Groups Defy Speaker Rule

Construction Begins On New Buildings

Ignore Permits For Meet

By CAROL CHIRI
Of The State News

As a test of the authority of the Student-Faculty Speaker Committee, a meeting with off-campus speakers was called Thursday night in the Union by the Campus Club Conference. About 100 students were present.

Invited to speak were three representatives of the Student Non-Violence Coordinating Committee (SNCC).

The Campus Club Conference, organized this week, is composed of the heads of nine influential student groups on campus. Members include the presidents of AUSG, the Humanist Society, the Young Socialists, the Young Democrats, the NAACP, The International Club, the Campus UN, the Forensics Union, and the NSA.

Before the meeting Bob Howard, president of AUSG, said that he hoped everyone had come in the spirit of inquiry and interest, not in the spirit of defiance.

Jan Garrett, president of the Young Socialists, who was chairman of the meeting, said that the purpose of the CCC was to sponsor unclear speakers brought in by member groups. He said that the conference was formed for two basic reasons: One, because the speaker committee is in direct violation of freedom of speech; and two, because it denies the student the right to judge for himself what and whom he can hear.

The speakers from SNCC were Gwen Kemp, Elizabeth Hershfield, and Steve Fox. They gave personal accounts of their experiences as members of SNCC in the South. The three were active participants in the Albany, Ga., movement, voter registration in Louisville, Ky., and various sit-in movements in the South. All three are from Detroit.

May Up Loan Act

A bill which would add \$250,000 to the present appropriations ceiling of the National Defense Loan Act will be re-introduced when the 88th Congress convenes this January, says Henry Dykema, MSU financial aid director.

The proposed amendment to the Defense Loan Act failed to reach the floor of the House before Congress adjourned last week.

Kykema attended a financial aid conference at Purdue University Monday and Tuesday where officials of the Department of Health, Education and Welfare promised that the proposal would be re-introduced.

Since the bill did not come to a vote before adjournment of Congress, it must pass through (Continued to page 8)

Wilson Elects Six To AUSG

Student Congress was brought to full strength Thursday with the election of six Wilson Hall representatives in the last of the congressional replacement elections.

The newest and largest co-ed dorm on campus, Wilson was granted a week's postponement in its balloting since it was electing representatives for the first time.

Elected to Congress from East Wilson were Marvin Berenson, Hollis Hills, N.Y. senior; Thomas Partridge, Swartz Creek sophomore; and Michael Weber, Fowler freshman.

Over on the women's side, in West Wilson, the successful candidates were Ursula Biezalis, Greenville sophomore; Polly Harold, Canton, Ohio, freshman; and Pamela Monette, Fremont freshman.

ALL-AMERICAN YEARBOOK-MSU's Wolverine received top All-American rating by Associated Collegiate Press Association again this year. The '62 editor-in-chief, Jerry Holmes, left, and the '63 editor, Lowell Kenney headed last year's production.

War Over NSA Just Beginning

From all indications, the floor battle waged in Wednesday night's student Congress meeting over MSU's membership in the National Student Association is merely a hint of things to come.

Membership was bitterly opposed spring term when Student Congress first voted to join the organization. But it would appear that this time, the opposing faction is receiving support and encouragement from outside the University.

For the most part, the National Student Association (NSA) is the American counterpart of the student unions existing in most European countries. Affiliated with the International Student Congress, it has a membership of some 400 American colleges and universities, representing a million and a half students.

Its officers and executive board are elected from member schools.

The greatest share of NSA's work has been in the areas in which it feels there is an infringement upon student's rights. Included in its other interests is testimony given on behalf of students when legislation affecting them is introduced in Congress, and the overseeing of studies into education and student welfare.

MSU's regional and national NSA dues are \$255 a year, not including a \$15 office expense.

Since then, Smith has been circulating petitions to call a referendum on the membership issue. The signatures of 10 percent of the undergraduate enrollment, or 1,943 names, must be obtained to bring it to a referendum vote.

Smith contends that AUSG should re-evaluate the benefits it is receiving from NSA. A seven-months grace period is allowed before NSA drops a member for failure to pay its dues.

AUSG President Bob Howard Elmhurst, Ill., senior, has been marshalling his forces to repulse the threat posed by Smith's group.

Howard charged Thursday that Smith and his faction is using "subterfuge" in its arguments against NSA membership. He also protested that a referendum would be premature.

"Although they're couching their objections to NSA in terms of the cost of membership, the value of NSA programming and the MSU personnel involved," Howard said, "their real objection is that it doesn't espouse their political philosophy."

"I don't think you can evaluate our relationship with NSA in such a short period of time. I think it is possible a referendum would be appropriate after we've been in long enough to have something to evaluate."

Williams To Visit

An address by G. Mennen Williams, assistant secretary of state for African Affairs, will highlight a community observance of United Nations Day Wednesday in East Lansing.

Fourteen civic organizations are cooperating in the celebration.

Heading the project is Mrs. Thomas H. Osgood, who was named chairman of the UN Day activities by Mayor Gordon L. Thomas of East Lansing.

Although this is an East Lansing project, Mrs. Osgood emphasizes, it is open to all interested citizens in the Greater Lansing area.

Williams will speak on "Facts for Fallacies of the United Nations," a subject chosen by the United States Committee for the Presiding at the luncheon session.

He will be East Lansing Mayor Thomas. John A. Hannah, president of MSU, will introduce the speaker. Moderator for the question period will be Leonard Rall, professor of economics.

Trustees Approve New Dorm

The Board of Trustees gave formal approval Thursday to construct a new \$6 million dormitory at Owen Hall on Shaw Lane.

The Board had previously given informal approval for the construction last week and ground-clearing has already begun on the site. They will meet Nov. 7 during the Purdue game to approve bids for the dorm. Architects plans must be submitted by Monday.

Construction of the \$960,000 cyclotron building and the \$297,000 planetarium was scheduled to begin this morning, following approval by the Board of Trustees Thursday.

Completion date of the cyclotron building is tentatively set for April 1963 and the planetarium is slated to open in September 1963.

The planetarium will be financed by alumni and friends of the University, including a \$250,000 gift from Mr. and Mrs. Abrams of Lansing.

It will be constructed on a site opposite Shaw Hall instead of adjacent to the Museum as originally planned.

In contrast to the "dumb-bell" shape of other planetariums, the MSU instrument will be a stubby, six-foot-long cylinder with rounded ends. Though more compact, the MSU planetarium can present a greater variety of programs than possible with the 12-foot unit located at Flint.

The seating arrangement is fixed so the audience will face in the same direction. It will also be possible to demonstrate the appearance of the heavens as they appear from the moon, as well as the earth.

The cyclotron building, also on Shaw Lane, will be three-tiered, rising from one story in the front to three in the back.

The highest tier will be the open room containing the cyclotron and experimental compartments. Next will be a two-story intermediate area for utilities servicing the cyclotron experiments. The front, one-story part will contain offices and laboratories.

The 50-million-electron-volt cyclotron will produce beams of protons and ions that will speed through a vacuum pipe as fast as 60,000 miles per second.

These particles will be channeled by large steering-magnets through the vacuum pipe into one of several different compartments and hurled against the atomic nuclei of various elements in such a way that the resulting reactions can be observed and measured meaningfully.

The Board of Trustees also gave the go ahead on a bid of \$309,849 to construct a steam tunnel from the engineering building to the new biochemistry building.

Overcrowded Language Labs

The growth of Michigan State has been a topic of much discussion and much dispute this fall. Regardless of the dispute the facts are clear: student enrollment has passed the 27,000 mark, an increase of 11 per cent over last year's total. The freshman class is our biggest and best.

Of course, the same old problems have arisen once again--the kind of problems which the Administration has had to face before, the kinds other universities are likewise facing.

The headaches are the same. Perhaps it is just a question of severity.

On-campus living units are packed to capacity. Off-campus housing is at a premium. Classes are larger and more impersonal than ever.

Few segments of campus life, if any, have escaped the overshadowing impact of bigness. The language department is one that has not escaped. It, also, is struggling to bring supply in line with demand particularly with the language labs.

This fall, 4,018 students registered for foreign language courses--the largest in Michigan State's history and an increase of 20 percent over last year's enrollment of 3,364.

Actually, these figures should come as no surprise for, indeed, interest in foreign language study at Michigan State has been increasing at a tremendous rate for the past few years.

For example, in 1958 only 1,414 students were taking a foreign language. The following year, the number reached 1,889. In the fall of 1960, 2,310 enrolled.

Last year there was an unbelievable jump: 3,364, an increase of 45 per cent.

The language department was forced to meet the large influx by, unfortunately, increasing the size of the classes and, fortunately, building two new language laboratories for this term, hence doubling the lab facilities in order to accommodate 120 students at one time.

Nevertheless, just as the construction of dormitories seems to be unable to keep up with the rising campus population so too has the doubling of the lab facilities fallen short of the demand.

Encouraged by their instructors, students have sought to take advantage of the extremely helpful tapes. But more often than not it has meant waiting in line--a phenomenon, incidentally, fast becoming a trademark for many campus activities.

The language department has been forced to extend the hours twice in an attempt to accommodate the students. Although this move has alleviated the problem somewhat, it is far from being remedied.

What is needed now are more lab facilities. They are expensive for sure. But there's no reason why students should have to stand in line to study.

"FRENCH IS COMING IN LOUD AND CLEAR. HOW'S SPANISH?"

Letters to the Editor

On Romney, Football Tickets, Etc.

To the Editor:

We would like to make a few short remarks concerning the political display Michigan gubernatorial candidate George Romney presented during the half-time show at the Michigan-Michigan State football game.

We congratulate Mr. Romney on a brilliant political move but we must censure the conduct of the University officials present at the game for allowing such a partisan display within the jurisdiction of this state-supported University. Mr. Romney did not only disturb the University of Michigan Band's half-time show, but with a background of 77,500 cheering people (whether they were cheering for the Michigan Band or Mr. Romney we have no way of knowing) scored a victory in his battle against incumbent Governor John B. Swainson for the governorship of Michigan.

May we also point out that Mr. Romney's appearance on campus did not have the consent of the faculty committee on guest appearances. Since the faculty committee did not okay Mr. Romney's display, who did?

Our interest in this matter is not of a political nature, since we are under 21 and not of voting age, but as students of Michigan State University we feel that our University (1) was disrespectful to our guests, the Michigan Band, and owes them an apology and (2) was used as a political arena when as a state university it should be strictly impartial. In the future we hope matters of this nature do not occur.

Serle Mosoff
Fred Lustig
Sanford Sulkes
332 MAC

(Editor's Note: The State News has received several letters from both MSU and U of M students condemning Romney's conduct at Saturday's game. All of them say basically the same thing, and unless new points are brought up, we do not plan to print any more letters on this topic.)

Cash vs. Spirit

To the Editor:

Increased enrollment is no excuse for freshmen having to sit on the field (and those seats were guaranteed only if students got to the stadium a MERE hour and a half before the game) for the big game with Michigan Saturday. The Michigan State administration is showing its realization of the rapid enrollment increase by having Wonders Hall and the prospective dorm near Owen Grad Center constructed. They realized long ago, I'm sure that the class of '66 is the largest class in Michigan State's history. Knowing this, why didn't they reserve us seats?

Why did they sell our seats to outsiders? To make more money? We freshmen have as much enthusiasm (if not more) for that game, or for any other game, as anyone. After all this is our school! Moreover, we paid for our tickets by paying our general fee assessments. We deserved seats. With room for

76,000 people there should have been enough room for 27,000 students, including 5,000 freshmen.

I realize that it's too late for action now. It was too late six months or even a year ago. I simply want to point out the fact that we freshmen were deprived of our rights. In the future, the administration should reserve seats for students and sell only the remaining tickets to outsiders. The money would still roll in!

(Editor's Note: The athletic department, not the Board of Trustees, controls ticket sales and admissions.)

Terrible Influence

To the Editor:

Probably the University administration, which is much concerned about students and their behavior on campus, about whom they should listen to, and all that, would like to know that a commercial for beer (in the air) was witnessed by the record crowd of 77,500 at Spartan Stadium last weekend.

What a terrible influence! What a shame!

LC Series Tops

To the Editor:

I read with great interest and pride the editorial in the Oct. 9 edition referring to the MSU Lecture-Concert Series being the best in the nation.

I feel well qualified to echo these sentiments quite strongly. In 1957, while reviewing many numbers for the paper, I had the opportunity to make a research study comparing our series with similar series at other leading colleges and universities throughout the country.

I can say in 100 percent honesty, as I did in an editorial published during the 1956-57 school year, that ours is superior to any in the country. There is no school which sponsors as many distinguished and talented artists as does Michigan State--a true feather in the cap of our fine University.

You're quite right in encouraging students to take advantage of this series. It's the best and you should all be proud of it. I was and still am.

Scotch and Seating

To the Editor:

I don't think that all students were supposed to be admitted to the Michigan-Michigan game. I reached this conclusion through an observation which added one more bit to the growing fund of knowledge which makes me think that an MSU student is not of primary importance to the University.

On Saturday I sat in Seat 9,

Row 23. Starting with Row 24 and up to at least Row 40 (and probably farther up than that) there were no students, only alumni. These alumni were wearing Michigan colors, waving Michigan banners and yelling Michigan cheers in what is supposedly the MSU student section.

This would be bad enough if all students could have entered to see the game, but I see no excuse for it since at least 100 students were turned away and others had to be seated in the end zones.

Fifteen rows of seats with 18 seats in each row equal 270 seats which couldn't be used by students. Those 100 were turned away, and 170 in the end zone had bad seats.

These same alumni were breaking University rules and doing it openly. They were yelling "Pass the bourbon" and "Who's got the Scotch?" They would then pass the bottles openly and pour their drinks, and drink them at a leisurely pace while our entrance "guards" turned their backs, though only 15 feet away.

I am not against drinking, but if we are going to let some do it, let everyone do it. Students have had instilled in them from the time they enter MSU: University rules must be obeyed at all times. It seems that they should add, "unless you are not a student--then you can do as you please."

I would also like to know where were our "glorious protectors", the campus police, when not 50 yards away from the Dept. of Public Safety building, a carload of visitors were gleefully drinking beer before and after the game?

Underage students, remember this place. It seems to be the safest place to drink on campus. John Musgrove
A-12 Mobile Homes

In Our Interest
I vote for the administration in creating a student faculty committee on outside speakers. The five members of Student Congress who abstained from voting on a resolution expressing AUSG opposition to the committee are to be commended.

To me, the Administration position on outside speakers is not unreasonable, and is in the best interest of the students of MSU and the State of Michigan. Therefore, complete cooperation should be forthcoming from every student and from all campus student organizations.

William C. Cesna

Just a Rumor

To the Editor:

I have recently heard a rumor on campus that the Michigan STATE NEWS would soon change its name to the "Michigan State Department of Public Safety News." Is there any basis for this rumor?

John K. Belaski

So the Editor Says

Congress: Big Battlefield

Ben Burns

I thought chicken fighting was illegal in the United States until I attended a meeting of AUSG Student Congress last week. The Congress was supposed to be debating the Speaker Committee bill and I felt it might be interesting to hear what some of the representatives had to say.

I was amazed. Student Congress is one place where progress has not taken its toll.

Three years ago I was an Inter-Co-op Council representative to that August body. I remember with nostalgia the debates, the debates and the debates--all over nothing.

A coed from a residence hall got up and said she felt the group should take more time to form an opinion and not be hasty in their action.

Other representatives clamored for the floor. They said coed had plenty of time to poll her living unit and come to a decision.

A self-appointed party whip, who was trying to get the legislation passed, refuted the coed's arguments.

He said representatives like her were lazy and stupid. He really put her in her place. He also lost her vote and some other. Other representatives got up and courageously defended attacked representative's reputation. Her position was explained and reputation as a defender of the rights of students saved took about 20 minutes.

During this dramatic interlude the person wielding the gavel at the front of the room dreamily ignored the storm and the comic books--or something.

It certainly wasn't Roberts Rules of Order. Good old Roberts was probably doing flip-flops in his grave over all that that I tallied over half an hour of debate directly off the point. That is no record for the student legislators. In the old days I sat in every week on the congressional sessions an hour or of debate off the point was the normal course of procedure. I'm an inkling it still is.

A fellow got up and said, "Let's cut out all this nonsense, do something constructive. No wonder we get a reputation for do-nothing Congress."

That one really brought back the memories. I remember making a similar speech several times three years ago before I resigned in disgust, along with about a third of the congressional representatives.

No, they don't all quit in a block. One by one the disillusioned representatives, who had hoped to accomplish something other than a captive audience for their oratory, drop out.

They are still dropping out. That is one reason why there were only 22 representatives at Congress the night of the great debate over the speaker committee. According to student congressional officials there were about 56 seats in Congress last year.

The final score on the speaker issue was 15 ayes, 5 absents and 0 nays. It was unanimous.

That same party whip (he must be frustrated since there are no political parties in student government) was busy last week He gave up berating women and turned journalist.

Here are his efforts:
"A question-student:
"How do you like sitting on the field?"
"Well, kid, you'll sit here till you get enough guts to stand and support your student government, your voice at the University AUSG is only as strong as the support you students give me. I'll bet that was chuckle-funny for the few hundred from Congressional representatives, who received a copy of the at the game Saturday.

I half expect another great debate soon on the merits of sitting on the football field.

Governor Swainson may have trouble with the legislators, but his problems are small compared with Bob Howard's predicament.

I'm not saying Student Congress never does anything worthwhile. They do, but it is usually an accident or loss in a of extraneous stuff.

Students, if you want an evening of hard-hitting fighting at cost, go to an AUSG congress meeting.

They are free and are guaranteed to last longer than the Pason-Liston fight.

Point of View

Tardy Theater Goers Defy Laws of Social Etiquette

Jackie Korona

It's fashionable to be late. That's what the cute blond coed and her date were thinking as they walked into the Auditorium 15 minutes after the curtain had gone up for the first act of "The Miracle Worker."

The two made their way "quietly" down the dark aisle to their seats, excusing themselves as they tripped over half a dozen feet getting to the middle of the row. After wiggling out of their coats, the young man gallantly helping his date with hers, the two settled back to watch the performance.

The time was 8:40 p.m. The curtain went up at 8:15.

If you've ever been sitting near such a couple--and I have, more than once--you know just what I'm talking about.

Why are so many people usually late for any program of the Lecture-Concert Series or the University Theatre? I can't figure it out.

One possibility may be the parking problem around the Auditorium. But that same problem has existed for the past several years. It's been there, and most people should be used to it by now. The only solution to this is: Plan ahead. Make sure you get to Fairchild or the Auditorium in plenty of time to find a parking place.

If the problem is just that of not leaving for the performance on time, the remedy is simply: Leave ten minutes earlier.

But there's another problem that seems as if it may be the major one. I think it's called just plain laziness.

When a couple, or a group of men or coeds, arrives for a performance 15 or 20 minutes late, as did the couple mentioned before, there really isn't any excuse. They just don't seem to care whether or not they see the performance from the beginning.

But what about those people who were unlucky enough to have seats near the late-comers? They made sure they were at the Auditorium on time. They came to SEE the performance.

And there's always the thought that the performers on-stage can be greatly annoyed and disturbed by late arrivals. Last year Roger Wagner interrupted the performance of his Choral FOUR times for the seating of those "fashionable" people who came late.

Mr. Wagner was annoyed. (He tactfully said so in an interview following the performance. The audience was annoyed. But the people kept coming, clicking down the aisles in high heels, climbing over and in front of others, until they were comfortably settled and the show could continue.

You'll say: Well, this doesn't happen only at State. It goes on wherever there's a performance being given, even in New York. It's fashionable to be late.

You who say that are right, but only to the extent that this is occurring everywhere. It is NOT fashionable to be late.

Take the example of Ann Rutherford and Richard Egan, both well-known in the world of show business. I went to a performance of a Broadway show recently which the two of them

also attended. True, they arrived about 15 minutes after I did, but it's also true that they were in their seats at least five minutes before the curtain went up.

And a couple of months ago, when the new Irving Berlin Musical "Mr. President" opened in Boston, there were numerous celebrities present--but every one of them was in his seat before the show started.

Even the brother of the President of the United States goes to the theatre on time. Edward "Ted" Kennedy attended a special summer stock performance of a musical comedy, and he was at the tent theatre 10 minutes before the outside lights announced the beginning of the show.

That's how "fashionable" it is to be late.

Just think about this situation. Maybe you can come up with even better reasons why you should get to a performance on time. But remember this, from Tennyson's "Guinevere": "Too late, too late ye cannot enter now."

The next time you're late for a Lecture-Concert Series program, you may not be able to enter right away. And it's hard trying to pick up a plot line after the first two scenes.

JEFFERSON DESIGNED A MANSION

LOUISVILLE, Ky. (AP)—Farmington is a mansion designed by Thomas Jefferson. It was built in 1810 and was visited by John James Audubon and Abraham Lincoln. It is now a public shrine.

Auto Show Opens Saturday

DETROIT (UPI)—The auto show is getting ready for its annual event requiring so much planning it is held only once a year.

The National Automobile Museum, scheduled to open Saturday morning, will be the first in a series of shows being held for the show, being held for the first time but only the second in the history of the museum.

The show will cover seven acres of the museum grounds along the Detroit River. It will use the adjoining Convention Arena for the show.

The best way to describe the show is to say there will be cars and more cars. All the model cars and most of the trucks made by American manufacturers will be exhibited.

There is a ban on the dream cars the industry likes to build. You won't see the Monza Chevrolet's experimental car, the Mustang, Ford's experimental sports car, or the Chrysler sports mode.

There will be a score of "show cars"—models with variable fur-lined floor mats, paint jobs and restyled

SENIORS SEEK JOBS—Placement Bureau operates for the senior looking for a job. Here, Herbert Hough of the Bureau of the

Census interviews Miss Cindi Kowalk of E. Lansing. —State News Photo.

Placement Bureau Expects 2,500 Student Interviews

Over 2,500 MSU seniors and graduate students are expected to take advantage of the Placement Bureau's interviewing program this year.

1962 interviews began Oct. 15 and will continue through the end of May.

Representatives of business, industry, government and education conduct interviews for senior and graduate students. Some 1,500 firms visited the Placement Bureau last year.

The bureau's recruiting program has mushroomed since 1948 when 100-150 employers interviewed approximately 1,000 students.

"Over 13,000 job interviews were held in 1961 - 62," said director John Finney. "This year will be probably bigger."

"Job opportunities for graduates look excellent at this stage of the economic year. There is a particular shortage of candidates for jobs in science, engineering and education."

Finney said there is an increase demand this year for students with advanced degrees.

Students graduating in December, 1962 or March, 1963, were urged to begin interviewing immediately, Finney said.

Engineering or science students who will receive degrees this June or summer should also begin interviews.

"The bulk of engineering and

science employers always complete their interviews by March 1," Finney warned. "It's extremely important that students in these fields realize this."

Liberal arts and business students may delay interviews until after Jan. 1, 1963.

"We want to make sure that seniors understand the importance of early interviews," Finney emphasized. "This will eliminate the plight of the startled

student who decides to start looking for a job in May of his senior year."

Finney urged seniors and graduate students to consult the weekly placement bulletin which includes information on firms visiting the bureau, job information and dates, places and times of interviews. A portion of the bulletin is published daily in the State News.

NEWS BRIEFS

by UPI

WILLOW RUN—A bomb scare has delayed seven United Airlines planes at Willow Run Airport outside Detroit. The airline said a person called about 2:45 a.m. Thursday and told a baggage clerk "the bomb is one of your planes." About five minutes later the person called again and said—"A bomb will go off in 15 minutes."

Nothing happened but the airline began a search of seven planes ready to take off. One has since been cleared for take-off, the other six are still on the ground. The call inconvenienced about 200 people.

NASHVILLE—William Kelsey has been named Police Chief here. He assumed his new duties Tuesday.

ALLEGAN—The Allegan County Sheriff's Department will be nearly doubled Jan. 1.

The county board of supervisors agreed to pleas by Sheriff's Harry Smith and authorized the sheriff to employ four turnkeys and three radio operators.

CHARLOTTE—A "balanced Budget" of \$862,927 has been approved by the Eaton County Board of Supervisors for next year.

The board, in accepting the report of the finance committee, voted to spread 5.5 mills on the state equalized value to achieve this balanced budget.

The board also granted nominal pay hikes to certain personnel under the regular salary schedule.

Toch Minimizes Role of Censors

Obscenity is blamed for much crime and delinquency for which it is probably not responsible, Hans Toch of the psychology department told the Humanist Society Tuesday night.

"Obscenity can become a real scapegoat," Toch said in a humorous talk on the newly formed Lansing Police Censorship Board.

He said the Board is based on two assumptions: first that obscene literature damages children's character and second that it is being sold to them by merchants. He denied both statements.

He quoted a study on the impact of literature which stated there is no evidence that reading is a major cause of juvenile delinquency. Rather, direct experiences are thought to be much more important.

Also, merchants take great precautions not to let children acquire this type of material, he assured the audience, and cited the case of a Lansing man who reported two youngsters shoplifting sex magazines to the police, although he refused to press charges against them.

According to the First Amendment nobody may circulate anything harmful to the community, he said. But so far nothing has been proven to be definitely harmful.

"Some of these publications are in distinctly bad taste," he admitted. "There are some nobody would stand up for."

The danger is being able to stop once censorship is started, he warned.

Dr. Toch observed that one of the characteristics of sex magazines is that their highly colored stories of sexual exploits are not true to life. The audience laughed when he added,

Profs Discuss Education

Two University specialists in international education spoke on aspects of African-American cooperation in University development at an informal discussion meeting Thursday night in the Union.

Ralph H. Smuckler, associate dean of international programs, and Leroy C. Ferguson, professor of political science, who has just returned from spending two years as all-university research coordinator at the University of Nigeria, spoke under sponsorship of Delta Phi Epsilon, professional fraternity for government service overseas and international business.

Two programs next week will feature Rogers B. Finch, permanent field representative of the Peace Corps, speaking on opportunities for service with his agency, on Tuesday, and Richard W. Patch, anthropologist from the American Universities Field Staff, speaking Thursday on recent revolutions in Latin America.

Intramural News

Mike Bird starred for West Shaw eight as they squeezed by West Shaw ten, 15-12, in IM football competition Wednesday. With two seconds left, Bird completed a pass to Mike Young for a 30-yard touchdown.

George Trombley started Wilson ten's march to victory over Wilson seven, 18-0, on an intercepted pass.

Fine passing by Rob Massey gave Wilson four the winning margin over Wilson one, 13-6. Massey made two pinpoint passes for 10 and 15 yards.

With machine like precision, John Mason and Jim Dobrei paced the Machines to a 31-0 win over the Owen Owls.

Lee Brown passed to Dan Poort for West Shaw 4 to tie the game up in the last quarter with West Shaw 1. The two teams continued in overtime to a 6-6 tie.

West Shaw 6 capitalized on several breaks to side past West Shaw 9, 19-13.

Bill Ryder completed three passes to Jim Chase and one to Mike Goldfine for Casopolis' four touchdowns and victory over Caravelle, 27-8.

Tom Frey, of Cache, ran 50 yards for one touchdown and passed for another to defeat Carlton, 26-6.

Larry Hillis intercepted a pass and went 35 yards for a touchdown to give Bailey 4 a 13-7 win over Bailey one.

A punt of 45 yards by Bruce Quigley highlighted the Six Pak's win over Brougham, 8-2.

Empyrean defeated the Emperors on three TD plays by Jim Florey. Florey passed to Jim Kappa Theta and Alpha Phi will Baer for two and ran for the third. The final score was 18-6.

In other games: Wilson two pion sorority team will compete 19, Wilson six 0; Wilson five with the top residence hall teams 13, Wilson three 7; East Shaw 6, East Shaw three 0; East ship, Shaw six 12, East Shaw nine 6;

East Shaw ten 18, East Shaw eight 6.

West Shaw three 27, West Shaw five 0; Casino 12, Cachet 6; Caribbean 25, Cameron 19; Cambridge 8, Cavalier 6; Bailey six 12, Bailey seven 6; East Shaw four 21, East Shaw one 6.

Zeta Beta Tau won the Fraternity table tennis tournament for the third consecutive year to retire the IM Fraternity trophy.

Eddie Minskoff, Beverly Hills senior, Pete Lederer, Chicago junior, and Donnie Biegelman, Detroit junior, were the members of the team taking honors Wednesday evening.

Z.B.T. made nine points for first place. Tied for second with six points are Sigma Chi and Delta Upsilon.

Wilson, the new dorm this year, scored nine points for a first in the Residence Hall table tennis tournament.

Tied for second with six points were East Shaw and Armstrong. In the Independent table tennis tournament, Evans Scholars won first with four points followed by Bethel Manor with three.

The women's varsity field yards for one touchdown and hockey team will meet Eastern Saturday on Old College Field.

Two games are scheduled. Last and went 35 yards for a touchdown to give Bailey 4 a 13-7 win over Bailey one.

A punt of 45 yards by Bruce Quigley highlighted the Six Pak's win over Brougham, 8-2.

Empyrean defeated the Emperors on three TD plays by Jim Florey. Florey passed to Jim Kappa Theta and Alpha Phi will Baer for two and ran for the third. The final score was 18-6.

In other games: Wilson two pion sorority team will compete 19, Wilson six 0; Wilson five with the top residence hall teams 13, Wilson three 7; East Shaw 6, East Shaw three 0; East ship, Shaw six 12, East Shaw nine 6;

Griffith Cops Boxing Title

VIENNA (UPI)—Welterweight champion Emile Griffith left a new synthetic boxing title behind him in Vienna Thursday, before flying back to the United States for an almost certain defense of his welter crown at Las Vegas, Nev., Dec. 8.

Griffith quickly abandoned the Austrian version of the new junior middleweight (154-pound) world title that he won in Vienna Wednesday night by outpointing Teddy Wright of Detroit.

On Monday, Griffith will meet promoter Mel Greb of Las Vegas in New York and probably sign for the Dec. 8 defense against

Jorge Fernandez of Argentina, although Luis Rodriguez has been getting some challenger's consideration.

Before Griffith and co-manager Gil Clancy came to Austria last week they promised promoter Greb the Dec. 8 title defense.

An unexpectedly small crowd of about 8,000 in Stadthalle saw Griffith win a unanimous 15-round decision over Wright Wednesday night for his eighth straight victory. Emile won a total of 72 points among the three ring officials to 69 for Wright in their lively contest.

Only the Austrian Boxing Association with headquarters in the United States.

Even the presence of Sugar Ray Robinson, former welterweight and five-time middleweight champion, could not fill the 17,000 seats in the huge Stadthalle Arena. The promoters, who had given big guarantees, lost an estimated \$40,000.

Robinson, 41, had been brought in to bolster the gate. Fighting in the scheduled eight-round semi-final, his first preliminary in 22 years, Sugar Ray knocked out Diego Infantes of Spain with a right to the chin at 1:15 of the second round.

Robinson was guaranteed \$10,000; Griffith, \$20,000, and Wright about \$9,000.

Sam Donnelly and Louie Eckhardt, regulars on Michigan State's soccer team, are products of Port Chester, N. Y., High School.

Prusow, Glenoe, Ill. freshman, all under five feet tall, moved, quarterbacks Pete Smith, 23, and Charlie Miyanka, 25, into the line, and took over. Even Steve Mellinger, 73, below, got lessons in blocking for his clash against his hometown college, Notre Dame. —State News Photos by Mark Krastof.

Spartan Booters Host Akron Team

When a rough Akron team invades the Spartan soccer turf tomorrow, at 1:30 p.m. it will mark the initial meeting of the two clubs in their histories.

Coach Gene Kenney probably wouldn't care less if the Ohioans didn't show up till next season. Akron, under Stew Parry's helm, sport an excellent 4-1-1 record and are visioning plans of an upset. Akron's fine defense is spearheaded by star center-halfback Fritz Kungie.

The Spartans will try to lengthen their season-long unbeaten streak to five, in an attempt to win the nod for the

midwest spot in the NCAA soccer tournament.

Coach Kenney is expected to stick with the same starters he used in the precedi

THE LUCKY 11th

WHITE SULPHUR SPRINGS, W. Va. (AP) — Two Indiana golfers scored holes-in-one on the same hole the same day at the new Greenbrier course. W. D. Simmons of Fort Wayne got his first ace in 15 years of golfing.

Alan Faust of Indianapolis scored his first ace in 21 years. Both aces came on the 11th hole.

There is a sign over the locker room door in the field house at West Point which reads, "On these friendly fields are sown the seeds that are harvested in later years."

I wholeheartedly agree with the thought of that statement.

Len Chappell, who starred for Wake Forest and scored 2,165 points in three seasons to set a new school record, was the No. 1 draft choice of the Syracuse Nationals in the National Basketball Association.

Place kicker Lou Groza of Cleveland Browns began the season with 1,086 points in the National League seasons and in the old All-American Conference.

Prep Grid Star Writes Epithet

Editor's Note: (UPI) Sept. 17, 1961, David Coughlin, 190-pound star lineman of the Swampscott (Mass.) High School football team, wrote an essay in school on what football meant to him. Just eight days later, he died of heart prostration following the Swampscott-Andover game. Mr. and Mrs. Oliver W. Coughlin have decided to make public their 17-year-old son's senior class essay, in the belief that it holds an inspirational message for America's youth.

I have found through experience that football, often referred to as the man maker, is a sport that is strenuous on the mind as well as on the body. We all know how hard it is to keep our mind on the task before us when we are physically fatigued, but in football it would be disastrous if you didn't. It would be detrimental to the team as well as to the boy himself.

The reason is that when a football player is distraught, he is unaware of his opponent's motives; he is thus susceptible to severe injury because he will be hit when his body is not prepared to be hit.

Also, it is injurious to the team, because a team is similar to a chain in that it is only as strong as its weakest component. When one boy slacks off, he is as good as asking his teammate, who is probably every bit as tired, to do the job of two men.

In order to avoid having the previously mentioned occur, a player must be in top physical as well as mental condition. He must always be prepared for the unexpected, and he must be able to adjust to the situation.

Thus a boy has to have desire and pride. If he lacks pride, he will think nothing of letting the opposition get the upper hand on him. If he lacks desire, he will not put in a hard enough effort to get in shape or to prevent his opponent from besting him.

Desire takes many forms, but it is necessary to life as well as football. Without desire a boy wouldn't want to play football, or he wouldn't want to win. Whenever a person has no desire to win, he has no real purpose or goal in life.

When a boy has no desire to play football, he had best not play because he would see no sense in what he was told to do; moreover, his heart would not be in his work.

I do not profess that football suffices for manhood or that it is really required in manhood, but I do say that a boy who has been an integral part of a football team and who has earnestly tried his hardest will certainly be a closer step to manhood than the rogue who stands around with nothing to devote himself to except himself. A football player learns quite a few necessary things in life; among them are to devote yourself wholeheartedly to the task before you; to be able to give yourself in mind, spirit and body to the cause. Most important, he learns how hard he has to work to be a star later on in life.

There is a sign over the locker room door in the field house at West Point which reads, "On these friendly fields are sown the seeds that are harvested in later years."

I wholeheartedly agree with the thought of that statement.

Len Chappell, who starred for Wake Forest and scored 2,165 points in three seasons to set a new school record, was the No. 1 draft choice of the Syracuse Nationals in the National Basketball Association.

Place kicker Lou Groza of Cleveland Browns began the season with 1,086 points in the National League seasons and in the old All-American Conference.

Sports Chatter

By DAVE HARFST

If you showed such an interest in football and had so many questions about the game, I am writing my first column. I only hope the answers will help make the Saturday games more interesting to you.

A combination of several British games, came to America in the middle of the 19th century. The most significant date for the rugged contact sport in America is Nov. 6, 1869. On that date, 25 men representing Princeton and Rutgers played the first intercollegiate football game. By the time the game was over, the Princeton team had won the game by a score of six goals to zero.

There has been almost a century since that first game, and the game of football has seen many changes take place. Now 600 colleges and universities and over 3,500 high schools have football teams. We here at Michigan State have had one of the teams in the country for well over a decade.

It has been almost a century since that first game, and the game of football has seen many changes take place. Now 600 colleges and universities and over 3,500 high schools have football teams. We here at Michigan State have had one of the teams in the country for well over a decade.

Each team sends 11 men onto the field, and at no time does the number change. Rules do permit substitutions, so the yellow jersey will have to play the whole game.

All football games are started with a kickoff, and the team that receives the kick is called the offensive team.

One of your questions was, "What is offense and what is defense?" Now you know that the team with the ball is the offensive team, and the team that is trying to stop them is the defensive team.

The 100-yard line is 100 yards long, and to score a touchdown (football field) is 100 yards long, and to score a touchdown the offensive team must take the ball over the defensive team's goal line. The goal line would be the last yard of the 100 yard field, with the 10 yards between the line and goal post (the big iron-H poles on each end of the field being the end zone).

Now we have the scene set for the big clash on Saturday. The offensive team has possession of the pigskin (football). It has four downs or tries to go 10 yards. If it moves the football by either running or passing, the 10 yards or more is called another first down. This continues until either the offensive team scores a touchdown or does not pick up 10 yards in four downs.

We also asked how the team scores points. Well I've explained scoring touchdowns several times. When a team scores a touchdown, it receives six points and a try for a point after touchdown (PAT extra point or conversion). In most games almost always kicked the extra point.

They elect to run or pass the point after touchdown from the three-yard line where all extra points are tried, and they score a touchdown—they receive two points. Hope this isn't confusing, Su, because there are still two other ways to score in the involved game of football.

They are the safety and field goal. A team gets two points for a safety. This occurs when the offensive team has the ball in its own end zone and is tackled behind its own goal line. This gives the defense eleven (team) two points.

Usually, the field goal is a place kick, like the extra point. Based through the uprights on one of the team's downs—extra touchdown.

And on the game of football goes, but in conclusion I'd like to answer your question about the huddle. That is when the players of the offensive team gather after every play. The quarterback, who calls the plays, is the "Big Guy" as you would say.

He tells the other members of the team what the play is. Rather than use names in the huddle, the quarterback uses the play by number, so each player knows what his duty is by the way, the coach can send the play into the quarter from the sidelines, and they very often do.

Well, Su, I hope this answers a few of the more important questions of the game of football. Oh, the coach of our team is Duffy Daugherty.

THE COACH! HE PASSED THE ENTIRE BACKFIELD AN ENGLISH EXAM JUST BEFORE THE GAME.

ALL SENIORS

Last opportunity for SENIOR PORTRAITS to appear in the 1963 Wolverine is Saturday, 9 a.m. to 1 p.m. (no appointment necessary) Room 43, Union Building

Wildcats, Buckeyes Set to Go

Coaches at Northwestern and Ohio State said yesterday their teams will be at full strength for their important showdown in the Big Ten feature football game Saturday.

The No. 3-ranked Northwestern Wildcats passed up their usual scrimmage and worked on special team assignments. Halfback Merlin Norenberg ran well on several plays and got off some long punts.

The eighth-ranked Ohio State Buckeyes drilled more than two hours and completed contact work before Saturday's game. Coach Woody Hayes said he had a couple of regulars with minor injuries, but they'll be ready for Northwestern.

Notre Dame will have three sophomores in the starting lineup against Michigan State Saturday. They are left end Dave Pivec, left guard Jim Carroll and Ron Elley, who has been a regular at left half the entire season.

Michigan State worked out against Notre Dame defenses Thursday and polished new plays. Coach Duffy Daugherty said tackle Jerry Rush was limping badly and is not expected to travel to South Bend this weekend.

Minnesota lined up on the 20-yard line on numerous occasions as the Gophers drilled on how to score from close in. Coach Murray Warmath also stressed short yardage plays and passing. There were no injuries on the first or second lineups.

Illinois, Minnesota's Saturday foe, lost another first string lineman yesterday. Left tackle Bob Easter suffered a knee injury and won't play against the Gophers. Center Dick Butkus was lost earlier.

Coach Jerry Burns of Iowa said quarterback Matt Szokorny and end Cloyd Webb were not running at "full efficiency" yesterday, but apparently have recovered enough from injuries to be considered in the starting lineup against Wisconsin.

Wisconsin, with three halfbacks hobbled, had a hard scrimmage, dealing mainly with passing. The Badgers also worked on defense against Iowa's attack.

Purdue divided its work on offense and defense in preparation for the Boilermakers game with Michigan. John Greiner was at right end on the possible starting team as a replacement for the injured Forest Farmer.

Munn Attends Olympic Session

A two-day meeting of the United States Olympic Committee opened Monday in Chicago.

Among the twenty-nine committee members present at the meeting, was MSU's Director of Athletics, Clarence "Buggie" Munn.

Munn stated that the purpose of the committee is to see that the Olympics are run and funds raised. "Unlike other countries, our athletes are supported by funds," said Munn. "In the mar-

BUGGIE MUNN

jority of nations, the government provides the money."

Also, as a member of the committee, Munn had a part in the selection of Detroit as the site of the 1968 summer Olympics.

Though the main item on the crowded agenda was the selection of two cities to represent the U. S. in the 1968 summer and winter Olympics, an item of equal importance and considerable consequence loomed before the committee. The National Federation, sponsored by the NCAA, challenged the AAU's dominant control of amateur athletics.

In reviewing the NCAA's position, Munn explained the situation thusly: "Years ago, there were more athletic clubs, and the AAU sanctioned all athletic participation according to the rules of the International Olympic Committee." "However, times have changed and now there are more colleges and more high schools with fine over-all programs. They have the facilities, the coaching and the athletes. Therefore, the NCAA is asking the AAU for equal representation."

Munn said that there is a "fabulous split" between the

feuding factions.

In order to establish some sort of reconciliation between the two organizations, Kenneth "Tug" Wilson, president of the U. S. Olympic Committee, appointed a committee to seek a sensible solution to the problem. The committee will offer its suggestions within a week or two, or else at the next regularly scheduled meeting in early March.

Earlier this week, Wilson commented on a recent policy statement by International Olympic President Avery Brundage, which indicated that college students would be ineligible for the Olympics.

Wilson said he didn't think such scholarships awarded by U.S. colleges would be affected, since, under NCAA rules, all are based on academic achievement.

When asked about his views on the statement, Munn backed up Wilson's contention that all amateur athletes in the U.S. should be permitted to compete in tryouts held by the Olympic Committee.

Munn said that if we used our "pros" we would make an even greater showing in the Olympics. In conclusion, Munn stated that there must be cooperation of both groups, with each giving in a little.

"In this way they can compromise on the problem of who has the power to do what and can formulate a policy to get the job done," said Munn.

Hillsdale 12th After Defeat

UPI's Board of coaches this week moved Hillsdale down from fifth to 12th spot in its ratings of small college football teams.

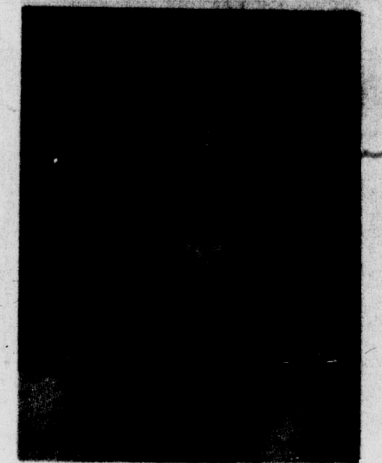

Hillsdale lost a 13-6 decision to Southern Illinois last weekend for its first defeat of the season following four victories. Florida A & M ranked first in the rating followed by Southern Mississippi, Fresno State, Northern Illinois, Southeastern Louisiana, Central Oklahoma, Delaware, Southern Illinois, Lenoir-Rhyne and Pittsburgh, Kansas.

Penn State and Navy have played football since 1894. Navy leads in victories, 14 to 11. Two games were ties.

Hoopsters Take to Courts

Under the direction of coach Forrest "Forddy" Anderson, the Michigan State basketball team has begun practicing for the 1962-63 season.

Including four starters of last year's team, 14 eligible cagers

FORDDY ANDERSON

started working out Monday. Eight sophomores, five juniors and two seniors make up this year's squad.

Pete Gent, leading Spartan scorer in the 1961-62 season, tops the returning starters. A junior from Bangor, Gent scored 311 points in 22 games and topped State's rebounding with 202 rebounds.

Three other juniors complete the list of returning starters. Bill Berry from Winnebago, Nev. played forward with Gent. Fred Thomann from Taylor started at center and Bill Schwarz from Columbia City, Ind., was a first string guard. Ron Divjak from East Chicago, Ind., is the other junior on the squad.

Seniors are captain Jack Lamers, a 6'3" guard from Kimberly, Wis., Lonnie Sanders from Detroit. Sanders, who plays halfback for the Spartan football squad, has not started practicing with the basketball squad. Another senior, Ted Williams is ineligible until the winter.

Sophomores joining the squad are guards Marcus Sanders, brother to Lonnie, Tom Douglas from Barryington, Ill., John Schlick from Okemos, and Lansing's Jim Goulding. Detroit's Gary Lytle, Battle Creek's Ron Welch and Dan Floberg from Lake Geneva, Wis., will play forward. Mark Vander Jagt of Cedar Grove, Wis., is slated to play center.

Impromptu Pep Rallies Arouse Concern

Trustees Create New Department

A Department of Biophysics was

established effective Nov. 1 by the Michigan State University Board of Trustees Thursday.

Dr. Leroy G. Augenstein, professor of biophysics, was named chairman of the new department that succeeds the biophysics program started at MSU a year ago.

"Biophysics," noted Dr. Richard U. Byerum, dean of natural science, "is a relatively new and important area applying principles of physics to biology. We thought a department was needed to round out our biology program."

The present staff in biophysics consists of Dr. Augenstein; Dr. Barnett Rosenberg, associate professor; Dr. J. Nag-Chaudhuri, research assistant professor; A. B. Robins, research assistant professor (as of Nov. 1962).

1) Dr. Ronald Mason, a part-time consultant, and four graduate assistants.

Dr. Augenstein helped as science coordinator for the \$9 million federal exposition at the Seattle World's Fair.

From 1958-60, he reviewed and administered research contracts in molecular radiobiology for the Atomic Energy Commission. In addition, he initiated and developed a biophysics program for the AEC.

He received the B.S. in physics from the University of Chicago in 1949, the M.S. in physics from the University of Illinois in 1954 and the Ph.D. in physicochemical biology from Illinois in 1956.

Dr. Rosenberg came to MSU last October after serving as a research scientist for New York University, 1959-61 and the Westinghouse Electric Corp., 1955-58.

An impromptu pep rally which attracted some 3,000 students last Thursday in a wave of enthusiasm over the MSU-UM game has aroused concern for student safety on the part of administration officials.

"Costly damage and personal injury have resulted from unorganized pep rallies at other universities," said John Fuzak, dean of students.

"This type of rally often produces undesirable side incidents such as overturned cars and student disruption of college towns," Fuzak noted. "Fortunately, Thursday's demonstration didn't spread off-campus."

Eldon Nonnamaker, dean of men, said the demonstration could easily have resulted in personal injury to students.

"We don't want to be 'kill-joys,'" he emphasized. "We want a spirited student body. But when a crowd of 3,000 gathers with no definite activities planned, someone is bound to be hurt. We were just lucky last Thursday."

Richard Bernitt, director of public safety, said the primary danger in unorganized pep rallies was the possibility of injury through running and falling.

"We did have some incidents last Thursday which shouldn't be repeated," Bernitt said. "Students entered dorms and some traffic signs were damaged."

"In spite of this, it was a good-humored crowd and no serious incidents occurred. However, there is always a potential for trouble in unorganized crowds of a very large size."

Nonnamaker cited more organized pep rallies as an alternative to impromptu demonstrations.

"If students want more pep rallies, I'm sure that Spartan Spirit and other student groups will be glad to organize them," he said.

Spartan Spirit chairman Bill Volmar, Cleveland junior, said the main obstacle to more pep rallies was lack of funds from AMSG.

"Spartan Spirit wants to sponsor more pep rallies, but we simply don't have the money," he emphasized.

Last Friday's organized rally cost \$70.

Only two more rallies are planned this year. Spartan Spirit will hold one before the Purdue game and the Senior Class will organize a rally before the homecoming game with Minnesota.

"All we can do now about the spontaneous pep rallies is to have an audio-visual truck and the cheerleaders on call," Volmar said. "Students like to start their own rallies and they don't want to be penned inside a building."

"However, I understand the University's concern about these rallies becoming uncontrolled. I think we should certainly be allotted more AMSG money for pep rallies to protect the University and the students."

Father Discusses Aims of Ecumenical Council

People expect the Ecumenical Council to bring about changes in the Catholic Church. But, according to Father MacEachin, of the St. Ignace Church, it is not true. Only modifications will be made.

Father MacEachin, a lecturer in the Department of Religion at the University of Michigan, said the Council will investigate the ancient documents of the Church and make changes in the light of modern conditions. But they will not be more than a hereditary characteristic that they cannot really accept. Many are not theologically convinced because they have not done enough to really treasure it.

He agrees with Archbishop Agostino Casaroli, who states, "The Council will not be a parliament where men may seek in a human way to promote individual interests and pet schemes."

Father MacEachin cites the canons from the Code of Canon Law library index and language library as examples of possible modifications to come out of the Council.

"The canons will be reviewed in the light of modern conditions. But they will not be more than a hereditary characteristic that they cannot really accept. Many are not theologically convinced because they have not done enough to really treasure it."

Cardinal Bea, S.J., who heads the Secretariat for Promoting Christian Unity, says that the Council's aim is not the union of the Christian world. It "may serve to prepare the way for Church unity."

Msgr. MacEachin adds that the Council will help "people who are friendly toward other people" to understand. But there are many prejudices who have rejected the purpose of existence.

"Today the Catholic Church occupies the spotlight upon the stage of the world," he expressed in a recent sermon. It "has been much loved and hated, much respected and rejected, defended and betrayed."

"And Pope John, who has made it a great object of wonderment, is more than a benign and trustworthy prophet. He is a kind and loving father, calling the world to prayer, to penance, love and unity. And he is directing the Church to the fulfillment of its divine mission."

view it for contemporary significance.

"Language gives proper direction to people's manners," he believes. "A refined vocabulary may lead to more English in the Mass."

Will there ever be a united Christian world under one Church?

Father MacEachin finds that it is possible, "but probable? Religion is almost a legacy which many receive from their parents—a hereditary characteristic that they cannot really accept. Many are not theologically convinced because they have not done enough to really treasure it."

Cardinal Bea, S.J., who heads the Secretariat for Promoting Christian Unity, says that the Council's aim is not the union of the Christian world. It "may serve to prepare the way for Church unity."

Msgr. MacEachin adds that the Council will help "people who are friendly toward other people" to understand. But there are many prejudices who have rejected the purpose of existence.

"Today the Catholic Church occupies the spotlight upon the stage of the world," he expressed in a recent sermon. It "has been much loved and hated, much respected and rejected, defended and betrayed."

"And Pope John, who has made it a great object of wonderment, is more than a benign and trustworthy prophet. He is a kind and loving father, calling the world to prayer, to penance, love and unity. And he is directing the Church to the fulfillment of its divine mission."

Msgr. MacEachin is concerned with the notions of college students in regard to the "index of forbidden literature." He hopes that the Council will re-

Prelates Elect Commissions

VATICAN CITY (UPI)—Roman Catholic prelates from around the world—2,700 strong—cast ballots Wednesday to elect drafting commissions of the Church's first-in-a-century, Ecumenical Council.

Ten subgroups of 16 members each are being chosen to prepare and present proposals to the Council. An electronic computer will tabulate the votes.

"What is being demonstrated here is a quality seldom recognized about the Church—its free exposition of opinion and choice," said Bishop Philip M. Hannan of Washington, D.C.

General sessions of the conference will be conducted by Stake President Sylvan Witter of East Lansing.

Dr. Stanley Idzerda, head of the Honors College, will discuss "The Catholic Students Apostolate" on Sunday Forum at St. John's Student Center.

New Center Constructed for Greek Orthodox Students

The new St. Andrew's Eastern Orthodox Parish and Student Center for members attending Michigan State University is nearing completion. It will be ready for use in early December.

The \$120,000 structure, located on Greencrest and Haslett St. in East Lansing, will provide a sanctuary to seat 220, five classrooms, an assembly or social hall, kitchen and, for married students, a nursery where small children may be cared for during services.

Established ten years ago at MSU, the Pan-Orthodox Student Association provides religious, recreational and educational opportunities for students of Eastern Orthodox faith. The organization is affiliated with St. Andrew's parish. Chaplain for the students, the Rev. Father Clement Palmer, is on the staff of clergy of the parish.

The parish for the MSU faculty and students is unique in

Ex-Cabinet Official Leads Mormons

Elder Ezra Taft Benson, former Secretary of Agriculture during the Eisenhower administration, will preside over a quarterly conference of the Lansing Council of 12 Apostles of the Church of Christ Latter-Day Saints (Mormon) tomorrow and Sunday in East Lansing.

Elder Benson is a member of the National Executive Board of Boy Scouts of America and a trustee of the American Institute of Cooperation and the Farm Foundation.

General sessions of the conference will be conducted by Stake President Sylvan Witter of East Lansing.

Pope John XXIII

Pope John the 23rd held an audience for some ten thousand persons in St. Peter's Basilica.

He told them that the Roman Catholic Ecumenical Council is moving along despite apparent stumblings during the first days.

MEMORIALS CRITICIZED

NEW YORK (AP)—God gets "second billing" in church memorials, says the Rev. Dr. Edgar S. Brown of the Lutheran Church in America.

Writing in the denomination's periodical, "The Lutheran," he says: "God doesn't rate nearly so much space or notice as does the name of the one to be memorialized, and he or she in turn takes second place to the larger-typed name of the donor."

Sunday Services

Matins 9:30 a.m.

Divine Liturgy 10:30 a.m.

Communion 11:30 a.m.

Sermon 11:45 a.m.

WHAT THEN ARE WE TO DO?

This question is asked every Sunday in the worship service of Central Methodist Church, Lansing. In fact, "What Then Are We To Do?" Sheets are prepared for every sermon. The minister offers five or six suggestions for study and application during the week. Approximately half the congregation takes a sheet home.

If you wish to worship where persons desire to "Apply Christianity," we invite you to worship with us next Sunday.

Services at 9:45 and 11:15 a.m.

Baptists Confer

CADILLAC, (UPD) -- Michigan Baptists are holding their 126th annual convention here today and Saturday.

Arthur L. Farrel, executive secretary of the convention, said over 600 delegates from 230 churches in the state are attending.

Pre-convention meetings began Wednesday night. Today the delegates will elect officers for the coming year.

Speakers include the Rev. Stan-

ford Kelly, general missionary from Cape Haitien, Haiti; Rev. Herbert C. Jackson, director of research for foreign missions of the National Council of Christian Churches; O.K. Armstrong, American Baptist Layman from Springfield, Mo., and a former congressman and administrative member of the Eisenhower Administration; and the Rev. Walter Price, secretary of the Berrien County Council of Churches.

Spartan Band To Serenade South Bend

The "Spartan Men of Brass"—Michigan State's 162-member marching band—will join the MSU football squad at Notre Dame Saturday.

The musicians will arrive in South Bend in time for a 10:30 to 11 a.m. concert in front of the Courthouse. They'll serenade townspeople with a selection of favorite band marches, plus some of the best show numbers from past performances.

On field in pregame and half-time appearances, the band will offer its "Patterns in Motion," constantly changing formations to tuneless rhythms.

"Round and Round" and the "Varsity Drag" are two of the numbers scheduled for the half-time show. Before the game the fans will hear musical salutes to Notre Dame and MSU and a special rendition of "I Could Have Danced All Night" featuring the percussion section.

Berlin Question Is Debate Topic Of Campus UN

Campus U.N. will debate a resolution dealing with the internationalization of Berlin Friday at 7:30 p.m. in the Union Ballroom.

The resolution introduced by the Irish delegation proposes that Berlin become an international city under U.N. control.

An amendment, sponsored by Italy, provides for a general plebiscite of the German people to determine reunification and possible government of Germany.

Town Courier To Begin Publication

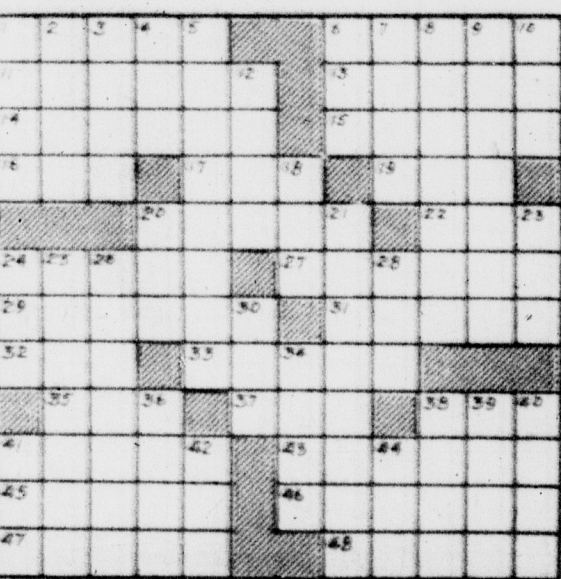

The first issue of the new East Lansing weekly newspaper, The Town Courier, will appear Nov. 14.

Harry Stapler, publisher and editor of the new paper, said permanent offices had now been set up in the Byrnes Building at 202 M.A.C. Ave. in downtown East Lansing.

CROWDED COLLECTION—Storage space for the museum has become limited. The dim and dusty east side of Spartan Stadium holds five years collection of museum articles and is filling up fast. There are canoes

on the rafters and buggys in the corners. Dr. Marvin Cain, curator of the museum, looks over some new additions with David Winfield, senior employee.

—State News Photo by Mark Krastof

Campus Museum Annex Houses Five-Year Accumulation

After five years of storage in the east side of the stadium, the Museum has accumulated all kinds of interesting articles.

Canoes hang from the concrete beams which support the ceiling. World War I uniforms and fur coats hang neatly in glass cases.

In one corner there is an old hearse, and next to it a buggy, both were once pulled by horses. In another place swords and pistols can be found.

The storage space is very

large, it takes up almost the entire east side of the stadium. It is dusty and dim. Light comes through glass block windows and from a few widely spaced lights.

Donations came in to the Museum regularly from alumni and friends of MSU. Although all donations are appreciated, there is not room for all of them in the Museum, so they are stored in the stadium for use in future displays and exhibits.

Every possible space is utilized, but the Museum is rapidly running out of room in which to store things, Marvin Cain, the Museum's curator of history said.

Michael Orclnyk and Dave Winfield are responsible for the cleaning, cataloguing, and storing

of the different articles that come in.

These two men also keep a file in which there is listed every article in the stadium. Every article has a number.

The Museum often lends articles to theater groups for costumes and props, as well as to professors and students for use in class displays.

FOLLOWING THE CHILDREN
LOUISVILLE, Ky. (AP)—Kids who visit the observation balcony at Standiford Field to watch the big airliners slip in under the pay turnstile. Airport officials don't mind a bit. The children usually draw their parents after them and it's a dime for big people.

High School Scholars Visit Campus Saturday
Over 475 high school seniors in the top quarter of their classes will visit the MSU campus Saturday for the 1962 Alumni Scholarship Student Day.

The purpose of the program is to acquaint prospective scholarship applicants with MSU programs.

Another group of high school students will tour the campus Nov. 17.
