

Grissom And Young Named For Gemini Flight

HOUSTON (AP)—A veteran space traveler and a rookie astronaut were picked Monday to close the gap in the United States' race to the moon.

Maj. Virgil I. (Gus) Grissom, 38, the second American in space and Lt. Cmdr. John W. Young, 33, a former Navy test pilot, got the nod as the first crew to fly a Gemini spacecraft into orbit later this year.

Named as backup crew were Cmdr. Walter M. Schirra, 41, pilot of a six-orbit Mercury flight Oct. 3, 1962, and Air Force Maj. Thomas P. Stafford, 33, a test pilot who has written textbooks on flying.

At a news conference at which the astronauts were named, it was

also revealed by Robert R. Gilruth, Manned Spacecraft Center director, that an ear ailment similar to the one suffered by former astronaut John Glenn, knocked Lt. Cmdr. Alan B. Shepard, Jr., 40, from consideration for the first Gemini crew.

Gilruth said Grissom was picked because of his long association with the Gemini program. The short, slender astronaut—he is 5'7" and weighs 150 pounds—has held a primary assignment in recent months of coordinating all Gemini developments with members of the 29-man space team.

Grissom had to swim for his life during recovery operations when his Sigma 7 spacecraft sank in the Atlantic after an 118-mile sub-orbital flight July 21, 1961. A valve was open in his space suit and

he went under twice before grasping a life preserver thrown from a helicopter.

The loss of Grissom's space capsule prompted the National Aeronautics and Space Administration to develop a new method of water recovery by having frogmen place a rubber yoke around the capsule.

Grissom said he was "very happy to be assigned the first Gemini flight. I have been following the program since its inception. And it is a real honor to be picked on the first crew."

Young, a dark-haired slender flier, said it was a "real pleasure to be assigned the first flight."

He said, "there will be a lot of work coming up but I couldn't have been picked with three better men."

Schirra, whose mission was called "textbook perfect," was backup Mercury astronaut for Lt. Cmdr. M. Scott Carpenter's flight May 24, 1962.

He said, "I'm a backup pilot again, and the backup crew does have work to do. We will do almost as much as the primary crew right up to the day of the flight."

Stafford, one of the tallest astronauts at six feet, said it was a "real privilege" to be in the group.

Gilruth said the first manned flight, now set for November or December of this year, would not contain many scientific experiments. He said the astronauts would be able to fly the spacecraft back through the earth's atmosphere.

Record Turnout Seen In Vote Today

Outlook 'Encouraging'

Scholarship OK Expected

A bill creating competitive state scholarships for college and university students should receive senate approval without much opposition, a Republican senator said Monday.

Sen. William G. Milliken, R-Traverse City, who introduced the bill, said that prospects for its passage are "very encouraging."

The bill currently is top priority on general orders. Milliken said that he would not ask that the bill be moved up immediately for third reading but would wait for it to appear the

next day, as is the usual procedure.

The scholarship bill is contingent to the higher education bill passed by the senate last week.

Money for the scholarships has already been provided in the education budget, Milliken said. This bill sets up the terms, grants, amounts and conditions on the scholarships.

The education budget provided \$1 million for use as loans and scholarships to college students.

"The current bill must be passed in order for the \$500,000 allotted for the scholarships to be put into use," Milliken said.

Milliken initially intended to create a special commission to award the scholarships. However, this was deleted by the house committee on state affairs.

Instead, the Michigan Higher Education Assistance Authority was given charge of the scholarships. The Authority already handles student loans.

To qualify for the scholarships the applicant must:

- be a Michigan resident,
- be "a person of good moral character,"
- meet college entrance requirements,
- take a state competitive scholarship examination,

(continued on page 4)

FEE-AKERS SIGN-UP--The University's two newest residence halls, viewed here from a Winged Spartan aircraft, are now

available for room reservation for next fall. The \$6 million structures, located at Hagadorn Road and Shaw Lane, will have their

own library, auditorium and classrooms. Interested students can sign-up at their dormitory manager's office.

Traveling Polls Go Into Town

Ballots Include Amendment

Today's All-University Student Government presidential primary election should produce the largest turnout ever, says Jim Patton, Wilmette, Ill., sophomore and assistant elections commissioner, because in many cases the polls—via mobile voting units—are being taken to the students.

Presidential candidates are Tom Partridge, Swartz Creek junior; Jerry Wallace, Cedar Springs junior; Herb Wingo, Buchanan sophomore; Bob Harris, Bryan, Ohio, junior; and James Jesse, Buchanan junior.

Also on the ballot will be as proposed amendment to the AUSG constitution. The amendment would change the part of the constitution which requires proposed amendments to be published in the State News four times during the two weeks before the election.

The change simply calls for proposed amendments to be published, without specifying how often.

It was decided to place the amendment on the primary ballot because of the many issues and candidates in Thursday's final election.

Mobile voting units will go to fraternities, sororities, co-ops,

Mix-up Starts Khrushchev Death Rumor

FRANKFURT, Germany (AP)—A West German news agency said Monday night a garbled conversation in Moscow between a Japanese journalist and a Tass employee apparently started a rumor—formally denied later—that Premier Khrushchev was dead.

Deutsche Presse-Agentur (DPA), the German agency, said:

"A misunderstanding over an apparently inexplicable interruption in the Soviet news agency Tass' report on Premier Khrushchev's speech led Monday to rumors about the death of the Soviet party and government chief.

"A Japanese journalist in Moscow inquired at Tass why the report on the Khrushchev speech in the English (language) service was not being continued. He apparently misunderstood the reply, given to him in Russian."

Supports Lunar Surface Theory

'Moon Rock' Made Here

Sand plus heat plus a vacuum makes "moon rocks."

It also strengthens the theory of a part-time graduate student about what the moon's surface is made of.

Walter I. Dobar of Brighton, heated a small cupful of sand until it melted, then suddenly exposed it to a high-order vacuum, as if it were lava erupting on the moon.

The molten sand foamed up and out of container. As it cooled, it hardened into a "moon rock"—a light, porous, glass-like foam he calls "simolovac."

Dobar, who is also manager of the Quality Assurance Department at Bendix Systems Division

in Ann Arbor, Mich., did his research partly to fulfill a graduate course assignment.

If Dobar is right—and his professors in the geology department think he is—it means that the task of landing and operating on the moon will be much easier than many scientists think.

In line with a currently popular theory, many space authorities believe the moon may be covered with a thick layer of dust that could engulf an astronaut or an ordinary vehicle.

Consequently, the federal government is going to considerable effort and expense to design vehicles that can land and operate without sinking in deep dust.

But, according to Dobar, the moon surface is covered with simolovac (an acronym for Simolva In Vacuum), which can support a weight of up to four tons per square foot.

Dobar has evidence that properties of simolovac match known properties of the moon's surface.

He reports that when simolovac is darkened by radiation such as occurs on the moon, the substance has the same light reflecting properties (photometric curve) that the moon has.

Other scientists have learned that sponge, lichens and other materials also have these light reflecting properties but simolovac is the first geological substance to have the correct characteristics.

Eleven Appointed To Faculty Group

President John A. Hannah has appointed 11 new representatives to the Faculty Committee on Student Affairs.

They are Esther Everett, associate professor of home management and child development; Eugene W. Roelofs, associate professor of fishery and wildlife;

James E. McKee, professor of sociology.

Claude McMillan, Jr., associate professor of management; Buford L. Steffire, professor of education; Charles Titkemeyer, professor of anatomy; Gordon L. Gray, associate professor of TV-radio.

Robert N. Hammer, associate professor of chemistry; George H. Martin, associate professor of engineering; Frederick Williams, associate professor of history; and James M. Elliott, associate professor of natural science.

Dean of Students John A. Fuzak is also a member of the faculty committee.

Each of the University's 11 academic colleges is represented on the new committee. The old committee had only six members.

The decision to enlarge the committee's representation was made last fall by the Academic Council. However, the committee on committees of the Academic Senate did not submit nominations to President Hannah until March.

The full committee met Monday for the first time this term.

Fuzak described the committee as "an instrument for better communications among the various departments of the University."

"I am enthusiastic about the new organization," he said. "I believe this will be a more effective group."

One of the primary tasks of the committee this term will be to create an organization to make a major policy evaluation of all areas of student affairs.

Fuzak said the group hopes to begin such an evaluation by the end of this term.

Specific problems which might be included in the study are housing, methods of dealing with students who violate University regulations and all disciplinary policies.

"This evaluation will include the general philosophy of the University in regard to students

as well as specifics," Fuzak said.

The new committee is organized on a rotating basis. The terms of Miss Everett and Roelofs expire Dec. 31, 1964. McKee, McMillan, Steffire and Titkemeyer will serve until Dec. 31, 1965.

The terms of Gray, Hammer, Martin and Williams will expire Dec. 31, 1966. Elliott's term will end Dec. 31, 1967.

New members will be appointed as terms expire.

World News at a Glance

Greek-Turk Relations Worsen

NICOSIA, Cyprus (AP)—U.N. troops headed off an all-out battle Monday between Greek and Turkish Cypriots at Kyrenia Pass. But fury was mounting on both sides and in Turkey, Premier Ismet Inonu said Greek-Turk relations were heading "in a dark direction."

Greek Cypriots threatened a major attack during the day on Turkish Cypriots holding positions on a hill overlooking a Greek cement factory in the shadow of the Kyrenia Mountains.

Rail Negotiations Continue

WASHINGTON (AP)—Negotiations arranged by President Johnson in an attempt to end the recurring threat of a nationwide railroad strike continued Monday, but no one would say whether the protracted dispute is any nearer settlement.

Earthquake Shakes Yugoslavia, Hungary

BELGRADE, Yugoslavia (AP)—An earthquake rolled across northern Yugoslavia and southern Hungary Monday, shook the capitals of both nations, damaged dozens of towns and villages and sent thousands fleeing in panic.

At least two persons were killed in Yugoslavia and incomplete reports reaching Belgrade told of more than 100 injured, some seriously.

MOTORIZED ELECTIONS -- Ready to roll for the tour of voting areas off-campus between 11:45 a.m. and 1:30 p.m. today, Don Schimp, Coloma freshman; Judy Reader, Detroit junior; and Judy Rapson, Fenton junior, gather at their truck-voting station.

Photo by Ricki Gilbert

Wanted: Jesse, James

The primary election for the All-University Student Government presidency will be held today.

The State News advocates the candidacy of James Jesse for this office and advises students to vote for him both today and in the final election Thursday.

Jesse, more than the other four candidates, has demonstrated an enthusiasm and concern for the problems and workings of AUSG. Moreover, he announced last weekend a plan for a sweeping reform of AUSG's current organization, one which promises to get to the heart of the many problems facing that body.

Jesse's proposal is to expand the AUSG executive board so that it will encompass representatives from each of the important governing bodies in the University. Like the other candidates, Jesse has observed that AUSG is not in actuality a representative body, and that this fact is central to the problems of apathy and disrespect which have plagued AUSG for several years.

His reorganization plan is the only concrete solution to these problems which has been suggested by any of the candidates. His dedication and originality in

studying the problem and working out a practical plan should be rewarded by an opportunity to incorporate it in a revision of AUSG's workings.

Jesse is a most highly-qualified candidate, primarily for the enthusiasm of which his revitalization plan is indicative. He has had two years continuous experience in student congress and has worked on many key committees. He has been chairman of the finance committee this year.

He is a calm, level-headed worker, and has run a sensible campaign. By shying away from sensationalism, Jesse has set what he hopes will be the pace of student government next year. In so doing, he has gained the respect and support of many student leaders, a definite asset in planning a new government.

We do not attempt here to downgrade any of the other candidates, since that would be of no use in solving the multiple problems of student government at this University.

We do attempt to persuade students to take the opportunity for a better, calmer, more practical and effective government here, by voting for James Jesse and for a badly needed reform in the running of AUSG.

Election Policy

The State News is a free and editorially independent newspaper within the University community.

This fact becomes somewhat more significant than usual today, since on this page the State News is declaring support of one candidate for the All-University Student Government presidency. There is bound to be a good deal of complaining and some cries of "foul!" because of this. We present here an explanation of our position regarding elections.

The State News reserves the right at all times to comment on University affairs in its editorial columns, and it regularly exercises this right in regard to such issues as student housing or library reform. We see no essential difference between these questions and that of the AUSG election.

We attempt at all times to study every matter of importance to the

University and present what the editorial board feels is a reasonable and workable solution to each problem.

In this case, we have studied the five platforms and candidates, and have found one man to be substantially more qualified and more promising than the others.

Our support of him is meant in the same way our support of a particular stand on other issues is meant--as the result of a careful consideration of the issue and as a recommendation from the State News editorial board for those who may be lacking the direct contact which we have with the issues.

We feel that if we refrained from making a judgment on the election or any other important issue, we would not be meeting our obligation to serve the University and to express a concern for the successful solution of campus problems.

Aiding The Library

All department heads in the University have been sent questionnaires by the Provost's office asking for suggestions for improving the library's service in the crucial ten years just ahead.

This is an opportunity for faculty leaders to make proposals

for improving library service in accordance with predictions for future needs in each department.

It is hoped that no one tapped to answer will miss the opportunity to suggest improvements in this most vital segment of University facilities.

Open Housing Suffers

By SUE JACOBY
State News Staff Writer

Dr. H. C. Tien's resignation from the East Lansing Human Relations Commission could mean the end of hopes for a city-wide open housing ordinance this year.

If no one is appointed to replace Tien, past votes by the commission indicate that there will probably not be sufficient support for recommendation of a fair housing law to the City Council.

Anti-discrimination motions approved by the commission this year have usually squeaked through by a 5-4 vote. The loss of Tien could mean a deadlock for any motion favoring stronger legislation to combat racial discrimination.

Mayor Gordon L. Thomas said he "did not know" whether an interim appointment would be made to fill Tien's place on the commission. Tien's term would have expired in September.

Tien resigned in protest against a vote which put the Human Relations Commission on record as saying there was not conclusive evidence of racial discrimination in East Lansing.

The irony of Tien's resignation from the commission is that the loss of his vote may mean defeat for an open housing ordinance when it comes up for final consideration.

The defeat of the motion asserting conclusive evidence of discrimination in East Lansing does not necessarily mean an open housing ordinance would be defeated. Mrs. Mahlon S. Sharp and the Rev. Wallace

Robertson both voted against the former motion.

Mrs. Sharp said she was afraid the motion would prejudice discussion of the open housing ordinance. However, both Mrs. Sharp and the Rev. Mr. Robertson have voted in favor of anti-discrimination motions in the past.

Mrs. Sharp was a member of the committee which developed an open housing ordinance designed to prohibit racial discrimination in real estate dealings. It is unlikely that she would vote against an ordinance she helped draw up.

If the Rev. Mr. Robertson and Mrs. Sharp vote according to past actions, the ordinance would probably pass with Tien's vote. Robert L. Green, instructor in edu-

cation; Robert F. Morgan, Buffalo, N.Y., graduate student; and Tien have all consistently voted for anti-discrimination moves.

Typical of the past attitude of the commission was a motion last January pleading the group to recommend a fair housing ordinance to the City Council if community research indicated a need for one.

Voting for the motion were Tien, Green, Morgan, Mrs. Sharp and the Rev. Mr. Robertson. Against the motion were Mrs. Stephanie H. Barch, a research assistant in zoology, Thomas B. Schepers, an official of the East Lansing State Bank; Dan C. Learned, an attorney; and Albert Ehinger, a realtor.

Without Tien, the vote may be 4-4 instead of 5-4.

New University Grows In Nigeria

Editor's Note: The following is the first of a four-part series on the University's project in Nigeria. It is written by an associate professor in the department of econ-

omics, John P. Henderson, who is now completing a tour with the project as advisor in economics. The article was prepared to reflect the activities of all Michigan State ad-

visors to the University of Nigeria.

Michigan State University's Program of technical assistance to West Africa's new University of Nigeria is the largest single

educational contract currently being supported by the United States Agency for International Development.

Now in its fourth year of operation, the Program is also one of the largest undertakings of the University's International Programs Department and one of its most unique, since it is concerned with the founding and operation of an entire university.

First Students Enrolled In 1960

The University of Nigeria enrolled its first students in October, 1960 and graduated its first class in June, 1963. Enrollment for the current academic year numbers about 1,850.

This university was the first in tropical Africa to grant autonomous degrees, for the continents' older institutions had typically awarded "external" degrees for European universities. It was also the first African university to give a strong emphasis to technical areas such as agriculture, education and engineering.

Some forty faculty members of Michigan State University have served on the University of Nigeria campus since 1960. At present there are a total of 27 professors and administrators on the Enugu and Nsukka campuses of the university, teaching agriculture, architecture, economics, education, English, general studies, geography and philosophy, and serving as department chairmen or deans.

George M. Johnson has been Vice-Chancellor of the University for the past four years and Chief of Party for the Michigan State Advisory Group, while William B. Hawley of the College of Education in East Lansing is Deputy Chief of Party. Charles F. Doane, Jr. of State's International Programs Office is Administrative Officer for the group. The great majority of the advisors are from Michigan State University, with the Lansing area being home for 22 of us,

Located In Eastern Nigeria

The main campus of the University of Nigeria is located at Nsukka near the northern border of the Eastern Region of Nigeria, a rural area with a population of about 50,000, and seat of government for the Nsukka Division in which it is estimated 500,000 people live.

The town itself consists of bamboo sheds and mud-brick buildings stretching about a mile in each of three directions from the main intersection, while in the fourth direction are the government buildings on the District Officer's Hill.

Before the university came, Nsukka was a small market village on the edge of a great expanse of savannah land, largely untouched by commercial activity, with no electricity and meager supplies of water.

Nsukka's Growth Bolstered

With the university have come retail shops serving the needs of the students and staff, as well as electricity, and water supplies far greater than anyone hoped for four years ago.

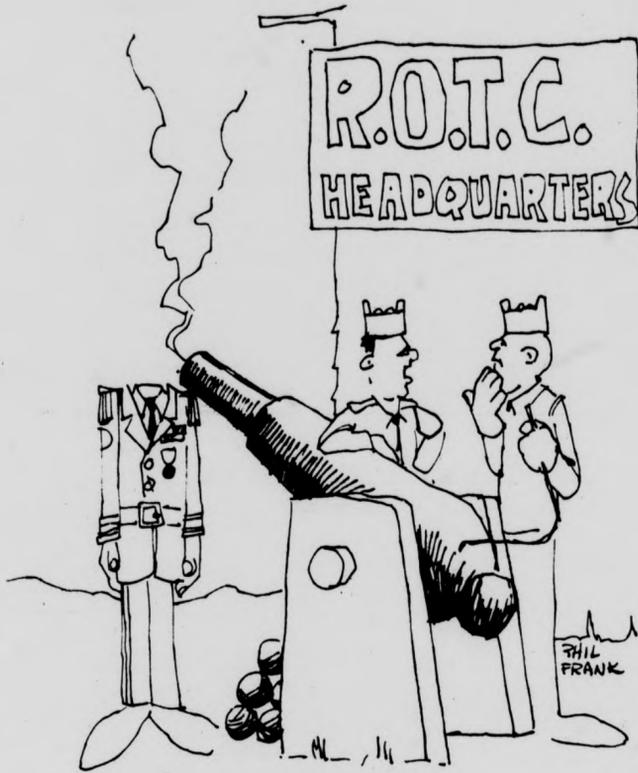

The structures in the town house everything from banana and kola nut vendors to "Glamour Photo" shops, sewing institutes, tailors, dry cleaners and laundries. While only a very few of the students or faculty at the university live in the town itself, there is increasing commercial activity in Nsukka and one day it will have a theater and more permanent streets and buildings.

For the 19 Michigan State advisors and their families who live in Nsukka, there is little opportunity for recreation and diversion. Proponents of the thesis that American professors live a life of affluence overseas would be hard put to find much evidence of opulence. The housing provided for the university's multi-racial faculty comprising many diverse ethnic groups is adequate but in no way comparable to the homes of the upper Nigerian elite or to the facilities often provided to American officials abroad.

Advisors' Recreation Limited

The only facilities for recreation are the cement tennis courts which bake in the tropical sun, a makeshift faculty club where drinks are sold and occasional 16 mm films are shown, and the lectures, concerts and drama generated by the intellectual pursuits of the community.

On the Enugu campus, acquired in 1962 when the Federal Government requested the university to take over the operation of a former technical college for training science teachers and land surveyors, there are about 375 first-year students taking basic courses

YOU'RE IN TROUBLE!

Letter To The Editor

Open Letter To Mayor

Mayor Thomas:

On April 1st, the East Lansing Human Relations Commission went on public record stat-

ing that there is no conclusive evidence of racial discrimination in this community. Such an unrealistic position taken by this Commission is a flagrant disre-

gard of facts and a blatant denial of reality.

In my opinion, this Commission has now on file sufficient, substantial and conclusive evidence of racial discrimination in housing and real estate transactions in this city. As the late President Kennedy had stated in his address to the Nation, "Time To Act!" "This is not a sectional issue. Difficulties over segregation and discrimination exist in every city, in every State of the Union, producing in many cities a rising tide of discontent that threatens the public safety."

Yet the East Lansing Human Relations Commission went on public record stating that "there is no conclusive evidence of racial discrimination!" This public statement is not only a falsehood, but also a violation of the East Lansing Human Relations Ordinance: "It shall be the duty of the Human Relations Commission...to disseminate authentic and factual data relating to interracial and other group relationships." We can not doubt the authenticity of the complaints on file with this Commission and that racial discrimination does, indeed, exist in East Lansing.

It is the duty of this Commission to disseminate the above facts. Instead, this Commission has spread falsehood on public records. In my opinion, this Commission has, therefore, violated the City Ordinance, Section 1-8.4.

In protest against their violation of the City Ordinance, I herewith resign from this Commission.

Always cordially yours,

H.C. Tien, M.D.

Wallace, Partridge Add To Campaign Platforms

Two candidates for the All-University Student Government (AUSG) presidency have added new planks to their platforms. Jerry Wallace, Cedar Springs junior, told a small group at Wilson Hall Sunday of his plan to increase academic benefits for students. His program calls for an expanded book exchange, increased library hours—especially during final exams—and course reviews which would be expanded to include subjects other than basics.

He also proposed continued support of provost lectures, curriculum studies with student participation, "major nights" in all dormitory complexes, and expansion of the college bowl program.

Tom Partridge, Swartz Creek junior, also announced a new plan in which students would have an opportunity to study at foreign universities. Confident that it would work, he said he intended to write to Washington suggesting the plan.

He said similar plans are already operating throughout the country.

Herb Wingo, Buchanan sophomore, said he did not completely approve of a plan offered by James Jesse, Buchanan junior.

The Jesse plan calls for an executive council which would have veto power over congressional, legislative. The council would be composed of representatives of all the major University governing groups.

Wingo said the plan would cause loss of contact between students and their representatives and would complicate the route through which student opinion is taken to AUSG.

He said his solution would be to cut down the membership in congress to about 30 or 35 members and to allow the major governing groups a vote. This, he argued, would be more effective and would prevent the leaders of these groups from gaining too much control.

Jamie Blanchard, Royal Oak senior, said that, although he did not see one candidate for the AUSG presidency that his plan was an excellent idea, he did not officially endorse any candidate.

He added that he did not give permission for his name to be used in the State News.

If he were to make a preference for AUSG president, he said, he would favor a candidate who is a personal friend.

They lost three decisions to Wooster College.

Members of the Spartan Forensic Squad won one "Superior" and two "Excellent" awards plus third place for squad record in the Flint Community College Freshman-Sophomore Debate Tournament Friday and Saturday.

Gil Durocher, Alma freshman, and James Hudek, Cedar Rapids, Iowa, sophomore were undefeated in debates with North Central Michigan College, Flint Community College, Henry Ford Community College and the University of Michigan.

Hudek was ranked the second highest speaker in the tourney.

Seven members of the squad went to the Delta Sigma Rho-Tau Kappa Alpha, National Honorary Forensic Society, Forensic Conference at Butler University, Indianapolis, March 29 - April 1.

Seventy three major colleges and universities participated in the event, the largest of its kind.

James Hudek and Harlan McGhan were among the top in extemporaneous speaking, with McGhan finishing 13th among the 54 speakers. Hudek won a trophy for a superior rating among the top five speakers.

Members won nine of 24 debates in the event.

Debate Team Earns High National Rating

MSU speakers and debaters ranked high in national contests this year.

Campus debaters were among the top 32 university and college teams competing from Illinois, Indiana, Michigan and Ohio at the National Debate Tournament in April at West Point.

In the largest entry in the history of the West Point Nationals, MSU debaters missed qualifying by two ballots.

With three judges voting, Harlan McGhan, Flint senior and James Hudek, Cedar Rapids, Iowa sophomore, won 14 of 24 ballots in eight rounds of debate against six colleges and universities.

Prof To Discuss Military In Africa

James Hooker, assistant professor of history, will address the International Relations Club on "The Role of the Military in Africa."

The program will be held at 7:15 tonight in 32 Union. Coffee will be served.

Hooker served as an historical analyst for the Department of the Army in Washington and spent years in African research.

Eugene Ionesco says of the puppet shows he saw as a child, "It was the spectacle of life itself... in an infinitely simplified and caricatured form, as though to underline the grotesque and brutal truth."

"Rhinoceros," opening in Fairchild Auditorium Tuesday night for a five night run, is essentially an adult puppet show.

The puppets, or characters, represent people in a society of appearances. They are concerned with "what people will say," their jobs; the way they look and act; solid, stolid, tangible reality; and they are obsessed with logic and conformity.

The rhinos take over a society that is neither weak nor strong, neither supremely good nor exceptionally degenerate. It is a "nothing" society which is, perhaps, merely standing still.

The people, however, may change their physical appearance, but they do not change their characters. They may have green skins and horns on their heads, but they still have the same attitudes.

They become rhinos because "it is the best thing to do," or "the only thing to do," or for the sake of appearances.

Even the heroine, Daisy, who is the last to change, does so because Berenger, the last man, is not very nice when he loses his temper. For Daisy emotion verges on irrationality which cannot be condoned by logic. So she joins the rhinos and becomes again a member of the only society she has ever known.

Berenger, the pariah, is a small, weak man alienated from the beginning of the play because he is unable to be like the rest of the puppets. He holds out against rhinoceros society because he cannot change from man to beast.

His skin will not turn a certain shade of green. He cannot trumpet heartily. He must remain a holdout even though he wishes he could be like the rest of society.

In "Rhinoceros," Ionesco does underline "the grotesque and brutal truth," like the puppet shows of his youth. He symbolizes man's loss of function, his degeneration into a stagnant life. But this symbolism is not of man's past nor of his present. It does, perhaps, suggest what man could be.

OPENING TONIGHT -- Earl Boen begins to turn into a 'Rhinoceros' to the dismay of a friend, played by C. David Colson, in the Performing Arts Company Production opening at Fairchild Theatre.

'Rhinoceros' Called Adult Puppet Show

Grad Wins Grant To Study In Rome

Dean A. Johnson of Ann Arbor, a 1961 MSU graduate, has been awarded a Rome Prize Fellowship for a year's study in landscape architecture at the American Academy in Rome.

The fellowship includes a \$3,000 stipend, plus free residence and use of facilities at the academy. Thirteen fellowships were awarded this year by the academy, which annually supports creative study by artists and scholars.

Petitions Let For Traffic Appeals Court

Petitioning for positions on the Student Traffic Appeals Court will be held during the next two weeks.

Positions are open for 4 freshmen, 3 sophomores, a junior, and a graduate.

Petitions are available at the University College Office in South Wonders, at the desk in Owen Graduate Center, in 101 Student Services and at the Union desk.

Petitions must be submitted by April 24 to: Student Traffic Appeals Court, c/o Division of Student Activities, Student Services Building, Campus.

Writer, Prof Differ On Red Scientists' Position

Excellent working conditions and good treatment keep Soviet scientists content behind the Iron Curtain, according to Preston Grover, Associated Press writer.

Maria Krzywoblocki, professor of engineering research and mechanical engineering and space consultant to the armed services, does not agree.

Grover said that it is not the "barbed wire" that keeps the Soviet scientists within their country, but the fact that they really don't want to leave.

Soviet scientists, unless they are trusted and outstanding, don't travel much outside the country. But British and American visiting scientists, after talking to many of them, feel also that they really don't want to go, Grover said.

"If they agree with the regime, Russian scientists have very good working conditions," Krzywoblocki said.

"But although they are treated well, I know many would like to leave but can not."

Krzywoblocki said that anyone who wants to leave the country must receive a special permit from the government. These special permits are not issued freely.

Grover agrees that a few do defect. One or two have dropped out of travel groups in Britain, Canada, and the United States, or have declined to return after accepting an exchange teaching fellowship.

But there has been no complaint such as has been raised in Britain and Germany about a steady "brain drain" of trained scientists to the United States where pay and facilities are better, Grover said.

"Before World War I, I remember that German scientists were happy to remain in their own country," Krzywoblocki said. "They were a highly distinguished class, much like the Russian scientists today. In fact more scientists traveled to Germany because of the conditions and prestige."

After World War II conditions changed radically, he said. Now conditions are not as good, treatment is poorer, and many want to leave.

By and large, scientists are the chosen people to receive top salaries in the Soviet Union, Grover said.

However, pay is not the whole story, he said. Their jobs have prestige, and scientists have an opportunity to exercise influence on government decisions.

"Russian scientists are treated well if they agree with the party line and keep out of politics," Krzywoblocki said. "If they will simply be nice boys and keep out of politics, they will get along well."

U-M Prof Speaks On Russian Tour

The Russian club will meet at 8 tonight in Union Parlor A to hear Stanton E. Samenow, University of Michigan professor discuss his tour of the Soviet Union.

Samenow will show slides of his visits last summer to Moscow, Leningrad, Kiev, Yalta and Soviet Central Asia. A question and answer period will follow his talk.

The meeting is open.

Police Restricted In Negro Arrests

JACKSON, Miss. (AP)—A federal judge ruled Monday Jackson police can't arrest Negroes who integrate transportation facilities.

U.S. Dist. Judge Sidney Mize issued a sweeping order enjoining police from arresting Negroes who defy laws requiring segregation of public buses, rail and air transportation facilities.

Statement On Bias To Be Prepared

A statement of the University's policy toward discrimination on the basis of race, creed or national origin in off-campus housing is being prepared by the Faculty Committee on Student Affairs.

Dean of Students John A. Fuzak said the statement will simply be a clarification of MSU's present policy. Off-campus houses are now taken off the approved list if landlords are found guilty of discrimination in renting to students.

The statement will also include the University's disapproval of discrimination in all off-campus housing.

"The University's position on this issue has been made clear in the past and by recent statements from President Hannah," Fuzak said. "This will not be a new policy, but a continuation of the old one."

Scholarships

(continued from page 1)

--show that he has the ability to gain a degree.

The scholarships are renewable.

Under the program a minimum of four scholarships per representative district--there are 110 such districts--will be provided. The bill does not set a maximum number of awards available.

Financial need is the primary consideration in granting scholarships, the bill states.

Scholarships may be used to attend any Michigan college or university or accredited junior college.

The maximum grant per student would be set at \$800 per year. In determining the amount actually granted by the Authority, the bill requires the amount of parental assistance available and the cost of tuition and fees to be considered.

Calendar of Coming Events

- Forestry Seminar -- 12 noon, 1 Forestry.
- MSU Retirees Club -- 1:45 p.m., Third Floor Union.
- Social Work Seminar -- 2 p.m., 31 Union.
- Food Science Seminar -- 4 p.m., 110 Anthony.
- Phi Kappa Phi -- 4 p.m., Library Aud.
- Microbiology and Public Health Seminar -- 4:10 p.m., 335 Giltner.
- Pathology Seminar -- 4:10 p.m., 346 Giltner.
- Special Seminar on Speech Research -- 7:45 p.m., 101 Kellogg.
- Joint Music Recital -- 8:15 p.m., Music Aud.
- All novice debaters and those interested in debate -- 3:10 p.m., 124 Auditorium.
- Campus 4-H Club -- 7:30 p.m., 317 Ag. Hall.
- Humanist Society -- 8 p.m., Wed., Union ballroom.
- Sailing Club -- 7:30 p.m., Union ballroom.
- College Life -- 7 p.m., Alpha Delta Pi sorority, Speaker: Cal Malefyt, former chaplain at Harvard.
- Pi Gamma Nu -- 7:15 p.m., 22 Union.
- Phi Gamma Nu -- 7:15 p.m., Wed., Student Services Lounge.

Campus Breifs

Delta Delta Delta sorority has announced the beginning of competition for three \$100 scholarships. All coed, Greek or non-Greek, are eligible.

Awards will be granted on the bases of leadership, scholarship, financial need, and resourcefulness.

Application blanks may be obtained at 101 Student Services. No applications accepted after May 11.

Merrill Concert

Ticket distribution for the Robert Merrill concert on April 22, begins at 9 a.m. today at the second floor Union ticket office. Coupon "G" may be exchanged for a reserved seat.

Classes In Arabic

The Arab Club will offer a class in beginning Arabic this term. The classes will meet Tuesdays 7 to 8:45 p.m. in 108

PEANUTS

YOU'RE GOING TO BE MY SCIENCE PROJECT!

I'M GOING TO BE WHAT?

I'M GOING TO ENTER YOU IN OUR SCHOOL SCIENCE FAIR.

I'M GOING TO MAKE A SERIES OF TESTS WITH YOU AND THAT STUPID BLANKET TO SEE WHY IT BRINGS YOU SECURITY.

SUDDENLY I FEEL VERY INSECURE!

Injury Slows Baseball Capt.

Things were pretty joyous in the Michigan State dugout following the Spartans' 22-5 shellacking of Hillsdale College in the first game of Saturday's double header but Captain Mal Chlizek couldn't really enjoy the celebration.

For the first time since the early part of the 1962 season, his sophomore year, the senior shortstop had failed to start a regular season game.

Chlizek jammed his index finger in a collision with second baseman Dennis Ketcham in a game with Florida State during the Spartans' spring training tour and was forced out of action.

Coach Danny Litwhiler said he felt the injury has greatly hampered Chlizek's hitting and fielding.

"He's not himself," Litwhiler said. "He's a better hitter than what he's shown this spring. He can't go the full 100 per

cent as his whole hand bothers him a lot."

Litwhiler also pointed out that the cold weather has had much to do with worsening matters. He said the sting of hitting a pitched ball on the bat handle in cold weather was painful—even more painful for Chlizek with his injured hand.

The veteran shortstop made no comment on this but did admit he is forced to wear a protective sponge on his hand when he is batting.

Commenting on an estimation by Assistant Coach Frank Pellerin that he had played between 70 and 75 consecutive ball games before the injury, Chlizek modestly said he didn't think the string was that long but did say "it's been a long, long time."

The NEWS in SPORTS

IM 'Lock It' Program Still Has Way To Go

The Men's Intramural Department's "lock the lock backwards" program has been a "limited" success, Frank Beeman, director of intramurals, announced Monday.

"We've cut down on the number of open lockers, but we still have a long way to go," Beeman said.

He said that there have been few complaints from the student body. "The program seems to have met with an amused acceptance."

In an effort to limit the number of "uninvited outsiders" in the IM building, all doors except those at the main entrance will be locked at 5 p.m. daily.

"They'll stay locked all weekend, too," Beeman said. "But we are going to keep a man at the equipment desk a little longer each day so that students having to walk around the building to get in will be able to check their equipment."

"We are also requiring students, faculty and staff to show identification when requested," Beeman said. "We are making every effort not to inconvenience anybody, but we are also trying to safeguard the property of those using the building."

Lots Of Help

Seven Aid Duffy In Football

Unless you are one of the pigeons that regularly inhabit Spartan Stadium, chances are the names Boisture, Bullough, Crillot, McVay, Serr, Smith or Stoll aren't household words where you come from.

Ah, but the name Daugherty—now that's something else. Or is it?

Actually all these names can be found on the Michigan State payroll list under the heading, "Football Coaches." Only one word—assistant—separates Boisture, Bullough, Crillot and company from enjoying the distinction that comes with the name Daugherty.

Dan Boisture is the offensive backfield coach for the Spartans, a job of little envy for the 1964 season. With five years of MSU experience behind him, Boisture can look back with pride at the accomplishments of such students as Sherm Lewis, George Saines and Herb Adderley.

Henry Bullough, defensive line coach, is a former Spartan letterman and National Football League performer. Also a veteran of five seasons here, Bullough has been responsible for most of the success of players, like Earl Lattimer, Ed Budde and Dave Behrman.

Defensive backfield Coach Vince Crillot, whose job will take on added importance with

the introduction of the new substitution rule next fall, is a veteran of four seasons. When you read the names Herman Johnson, Charlie Migyanka or Lou Bobbich in the football program next season, you might want to remember the man backing them up.

In charge of the offensive line for the eighth consecutive year is Gordon Serr, a member of the 1952 Spartan team which captured the mythical national title. Again the names Behrman, and Budde as well as Ellison Kelly are testimony of MSU coaching paying off.

Ends Coach Cal Stoll, starting his sixth season here, has little trouble dropping the names of former pupils. Matt Snorton, Dan Underwood, Ernie Clark and Fred Arbanas are just the beginning.

Another whose assistance is greatly depended upon by Coach Duffy Daugherty is John McVay, assistant backfield coach, Stoll's

big task lies in the realm of recruiting.

He is one of State's leading scouts.

Grooming Spartan freshmen players is the special talent of Burt Smith, frosh coach. A member of Daugherty's first staff, Smith has also seen duty as defensive and offensive line coach since he began in 1954.

BASEBALL SCOREBOARD

AMERICAN LEAGUE—The Los Angeles Angels defeated the Washington Senators, 4-0, in the league opener. This put the Angels into first in the league—and Washington in the cellar.

NATIONAL LEAGUE—The Houston Colts whipped the Cincinnati Reds, 6-3, in a league opener at Cincinnati.

Tigers Open Against A's

(UPI)—Partly cloudy weather with a temperature in the low 50's is forecast for today's baseball opener at Tiger Stadium. The Tigers open against the Kansas City A's. A crowd of around 30,000 persons is expected to be on hand when Gov. George Romney tosses out the first ball to Detroit Mayor Jerome Cavanagh, officially opening Detroit's 1964 baseball season.

'Splash' Show Starts Thurs.

HALF THE PICTURE -- The rest can be seen by attending the Green-Splash Watershow, "Wide Wet World," Thursday through Sunday at the Women's IM pool. Tickets for the three evening and Sunday afternoon performances are now on sale at the Union Ticket office.

LBj Throws Opening Ball

WASHINGTON, 4—President Johnson got his baptism Monday as an opening day pitcher.

Under sodden skies, the President followed a half-century old tradition and made the ceremonial first pitch that each year opens the American League baseball season.

Johnson's first toss was a short pop fly into the massed players of Los Angeles and Washington. It fell to the ground and Angels' Coach Salty Parker dove in beneath the pileup and outwrestled Senator pitcher Dave Sterhouse for the ball.

The President made another heave a few seconds later for the benefit of photographers. This time it sailed far over the mass of players and Senator pitcher Bernie Daniels caught it on the fly.

President William Howard Taft was the first chief executive to throw out the first ball of the season, and that was in 1910.

CASA NOVA #2

Gauguin And Friends On Display At Kresge

Cezanne, Gauguin, Pissarro, Renoir and Toulouse-Lautrec are among the famous artists whose works are shown in "The Turn of the Century," an exhibit of paintings and prints by artists of the late 19th and early 20th centuries, which opens today at Kresge Art Center.

The works are on loan from several museums throughout the country and will be exhibited through May 4.

A guide, the first to appear this gallery season, has been prepared for the exhibit. The guide explains the various artistic styles represented and gives the medium the artist used and the date of each work.

Paul Love, professor and director of the gallery, prepared the text and Charles Pollock, associate professor, designed the layout.

Two highlights of works representing realism are "After the Bath," a drawing by Degas loaned by the Detroit Institute of Arts, and "L'Estampe Original," a color lithograph by Toulouse-Lautrec from the Rosenwald Collection of the National Gallery.

Three oil paintings, Renoir's "Seated Nude," Signac's "Quay at Clichy," and Pissarro's "Woman Washing Her Feet in a Brook" are examples of impressionism.

Pechstein's "Portrait of the Artist with his Wife" and a series of German prints reveal the emotional character of expressionism. "Incidents in the Peasant War" by Kollwitz vividly depicts the emotions of war.

Kandinsky's oil, "Painting with a White Shape," is in the non-objective style of art in which there is no image representing any object familiar to the viewer.

A rare engraving done in Germany in 1501 by Albrecht Durer is on display among the recent acquisitions. Titled "Nemesis" or "The Great Fortune," it shows the buxom female figure well-liked in that era. It is the gift of John F. Wolfram of Lansing.

Other recent acquisitions on exhibit are engravings by William Hogarth, a British satirist, depicting elections in 18th century Britain. They were purchased through the help of the MSU Development Fund.

A bounty of bargains for every member of the family, plus values for the home.

EAST LANSING BIRTHDAY SALE

Area UN Blasts Apartheid Policy

The UN Great Lakes Regional Conference closed here Sunday afternoon after a general assembly session that condemned the apartheid policy of the Republic of South Africa.

In the final minutes of the assembly a resolution to admit the People's Republic of China fell one vote short of required two-thirds majority.

Earlier in the final assembly, the Somali delegation presented a resolution that Israel be allowed to complete construction of pipeline diverting the Jordan River waters to the Negev Desert. The resolution specified that

the UN should check the amount of water diverted and make troops available in event of an Arab attack. It was adopted.

The conference, attended by about 300 delegates from 17 colleges and universities, cheered a Brazilian resolution congratulating the chairman and presiding officers and to the campus UN for its hospitality.

Henning Kreke, Cologne, Germany, junior, presided over the general assembly. He was assisted by John Wingate, Warren senior, first vice president, and Abraham Adedire, Nigeria graduate student, secretary general.
