of Rep. Ralph E. Young, who died Jan. 22, and are running in the Feb. 26 primary election along with Russell L. Ragsdale.

Radio Station Advertising Ban To Stay in Force, AUSG Told

Students To Learn Real MSU

Fresh-Soph Council has launched an information drive to tell State students of the wide range of academic and cultural activities and opportunities available to them.

Students will find State's advantages proclaimed through newspapers, radio, TV, posters and lectures for the next several weeks.

Council members said the plan was formed because it was felt too much stress is often placed on social and sports activities while many other opportunities are overlooked.

A probe into the many aspects of the University, past, present and future, was begun under the cultural and service committee of the council.

Advisers to the planning group included President John A. Hannah and Dr. Gordon A. Sabine, vice president for special projects.

When the committee decided an information campaign was needed, it organized activities which included forums on local radio and television stations, in addition to a weekly program out of both Chicago and Lansing.

Posters describing various aspects of the campus will be placed in the dorms. Displays showing the history of various buildings, map comparisons, and Pulitzer Prize-awarded faculty books, will be shown in the Union, Student Services, and library.

On February 19 through 27, Fresh-Soph members will go to the dorms before and after dinner for an activity orientation. The members will explain all the various extra-curricular activities available and their qualifications for joining.

A closed meeting between student leaders and faculty members on Feb. 22, will open with a speech by John W. Crawford, head of the advertising department. He will talk of the past, present, and future of the University.

Following the speech there will be a free discussion period between the faculty members and president of the various student organizations.

A summarization of all the information compiled during the campaign will be available at Parents Weekend in booklet form.

Investigators Challenge McNamara

WASHINGTON, (AP)—Senate investigators voted Wednesday to challenge head-on the refusal by Secretary of Defense Robert S. McNamara to let his staff tell who censored specific speeches by military men.

Chairman John Stennis, (D-Miss.), said the special investigating subcommittee voted unanimously to call back Willis D. Lawrence, one of the top Pentagon censors, and order him to tell who censored a speech by Lt. Gen. Arthur G. Trudeau.

McNamara has refused to tell the subcommittee who on his staff censored which speech, and has forbidden his aides to tell, either.

Lawrence had been the first to cite McNamara's orders as a basis for refusing to give such information in a hearing.

Stennis said the subcommittee had unanimously approved a motion by Sen. Francis Case, (R-S.D.) to call Lawrence back to the witness stand and demand answers to such questions.

HISTORICAL DISPLAY—Kay Lawrence, Chicago sophomore, chairman of MAC, MSC, MSU (right), and Judy Hoffman, Royal Oak sophomore, chairman of the Culture and Service Committee, center, were joined by President John A. Hannah Wednesday afternoon as they opened a new display in the Union lobby pointing out little known facts about the University. —State News Photo by Paul Remy.

New Chemistry Building Needed to Replace Kedzie

By BRUCE FABRICANT
Of the State News Staff

A new chemistry building will be erected on campus in at least two years to meet the needs of increased student enrollment and to replace present inadequate facilities, according to Dr. Max T. Rogers, head of the chemistry department.

"The University can no longer meet the demand of student enrollment in chemistry courses," Rogers said. He said the situation has become so bad that the chemistry department had to turn away prospective chemistry students in both fall and winter terms.

"There was a 10 per cent increase in enrollment since last year and even then conditions were extremely bad."

Rogers said the problem will become worse in the future because 150 veterinary medicine students will try to take organic chemistry next year but many will be short laboratory space.

For the past 12 years the chemistry department has been split, Rogers explained. General chemistry classes are presently conducted in quonset huts located near the Police Administration offices while advanced courses are held in Kedzie.

"When the new building is completed all chemistry students will have classes under one roof," Rogers said. The added room will help the department increase undergraduate enrollment in courses like chemistry 101 and 102.

"In addition to an increased undergraduate enrollment the

department will also be able to expand its Honors College program. Kedzie presently provides little laboratory space for honor students. But the new building will provide space for at least 50 to 60 students."

Rogers said that the \$6 million building will also contain an adequate conference room for staff members, small recitation rooms and a large lecture theatre.

The graduate student will benefit from the building also, Rogers explained.

"Graduate students work throughout the chemistry department should expand at least 50 per cent within the

next five years because some space will be set aside for only graduate students and post-doctoral students," Rogers said.

As proof of the expanded size of the chemistry department, Rogers said that a combination of quonset huts and Kedzie contain a total of 72,000 square feet. The new building will contain 170,000 square feet.

"The ventilating system in Kedzie does not provide sufficient draft from its hoods," Rogers said. Laboratory plumbing is corroded and to replace it would not prove to be an economical venture."

Steel Union Seeks Shorter Work Week

PITTSBURGH, (AP)—The United Steelworkers Union said Wednesday it will press for substantially greater job security and expanded unemployment benefits in contract negotiations with the basic steel industry.

The union said it would seek shorter work periods as a means to obtain better job security, but did not go beyond generalizations.

The union said it will demand:

- 1—Improvement and expansion of unemployment benefits for workers not given the opportunity to work a full week.
- 2—Substantial improvements in the seniority systems to assure that veteran employees are not laid off while younger ones are working.
- 3—Programs for the training and retraining of employees so they will be able to qualify for available jobs.
- 4—Limitations on overtime work while qualified employees are laid off.
- 5—Periodic extended vacations for long-service employees and lengthening of regular vacations.
- 6—Higher wages. Basic wages now range from \$2.20 1/2 to \$4.20 an hour.

The contract proposals were drawn up by the union's 34-member executive board on Monday and Tuesday and were approved by the 27,000-member Pittsburgh-based union Thursday.

At the time the union and industry negotiators met to discuss the proposals, the union said it was in Pittsburgh.

"Dear Governor Hughes: We congratulate you. We hope your children will be happy with a good governor like you. We wish one of your boys grows up to be governor, too."

(Signed) Miss Blumenthal's second grade.

The border of the giant card contained smaller drawings done by the second graders, depicting imaginary scenes, the state house and maps of New Jersey.

"I like that," said Hughes, a father of six children.

University Avoids Trade Competition

By SALLY DERRICKSON
Of the State News Staff

Dean of Students John A. Fuzak told Student Congress members Wednesday night that the administration will not change its policy on commercial advertising.

He spoke to the group in an effort to clear up misunderstandings about this policy as

it applies to the proposed all-university radio station.

The policy was originally formulated to regulate the operation of Brody Radio. It states that no commercial exploitation will be allowed. Spokesmen for the proposed station have said that commercial advertising is the only feasible way to support the station.

Fuzak was questioned on the University's policy as it applies to advertising in the State News. He said that the State News was originally established by journalism people as an educational device on campus. If the State News were just being started, the policy might apply to the newspaper also.

"The decision to retain the present policy," Fuzak said, "was not based on the fact that

Con-Con Battles Tax Limit

A proposal to set a 50 per cent ceiling for Michigan tax assessment rate on real and personal property met stiff opposition Wednesday on the floor of the Constitutional Convention.

If the proposal is added to the new Constitution, the legislature would be required to "specify the proportion of true cash value at which such property shall be uniformly assessed, which shall not exceed 50 per cent."

"Uniformity of assessment is the cornerstone of any system of general property taxation," said D. Hale Brake, chairman of the committee on finance and taxation.

"The fact that uniformity has not been achieved in the past does not mean it isn't possible to attain it," he said.

"A majority of the members of the committee believed that the standard set by the legislature should not exceed 50 per cent."

Three minority reports by members of the finance committee have been filed, however, in opposition to various parts of the proposal. One report said that the loss in revenue would run into the millions of dollars if the tax rate ceiling were fixed at 50 per cent. The report added that the rate might be set below the ceiling, as low as 35 or 25.

Mine Blast Kills 59, Traps 124

SAARBUECKEN, Germany (AP)—A searing blast tore through a big coal mine Wednesday, caving in galleries on several levels and hurling the bodies of miners about the tunnels. Blackened rescuers reported at least 59 killed and 124 still trapped in one of Germany's worst mining disasters.

At least 85 of the 500 who escaped or were rescued were injured, some so seriously they may die.

"A great number of those missing may not be brought out alive," a rescue official said.

The miners were trapped at the 1,800-foot level.

The disaster occurred at 7:35 a.m. at nearby Voellingen in the Luisenthal mine. The mine has won awards as one of Germany's safest though 200,000 cubic meters of dangerous methane gas are pumped from it daily.

Survivors said a 100-yard-long sheet of flame in the main shaft shot from the second to the fourth level, touching off a tremendous explosion.

Many of the dead were killed outright by the flames, by shock waves which crushed their lungs or hurled them against tunnel walls, and by falling timbers and ceilings.

DR. JOHN FUZAK

radio stations in the area do not want competition. The trend is to pull the University out of the area of commercial enterprise in other fields, too."

He said that objections have been raised by the public and by the legislature when the University uses public facilities, paid for with tax payers' money, in commercial competition.

"The University in its broader operations doesn't go into commercial competition," Fuzak said. "It's taking an unfair advantage. This particular policy applies to student radio."

The administration is not against the proposed station, he said, and if the group can come up with another method to support the station, the question is open.

Fuzak also clarified the meaning of "University policy."

"Policy can't be changed just because a majority of students currently are in favor of a change," he said. "If those responsible (the administration) decide that such a change is not in the best interests of the University, the policy will not be changed."

A Congress member pointed out that University of Michigan has an all-university radio station supported by commercial advertising. Fuzak said that he supposed the station had been in existence for a longer time, operating with advertising revenue. He emphasized that all universities are facing similar problems in regard to university use of public facilities in commercial competition.

Fuzak also told the group that a decision on changes in housing will be announced probably "after the beginning of Spring term."

He said that the faculty committee on Student Affairs is currently studying all aspects of the situation, including such things as how many off-campus students are affected by the rules, available housing facilities, etc.

"This is not a change that See RADIO page 5

Brother Robert Faces Jap Mob

KYOTO, JAPAN, (AP)—A yelling mob of Communists with waving banners surged toward Atty. Gen. Robert Kennedy's bus Thursday when he arrived at a textile mill in this ancient city.

Police squads pushed back the shouting demonstrators and the bus was driven between the welcoming party and the Communists, permitting Kennedy to step down and enter the factory safely. Police estimated the Reds totaled about 300.

It was the second largest demonstration Kennedy has encountered since he arrived in Japan Sunday night on his good will tour. It was exceeded only by an uproar that broke out Tuesday at Waseda University in Tokyo when he tried to address the students.

The latest outburst was led by the same young man who headed a group of about 100 Communists who demonstrated outside the Attorney General's hotel, here Wednesday night.

Then the group handed U. S. officials a petition protesting against "Oppression of American Communists," and dispersed.

The Communists didn't give up so easily this time. As Kennedy and his wife, Ethel, toured the Kawashima textile mills with U. S. Ambassador Edwin O. Reischauer and his Japanese wife, the Reds closed ranks across the street from the factory and kept up their chants.

Kennedy showed his usual calm. When his bus rolled to a stop, he leaned out a window nearest the mob, smiled and waved his hands.

This infuriated the demonstrators and several young girls in the front ranks screamed "Kennedy go home!"

The demonstration occurred after Kennedy told a politically moderate group of Japanese labor union officials at a breakfast that there is a strong possibility the United States might resume nuclear tests in the atmosphere.

President Kennedy spoke similarly in Washington Wednesday but did not use the words "strong possibility" that his brother Robert did. The President said he expects to decide within a month whether to go ahead with the tests and made plain he favors them.

The Attorney General said: "There is no intention in this administration to resume nuclear testing just because the Soviet Union has. I would say there is a strong possibility the United States might resume testing."

Speaking in the only nation ever A-bombed, the President's brother told the Japanese "the only reason testing will be resumed—if it is—is so that the United States and the world cannot be blackmailed into surrender."

UN Bonds Endorsed By Adlai

WASHINGTON (AP)—Adlai E. Stevenson strongly endorsed Wednesday purchase of half a \$200-million United Nations bond issue. He pictured it as a move bolstering United States security and strengthening an institution he said had blunted Communist thrusts in Asia and Africa.

The U. S. Ambassador to the United Nations, expressing confidence of repayment, told Senators installments returned could be applied toward meeting annual U. S. assessments.

Even if the United States had to give instead of lend the \$100 million "it would be worth the cost many times over" to keep the United Nations alive, he said, and added:

"If the United Nations, even in its present imperfect form, were ever subtracted from the arsenal of our diplomacy, I think many times its cost in dollars would then have to be added to our defense arsenal. Nor do I care to contemplate the possible loss of life in avoidable conflict."

Stevenson testified before the Senate Foreign Relations Committee for nearly 3 1/2 hours on President Kennedy's case for helping the United Nations liquidate a deficit stemming largely from its Congo operations. Soviet bloc members have refused to pay their share of supporting troops there.

He rattled off a list of what he considered UN successes, particularly use of UN troops to help establish a unified, independent Congo. Without them there would have been a direct confrontation of the great powers, he said.

"The Soviet Union had smuggled aircraft and trucks and technicians into the Congo," Stevenson said, "in an attempt to turn the old Lumumba government to its purposes, but the UN prevented it from succeeding."

"It begins to look as if the Congolese government, in partnership with the UN can begin to repair some of the ravages of the past two years and turn its attention to the great task of building a viable nation."

MOTHER HAS TWIST TROUBLE—Mrs. C. Brent Stewart of Indianapolis, Ind., who broke her knee caps doing the twist at a party, is surrounded by her five children as she displays the cast which extends from ankles to hips. Departments Merge

Triple 'M' Sets National Trend

Did you know the college of Engineering has its own 3M? It stands for Metallurgy, Mechanics and Material Science.

Mechanics, formerly called Applied Mechanics, has been merged with the Metallurgy department.

This reorganization is formal recognition of the close relationship of the two former departments.

"MSU is one of the few to take lead in this direction," explained Dr. Austen J. Smith, head of the new 3M. "The only other school that has done so to my knowledge is Cornell University." This is becoming what he called the national trend.

Students who are enrolled in 3M will keep their old curriculums as they have already started in their programs. However about 30 graduate students will be enrolled in the new curriculum. New programs for undergraduates will be effective in the fall of 1963.

Asked if newer materials due to their lighter weight would eventually replace steel, Smith said that steel is the cheapest structural element and it would continue to be the basic material, in spite of the successful entry of aluminum due to its lighter weight and thus lower transportation costs, because of the high prices of newer materials.

New materials incorporated in the study will include semiconductors, transistors, ceramics, and plastic besides iron, copper and brass.

"One of the problems confronting metallurgists today is the inadequacy of materials in withstanding the demands placed on them due to conditions imposed by an accelerated science," Smith said.

Excessive Vitamins Dangerous for Many

Many Americans may be getting too many vitamins, a nutrition researcher here has reported.

Despite claims of food and health fadists, Dr. Dorothy A. Arata said most people get enough of the essential nutrients in a reasonably well-balanced diet.

"The great quantities of vitamin-enriched foods on the market combined with the many 'supervitamin' pills now being sold," she said "could result in dangerous excesses for many people."

The associate professor of foods and nutrition noted that excessive amounts of vitamins A and D, which are fat soluble, are known to be harmful.

A high intake results in a loss of minerals in the bones and a subsequent deposit of calcium in soft tissue.

The B vitamins, in contrast, have not been considered potentially dangerous even in very great quantities. Since they are water soluble, it was thought that surpluses were eliminated from the body.

Now, however, Dr. Arata questions this idea. Preliminary results of her research with white rats indicates that excessive amounts or at least one of the B vitamins—niacin—do remain in the body.

This excess, she said, when combined with a higher-than-normal amount of fat in the diet of the rats, causes deposits of fat in the liver and an accompanying disruption of the metabolism of a vital coenzyme, DPN, in the tissue.

The MSU researcher is continuing her study of these undesirable effects of excessive niacin and is also investigating the possibility of similar effects resulting from too much thiamine, another B vitamin.

How much is too much? In her research with niacin, Dr. Arata is using 100 times the normal daily requirement. With vitamin A, other researchers have found, 1,000 to 2,000 times the normal daily requirement definitely causes ill effects.

"While lesser amounts may also be harmful," Dr. Arata said, "these figures are not particularly high in view of the many sources of vitamins available today."

"There have been several instances of children getting hypervitaminosis from drinking bottles of cod-liver oil."

Fadists, she pointed out, promote the sale of massive doses of vitamins on the premise that if a little bit is good, a great quantity is better. These persons, she said, are doing more harm than good.

"For the ordinary person with a varied diet that regularly includes animal products, grain foods, green vegetables and fruits," she declared, "vitamin supplements and special foods are, at the best, a waste of money."

Baber, Norden To Present Joint Recital

Joseph Baber, violinist and Richmond, Va., senior, and James Norden, pianist and South Haven senior, will be presented in a joint recital Friday at 8:15 p.m. in the Music Auditorium.

Norden will open the program with Beethoven's Monumental Thirty-Two Variations in C Minor.

Baber will follow with the Sonata in D Major by Bach. His accompanist will be Miss Candace Willner, Arlington Heights, Ill., sophomore.

The recital will close with three piano pieces by Debussy, Griffes, and Poulenc, played by Norden.

The public is invited.

Chinese New Year A Hot Affair

HONG KONG, (AP)—Firecrackers set off by Chinese celebrating the Lunar New Year have caused 100 fires in the past 36 hours. British authorities said Tuesday. Most were minor but one destroyed 150 hillside huts, leaving 1,000 refugees from Red China homeless.

Is this the only reason for using Mennen Skin Bracer?

Skin Bracer's rugged, long-lasting aroma is an obvious attribute. But is it everything?

After all, Menthol-iced Skin Bracer is the after-shave lotion that cools rather than burns. It helps heal shaving nicks and scrapes. Helps prevent blemishes. Conditions your skin.

Aren't these sound, scientific virtues more important than the purely emotional effect Skin Bracer has on women? In that case, buy a bottle. And—have fun.

Officials To Iron Out Details Medical School Gains Support

Encouraged by a panel of leading medical educators, University officials are working on details of the new Institute of Biology and Medicine.

The Institute, which is to start a two-year, preclinical medical school in 1964, represents a new way of preparing medical doctors, Ph.D. biologists, veterinarians, nurses and medical technicians.

"Since our approach is new," explained Dr. Richard U. Byerrum, assistant provost and acting director of the institute, "we wanted to know if it would be acceptable to medical educators."

"At a seminar last week with some of the best men in the field, we were gratified to learn that they were generally enthusiastic about our plans."

Dr. Chauncey Leake, professor of pharmacology at Ohio State University, former head of the University of Texas medical branch and past president of the American Association for the Advancement of Science, was particularly enthusiastic.

He agreed with the general philosophy, saying that the MSU approach "is an excellent one."

"Our health remains our most important asset," he declared. "It seems to me that the people should be behind a project such as this. . . You're on a good path and going well."

The Institute of Biology and Medicine is designed to help relieve a critical national and state shortage of medical doctors and biologists with Ph.D. degrees, Byerrum explained. He pointed out that the Institute will be concerned with:

- Medical students, through four years of premedical education, which has been given here for many years, and two years of medical school, starting in 1964. Because the two-year program is preclinical, it will not require extensive hospital teaching facilities.
- Students who complete the work will be eligible to fill some of the 700 to 800 vacancies that occur annually at the third-year level in the nation's medical schools, including 30 to 40 at Wayne State University and the University of Michigan.
- Biologists from the freshman level through graduate work. This program ordinarily takes six to eight years to complete. MSU's strong Ph.D. programs in botany, zoology, microbiology, animal husbandry, physiology and other biological sciences will be further strengthened.
- Veterinary students, enhancing present programs which have made MSU a leader in this area. The D.V.M. de-

gree requires four years of study past the sophomore level, a total of six years.

—Nursing and medical technology students, who usually end their schooling with a bachelor's degree in four years. These majors are already offered here and will also be strengthened by the Institute.

Byerrum said a unique characteristic of the institute, as presently planned, will be a flexibility that will enable students in the various medical and biological fields to avoid committing themselves to a specific field until late in their college careers.

"The exact time," he noted, "will probably depend upon the specialty. A nurse will likely have to decide at the beginning of her junior year. However, the student who wants either Ph.D. or M.D. education may not have to commit himself until he begins graduate work."

"We think this sort of program will be very attractive to young people and will encourage more to enter medical and biological professions. At many schools, students often have to decide on specialties

before they have had a chance to study the general field.

"In order for the plan to work, core courses will have to be developed which will be suitable for all the students concerned. This is possible, we think, because biologists, physicians, veterinarians, nurses and medical technologists all need certain fundamental knowledge in such fields as physiology, anatomy, biochemistry and genetics."

Another feature of the Institute, Byerrum continued, is to be its emphasis on the comparative approach to biology. For instance, instead of studying plant, animal and human genetics as separate subjects, all three might be offered in one course.

MSU educators said they feel this sort of approach, already practiced to some extent at other universities, offers a better understanding of a number of subjects.

At many universities, Byerrum said, medical schools have been started as separate appendages of the university and have grown independently of the rest of the university.

MSU, he said, hopes to avoid this by expanding existing departments to provide medical education. The University already has most of the teachers it will need. Many have had medical school experience.

The affected departments, it is planned, will retain their positions in their respective colleges, but will have some of their activities coordinated by the Institute.

Eventually, some departments will come under the additional supervision of a school of medicine. This sort of point supervision of certain departments has worked effectively at Michigan State for many years.

While State is looking forward to making innovations in medical education, Byerrum noted that advice offered by Dr. Morton Levitt, assistant dean of medicine at Wayne State, will be heeded.

At the recent seminar, Levitt, who, along with Dr. William Hubbard, Michigan's dean of medicine, participated as a member of the MSU curriculum planning committee, pointed out that the medical program must follow certain traditional patterns since students will be going to other schools for the final two years.

"Tradition should not be a straight jacket," he said, "but it can't be ignored. The question of transfer must be a paramount consideration."

The seminar was one of a number of planning programs which have been financed out of a \$167,000 from the Commonwealth Fund of New York.

Lowe and Mattson Predict Rough Ohio State Meet

By **TERRY DURFEE**
State News Sports Writer

Michigan State tankers will meet archrivals Ohio State in one of the toughest dual meets of the season this weekend. Getting ready for the competition are diver Van Lowe and backstroke swimmer Jeff Mattson.

Van Lowe, a sophomore, first started diving at Proviso High School in Maywood, Illinois. As a ninth grader Van was too small to participate in football or basketball, so he decided to try diving.

His family moved to Birmingham, Michigan in his senior year, and Van dove for Seaholm High School. He placed fourth that same year in the class A swimming championship.

Lowe came to State not planning to dive, but found himself over at the IM pool and on the freshman team. Last year he placed second in the Midwestern AAU competition.

"I know that Ohio State has some of the best divers in the nation, although I have never seen them dive," says Van. He faces champions Lou Vitucci and Juan Botella.

Lowe, whose name is really Richard VanZant Lowe, prefers to be called Van. He is a non-preference major but is

interested in business or mathematics.

Jeff Mattson, a junior, hails from the west coast; Olympia Washington. Mattson has been

two years in the 100 yard freestyle.

Last year Mattson placed third in the NCAA championship in the 100 yard backstroke.

DIVER VAN LOWE (l.) and swimmer Jeff Mattson (r.) prepare for Ohio State.

swimming the backstroke since the age of ten.

While in high school he was named to the Prep All-American squad in the backstroke for three years, and two years in the 50-yard freestyle. He was also state champion for three years in the backstroke and

and was named to the collegiate All-American squad. He was also a member of the All-American 400-yd freestyle relay, which placed second in the NCAA.

Besides a great interest in swimming, Jeff enjoys the outdoors and mountain climbing. He also belongs to a skin diving club and has spent much time exploring the Puget Sound. He has also become very interested in sky diving and hopes to try it after graduation.

Jeff is a divisional social science major who enjoys good music, drawing and painting.

Mattson and Lowe are looking forward to the Buckeye meet and feel Ohio State will be a real challenge.

Pole Vaulter Uelses Predicts More Height

QUANTICO, Va. (AP)—John Uelses, who shattered track tradition and pole vaulting's 16-foot barrier with his fiber glass pole and short takeoff run, predicted Wednesday he'll go even higher this weekend, possibly to 16 feet, 2 inches.

The 24-year-old Marine Corporal became the first pole vaulter ever to clear 16 feet last weekend, sailing over twice at that height. He set an indoor record of 16 feet, 3/4 inch at Boston Saturday night.

Uelses will get two chances to better his record this weekend, Friday night at Philadelphia and Saturday night at Los Angeles.

There was one qualification in his prediction, made at a news conference on the Marine base here.

Uelses said he caught influenza Tuesday, but expects to be rid of it before Friday. If not, it may hurt his chances for a new mark.

Born John Hans Feigenbaum in Berlin, Uelses lost his father during World War II. His mother fled the Nazis and Uelses entered the United States in 1949 to live with his aunt in Miami. She adopted him and legally changed his last name to hers.

After graduating from high school in Miami, Uelses entered the University of Alabama, but signed up with the Marines after his freshman year. He will be released from the Marines in May and expects to return to college next

fall, probably to Southern Illinois College.

Uelses, 6-foot-2 and 173 pounds, replied calmly to critics of his fiber glass pole, who say he gets a slingshot effect that boosts him higher than a steel pole would. He said:

"I can't see where there could be any problem. The definition of a pole vault says to get over a height with a pole. It doesn't say what kind of a pole."

The crew-cut Marine conceded there is a knack to using the fiber glass pole because it snaps back more quickly than a steel pole. "If your reactions are slow, you can't use it," he said.

In less than a year after switching to fiber glass, Uelses boosted his vaulting record almost a foot. His best mark indoors last winter was 15 feet, 1 inch.

"I started using a fiber glass pole last April," he said. "At first I didn't trust it. It was too flexible."

Now that he has cracked the mental barrier associated with 16 feet, Uelses believes he could clear it with a steel pole.

"You can have speed and power like Bragg," said Uelses. "Or you can have just average speed and technique like I do. To me, pole vaulting means a trick on top of the pole. The crossbar merely measures how high you can do the trick."

Although he swears by the fiber glass pole, Uelses doesn't recommend it for beginners. "You should start on a steel pole and learn your steel vaulting technique before you switch to fiber glass," he said.

World of Sports

By The Associated Press

BERLIN—EAST GERMANY reported a new failure yesterday in its efforts to get admittance to the United States for its hockey team that wants to play in the world championships at Colorado Springs, Colo., March 7-18.

GOTEBORG—INGEMAR JOHANSSON, former World Heavyweight Boxing Champion, was rated a 4-1 favorite yesterday over Joe Bygraves of Jamaica in his first fight of a comeback attempt aimed at taking him back to the top. They meet Friday in a 10-rounder.

WASHINGTON—HEAVYWEIGHT Boxing Champion Floyd Patterson is scheduled to box in exhibition matches in Cairo, next month.

NEW YORK—ERNE DAVIS, college football's outstanding player last fall, has a date this week-end with 18 psychologists. They will analyze him for three days.

But don't get alarmed. Ernie is not a candidate for the straight-jacket. It's all the idea of his new employers, the Cleveland Browns. They want to find out what kind of a job Davis can best hold in the off-season.

NEW YORK—JOSEPH HACKEN, 42, pleaded guilty yesterday to two counts of bribing college basketball players to "shave" points.

Hacken was accused of bribing or trying to bribe 13 players from nine colleges as his part in a basketball scandal that has involved 21 players at 18 schools.

FT. LAUDERDALE, FLA.—PITCHER BILL STAFFORD and outfielder Bob Cerv became the 21st and 22nd members of the New York Yankees to sign their 1962 contracts yesterday.

Stafford, a righthander, was signed here personally by general manager Roy Hamey and got a substantial increase.

CINCINNATI—The Cincinnati Reds increased the number of signed players for the 1962 season to 21 yesterday as pitcher Ken Hunt and outfielder Joe Gaines agreed to terms.

Hunt, voted by Cincinnati baseball writers as the Red's Rookie Of The Year for 1961, had a 9-10 record during the past season although at mid-season he had a 9-4 mark.

Gaines was with Indianapolis of the American Association last year and batted .315, finishing fourth in the League. He played in five games with the Reds near the close of the season.

DAVOS, SWITZERLAND—THREE AMERICAN figure skating stars from Colorado Springs, Colo., began training here yesterday for an International 2-day competition starting Saturday.

They were U. S. Junior Champion Christine Haigler, 14; Maide Sullivan, 17, and Susan Prange, 16.

The girls arrived in Switzerland by air yesterday and showed signs of fatigue when they reached Davos after a 5-hour train journey later in the day.

CHAMONIX, FRANCE—THE POWERFUL Austrian team of eight men and seven women threatened to boycott the World Ski Games Wednesday night unless it is permitted to enter a bigger quota of racers in each event.

Finest Trackmen To Spark Saturday's State Relays

By **DICK ROBINSON**
State News Sports Writer

Some of the nation's finest performers will spark the field events at the annual MSU Relays Saturday, while few top names are entered in the distance running events.

Most of the 19 colleges and universities in the meet have yanked their best runners from their normally run distance events to compete in the relays.

Missouri's defending titleholder, Don Smith, is back this year to try for his second successive shot put crown.

Two more prominently known performers are Western Michigan's high jumpers Alonzo Littlejohn and Jim Oliphant, both capable of 6' 9" jumps.

Littlejohn, who grabbed the 1961 Relay Crown, went on to turn in a 6' 9 1/2" leap outdoor, which was the fourth best varsity collegiate jump last spring.

Although Oliphant only cleared the bar at 6' 8 3/4" last spring, he tied for third in the nationals and recently won at the Michigan Relays.

Mid-American shot champion from Miami (Ohio), Paul LaSpina, figures to give the Tiger's Smith plenty of competition. LaSpina won the Michigan Relays with a throw of 53' 5" and took fourth in the MSU meet last turn around.

Other notable weight throwers are Michigan's Reg Schmitt, Ohio State's Ron Wely, Western Michigan's Barry Donath, Notre Dame's Mike Giacinto, Ohio's Jeff Miller and Central State's Sherlock Knight.

The best Spartan shot putter is soph Charlie Brown.

In the high jump, Jim Vest of Miami, "Bubba" Johnson of State, Keith Richardson of Central Michigan and Dave Browning of Bowling Green aim to

shoot higher than Western's twosome.

The pole vault offers an experienced field with everyone returning that placed last year except champion Mike Johnson of Purdue.

Challenging for the pole title will be State's Gerald Dehenan and Bill Alcorn; Drake's Jerry Shipman, Michigan's Rod Denhart, Missouri's Willis Loy and Notre Dame's Frank Froelke.

The broad jump title, won in 1961 by State's grad student, Sonny Akpata, will probably be filled by Drake's Marv Gilliam, the outdoor Big Eight and indoor Central Collegiate winner; Loyola's Henry White, Bradley Relays titleholder; Western's Don Gillum, Mid-American conference champ; or the Spartans Sherm Lewis and John Parker.

In the first of the distances, the 1000-yard run, the field is wide open between Jim Neahusan of Michigan, Dale McCormick of Ohio State and Warren Ochs of MSU as possible contenders.

An outstanding pick in the 600-yard run is Purdue's Dave Mills, who is the holder of the American indoor record of :47.2 for the 440.

An event that lacks a top favorite is the mile run where State's Don Castle, Kansas State's John McNeal, Missouri's Jerry McFadden and Notre Dame's Tom Dempsey stand out.

The two-mile has more of a flavor as Miami's Steve Teke-

sky, sixth in the NCAA three-mile; Ohio's Ray Fleming, 22nd in the NCAA cross country meet; Western's Don Hancock, 11th in national cross country; and Michigan's Chris Murray are entered.

British To O.K. U. S. Tests

WASHINGTON (AP)—A formal announcement of British permission to use Christmas Island for U.S. atomic testing in the atmosphere is expected shortly. Informants said Wednesday President Kennedy will follow soon with a decision on whether to go ahead with atmospheric explosions.

It was also reliably reported that Britain some time ago sought and received U.S. permission to test a nuclear device underground at the Nevada proving grounds.

However, the Nevada project has not yet been worked out and is not related to the Christmas Island plans, these informants said.

British permission for the United States to use Christmas Island, a British-held Pacific island south of Hawaii, is expected to be announced simultaneously by the British and U.S. governments Thursday, these sources said.

Informal British consent for use of the island was received by Washington some months ago, authorities said, but timing of the announcement was left mainly up to the British government which faces some opposition at home to the idea of renewed atmospheric tests by the west.

Russia came under worldwide criticism for breaking an atomic test moratorium last September with a long series of nuclear explosions set off in the air, causing radioactive fallout that could be harmful to human life.

Sharer Selected To Top National Post In Adult Ed.

Robert E. Sharer of East Lansing was named the new president of the Adult Education Association of the United States Monday.

Sharer, assistant director of the University's Continuing Education Service, was informed that he will replace Dr. Ambrose Caliver of the U.S. Office of Education, who died Jan. 29th.

Sharer was selected as the president-elect in August 1960, but was not slated to take office until November 1962. The death of the president, Dr. Caliver, necessitated Sharer's promotion.

Currently serving as president and president-elect, Sharer will be only the second man in history to head the national organization for two terms.

Ex-Student, Sophomore Convicted of Thefts

The thefts of a car battery and four hubcaps led to the arrests of an ex-Michigan State student and a University sophomore Tuesday.

Karl E. Lind Jr., an ex-student from Belleville, admitted taking the battery from a car parked near Case Hall, the Department of Public Safety, said.

The theft was reported on Jan. 24 by a resident of North Case, officers said.

Lind pleaded guilty in Lansing Township Justice Court Tuesday and received a fine of \$100 plus \$4.50 court costs and a three day jail sentence. He was sentenced to serve an additional 15-day jail term if the fine and costs were not paid.

The court also placed Lind on six months probation and ordered him to pay probation fees of \$5 per month.

Lind attended MSU fall term but was not enrolled this term. Irving J. Ochenschlager, Aurora, Ill., sophomore, appeared in Lansing Township Justice Court Wednesday morning, and pleaded guilty to the theft of four hubcaps from a

car parked in the Brody group parking lot.

The theft was reported Feb. 4 by a resident of Emmons Hall.

Ochenschlager was fined \$30, \$4.50 court costs and \$10 county costs. He also received a 10-day jail sentence which was suspended.

The hubcaps, valued at \$84, were recovered, officers said.

Con-Con

(Continued from Page 1) per cent, causing a great loss in tax revenue.

A second part of the proposal would provide that, "neither the state nor any unit of government may impose a graduated income tax."

"A flat rate income tax is clearly permitted and could, in the opinion of the committee, be imposed on . . . income computed for Federal tax purposes, Brake said.

The graduated income tax issue will be discussed later at the Convention.

Montgomery Identified

Lee R. Montgomery, Williamston sophomore, was incorrectly identified as being involved in a traffic accident in Tuesday's State News.

The person involved was L.R. Montgomery of 2783 College Road, Holt.

Petitions Ready

Petitions are still available for chairmanships on the 1962 Career Carnival. They may be picked up in the Placement Bureau and should be returned Feb. 15.

The positions open are general chairman, publicity, art, banquet, staging and secretary. The carnival will be held Oct. 8 and 9.

CASA NOVA NO. 2
ED 7-1665 211 M.A.C.

AN ATTRACTIVE DISPLAY case containing three Michigan Constitutions—with room for a fourth—has been installed at Constitution Hall in Lansing's Civic Center, where the Constitutional Convention is in session. The Constitutions of 1835, 1850 and 1906 are closely examined by Edmond Lesinski (D-Detroit), Miss Vera Andrus (R-Port Huron) and Cliff Ferras (R-Nadeau). The delegates promise there will be a fourth and new Constitution ready for display in the near future.

Ranger 3 Camera Would Have Failed, Report Says

PASADENA, (AP)—Malfunction of an Atlas missile component was at least partly responsible for the failure of the Ranger 3 spacecraft to hit the moon last month, scientists said Wednesday.

But, they said, Ranger 3 probably would have failed in at least two objectives had the atlas performed as planned. The Ranger television camera would not have obtained good pictures of the lunar surface, scientists said, and the capsule containing a seismometer probably would have been smashed when the spacecraft hit the moon.

Caltech's jet propulsion laboratory, which built Ranger 3, called a news conference report on the project. Spokesmen said, as they did shortly after the launching, that Ranger 3 achieved excessive velocity. This made it cross the moon's orbital path before the moon reached the intended point of collision.

Scientists calculate now that it missed by 22,862 miles. Wednesday at 5:30 A.M., Ranger 3 was 539,378 miles from earth and was traveling 2,146 miles per hour. It is in solar orbit.

Project officers did not say which atlas component failed. They said it is not known whether this was the only failure in the launching vehicle. Preliminary evidence indicates the second stage agena rocket performed roughly as it was supposed to.

Good photographs of the moon would have been obtained even with a precise launching because Ranger 3 went out of control near the point where it crossed the moon's orbital path. Instead of remain-

"There are many people in this country who would have a much fatter wallet if they would simply remove all the credit cards from it."—B. J. Dahl, Chewelah (Wash.) Independent.

ing stable as planned it tumbled through space. This made it impossible for its television camera to focus on the moon. Nearing the moon, Ranger 3 as supposed to position itself so that it could descend slowly with the aid of retro-rockets. This was to soften the landing of the capsule containing the seismometer, which was supposed to send back information about moonquakes.

Father of Six Plagued By Series of Tragedies

MONTGOMERY, ALA., (AP)—At 39, Ivo Livingston was an average sort of guy, like millions of other middle-income American fathers.

His carpenter's job provided his family of six children some of the good things in life, and the future looked promising. That was in 1957. Things have changed.

Today Livingston, armless and marked from severe burns, cuts and bruises, lay in a hospital with the latest in a grim series of major injuries, and financial setbacks which began five years ago.

"But I never give up," he said. He hopes to get artificial limbs so he can work again and start paying off "about \$7,000 in medical and hospital bills."

Tragedy struck first while he was walking across a railroad track. A victim of fainting spells, he blacked out and a train mangled his right arm. It had to be amputated just below the elbow.

In 1958 an explosion in his small furniture repair shop scorched his right leg. It was saved, but he spent five months in a wheelchair before returning to work, 18 to 20 hours a day, to keep his business from going under.

Livingston narrowly escaped death three years ago when his truck plunged down a 75-foot

embankment. Last year another truck was stolen.

Last Saturday his left arm was sheared off when he slipped and fell into a bandsaw while working in his shop.

Alone and bleeding heavily, he threw himself desperately through a plate glass window to seek medical attention. The key to the locked door was in his pocket.

International Club To Remember Ghandi

In response to student demand, the International Club will present a short film feature on Mahatma Ghandi. It will accompany the full length feature "Chandra" to be shown Friday at 7:30 p.m. Union Ballroom.

Earlier many students took part in a peace march and peace rally on Jan. 30, the fourteenth anniversary of Mahatma Ghandi's assassination by a religious fanatic. It was largely due to the efforts of Ghandi that India won its independence from the British rule without war.

The movie will depict highlights from his career both as a political and as a spiritual leader. It will have examples of Gandhian Non-violence, the

"Homespun Movement," steps toward eventual independence of India and his work towards uniting the Hindus and Moslems, two diverse religious groups.

Tickets are still available at 50 cents from the Union ticket Office and U N Lounge.

Boy Scouts Govern East Lansing for a Day

The Boy Scouts of East Lansing took over their city Monday as they assumed the positions of the municipal offices in the afternoon and ended their day by attending a regular City Council meeting.

The Boy Scouts that took part were from four local Troops and three Explorer Posts. They held the offices of

the city treasurer, city engineer, city attorney, police chief, fire chief, city planner, mayor, assessor and assistant city engineer.

The boys took office at 1 p.m. and their terms expired at 4 p.m. that same day, but they returned for the City Council meeting in the evening. Councilwoman Nan R. Dar-

rag, welcomed the boys to the meeting but suggested that they be excused early from the meeting. The reason: school on Tuesday.

The director of the Boy Scout program was Jerry J. Archer, district executive for the Chief Okemos Council No. 271.

The agenda of the meeting

was concerned mainly with public improvements in the East Lansing area. The Council voted to assess property owners on the alley running from Bogue St. to River St. south of Grand River, \$2,732 for blacktopping that alley.

Residents on the south side of the alley will be assessed one-third of the cost. Business properties on the north

side of the alley will be assessed two-thirds of the cost.

The Ingham County Society for Crippled Children and Adults was granted permission to solicit contributions through East Lansing on April 3. The society will also conduct its annual Lily sale in East Lansing Saturday, April 14.

A petition on behalf of the East Lansing school patrolmen

for an increase in salary, was referred to the city manager, John M. Patriarche. The patrolmen, who are on duty all day, said they needed heavier clothing for the winter and thus deserved a salary increase.

Patriarche was ordered by the Council to consider the increase when the new city budget is prepared.

Judge Denies Ban In PT-109 Dispute

NEW YORK (AP)—A judge Wednesday denied a motion by the publishers of the book "PT-109 John F. Kennedy and World War II," to ban another firm from putting out a book under the title, "John F. Kennedy and PT-109."

"The law does not recognize a monopoly of the English language," New York State Supreme Court Justice Abraham J. Gellinoff said in his decision.

He said there might be some confusion between the two titles but that it was insufficient to warrant the granting of a temporary injunction.

The injunction had been sought by McGraw-Hill Book Co., Inc., publisher of "PT-109 John F. Kennedy and World War II," written by Robert J. Donovan. The suit was directed against Random House, Inc., publisher of John F. Kennedy and "PT-109," written by Richard Tregaskis.

McGraw-Hill contended that the similarity in titles would lead to confusion and that it constituted unfair competition.

Both books deal with President Kennedy's activities as a patrol boat commander in the South Pacific during World War II.

McGraw-Hill was joined in the suit by Fawcett Publications, Inc., prospective publisher of a paperback edition of the Donovan book.

Gellinoff said McGraw-Hill did not originate the term "PT-109."

"It had been used in public

and private speech, in newspapers, magazines, books and on the radio," he said.

"It has become an expression residing in the public domain and cannot, therefore, have a monopoly over its use."

The justice said further in his 14-page opinion: "Words or phrases which have been in common use, which are descriptive or generic, or which constitute the true and generally accepted name by which an article or thing is called, may not be appropriated by anyone to his exclusive use. Words may not, therefore, be exclusively appropriated as the title of a book."

Poet Frost Recovering

MIAMI (AP)—Poet Robert Frost, 87, hospitalized with lung congestion, was reported Wednesday in satisfactory condition.

Frost, who maintains a winter residence in South Miami, was taken to Baptist Hospital Tuesday night with a fever, after several days of illness.

An attendant said Wednesday the noted poet was "doing well."

Frost, who will be 88 in March, also maintains homes at Cambridge, Mass., where he is a Harvard consultant, and at Ripton, Vt., where he has spent much of his life.

Food Science Offers Ten \$300 Scholarships

Scholarships are being offered by the Institute of Food Technologists to candidates interested in pursuing a course in food science here.

High school seniors may pick up applications for the ten \$300 scholarships in 220 Anthony Hall prior to March 1. This is the second year these

\$300 scholarships have been offered to high school seniors, according to B. S. Schweigert of the Department of Food Science.

Other scholarships are also available in the Department of Food Science through funds provided by the Michigan food industry.

Dr. Rivkin To Lecture On African Economics

"Economic Development in the New Countries of Africa" will be the topic of a lecture by Dr. Arnold Rivkin in 101 Kellogg Center at 8 p.m., Tuesday.

Rivkin is the Director of African Political and Economic Development Research Pro-

gram of the Center for International Studies at Massachusetts Institute of Technology. Under this program interdisciplinary research is being carried out in the sociological, economic and political science aspects of African life and problems.

Rivkin just returned from Africa where he coordinated the work of a team of economists and political scientists studying the process of economic growth under changing political conditions in Nigeria, Congo and the Federation of Rhodesia and Nyasaland.

Rivkin has been instrumental in setting up the International Cooperation Administration (ICA) area training program. He has been associate general counsel for the ICA in Washington and has worked in the same capacity in the European office of the Marshall plan.

Adult Seminar

CONTINUING EDUCATION—Julius Nolte, Dean of University Extension, University of Minnesota, addressed a small discussion group, Wednesday during the fifth annual University Adult Education seminar. The seminar, which began Monday, included representatives from 30 schools throughout the country.

A SYMPOSIUM-PANEL discussion and question period held Wednesday afternoon explored the issues in Julius Nolte's address "Charting New Strategies and Developing New Approaches". The panel included, left to right, Harold Gray, Miriam Kelley, Charles Adrian, Chairman, Patrick Callihan, and Ralph Smuckler.

WHAT TO WEAR?—Margo Lamphere, Ferndale junior, and Harriet Toothill, Glen Ellyn, Ill. sophomore, help each other decide what dress to wear for the J-Hop. Coeds should wear dressy cocktail dresses. The men may wear either tuxedos or dark suits.

Girl's Day Features Panel of Queens

"Miss Teen, Every Day a Queen" was the theme of the Girl's Day program last Thursday which featured a panel discussion for junior and senior high school girls in conjunction with Farmer's Week.

More than 1,500 teenagers were standing in the aisles of the Union ballroom in anticipation of the appearance of four beauty queens who had to stage their performance twice in order to accommodate the home economics classes which were invited from 81 nearby schools.

Appearing on the panel were Nancy Ann Fleming, Miss America of 1961; Marjorie Mueller, Michigan Dairy Queen, Sally Green, Michigan Apple Queen, and Mrs. Patricia Hagan, Lansing's Mrs. Homemaker of 1961. Except for Mrs. Hagan, a graduate of the University of Iowa, all of the panelists are students at Michigan State.

"Do your very best in everything, because no job is unimportant," urged Mrs. Hagan. Miss Mueller told the girls that they could increase their knowledge not only through education, but through reading and conversation. Adding that each person should show her interest in others, she said, "If you wish to make friends, you must be a friend."

"Don't call attention to yourself" was the advice of Miss Green who related several amusing examples of how not to act in an unexpected situation. Miss Fleming told the girls to "avoid becoming so absorbed in yourself that you become self-conscious" and to work for good health, neat appearance and good grooming.

The discussion was summed up by Miss Fleming when she said that a mature and likeable young person must be informed, interested, adaptable and attractive.

Party Line Far-East Accents J-Hop

By Cathie M. Mahoney

The BIG word this week-end is J-HOP!

The semi-formal All-University dance will find at least 1,500 couples in attendance—tickets were sold out Monday afternoon.

The theme, "Jade" will bring the far-east atmosphere to the auditorium Saturday night. But the music of the famous Count Basie will add the American touch to the oriental setting.

Hamon Flowers of Detroit will construct a false ceiling of white branches as part of the decor. The company is known especially for its work on the debutante parties of Anne and Charlotte Ford. Other trimmings will include a huge "fire-breathing" dragon. The favors for the coeds are a secret, but we hear that they are in keeping with the theme.

During intermission, Miss MSU will be selected by the members of Blue Key.

The festivities will end at 1 a.m. with a continental breakfast—included in the ticket price—at Albert Pick Motel. All couples attending the J-Hop are entitled to attend the breakfast. Coeds have been granted 3 a.m. permissions by AWS.

"Hollywood U.S.A." is the theme of Alpha Epsilon Pi's party on Saturday night. Members and their dates will appear dressed as movie stars with prizes for the best look-alikes. The decorations in the house will take after a movie premiere.

A book for the University of Nigeria is the admission fee to a cross-cultural novelty dance Friday from 9 to 12 p.m. in Parlors A, B, and C of the Union.
